| 6 | 1, 3, 5, 7, 9, 11 |

## SERIES "CC" (COMMERCIAL VERSION OF SERIES "C")

All specifications and features remain essentially the same as in the Series "C" switch. Electrical specifications are:

1. Initial contact resistance—.015Ω max.
2. Current breaking capacities
   1/8 amp—115 V.A.C. resistive
   1/8 amp— 28 V.D.C. resistive
   1/8 amp— 28 V.D.C. inductive
3. Dielectric strength (voltage breakdown)—
   a. between any two adjacent positions—500V (60 cycles)
   b. between any active position to ground 1000V (60 cycles)

Materials and tooling are modified to reduce cost. Priced at the same level as open frame or wafer switches. Off-the-shelf delivery. For ordering information see below, but indicate CC. (For example: 11-CCM-2).

### ELECTRICAL FEATURES

1. Initial contact resistance — .010Ω max.
2. Current carrying capacity — 5.5 amps.
3. Current breaking capacities
   ¼ amp — 115 V.A.C. resistive
   ¼ amp — 28 V.D.C. resistive
   ⅛ amp — 28 V.D.C. inductive.
4. Dielectric strength (voltage breakdown) —
   a. between any two adjacent positions — 800 v RMs (60 cycles).
   b. between any active position to ground 1500 V (60 cycles).
5. Insulation resistance (measured at 25°C, 50% RH at sea level) — $10^5$ megohms.
6. Thermal EMF — 1 microvolt/°C maximum.
7. Capacitance — between adjacent active contacts .5 PFD Max.
8. Capacitance — between contact and common terminal .9 PFD Max.

### MECHANICAL FEATURES

1. Life expectancy — in excess of 50,000 mechanical operations.
2. Detent — stainless steel roller-type detent snaps from position to position. Detent housing made of special high-strength plastic, providing positive action and minimal wear.
3. Stop strength — Designed to withstand 10 pounds-inches of torque.
4. "Molded in" terminals give exceptional terminal strength, completely eliminating movement.
5. Terminal locations clearly marked on rear cover plate.
6. On any one deck of a multi-pole switch, a variety of combinations of shorting (MBB) and non-shorting (BBM) actions may be obtained.
7. Materials and finishes:
   Rotor — Lexan
   Rotor blade — Beryllium copper (silver plated)
   Contacts & solder terminals — solid silver alloy
   Housing — Diallyl Phthalate
   Stator — Diallyl Phthalate
   Shaft — stainless steel
8. One piece contact terminal construction has holes large enough to accept two #22 AWG wires.
9. Shaft and panel seal at additional cost may be specified by using prefix "S" before switch type numbers. Bushing and shaft stick-out from mounting surface is reduced by 1/16". Overall length of switch from mounting surface is increased by 1/16".
10. Explosion proof per paragraph 4, p. 12 of MIL-S-3786.

**ENGINEERING NOTE**
**Series "A" available with above specifications but with "wrap-around" turret-type solder lugs. "Across-terminal" dimension is .820 (±.002).**

### ADJUSTABLE STOP VERSIONS AVAILABLE
### (To specify add "J" to below ordering information)

| 2 | 16-CB-2 |

### MULTI-DECK SWITCHES UP TO 12 DECKS AVAILABLE

For multi-deck version of these switches, indicate number of decks as follows. Merely change first number of coding as shown:

| Number of decks | |
|---|---|
| One deck | 1 1-CB-4 |
| Two decks | 2 1-CB-4 |
| Three decks | 3 1-CB-4 |

"M" = Shorting action (MBB)
"B" = Non-shorting action (BBM)
Supplied unless otherwise specified.

**Code: 2 6—C-M—2**

- 2 — Number of decks
- 6 — Poles per deck
- C — Series
- M — Shorting (B indicates non-shorting)
- 2 — Positions per pole

e.g. this is 2 decks, 6 poles per deck, Series "C" shorting action, 2 positions per pole.

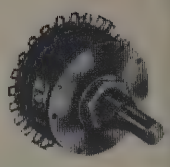
# RCL Electronics

## *miniature rotary switches*

## (LOW COST COMMERCIAL VERSIONS)



Completely automated facilities and mass production tooling, now makes RCL highly competitive in commercial applications with "obsolete" wafer-type and open frame switches.

Material and tooling are modified to reduce cost, but comparable performance is maintained with our "standard" series of switches, to correspond with "instrument type" switches.

### MODIFICATIONS OF ELECTRICAL FEATURES

**COMMERCIAL TYPE "CC," "DC," "HC," "FC," "RC"**

- Initial Contact Resistance: .015Ω max.
- Current Breaking Capacities:
  1/8 amp — 115 VAC resistive
  1/8 amp — 28 VDC resistive
  1/8 amp — 28 VDC inductive
- Dielectric Strength (Voltage Breakdown):
  a. Between any two adjacent positions — 500V (60 cycles)
  b. Between any active position to ground — 1000V (60 cycles)

**COMMERCIAL TYPES "EC," "TC"**

- Current Carrying Capacity: 6 amps
- Current Breaking Capacity (Rated Load at 125°C)
  1 amp — 115 VAC resistive
  3/4 amp — 28 VDC resistive
  1/4 amp — 28 VDC inductive

### SPECIAL MODIFICATIONS AVAILABLE

All commercial version RCL switches are available with the following features at additional cost:

- Spring return feature (Series CC and DC only)
- "Push-to-turn" and "pull-to-turn" spring loaded action where an isolated position is required (Series CC, DC)
- Non-standard shaft and bushing lengths
- Specially coded outputs, including decimal to binary for digital applications
- 1/4" diameter shaft and 3/8"-32 threaded bushing (Series CC, DC, HC, AC only)

| RCL STANDARD SERIES | RCL SERIES | BODY DIAM. | MAX. POS. PER DECK | MAX. POLES PER DECK | MAX. NO. OF DECKS |
|---|---|---|---|---|---|
| C | CC | .610 | 12 | 5 | 12 |
| D | DD | .610 | 10 | 2 | 12 |
| H | HC | .610 | 6 | 3 | 12 |

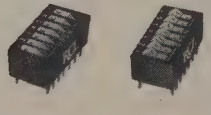
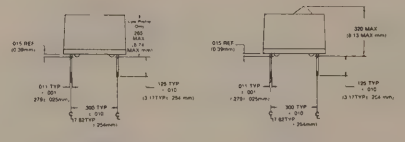
| R<br>RPC | RC<br>RCPC | .586 | 12 | 4 | 1 |
| FJ | FCJ | .524 | 10 | 3 | 1 |
| RJ | RCJ | .586 | 12 | 4 | 1 |
|  | K | 1.260 | 12 | 2 | 8 |

# RCL "PIP"/DIP SWITCH

### "PROGRAMMABLE IN-LINE PACKAGE" SWITCH



LOW PROFILE VERSION — STANDARD VERSION



LOW PROFILE VERSION — STANDARD VERSION

- Positive detent action
- Low and uniform contact resistance
- Snap-on transparent plastic shield available
- True wiping action
- Delivery from stock
- Withstands ultrasonic cleaning
- Long life expectancy (3000 operations per rocker minimum)
- Rocker marking available for positive position identification
- Competitively priced

### GENERAL FEATURES

**EASE OF OPERATION:** Programs easily modified by manually changing position of rocker arms.

**ECONOMICAL:** Board mounted switches permit updating circuits without costly wiring changes.

**DEPENDABILITY:** Complete insulation of contact surfaces from unwanted surrounding risks.

**SIZE AVAILABILITY:** From 2 through 10 positions.

**INTEGRATED TERMINALS:** Terminals are molded into the basic switch structure, offering the ultimate in contact protection.

**LOW PROFILE RECESSED ROCKER VERSION**

- Low Profile above PC Board .265
- Provides total security once the switches are set
- Recessed Rocker prevents accidental actuation of positions
- Can be easily sealed prior to board immersion
- Red marker available for positive position identification

**SMALL SIZE:** Overall height will not exceed .320". Utilizes least possible P.C. board space.

**WIPING BALL CONTACT:** Spring loaded contacts prevent possible "opens" during normal operation, including shock and vibration. Important in logic applications.

**PLASTIC DUST COVER:** Available as an optional feature. Permits switch to remain in position during cleaning or soldering operations with minimum resultant contamination. Aids in prevention of accidental actuation of switch during regular day to day operations.

### ELECTRICAL SPECIFICATIONS

SPST Switching: Make before break

Current Voltage Ratings:

| Non-Switching | Switching |
|---|---|
| 50 VDC @ 100 mA | 5 VDC @ 100 mA (Typ.)<br>24 VDC @ 25 mA (Max.) |

Contact Resistance:
100 Milliohms (Max.) after life, measured at 100 Milliamps and 5 VDC (Typ.)

Insulation Resistance (at 100 VDC):
Between adjacent open or closed switches —
$1 \times 10^{11}$ ohm (initial)
$1 \times 10^{9}$ after environmental tests

Dielectric Breakdown Voltage: Between adjacent open or closed switches — 500 VDC (Min.)

Circuit Capacitance (between adjacent switches): 5 pfd

### MECHANICAL SPECIFICATIONS:

Operating Temperature: −40°F thru +195°F

Shock: 20g level — 11 milliseconds

Vibration: Discontinuity shall not exceed 10 microseconds when tested in accordance with MIL-STD-202D, Method 204, Condition C.

Life Expectancy: 3000 operations per rocker (minimum).

### ORDERING INFORMATION

| RCL PART NUMBER | NO. OF ROCKERS | LENGTH INCHES | LENGTH MM |

# *miniature rotary switches*

**AVAILABLE WITH CONCENTRIC SHAFT**

## SERIES "E" 1⅜" BODY DIAMETER

- Up to 24 active positions per deck, **shorting or non-shorting**, and up to 12 poles per deck
- Meets all applicable requirements of Mil S-3786
- Available with concentric shaft
- Available with adjustable stops

| Poles | Pole (Common) Location At Term. # |
|---|---|
| 1 | 1 |
| 2 | 1, 13 |

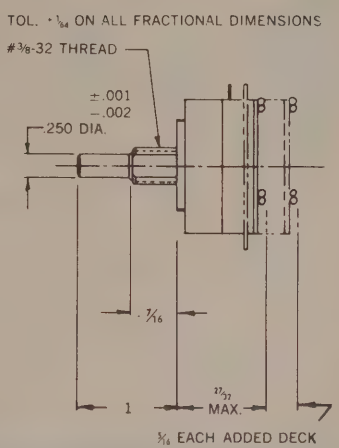
FRONT VIEW



1/16 EACH ADDED DECK

## SERIES "EC" (LOW COST COMMERCIAL VERSION OF SERIES "E")

All specifications and features remain essentially the same as in the Series "E" switch. Materials and tooling are modified to reduce cost. Electrical specifications are derated by approximately 40%.

Priced at the same level as open frame or wafer switches. For ordering information see below but indicate EC. (For example: 11-ECM-2)

### ELECTRICAL FEATURES

**SERIES E**

- Contact Resistance: .010 ohms max. initial
- Current Carrying Capacity: 10 amps
- Current Breaking Capacity:
  2 amp — 115 VAC Resistive
  1 amp — 28 VDC Resistive
  .5 amp — 28 VDC Inductive

**SERIES EC**

- Current Carrying Capacity: 6 amps
- Current Breaking Capacity:
  1 amp — 115 VAC Resistive
  ¾ amp — 28 VDC Resistive
  ¼ amp — 28 VDC Inductive

### MECHANICAL FEATURES

- Life Expectancy: In excess of 50,000 mechanical operations
- Rotational Torque: 20 to 80 ounce-inches depending on number of poles per deck and number of decks.
- Stop Strength: 15 pound-inches.
- Solder terminals will accept two .032 diam. (AWG #20) wires.
- "Molded-in" terminals result in exceptionally high contact stability, completely eliminating movement.
- Shaft and Panel Seals at additional cost may be specified by using Prefix "S" before Switch Type Numbers. This reduces bushing and shaft stick-out from mounting surface by 1/16". Overall lengths of switch from mounting surface is increased by 1/16".
- Explosion Proof per paragraph 4.8.12 of MIL-S-3786.
- Weight: 1 Deck Switch 1.75 oz. For each additional deck add .500 oz.

ALSO AVAILABLE IN 12 POSITION VERSION AS SERIES "T"
AND IN 12 POSITION COMMERCIAL VERSION AS SERIES "TC"

**ALTHOUGH ONLY 1 DECK IS SHOWN FOR ILLUSTRATIVE PURPOSES, UP TO 20 DECKS ARE AVAILABLE.**

FOR ADDITIONAL AMF SWITCH PRODUCTS REFER TO UID DIVISION SECTION 5100

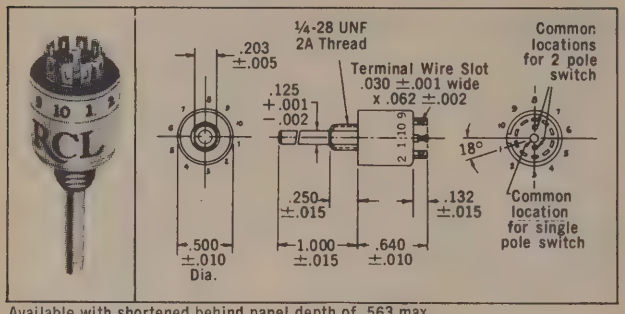
# RCL Electronics
# *miniature rotary switches*

**OFF-THE-SHELF DELIVERY**

**MILITARY QUALIFIED TO MIL-S-3786/20 AND LISTED ON QPL**

## RCL SERIES "F" 10-POSITION SWITCHES



Available with shortened behind panel depth of .563 max. (Instead of .640 ± .010, specify Series "FF".)

**NOW AVAILABLE**

**SERIES "G" 6-POSITION SWITCHES**

Specifications are the same as RCL's "F" series, but with 60° throw and non-shorting only. Up to 1 pole-6 position, or 2 pole-3 position.

Available with standard solder lugs or printed circuit terminals.

### ½" DIAMETER

This subminiature rotary switch has been designed to offer the features of larger switches in a fraction of the space formerly required.

### SPECIFICATIONS FOR BOTH "F" AND "R" SERIES

**Contact Resistance:** 10 milliohms maximum initial.

**Insulation Resistance:** 50,000 megohms initial; 10,000 megohms min. between mutually insulated parts.

**Voltage Breakdown:** 600 VAC min. between mutually insulated parts.

**Electrical Rating:** Will make and break 50 milliamperes: 115 VAC for 25,000 cycles or 200 milliamperes 115 VAC for 10,000 cycles.

**Contacts:** Shorting or non-shorting contacts.

**Deck and Terminal Arrangement:** Available only in one deck with terminals projecting from rear of switch.

**Shaft Length, Flat and Orientation:** Available in accordance with individual requirements.

**Materials and Finishes:** In accordance with applicable MIL specs.

**Contact Terminals:** Solid silver alloy gold plated. Will accept Two #22 AWG wires.

**Common:** Terminal brass gold plated.

**Wipers:** Solid silver alloy.

**Environmental requirements:** Meets or exceeds MIL-S-3786. Explosion proof per paragraph 4.8.12 of MIL-S-3786.

The RCL HOMING SWITCH produces circuitry connecting all of the terminals to a special common except the terminal in the pre-selected switch position. The terminal with pre-selected switch position makes to its common, and is isolated from the homing common.

MULTI-POLE SWITCHES . . . EACH POLE OFFERS NORMAL SEQUENTIAL SWITCHING.

SWITCH POSITIONS ARE ALL SHORTED EXCEPT ONE (Electrically isolated circuits on the poles). Non-isolated terminals are internally tied together and have an external grounding terminal.

APPLICATION NOTES:

(A) Multi-channel systems operating in the high frequency range, often produce "feedback" resulting in garbled reception or transmission. Until the development and perfection of the homing feature, it was necessary to utilize a more expensive squelch circuit. This squelching can now be accomplished WITHOUT THE NECESSITY OF UTILIZING EXTERNAL CIRCUIT ELEMENTS.

(B) Cross-talk between frequency channels is also eliminated as a result of this homing feature.

## SPECIFICATIONS:

(Same as "F" switch on facing page with following modifications)

**Electrical Rating:** Will make and break 100 milliamperes @ 28 VDC for 10,000 cycles.

**Poles:** Only shorting available.

**Common Terminal:** Brass, silver and gold plated.

All positions except the position in use are tied together.

All positions except the position in use are grounded functioning contacts allowing for this unique circuitry.

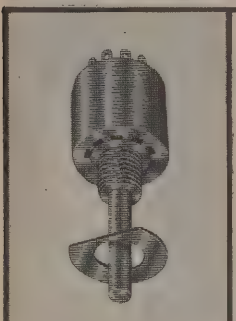
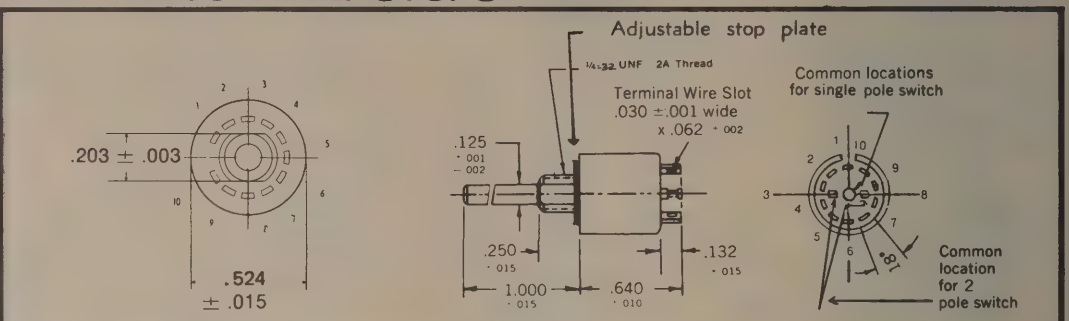
# commercial sub-miniature rotary switches

## RCL SERIES "FCJ" COMPLETELY ENCLOSED SWITCHES WITH ADJUSTABLE STOPS





A subminiature rotary switch with adjustable stops . . . permits the user to vary the number of positions!

**FEATURES**

- **From 2 to 10 positions available merely by moving external plate!**
- **Shorting or non-shorting action available.**
- **As many as 3 poles possible on one deck!**
- **Instant switching to any desired number of positions.**
- **Available with P.C. terminals. To order use Suffix P.C.**
- **Permits stocking of a minimum number of switch types.**
- **Ideal for breadboard setups and prototype work — where rapid circuit modification may be desired.**

This switch is furnished with one internal fixed stop and one external adjustable stop plate. This permits adjustment of the number of positions.

Adjustments are made merely by rotating the external adjustable plate until its integral stop tab passes through the proper hole in the switch front plate.

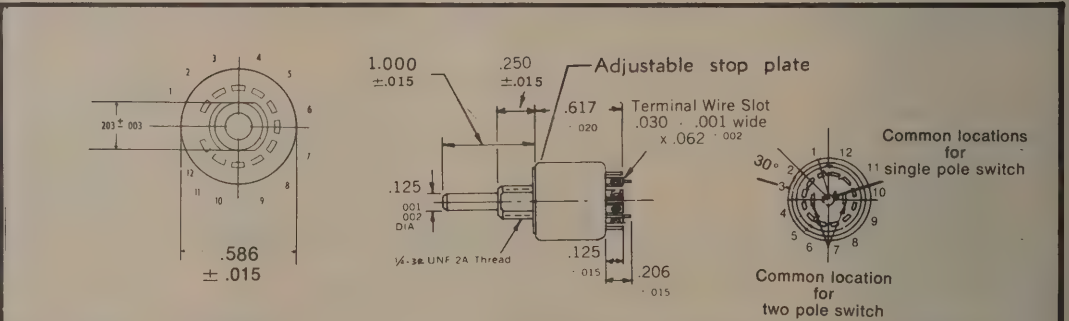
**36° SHORTING**

| Type No. | Single Deck Number of Poles Per Deck | Maximum Number of Positions Per Pole |
|---|---|---|
| 11-FCM-10-J | 1 pole per deck | 2 through 10 |
| 12-FCM-5-J | 2 poles per deck | 2 through 5 |
| 13-FCM-3-J | 3 poles per deck | 2 or 3 |

**36° NON-SHORTING**

| Type No. | Single Deck Number of Poles Per Deck | Maximum Number of Positions Per Pole |
|---|---|---|
| 11-FCB-10-J | 1 pole per deck | 2 through 10 |
| 12-FCB-5-J | 2 poles per deck | 2 through 5 |
| 13-FCB-3-J | 3 poles per deck | 2 or 3 |

## RCL SERIES "RCJ" COMPLETELY ENCLOSED SWITCHES WITH ADJUSTABLE STOPS



A subminiature rotary switch with adjustable stops . . . permits the user to vary the number of positions!

**FEATURES**

- **From 2 to 12 positions available merely by moving external plate!**
- **Shorting or non-shorting action available.**
- **As many as 4 poles possible on one deck!**
- **Instant switching to any desired number of positions.**
- **Available with P.C. terminals. To order use Suffix P.C.**
- **Permits stocking of a minimum number of switch types.**
- **Ideal for breadboard setups and prototype work — where rapid circuit modification may be desired.**

This switch is furnished with one internal fixed stop and one external adjustable stop plate. This permits adjustment of the number of positions.

Adjustments are made merely by rotating the external adjustable plate until its integral stop tab passes through the proper hole in the switch front plate.

**30° SHORTING**

| Type No. | Single Deck Number of Poles Per Deck | Maximum Number of Positions Per Pole |
|---|---|---|
| 11-RCM-12-J | 1 pole per deck | 2 through 12 |
| 12-RCM-6-J | 2 poles per deck | 2 through 6 |
| 13-RCM-4-J | 3 poles per deck | 2 through 4 |
| 14-RCM-3-J | 4 poles per deck | 2 or 3 |

**30° NON-SHORTING**

| Type No. | Single Deck Number of Poles Per Deck | Maximum Number of Positions Per Pole |
|---|---|---|
| 11-RCB-12-J | 1 pole per deck | 2 through 12 |
| 12-RCB-6-J | 2 poles per deck | 2 through 6 |
| 13-RCB-4-J | 3 poles per deck | 2 through 4 |
| 14-RCB-3-J | 4 poles per deck | 2 or 3 |

# keylock switches

## SERIES CC, DC, HC, FC, RC

Provides maximum security by permitting operation only by authorized personnel.

Adaptable to most RCL commercial style miniature rotary switches (6 to 12 positions).

Specifications: 8 tumblers . . . ⅞" diameter . . . Double bitted lock. Operation by double sided flat key . . . 2 provided. Secured by nut at rear of panel to prevent unauthorized loosening or dismounting.

TERMINAL NUMBERS

| RCL SERIES | TOTAL # OF POSITIONS AVAILABLE | A | KEY INSERTION AND WITHDRAWAL POSITIONS B | C | D | ANGLE OF THROW | CONFIGURATIONS |

## ORDERING INFORMATION

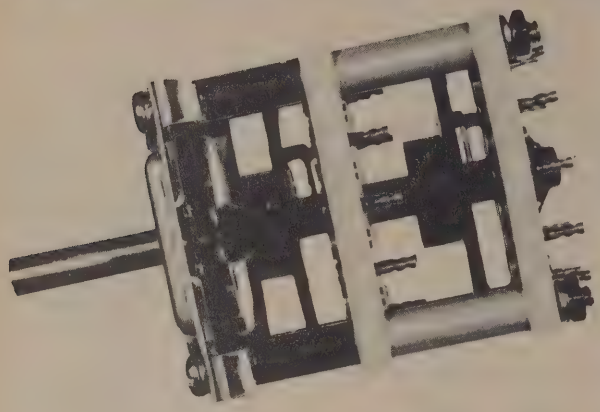
To order Keylock Modification, use prefix -001

**EXAMPLE:**

To order CC Type Switch (Commercial Version) 2001-11-CCM-2
(2 position, single pole, single deck with keylock)
(4001 would indicate 4 position Key Withdrawal — available only in 12 position switch)

**Refer to RCL miniature Rotary Switch Catalog for complete ordering information on all series of switches.**

# Shallco ROTARY SWITCHES SERIES C



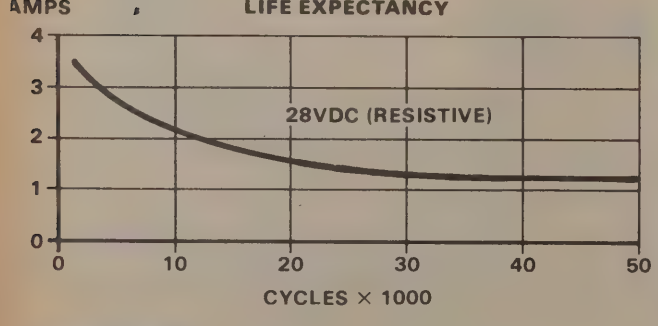
## SPECIFICATIONS

### GENERAL:
Meets or surpasses requirements of MIL-S-3786

### ELECTRICAL:
Current carrying capacity—10 amps.
Current switching capacity—up to 2 amps.
Contact resistance—Initial—.005 ohms max.
Contact resistance—After Life—.010 ohms max.
Insulation resistance—50,000 megohms
Dielectric withstanding voltage—1500V RMS
Dielectric withstanding voltage after life—1000V RMS

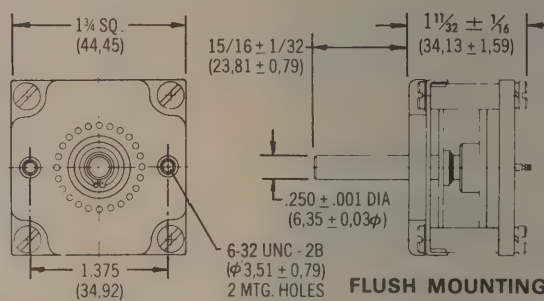
### MECHANICAL:
Rotational life—50,000 cycles* min.@.250 amps.@85°C
Stop torque—50 In. Lbs.
Type construction—Open frame
Adjustable stops—To any desired position.
Optional features—⅜-32 UNEF-2A bushing mount with anti-rotation tab. Shaft and front panel "O" ring seals.
Progressive shorting based on either 20 or 24 equally spaced contacts.

*One cycle = one full cw plus one full ccw rotation.



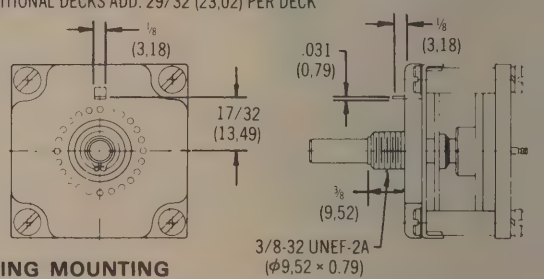
## FEATURES OF SHALLCO 1-3/4" (44,45) SQUARE SERIES C SINGLE OR MULTIDECK SWITCH

- Meets or surpasses requirements of MIL-S-3786
- Available in one pole 2-32 position through four pole 2-7 position
- High current carrying capacity
- Low contact resistance



FLUSH MOUNTING

FOR ADDITIONAL DECKS ADD. 29/32 (23,02) PER DECK



BUSHING MOUNTING

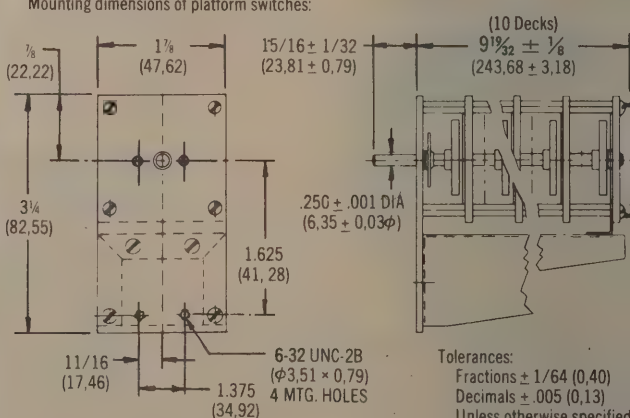
Standard switches above 5 decks are provided with 4 rear support spacers tapped 6-32 UNC-2B (φ3,51 × 0,79) × ¼ (6,35) deep min. Add 21/64 (8,33) to total length when rear support spacers are supplied.

Unless otherwise specified, platforms are supplied for:

1 & 2 pole switches, 10 decks and up.

3 & 4 pole switches, 9 decks and up.

Mounting dimensions of platform switches:



Tolerances:
Fractions ± 1/64 (0,40)
Decimals ± .005 (0,13)
Unless otherwise specified

FOR ADDITIONAL DECKS ADD 29/32 (23.02) PER DECK

NUMBERS IN ( ) ARE METRIC EQUIVALENT (MILLIMETERS)

DAVEN DESIGNED

# Get your chief engineers off your back. Your cost accountants, too.

Shigoto controls *every* step of design, production, testing and delivery of *every* component we sell. Our consistent standards and tolerances will keep engineers happy. And it lets us hold down costs. Accountants will love that.

Shigoto has even more ways to keep *you* happy.

We make so many components, sub-assemblies, assemblies and systems, you can make us your single source.

We'll help you design and produce adaptations and modifications at a fraction of the cost you'd pay elsewhere. Or make entirely new systems to your precise specs.

And we get it there where and when you need it.

Trust Shigoto. Our components are already in the things you rely on. Like your phone. Call us today.

**Shigoto. The solution.**

# STACKPOLE

## ROTARY SWITCHES

Stackpole rotary switches combine the high reliability of fully enclosed, modular construction with economy and a wide range of off-the-shelf options. Three separate series provide sizes and configurations to meet any application need. For complete specifications of standard rotary switches, request Bulletin 73-108.

### ADVANTAGES

All series feature totally enclosed designs, seal out dirt, moisture and corrosion, seal in lubrication. Rugged, torsionally rigid assemblies withstand rough usage. Series 100 conforms to MIL-S-3786 for shock, vibration and explosion-proofing.

Series 80 has 13/16" x 9/16" body with in-line pins, ideal for either PC board insertion or hand solder applications.

### DELIVERY

Fastest in the industry. Within two weeks for standard configurations, within three weeks on specials (samples in 2-3 days). Request Bulletin 73-108 for information and method of specifying custom-design switches.

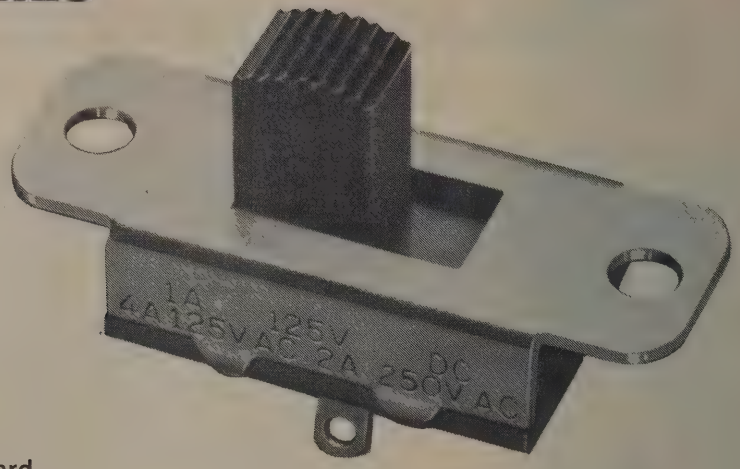
# BASIC SINGLE-POLE SWITCHES



## TWO POSITION OR MULTI-POSITION ON-OFF OR MULTI-SPEED

Universally acclaimed as the standard of the industry, these Stackpole switches are the most rugged, most dependable and long-lived switches for power control — at any price. An example of the design-proven features is the movable contact (a heavy slug of silver-plated copper alloy, coil spring-loaded to assure positive contacting) which eliminates distortion through light and heavy loads. It has been the obvious choice for thousands of applications and proven through the hundreds of millions of Stackpole switches in customer use today.

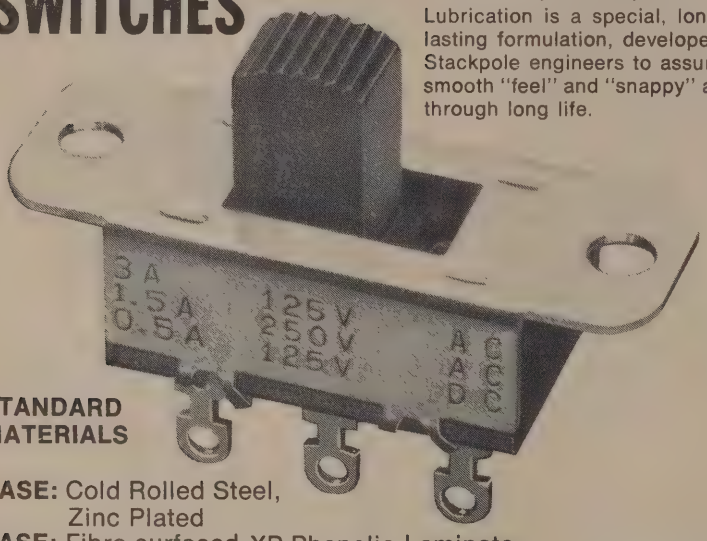
# BASIC DOUBLE-POLE SWITCHES

## SIMPLE TWO-CIRCUIT SWITCHING

These famed Stackpole switches are mass produced with many unique design features. The terminals are firmly anchored in the base by a swaging process which assures that they will not loosen or shift, even after rugged use. Terminals are silver-plated copper alloy, heavier than that found in any similar product.

Lubrication is a special, long-lasting formulation, developed by Stackpole engineers to assure a smooth "feel" and "snappy" action through long life.



**STANDARD MATERIALS**

**CASE:** Cold Rolled Steel, Zinc Plated
**BASE:** Fibre surfaced XP Phenolic Laminate
**ACTUATOR:** Phenolic or Nylon, Black
**TERMINALS:** Copper Alloy, Silver Plated
**SLIDING CONTACT:** Silver Clad Phos. Bronze (Except S-5224XD11-U)

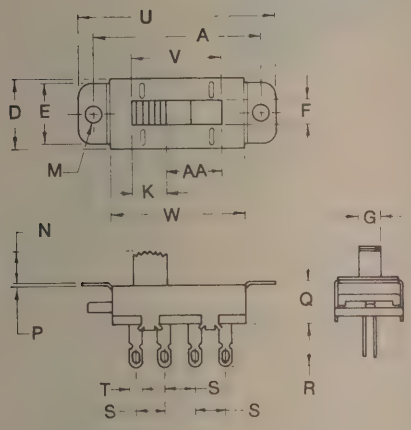
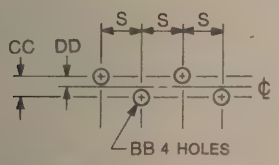
## SERIES S-91
## SINGLE-POLE, THREE-POSITION MINIATURE

Ideal for applications such as "OFF-LOW-HIGH", "LOW-MED-HIGH". Maintained detent. Available to 3 amps.



### P.C BOARD LAYOUT



| 125 VAC UL & CSA RATING | PART NO. |

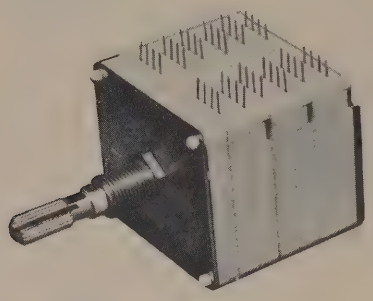
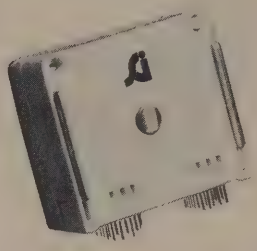
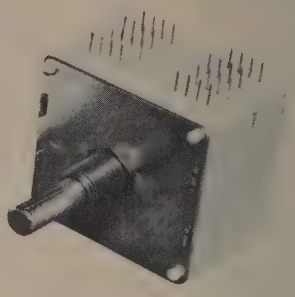
• Fully programmable up to 60 detent positions





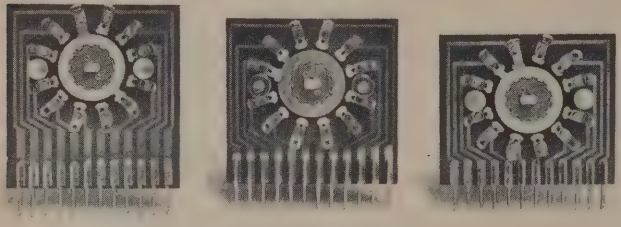


ELECTRICAL RATINGS

| | |
|---|---|
| Current Carrying Capacity | .25 amp @ 115 VAC |
| Resistive Load | .125 amp @ 115 AC |
| Contact Resistance | initial 0.10 ohm maximum |
| Insulation Resistance | 100 megohms |
| Dielectric Strength | 500 VAC minimum |
| Contact Life | 25K cycles of 720° (50K cycles of 360°) |

| | |
|---|---|
| Operating Force | 14 to 24 inch oz. standard |
| Temperature Ranges | -55°C to +85°C |
| Insulation | Molded Valox 310 |
| Programmable Disc Contacts | Plated Copper clad laminate Plated spring tempered material |
| Front Plate and Shaft | Cold rolled steel cadmium plated |
| Bushing | Brass, aluminum or die cast zinc |

## NEW SM-PCB ROTARY SWITCHES



• Three profile heights .625", .742", .875"

Current and Voltage Ratings: Resistive Load.
Brass silver plated, make and break:

| | |
|---|---|
| .550 amp at 28 VDC | .170 amp at 115 VAC RMS |
| 135 amp at 100 VDC | .8 amp at 24 VAC RMS |

Coin silver alloy, make and break:

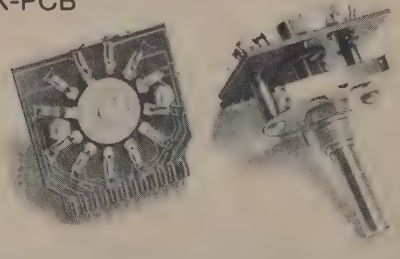
| | |
|---|---|
| 1.10 amp at 28 VDC | .335 amp at 115 VAC RMS |
| .27 amp at 100 VDC | 1.6 amp at 24 VAC RMS |

Current Carrying Capacity:
Brass silver plated - 2 amp Coin silver alloy - 2 amp

Dielectric Stength: 750 VAC between critical parts and ground.

Contact Resistance: (Path resistance not included).
Silver plated parts - average initial 5 milliohms.
Coin silver alloy parts - average initial 3 milliohms.

## SK-PCB



• Available in standard .875" profile height

Current and Voltage Ratings: Resistive Load.
Brass silver plated, make and break:

| | |
|---|---|
| 1.5 amp at 28 VDC | .230 amp at 115 VAC RMS |
| .22 amp at 100 VDC | 1.75 amp at 24 VAC RMS |

Coin silver alloy, make and break:

| | |
|---|---|
| .34 amp at 100 VDC | .450 amp at 115 VAC RMS |

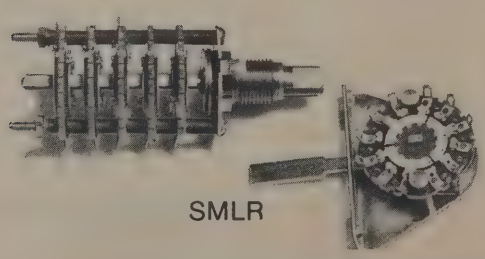
Current Carrying Capacity:
Brass silver plated - 2 amp, Coin silver alloy - 2 amp

Dielectric Strength: 750 VAC between critical parts and ground

Contact Resistance: (Path resistance not included)
Silver plated parts - average initial 3 milliohms.
Coin silver alloy parts - average initial milliohms.

## SUBMINIATURE TYPE ROTARY SWITCHES

• Available 1-6 Poles • 12 position 30° Throw



SMLR

Current and Voltage Ratings: Resistive Load.
Brass, silver plated, make and break:

| | |
|---|---|
| .550 amp at 28 VDC | .170 amp at 115 VAC RMS |
| .135 amp at 100 VDC | .8 amp at 24 VAC RMS |

Coin silver alloy, make and break:

| | |
|---|---|
| 1.100 amp at 28 VDC | .335 amp at 115 VAC RMS |
| .27 amp at 100 VDC | 1.6 amp at 24 VAC RMS |

Current Carrying Capacity:
Brass silver plated - 7 amp. Coin silver alloy - 9 amp

Dielectric Strength: 750 VAC between critical parts and ground.

Contact Resistance: Silver plated parts - average initial 5 milliohms.
Coin silver alloy parts - average initial 3 milliohms.

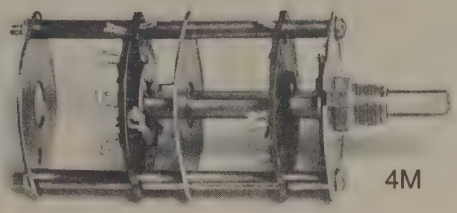
# Rotary Switches

## SK, 4M, 42LR, 7M, 5M ROTARY SWITCHES

SK



4M

42LR

7M

5M

Current and Voltage Ratings: Resistive Load.
Brass, silver plated, make and break:

| | |
|---|---|
| 1.5 amp at 28 VDC | .230 amp at 115 VAC RMS |
| .22 amp at 100 VDC | 1.75 amp at 24 VAC RMS |

Coin silver alloy, make and break:

| | |
|---|---|
| 2.6 amp at 38 VDC | .450 amp at 115 VAC RMS |
| .34 amp at 100 VDC | 3.4 amp at 24 VAC RMS |

Current Carrying Capacity:
Brass silver plated - 9 amp. Coin silver alloy - 12 amp

Dielectric Strength: 1,000 VAC between critical parts and ground.

Contact Resistance: Silver plated parts - average initial 5 milliohms.
Coin silver alloy parts - average initial 3 milliohms.

New Dual Flex Detent™
added to 7M line

- 1 9/16" Detent
- Dual ball starwheel design for long life
- Positive indexing

## PB 400 PUSHBUTTON SWITCHES

Contact Resistance: (Contact + Path): Average initial less than 5 milliohms. Average after 25,000 cycles (no load) is less than 10 milliohms.

Insulation Resistance: Between adjacent terminals, also between terminals and chassis - greater than 7,500 megohms.

Current/Voltage Ratings: Resistive Load a.c. 40 watt/d.c. 15 watt.

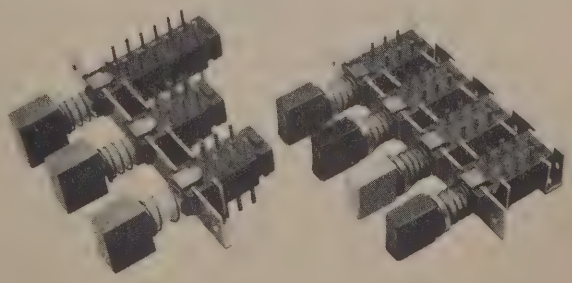
| | |
|---|---|
| 100 ma @ 150 VDC | 175 ma @ 250 VAC |
| 350 ma @ 125 VAC | 1.3 amp @ 28 VAC |

Current Carrying Capacity: 2 amp maximum

Voltage Breakdown: Between all terminals connected together and mounting chassis, also between adjacent terminals—1500 VAC minimum.

Switching Functions: 2, 4, 6 and 8 pole, double-throw, non-shorting.

A/C Switch Availability: A two pole double throw A/C switch, rated at 4A/250V can be included in the switching functions on any available switch chassis.



Standard Grigsby's Engineering Staff will answer any inquiries regarding your switch problems or switch design. Because our switches are custom built, it is necessary for us to know how you wish to combine your options and what circuitry is required. Your own drawings may be submitted or you may use our convenient layout sheets that are available without charge by contacting our Sales Office.

# TAPESWITCH®

## PRESS-AT-ANY-POINT RIBBON AND MAT

# SENSING SWITCHES

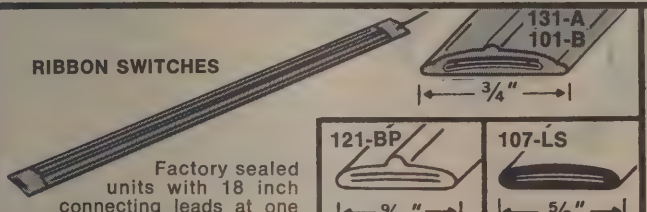
Tapeswitch products are proven in all industries. Patented construction withstands tons of force yet can close on light finger pressure. TAPESWITCHES are unexcelled for—*safety . . . automation . . . antiburglar systems . . . counting . . . timing . . . door control . . . light switching . . . machine control . . . material handling . . . seat switching . . . computer and console switching . . .* plus many other applications. TAPESWITCH RIBBON SWITCHES can be bought in the size and length needed.

**Features:** Inherently sealed. Self bottoming. **Press-at-any-point operation** eliminates linkages. All styles except flex-action switches can be coiled without shorting. Millions of impacts at one point.

**Rating:** All Tapeswitches are rated at more than 1 ampere, 117 VAC. However, for floor switching low voltage is recommended.

TAPESWITCHES are designed in accord with the best principles of switch and cable design, with jacketing and insulation meeting the requirements of MIL-C-9154 and MIL-I-631C respectively. Unique Fail-Safe circuitry is feasible with all Tapeswitches. See our Literature.

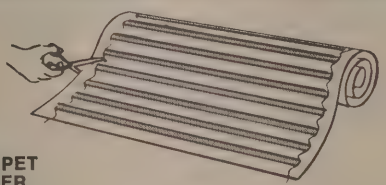
### RIBBON SWITCHES



Factory sealed units with 18 inch connecting leads at one end. Sensitivity: 8, 12, or 40 ounces finger pressure. Standard lengths: 1, 2, 5, 8, 10, 12, 15, 18, 20 ft. Double leads on order. See text at top.

### TAPESWITCH CONTROFLEX® SAFETY EDGES

Serve as cushioned sensing switches for the leading edges of doors, gate arms, machinery, presses, elevators, to stop or reverse the acting force. Numerous styles available. Double leads optional for Tapeswitch true "Fail-Safe" Circuit. Write or call for detailed literature.

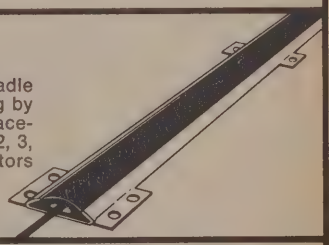


### PE-30 UNDER CARPET SWITCHING RUNNER

30 inches wide x 3½ inches thick 5ft., 25ft., 50ft. roll. Can be cut to any length from roll. For indoor use under carpeting. Excellent under plywood or tile. Parallel Tapeswitches between clear sheeting. Tinned wires for easy connections.

### RBMA ROAD SWITCH

Successful, rugged roadway treadle for counting, timing, controlling by vehicles. 7/16" thick. Sealed, replaceable switch element. Lengths: 2, 3, 5, 8, 10 ft. Cast iron end protectors available.

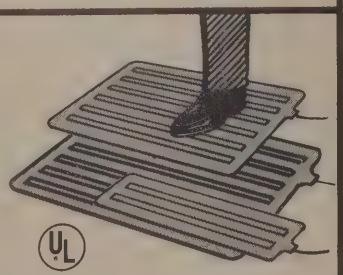


### TAPESWITCH RELAY R-1

FOR AC CONTROL WITH ANY TAPESWITCH. This plug-in unit has AC outlet sockets giving Normally **ON** or Normally **OFF** 117 Volts AC at 5 Amperes. Built-in low voltage transformer. Simultaneous action.

### CVP SWITCHING MATS

CVP style mats are durable flexible area switches for use exposed or under rubber mat or carpeting. UL listed for use in alarms. 3/32" thick. Available 6" x 23", 17" x 23", 23" x 35".



### POINT AND WAFER SWITCHES

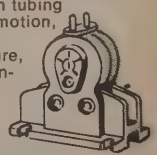
**NO-1 and NO-1R**—Rugged compact wafer switch. Normally Open. For under valuable objects or general purpose detection. 2 lb. nom. sensitivity.

**NC-3**—Normally closed detector switch. Opens when weight is lifted off. 2 lb. nom. sensitivity.

**NO-S**—1 ounce sensitivity wiping action. Super sensitive.

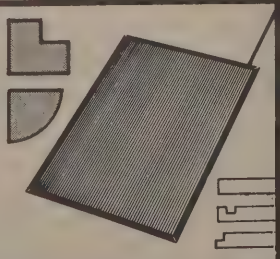
### SENSITIVE AIRWAVE SWITCH MODEL AW

High quality diaphragm switch, adjustable sensitivity. Operates from tubing squeeze, air motion, light vacuum, breath pressure, etc. Silver contacts. Many adjustment features.



### CKP & CRP HEAVY DUTY INDUSTRIAL SWITCH CARPET.

Both styles ½ inch thick with ramped edging. Sealed. Available any size or shape. Weatherproof. Standard sizes: 24" x 36", 30" x 30", 30" x 48", 36" x 48", 36" x 72". Optional features available.



### 111 CONTROFLEX® FOOTSWITCH

Rugged, low-profile sealed vinyl footswitch. Rated at 100 watts. Employs Controflex® in flat pad. Non tiring. Stand or jump on it. 2" x 5" x 3/8" 6 ft. lead wire. SPST N.O.

### 177 CONTROFLEX® HAND FLEX SWITCH

Innovation in hand controls. Rugged, sealed, compact. Hold in Palm and flex with thumb. 177 NO is **Normally Open.** 177 NC-3 is SPDT.

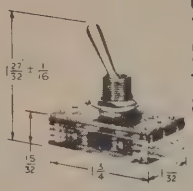
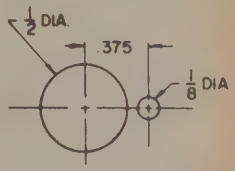
# T-bar SWITCHES for Multipole High Density Switching

## T-Bar Toggle Switches

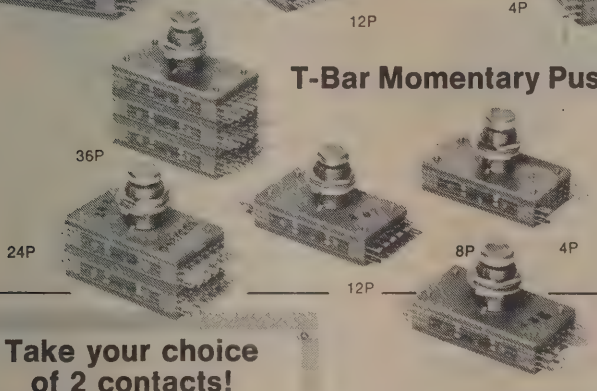
Switch from 4 to 144 circuits with one T-Bar Toggle Switch. Available in configurations of 4, 8, 12, 24, 36, 48, 72, 108 and 144 poles. For low level applications specify the 902 Series.



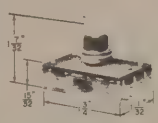


PANEL CUTOUT FOR TOGGLE AND PUSH-BUTTON SWITCHES

## T-Bar Momentary Push-Button Switches

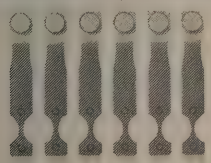


Switch from 4 to 36 circuits with one T-Bar Momentary Push-Button Switch. Available in configurations of 4, 8, 12, 24 and 36 poles.



## Take your choice of 2 contacts!

**800 SERIES**
**for reliable General Purpose Switching**



The 800 Series contact is a highly reliable gold-plated button contact. With its high contact pressure and positive wiping action, it is used in control type applications and in general purpose switching, such as relays, valves, lamps, etc. Contact Rating: up to 5 AMPS max.

**900 SERIES**
**for reliable Low Level Switching**

The 900 Series DATA-RITE™ contact has the reliability of a bifurcated contact with the added feature of two degrees of wiping action. The unique EDGE-TO-DOME contact guarantees a clean surface, which is critical for low level signals. The 900 Series is typically used in computer I/O signals; voice and data-grade communications; thermocouple and strain gauge outputs; all low level switching, whenever reliability is a premium, or whenever slight variations in contact resistance cannot be tolerated. Contact Rating: Microvolts up to 1 AMP max.

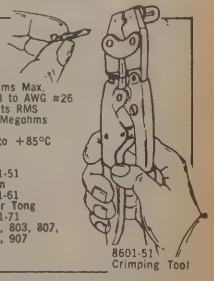
## SWITCH SPECIFICATIONS

| | |
|---|---|
| Contacts: | Series 800—general purpose gold plated<br>Series 900—low-level bifurcated gold plated |
| Contact Rating: | Series 800—5 amps max. resistive to 150 watts<br>Series 900—1 amp maximum resistive to 50 watts |
| Life Expectancy: at 20 CPM | Series 800—50,000 cycles<br>Series 900—50,000 cycles |
| Contact Resistance: | 20 milliohms typical |
| Ambient Temperatures: | —55° to plus 85°C |
| Terminals: | Mate with T-Bar Connectors |
| Dielectric Strength: | 1000 VRMS @ 60 cycles/sec. (higher available) |
| Insulation: | 5000 megohms min. (higher available) |

## T-BAR CONNECTORS

The T-Bar Series 88601 Connector has been specifically designed for use with T-Bar switches and relays. The connector contacts are crimp type which are snapped into a plastic insulator block. After installation, connectors are held in place against shock and vibration by use of a retaining clip.

| | |
|---|---|
| Current Carrying Capacity | 5 Amps |
| Contact Resistance | 5 Milliohms Max. |
| Wire Accommodated | AWG #18 to AWG #26 |
| Dielectric Strength | 1000 Volts RMS |
| Insulation Resistance | 100,000 Megohms Min. |
| Ambient Temperature | —55°C to +85°C |
| Weight | 0.3 Oz. |
| Recommended Tools | Crimper P/N 8601-51<br>Extraction P/N 8601-61<br>Connector Tong P/N 8601-71 |
| Use 88601 With | 801, 802, 803, 807, 901, 902, 907 |



## HOW TO ORDER

**1.** Specify Series **2.** Specify Number of Poles and Contact Form

Don't forget to order the mating T-Bar Series 88601 Connector! One for each 6 poles.

902 — 12 C

| SERIES | Application | No. of Poles | Contact Forms* |
|---|---|---|---|
| T-Bar® TOGGLE SWITCHES | | | |
| 802 | Gen. Purpose | 4 to 144 | "A" or "C" |
| 902 | Low Level | | |
| T-Bar® PUSHBUTTON SWITCHES | | | |
| 803 | Gen. Purpose | 4 to 36 | "A" or "C" |

*Form "A" — normally open contacts. Form "C" — double throw, break-before-make.

Manufactured under 1 or more of the following patents: 3206990, 3226508, 3689856.

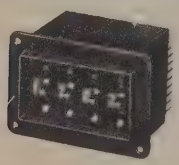
## SWITCHES

### SQUARE ROTARY SWITCHES

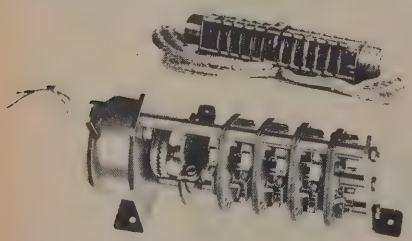
- 13 models available
- 1 5/16" sq. to 8" sq. x 15 decks (max.)
- 1 to 12 poles
- Up to 150 positions/pole
- Fixed stops or continuous rotation
- 3 amps at 120 VAC
  to 15 amps at 120 VAC
- Precious metal contacts

### THUMBWHEEL SWITCHES



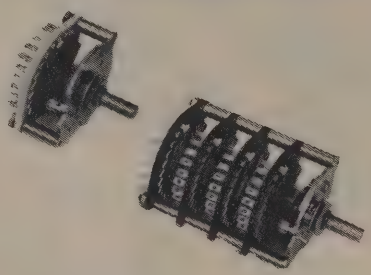
- Modular construction
- Compact
- Wide range of logic codes
- Positive detent
- Simple installation
- Two models available — Panelmite and Thumbmite

### REMOTELY CONTROLLED ROTARY SWITCHES



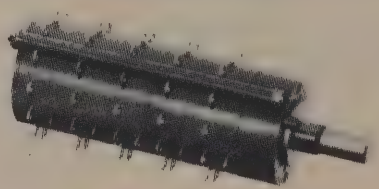
- All Tech Lab Switches can be supplied as stepping switches or continuous motor driven
- Solenoid drives
- Motor and Geneva drives
- Enercon AC incremental motor drive
- Available with interrupters or homing decks
- Completely pre-wired ready to install
- Hermetic sealing available
- May be remotely controlled by: Master-slave arrangement; Computer or other; External pulse
- Either AC or DC operation

### TYPE 2 ROTARY SWITCH

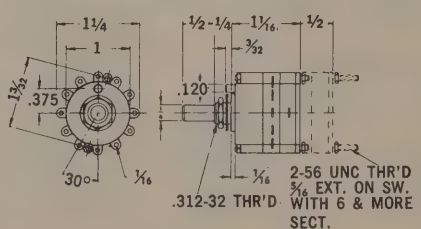


- Four insulation materials available
- 1 to 4 poles/deck
- Up to 24 positions/pole
- 2¼" x 1¾" x 24 decks (max.)
- Adjustable stops
- 5 amps, 120 VAC max.
- Precious metal contacts

### TYPE 3 ROTARY SWITCH



DIMENSIONS

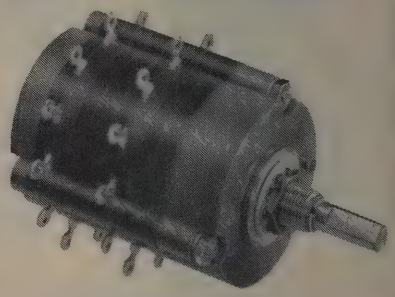


- Enclosed molding in diallyl phthalate
- Molded in terminals
- 1 or 2 poles/deck
- Up to 12 positions/pole
- 1¼" OD up to 8 decks (max.)
- Adjustable stops
- 12 amps, 28 VDC
- Precious metal contacts
- Mixed decks of shorting and non-shorting
- Mixed shorting and non-shorting contacts on each deck
- Choice of either ⅜-32 or 5/16-32 mounting bushing

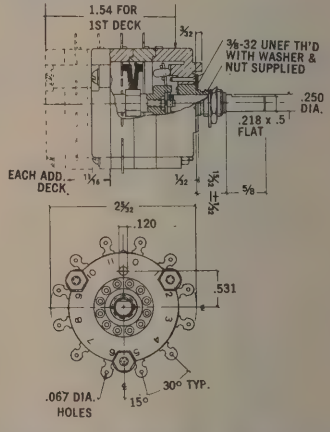
### SPECIALS

**Tech Labs can customize your Switch and Attenuator requirements, completely pre-wire your switches ready for installation. We can also undertake prototype design and manufacturing. Contact our factory for quotations.**

### ROTARY INSTRUMENT SWITCH SERIES 2000



- Extremely low contact resistance — <1 milliohm
- Extremely high insulation resistance — more than one million megohms
- Totally enclosed -- dust tight
- Long life — > one million
- 12 position/1-6 pole/deck max.
- Solid silver contacts
- External adjustable stops
- Shorting (MBB)



### SPECIAL DESIGN VARIATIONS

**SIX AND ELEVEN POSITION DETENTS**
The six position detent is 60° throw, skipping every other contact. The eleven position detent is 30° throw with the eleventh position omitted so that the detent goes 60° from position ten to position zero.

**OFFSET WIPERS**
30° and 180° offset wipers are available for use in special circuits.

**CAPACITANCE**
Less than 1 micromicrofarad between contacts or to ground.

**CURRENT CAPACITY**
5 amps maximum continuous duty.

**THERMAL EMF**
Extremely low. Silver contacts & brushes.

**VOLTAGE BREAKDOWN**
Withstands 1500V RMS between contacts and to ground.

**LOSSES**
Low electrical losses at frequencies up to several megacycles.

# TEC LAB 5 AMP 50 VDC TOGGLE SWITCHES

EQUIVALENT TO TORBAL 5 AMP

Tec Lab switches are available in many **combinations** of bushings, terminals, handles, housings and electrical styles.

The most widely used **combinations**, or **types**, are listed in the table below. These are coded with the outline drawings on this page so you can determine construction details and dimensions of the various parts of the switch.

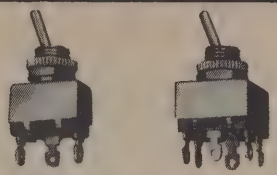
The SP-1, for example, has short bushing, solder terminals, long stem handle, single-pole housing and double-throw electrical style.

| Model Designation | Bushing A | Terminal B | Handle C | Housing D | Elec. E |
|---|---|---|---|---|---|
| SP-1 | 1 | 1 | 1 | 1 | 1 |
| SP-3 | 2 | 1 | 1 | 1 | 1 |
| SP-4 | 1 | 1 | 1 | 1 | 2 |
| SP-5 | 1 | 2 | 1 | 1 | 1 |
| SP-6 | 1 | 1 | 4 | 1 | 1 |
| SP-7 | 1 | 1 | 2 | 1 | 1 |
| SP-10 | 2 | 1 | 3 | 1 | 1 |
| SP-11 | 1 | 1 | 3 | 1 | 1 |
| SP-14 | 2 | 1 | 4 | 1 | 1 |
| DP-1 | 1 | 1 | 1 | 2 | 1 |
| DP-3 | 2 | 1 | 1 | 2 | 1 |
| DP-6 | 1 | 1 | 4 | 2 | 1 |
| DP-7 | 1 | 1 | 2 | 2 | 1 |
| DP-10 | 2 | 1 | 3 | 2 | 1 |
| DP-11 | 1 | 1 | 3 | 2 | 1 |

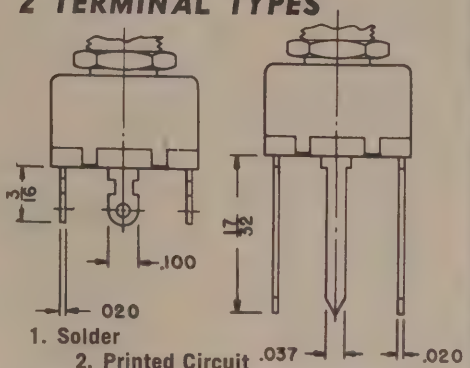
Generally, switch types not listed in this table can be made available. To specify the type desired in your inquiry, list the numerical style desired for each switch feature. Example, to specify switch having the following styles:

| | Block Letter | Style No. |
|---|---|---|
| **Bushing, long** | **A** | **2** |
| **Terminal, printed circuit** | **B** | **2** |
| **Handle, ball end, long** | **C** | **4** |
| **Housing, single-pole** | **D** | **1** |
| **Electrical, double-throw** | **E** | **1** |

**Specify A2 — B2 — C4 — D1 — E1**



## 2 TERMINAL TYPES



1. Solder
2. Printed Circuit

## APPLICABLE MIL SPEC

MIL-S-3950 MS-75028 MS-75029

## MATERIAL SPEC

- **Base**
  Rogers RX-600
  Phenolic Glass Fiber
- **Housing and Mounting Bushing**
  One-piece casting of Duronze III — corrosion proof
  Conforms to QQ-M-151 & AN-QQ-S-91
- **Contacts**
  Fine silver-gold plated

## OPERATING CHARACTERISTICS

- **Insulation Resistance**
  Greater than 100,000 megohms at 100 VDC and 70°F
- **Dielectric Strength**
  At sea level 1,000V rms at 60 cps for 1 min.
- **Contact Resistance**
  Initial — less than .010 ohms
- **Contact Rating**

| DC Load Inductive | AC Load Inductive |
|---|---|
| **28V** | **125V** |
| 5 amp | 5 amp |

- **Temperature Range**
  −55°C to 85°C
- **Vibration Endurance**
  10 to 2,000 cps per MIL-R-25018
- **Shock Endurance**
  75G
- **Contact Chatter**
  10 microseconds or less MIL-R-5757
- **Corrosion Resistance**
  of complete assembly 50 hrs per QQ-M-151
- **Mechanical Endurance**
  100,000 cycles switching 10 amp. 50 VDC resistive load

# ATTENUATORS

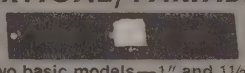
## ROTARY/VARIABLE

- Five basic models — 1⅞" to 3" dia.
- All circuit configurations
- Wide range of impedance
- Available with detents, tapers and cueing
- Aluminum anodized can
- Precious metal contacts
- Up to 45 steps
- Audio, video and RF

## FIXED ATTENUATORS

- Two basic models
- Standard circuits "T" and Bridged "H" — others available
- Octal plug-in base available
- Up to 80 db loss
- Many impedance available

## VERTICAL/VARIABLE



- Two basic models — 1" and 1½" wide
- Many circuit configurations available
- Wide range of impedance
- Available with detents, tapers and cueing
- Black anodized escutcheon plate
- Precious metal contacts
- Up to 30 steps

## PRECISION ATTENUATORS

TYPE 11T AND 11H PRECISION ATTENUATORS — DC to 10 MHz*

- Circuit: "T" or Balanced "H"
- Impedance: 50 to 600 ohms, as specified
- Resistor Accuracy: ±0.1% or better
- Accuracy: ±0.1 db to 200 KHz (overall) ±0.6 db to 2 MHz
  Lower values of loss, essentially flat to 10 MHz

| Type No. | Circuit | db Range | db/ Step | Dimensions |
|---|---|---|---|---|
| 11-T | "T" | 111 | 0.1 | 5¼"x19"x5" |
| 11-H | Bal. "H" | 111 | 0.1 | 5¼"x19"x10" |

* On Low Impedance Units, Lower Losses Usable to 100 MHz.

TYPE 850T AND 850H FOR THE AUDIO RANGE

- Circuit: "T" or Balanced "H"
- Impedance: 600/600 ohms unless specified — Other values to order
- Range: 2 dial unit gives 93 db in 0.1 db steps: 3 dial unit gives 111 db in 0.1 db steps
- Terminals: Telephone type jacks for input and output — Solder terminals provided on rear for permanent connections: Insertion of plugs into jacks lifts rear connections
- Accuracy: Resistors adjusted to ±0.1% excepting low values of loss are ±.25%

# UID Electronics Division

# BASIC SLIDE SWITCHES

### GENERAL DESCRIPTION

This complete line of compact slide switches offers quality switching where space is at a premium. UID's simple, trouble-free design assures long service under extreme conditions. A thorough contact wipe provides uniformly low contact resistance throughout the life of the switch. Both UL and CSA listings, including fire retardant T.V. rated switches, are maintained; special ratings can be obtained if warranted.

### CONSTRUCTION

UID slide switches are designed to be versatile to meet the varied mounting and terminal types desired. Standard plain mounting holes, extruded, extruded and tapped, twist tab, and plug-in mounting with variations, are manufactured daily for thousands of applications.

Terminals (solder lug, printed circuit, half terminal, wire wrap, and quick connect) are adequately spaced for easy connection.

### APPLICATIONS

Computers, electronic test equipment, electric tools, battery chargers, organs, home appliances, home entertainment equipment, and thousands of similar products incorporate UID switches. Custom switches to meet special applications are a favorite challenge to UID's engineering design department.

   SRO – Spring Return from One Side to Center (3 position)
   SRC – Spring Return from Both Sides to Center (3 position)
5. **Mounting:**
   00 – Standard
   TT – Twist Tab Mounting
   PI – Plug in Mounting
   SO – Side Operated
   PP – Push-Pull
6. **Terminal:**
   S – Solder (Standard)
   A – Long Printed Circuit
   F – Faston .110
   H – Half Solder
   P – Printed Circuit
   W – Wire Wrap
7. **Button Colors:**
   B1 – Black
   Other colors available. Consult factory
8. **Button Heights For Standard Knobs**
   00 – 11/32" (Standard)
   Other sizes available. Consult factory
9. **Extra Features:**
   NB – Notched Terminal Board (for Nylon Terminal Cover)
   SG – Solder Guard (Assembled on Switch)
   GP – Gold Plated Contacts and Terminals .000035
   GF – Gold Flash Contacts and Terminals
   PN – Your Part Number Stamped on Shell
   T4 – Extruded and Tapped for 4-40 Screw
   T6 – Extruded and Tapped for 6-32 Screw

### MATERIAL:

**Housing**
– Zinc-plated steel .025" thick (std.) Cadmium, black oxide, and other platings are available to customer specifications.

**Terminal Board**
– XP laminate phenolic (Std.). Flame retardant or other special grades available.

**Mounting Holes**
– .136 – .140 dia. plain (std.). Extruded not tapped, extruded and tapped for 4-40 and 6-32 screws available.

**Button Length**
– 11/32" (std.) Others available.

**Button Color**
– Black (std.)
A spectrum of colors can be supplied. Button markings to meet customer specifications are available.

**Button Material**
– Phenolics and nylon.

**Contacts**
– Silver-plated bronze (std.)
Silver laminate on bronze and gold flash over silver plating are available.

**Terminals**
**Solder**
– Silver-plated copper (std.)
**Faston**
– Silver-plated copper (std.) Accepts Amp. no. 42068-1
**Wire-Wrap**
– Silver-plated brass (std.)
**Printed Circuit**
– Silver-plated copper (std.)

**Terminal Shields**
– Nylon snap-on

**Solder Guard**
– Available for all solder lug terminals

### SPECIAL FEATURES:

– Stamped part number.
– Various mounting arrangements and mounting plates.
– Glamour caps for buttons.
– Wire leads attached.
– A multitude of variations from standard construction.

### ELECTRICAL DATA

**Contact resistance (initial) – .005 ohms (max.)**
**Dielectric withstanding voltage – 1200V RMS**
**Underwriters Laboratories and Canadian Standard Associates Listings – as stated.**

# ROCKER SWITCHES

### GENERAL DESCRIPTION

UID Electronics offers UL and CSA light and heavy duty rocker switches for today's fashionable products. Automated production enables uniform premium quality across the line. Styled molded actuators in a spectrum of colors enhance the switches. Beautifully metalized rockers can be had on all types. Single and two piece steel housings provide numerous mountings to meet custom requirements. The thorough wiping contact guarantees extremely low contact resistance to meet advanced circuit switching specifications. A selection of terminals insure the proper choice for the most economical connection to UID Rocker Switches. For a solution to your switching problems, contact UID direct or through your nearest field sales office.

UID's dependable Rocker Switches incorporate heavy duty plastic actuators in standard colors as well as custom blended shades. Switches are available in single or two-piece housings, and with several plastic actuator configurations to meet customer requirements. Long life and uniformly low contact resistance are assured by silver-plated terminals and contacts.

### SPECIAL FEATURES:

Rocker switches are available with:

- Various stampings on the rocker button.
- Custom rockers in multiple hues to enhance modern designs
- Color-coded leads extending from terminals for accurate, economical connection.
- A switch to meet almost any requirement.

### ELECTRICAL DATA

- Contact resistance (initial) - 0.005 ohms (max.)
- Dielectric withstanding voltage - 1200V RMS
- Underwriters' Laboratories and Canadian Standard Association - as stated.

### APPLICATIONS

UID Rocker Switches are finding ever increasing use in industrial control panels, appliances, home entertainment systems, and a host of other modern products.

### MATERIAL:

**Housing**
- Zinc plated steel 0.025" thick – (Standard) Cadmium, black oxide, and other platings are available

**Rocker**
- Cycolac in color and plateable grades

**Terminal Board**
- XP laminate phenolic (Std.). Flame retardant or other special grades available.

**Mounting holes**
- 0.136 - 0.140 diameter, plain round standard Extruded not tapped, extruded and tapped for 4-40 and 6-32 screws available

**Contacts**
- Silver-plated (Std.), Silver laminate, gold-flashed, or gold plating over copper, bronze, phosphor bronze, and other contact base metals are offered to meet specific requirements.

**Terminals**
- Solder terminal - provided unless otherwise specified. Two holes provide easy wire insertion for rapid soldering. 0.110 and 0.125 wide to accept AMP No. 42470-1 (loose piece) or 42068-1 (strip) and AMP Faston Connector Series 110 or equivalent.

  Wire wrap (WW)
  Silver-plated brass.
  Printed circuit (PC)
  Silver-plated copper or brass.
  Half terminal (HT)
  Silver-plated copper or brass.
  Long printed circuit (AP)
  Silver-plated brass

**Terminal shields** – For SPDT, DPDT, TPDT only
- Snap-on nylon box shield completely covers all exposed terminals, (specify notch terminal board on switch.)

**Solder guard**
- Fish paper protector against excessive solder and flux flow.

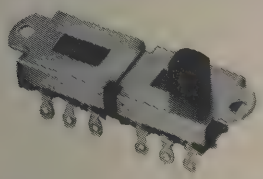
## CUSTOM MADE SWITCHES

The custom capabilities of UID are limited only by the imagination of design engineers. Illustrated are some of the many types of special configurations and modifications already designed and produced to solve specific engineering problems.

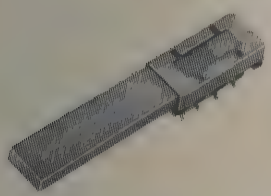
Our highly trained and experienced staff of engineers is ready to assist you in any way possible.

### SLIDE SWITCHES

Inexpensive control for intercoms and other communication equipment is available with this standard DPDT printed circuit mounted switch with offset shell.



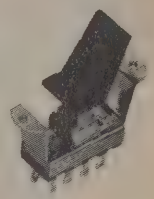
T.V. service switch – standard 6 PDT slide switches.



TV color test functions are simplified by specifying UID push-pull switches. Shown is a DPTT printed-circuit mounted push-pull switch.

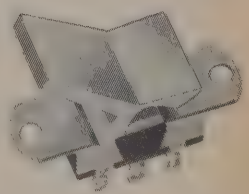
### ROCKER SWITCHES

Type "L" paddle rocker switch DPTT with "G" offset shell allows direct panel mounting without special offset hardware.



Multiprocessor control switches for computers take on a custom look with this large DPDT "M" style rocker switch, capable of logic circuit type switching.

The contemporary look is in with this standard "L" style rocker available in a wide spectrum of ABS colors.



### PUSH BUTTON SWITCHES

Solenoid-release push button switch with interlock and positive lock out features. Solenoid can be mounted on switch or separately.

Enclosed push button switch with integral PC board for insertion into an edge connector.

## NEW SWITCHES

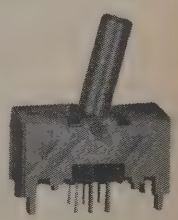
UID constantly introduces new types of switches to maintain our leadership in the field. Here are a few of our more popular recent additions.

### 1'' PUSHBUTTON SWITCHES

Designed for vending machines, photocopiers, & home entertainment products. Can be used in many other applications requiring a single-pole, normally open, momentary switch. Easy connection via faston connectors to our 3/16" tab terminals.

### MINIATURE SWITCHES

Miniature switches designed as direct replacements for ALPS or ALCO. PC board mountings for greater stability.



### MINIATURE TOGGLE SWITCHES

Included in the line are single, double, triple and four pole versions, with variations of terminals and toggle handles available. Locking ring, lock washer, and two hex nuts included with each unit.

### MINIATURE TRIPLE THROW SLIDE SWITCHES

Single pole construction incorporates highly successful dual wipe and ball and spring contact. Available with or without mounting ears.

FOR ADDITIONAL AMF SWITCH PRODUCTS REFER TO RCL DIVISION PAGES 4230 - 4239

# UNIMAX: BETTER SWITCHING SOLUTIONS

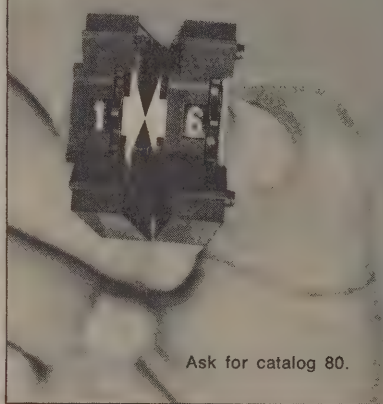
## Lighted Pushbutton Switches

Ask for Catalog LPB

In a field full of appearance quality/performance switching variables, Unimax switches are the ones that *show* you care about quality, performance and price.

- *Single Lamp*—Round, square or rectangular, lighted and unlighted, momentary or alternate switching. 1-4 poles.
- *Dual Lamp*—Rectagular and square, double pole, momentary or alternate action. 5A @ 250VAC or 28 VDC. Keylock versions.
- *Four Lamp*—Multi-switch configurations. Approved to MIL-S-22885/9-12. Also meets high-shock requirements of MIL-S-910C.
- *Oil-Tight*—Pilot, lighted, unlighted, emergency, key-operated rotary types. 500V @ 10A ratings.

## they SNAP together!



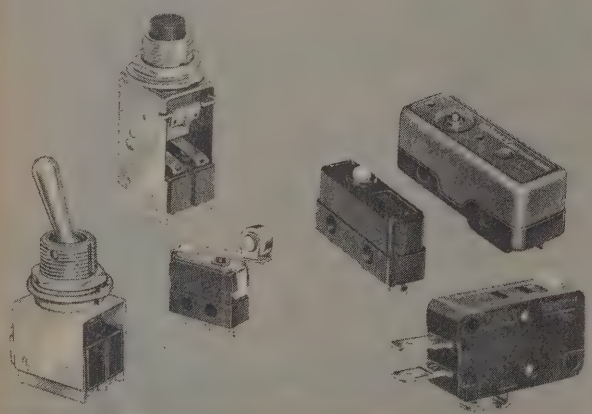
Ask for catalog 80.

**"No Hardware" Digital Thumbwheel Switches**

- No assembly hardware required
- Large selection of output codes on standard models
- Built-in logic standard on "Smart Switches"
- Either Snap-in front, or rear hard mount
- Matte finish standard
- Only 5 parts per switch
- Standard .315" (8mm) width
- Removable stop pins

The industry's widest selection of precision, general purpose, miniature and sub-miniature snap-action switches, as well as toggle and push-button switch assemblies. Ratings from low-level to 25A. All actuator styles available. Ask for catalog 60.

## Snap-Action Switches



A full range of snap-acting switches enclosed in rugged die cast metal housings for protection against mechanical damage and, depending on the method of sealing, against destructive environmental conditions, Series KS (compact) is available with either through bolt or flange mounting. Series KL (heavy duty) is horsepower rated. Series KWL (splash proof) and KXL (explosion proof) are suitable for use in severe environments. All types are available with a variety of actuators. Ask for Catalog 30.

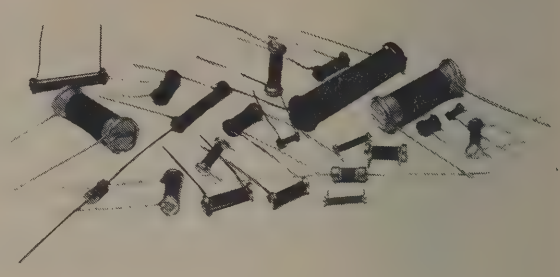
# CARBORUNDUM THERMISTORS

## APPLICATION DATA

Carborundum thermistors are temperature dependent resistors, offered in a wide variety of resistance-temperature characteristics. They are available with a wide range of negative temperature coefficients at 25°C ranging from −0.3%/°C to −5.4%/°C. These parts are made from ceramic materials, bonded in a high-temperature firing process into rod, disc, and chip configurations. They are available in a large range of sizes, thermal characteristics, resistance values, and temperature coefficients to suit the needs of many types of electrical and electronic circuits.

Carborundum offers long experience in the design of special resistance devices. This, together with expertise in the field of ceramic technology, assures a stable and uniform product to meet your thermistor requirements. All materials used in the manufacture of Carborundum thermistors are of the highest quality. Strict quality control is maintained over all stages of manufacture, and a minimum of two calibrations at the specified reference temperature is standard.



## DEFINITIONS

**Zero Power Resistance** ... is the resistance of a thermistor at the calibrating temperature, measured in such a manner that the measuring current does not appreciably heat the thermistor. Resistance, as used here, means zero power resistance unless otherwise stated.

**Beta** ($\beta$) ... is the number that satisfies the equation:

$$R_1/R_2 = \epsilon^{\beta\,(1/T_1 - 1/T_2)}$$

Carborundum determines beta from measurements at 25°C and 73.2°C. Beta is proportional to the slope of the resistance-temperature characteristic, and it is also known as the material constant. It is not truly a constant, but it gives a good approximation of resistance over a substantial working range. In the equation, $\epsilon$ is 2.718..., the base of natural logarithms, and $\beta$, $T_1$, and $T_2$ are in Kelvin (K).

**Alpha** ($\alpha$) ... or temperature coefficient of resistance (TCR) is proportional both to beta and to the square root of the temperature at which it is specified. Very nearly,

$$\alpha = -100\ \beta/T^2$$

In this equation, temperature is in Kelvin (K), and $\alpha$ is in percent per degree C (%/°C). It is evident that alpha becomes much higher as temperatures decrease.

**Dissipation Constant** ($\delta$) ... is the ratio of power dissipated by the thermistor divided by the temperature rise above ambient due to self-heating. Here, it is 20 times the power required, in watts, to bring the thermistor to 75°C in an ambient of 25°C, and it is expressed in milliwatts.

**Time Constant** ($\tau$) ... is the time required for a thermistor which has attained equilibrium after being self-heated to 75°C to cool to 43.4°C in an ambient of 25°C. It is expressed in seconds.

*Both $\delta$ and $\tau$ are necessarily approximate quantities, and they represent complicated concepts. They cannot be fully defined or used unless the conditions under which they are measured are fully defined.*

*In particular, note that the dissipation of a thermistor is the sum of dissipation due to conduction, convection, and radiation, which are related to temperature by linear, square-law, and fourth-power equations respectively. Only over narrow temperature ranges can dissipation constant be considered constant.*

*Also note that time constant is defined by a zero-power cooling curve. If the thermistor is attached to a heat sink the effective time constant is changed substantially. The time required for a thermistor to reach equilibrium due to heating from a current passing through it may be dramatically different from the time constant as defined above.*

## THERMISTOR SPECIFICATION

Thermistors are most often specified by a zero power resistance, suitably toleranced, at some specified temperature (most often 25°C or 37.8°C), and by a temperature coefficient, also suitably toleranced. This is all that is required as an electrical specification. Additional specifications may result in double dimensioning and be unduly restrictive (and therefore costly) or ambiguous.

The zero power resistance of a thermistor should be read in a temperature controlled, agitated oil bath. Not only does the oil bath provide a more controllable constant temperature, but it also speeds the settling of the reading.

## ROD THERMISTORS

Rod thermistors are manufactured by extruding and firing a suitable ceramic mixture. For a given type of thermistor, low-, medium-, or high-sensitivity, a number of mixtures are available: in general, a mixture yielding a higher resistivity product also yields a higher beta or temperature sensitivity.

Standard rod thermistors are shown in the following table. They have a resistance tolerance of ±10% at 25°C, and they are neither coated nor marked. Special rod thermistors may be ordered with intermediate resistance values, other resistance tolerances, other calibration temperatures, coating, marking, special lead preparation, etc. Parts without wire leads are also available.

## DISC THERMISTORS

Disc thermistors are manufactured by pressing and firing a suitable ceramic mixture. Carborundum offers six standard mixtures of various resistivity and beta.

Standard disc thermistors are shown in the following table. They have a resistance tolerance of ±10% at 25°C, and they are neither coated nor marked. Special disc thermistors may be ordered with intermediate resistance values, other resistance tolerances, other calibration temperatures, coating, marking, special lead preparation, etc. Parts without wire leads are also available.

Elmwood thermostats are precision-engineered for quick, reliable response in high limit or control applications. Many meet military specifications, as well as U.L., C.S.A. and European requirements. Exposures are from —65°F to +550°F, ratings to 15 Amps, with narrow or wide differentials as required. A variety of brackets and terminals are available, as well as custom packaging. Write or phone for complete catalog.

# SUB-MINIATURE SNAP-ACTION THERMOSTATS

| DESCRIPTION | ELECTRICAL RESISTIVE RATINGS | TEMPERATURE SET POINT RANGE | NARROWEST TOLERANCE ALLOWABLE | NARROWEST DIFFERENTIAL AVAILABLE | APPROV AGENCY LISTINGS | TYPICAL APPLICATIONS |
|---|---|---|---|---|---|---|
| **3100** Hermetically sealed, all welded construction long life, narrow or wide tolerances and differentials. | 6 Amp. 125 VAC<br>7 Amp 30 VDC<br>3 Amp 250 VAC | —30° to 500°F<br>—34.44° to 260°C | ±3°F<br>±1.7°C | 6°F max.<br>3.3°C max. | U.L. | High-temp control for glue guns, copy machines, computers, aircraft, electronic controls with commercial or military specifications. |
| **3MS1** Qualified for Q.P.L. listing under Mil-S-24236, Type 1, Class 4. SPST, hermetically sealed, subminiature bimetallic thermostat. | 6 Amp 125 VAC<br>7 Amp 30 VDC<br>3 Amp 250 VAC | —30° to 500°F<br>—34.44° to 260°C | ±3°F<br>±1.7°C | 6°F max.<br>3.3°C max. | DESC-EQA | Aerospace, aircraft, weapons systems, communications, military vehicles, or wherever a high reliability thermostat is needed. |
| **3150**  Hermetically sealed, all welded const. Similar to 3100 except low silhouette .301" max. design | 4 Amp 120 VAC 30 VDC<br>2 Amp 250 VAC | —30° to 350°F<br>—34.44° to 177°C | ±3°F<br>±1.7°C | 6°F max.<br>3.3°C max. | U.L. | Copy machines, computers, aircraft, electronic controls with commercial or military specifications where space is critical. |
| **3153**  Similar to 3150 with additional mfg. and testing to requirements of MIL-S-24236 | 4 Amp 120 VAC 30 VDC<br>2 Amp 250 VAC | —30° to 350°F<br>—34.44° to 177°C | ±3°F<br>±1.7°C | 6°F max.<br>3.3°C max. | U.L. | Similar to 3150, for more stringent military requirements, such as Apollo and Skylab heat controls. |
| **3305**  Subminiature .430" dia., hermetically sealed, tolerances to ±3°F and narrow differentials. | 3 Amp 120 VAC 30 VDC | 100° to 250°F<br>37.8° to 121°C | ±3°F<br>±1.7°C | 6°F max.<br>3.3°C max. | None | Crystal ovens, gyros, electronics overheat protection where subminiature thermostat is required. |
| **3000** Custom package housings for any Elmwood thermostats. Housings all-welded stainless steel. | Any model | —30° to 500°F<br>—34.44° to 260°C | ±4°F<br>±2.2°C | 8°F max.<br>4.4°C max. | See other models | Aircraft bleed air duct sensing, hydraulic oil temp control, liquid bath control, heater control. |
| **3001-3004**  Non-hermetic, utilizing 3100 design with phenolic and metal housing. | 7 Amp 120 VAC 30 VDC<br>3 Amp 250 VAC | 0° to 335°F<br>—17.8° to 168.3°C | ±4°F<br>±2.2°C | 8°F max.<br>4.4°C max. | U.L. C.S.A. | **3001-** Computers, copy machines, radar equipment, where low height .281" is required.<br>**3004-** Where 4mm spacing is required for Europe. |
| **3450**  Non-hermetic, with 15 Amp 120 VAC rating. U.L. and C.S.A. listings for 100,000 cycles. | 15 Amp 120 VAC 12 VDC<br>10 Amp 277 VAC | 32° to 335°F<br>0° to 170°C | ±5°F<br>±3°C | 20°F 11°C min. below set point. | U.L. C.S.A. | Power supplies, communication, medical equipment, computers where high amp loads are present.<br>Where 4mm spacing is required for Europe specify 3455R. |
| **3455RBV**  Epoxy overmold constr. of 3455R. # THERMISTORS

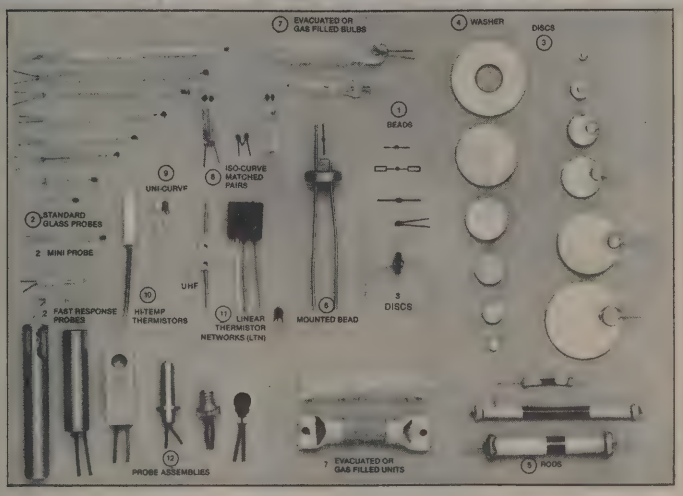
Fenwal Electronics

WORLDWIDE THERMISTOR LEADERSHIP THROUGH QUALITY



## ● THERMISTOR CONFIGURATIONS ●

**1. Glass Coated Beads** — used where small size, fast response, high precision, stability, and temperatures to 300°C are required.

**2. Glass Probes** — medium-small in size. Many of the advantages of beads but rugged, more easily mounted, useful in liquid media.

**3. Discs** — used where medium power dissipation is a requirement and space not a problem. Useful to 150°C.

**4. Washers** — used where high power dissipation is a prime requirement.

**5. Rods** — these units have power dissipation intermediate between discs and washers and are also used where their physical shape is an asset.

**6. Mounted Beads** — provide ease in using glass beads in such applications as gas chromatography, flow and vacuum measurement, etc.

**7. Vacuum and Gas Filled Assemblies** — high power sensitivity for specialized circuit applications.

## ● INTERCHANGEABLE THERMISTORS ●

**8. Iso-Curve® Interchangeable Thermistors** — these units available in bead or glass probe configurations, follow standard curves over wide temperature range, and are completely interchangeable. Units match standard curves as close as ± ¼% of resistance or as required.

**9. Uni-Curve® Interchangeable Thermistors** — completely interchangeable units having an accuracy of +0.2°C over a temperature range of 0°C to 70°C and available on special order to other tolerances and ranges.

## ● HI-TEMP THERMISTORS ●

**10. Hi-Temp Thermistors** — designed specifically for HI-TEMP measurement and control in applications having operating ranges from 500°C to 1000°C.

## ● LINEAR THERMISTOR NETWORKS (LTN) ●

**11. Linear Thermistor Networks (LTN™)** — precision resistors and thermistors which are designed to produce a resistance change or voltage output that varies linearly with temperature over the selected temperature range. Ask for Bulletin L-9A.

## ● THERMISTOR PROBES ●

**12. Probe Assemblies** — standard catalog types or built to specific military or commercial requirements. We are experienced in design of probe assemblies for all fields of application including industrial control and indication, aerospace — specializing in telemetry applications, and oceanographic — featuring fast response, very high pressure, and interchangeability using our Iso-Curve and Uni-Curve Thermistors.

## Here's Help in Applying F. E. Thermistors . . .

THERMISTOR MANUAL (EMC-6A). Most complete up-to-date listing of thermistors available. Theory, engineering data, complete specifications.

THERMISTOR HOUSING MANUAL (L-5A). Detailed information on how Fenwal Electronics can build thermistor sensor assemblies to fit your requirements.

THERMISTOR APPLICATIONS NOTES (AN-1A, AN-2A). "Methods for designing linear temperature read out circuits (AN-1A)" and "Using thermistors to compensate for transistor temperature sensitivity (AN-2A)"

HI-TEMP THERMISTOR BULLETIN (L-8A) features thermistors designed specifically for high temperature measurement and control applications having operating ranges from 500°C to 1000°C.

LINEAR THERMISTOR NETWORKS (LTN™) precision resistors and thermistors which are designed to produce a resistance change or voltage output that varies linearly with temperature over the selected temperature range. Ask for Bulletin L-9A.

INTERCHANGEABLE THERMISTORS: ISO-CURVE manual (L-2B) and UNI-CURVE manual (L-6A) provide indepth data pertaining to precision and low-cost RT, curve-matched interchangeable thermistors.

CAPSULE THERMISTOR COURSES (L-3A). A complete 24-page primer on thermistors, their characteristics and uses, including curves, circuit diagrams and applications data.

## EXPERIMENTER'S THERMISTOR KITS

**Model G-200** Standard Kit. Contains 12 different thermistors (2 glass probes, 3 beads, 2 discs, 3 rods, 2 washers). Each thermistor is packed with specification sheets showing characteristics. **PRICE: 19.95**

**Model G-700** Low-Cost Kit. Includes four glass beads and probes, manual, and computer for a variety of applications. **PRICE: 4.95**

**Model G-701** Economy Kit. Includes 10 glass beads and probes, manual and computer for a wider range of applications than G-700 kit above. **PRICE: 9.95**

**Model G-500** Uni-Curve Kit. Contains 6 standard Rt curve matched interchangeable thermistors (3K, 5K, 10K, 30K, 50K, 100K. Includes complete data sheets with full specifications and DC. TC listings. **PRICE 19.95**

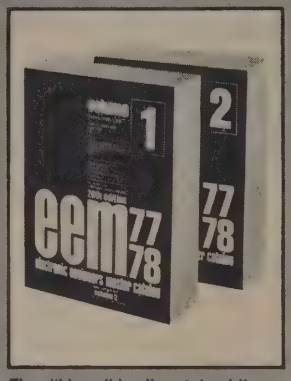
# WE KNOW OUR STUFF

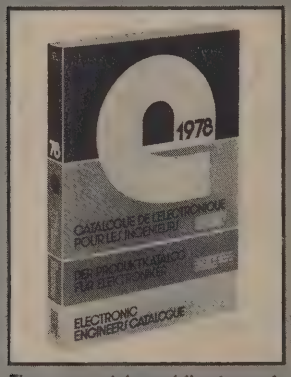
## 41 YEARS OF EXPERIENCE IN CATALOGING, 21 EDITIONS OF eem

### eem/ELECTRONIC ENGINEERS MASTER CATALOG —



The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

### ELECTRONIC ENGINEERS CATALOGUE



The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.

### eem FILE SYSTEM —

The only filing system designed especially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

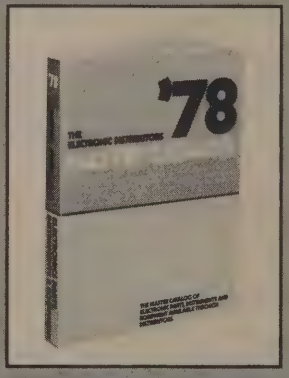
### UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

### IC MASTER AND THE UPDATES —

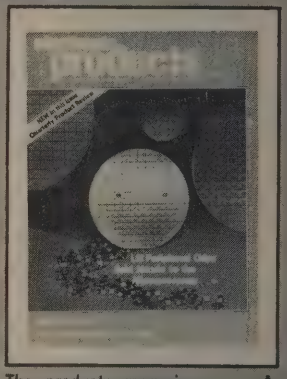
The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

### ELECTRONIC DISTRIBUTORS MASTER CATALOG —



The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

### ELECTRONIC PRODUCTS MAGAZINE —



The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

### UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

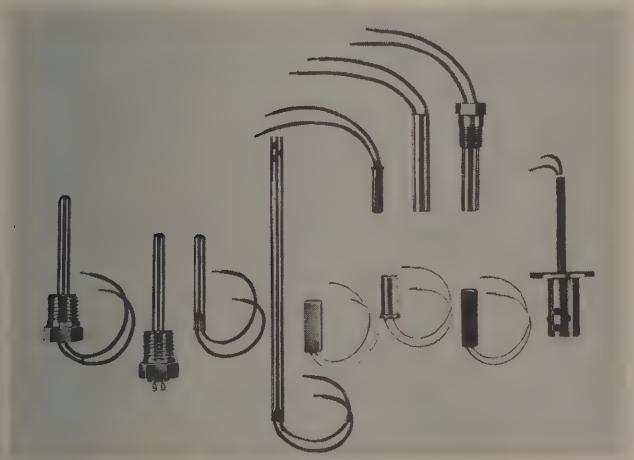
*Not presently available in Glass Probes.
Tolerance on resistance values ± 20% @25°C. Closer tolerances available.
Beads have a maximum operating temperature of 260°C.

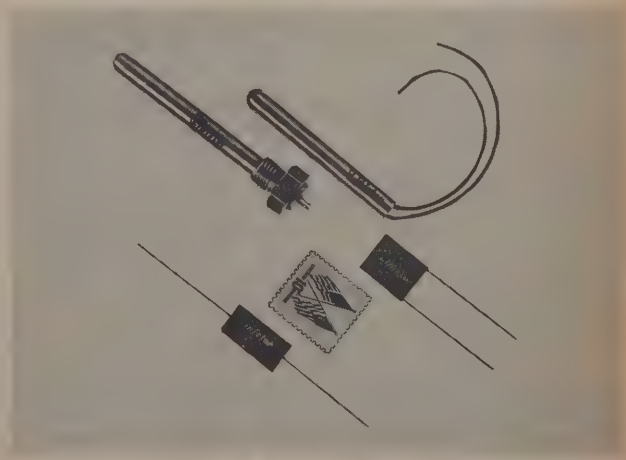
-G1 for Glass Beads with platinum leads
-G15 for Glass Probes
-G20 for Glass Bead Assemblies

# THERMISTOR PROBES



The probes illustrated above include stainless steel, aluminum, and chrome-plated materials in a variety of configurations. In addition, a variety of other designs are available. These probes are used in conjunction with solid state circuitry for liquid level measurement, and for use as sensors to measure the temperature of liquids or surface temperatures. Write for probe catalog TP-739.

# LINISTOR® ASSEMBLIES



Keystone developed Linistor assemblies to give an accurate resistance response over a temperature span of 0° to 100° C. Because Linistor assemblies have flattened out the thermistor resistance curve to a constant and predictable straight-line plot, they are valuable in a wide range of applications. Four standard encasements are available. Tolerance on resistance of Linistor is ± 2% at 25°C. Write for Linistor Bulletin L-601.

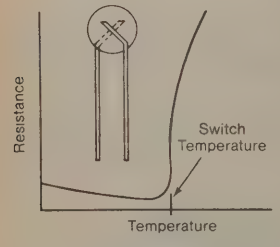
**Maximum operating temperature—125°C**

Keystone also offers a line of Disc-Type Thermistors ranging in sizes from .100 inch to 1.00 inch in diameter. Thirty-four different slopes are available (temperature coefficients from −3.75% per °C at 25°C to −5.22% per °C at 25°C). Resistance values range from 11.16 ohms to 518,400 ohms at 25°C. Write for short form catalog T-504 or complete catalog BW2.

# PTC—POSITIVE TEMPERATURE COEFFICIENT THERMISTORS



Positive Temperature Coefficient (PTC) thermistors are characterized by an extremely large resistance change in a small temperature span. The figure at left depicts a generalized resistance temperature plot for a PTC. The temperature at which the resistance begins to increase rapidly is referred to as the switching temperature. This point can be changed from below 0°C to above 120°C.

## TYPICAL PTC APPLICATIONS

• Automatic Color TV Degaussing • Air Flow Measurement • Non-Destructive Fuse • Single Phase Motor Starting • Liquid Level Sensing • Combination Heater-Thermostat • Arc Suppression • Time Delay Fusing

For detailed application notes, write for Bulletin P-780.

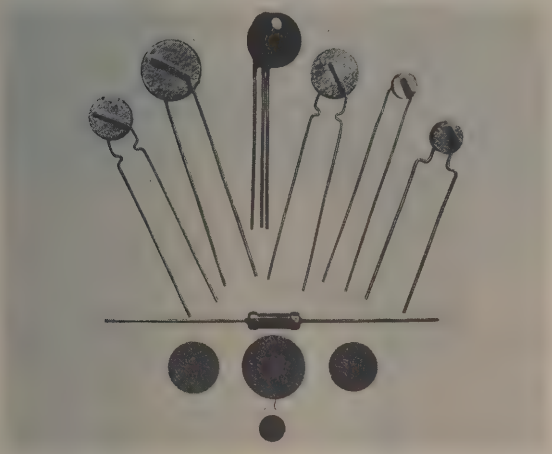
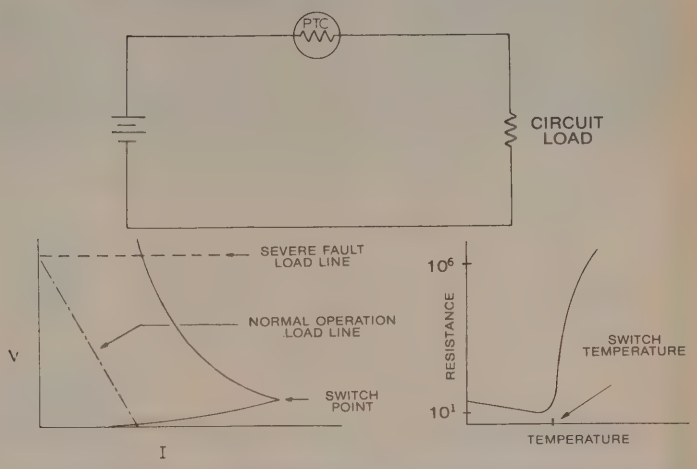
# POPULAR PTC CIRCUIT APPLICATIONS



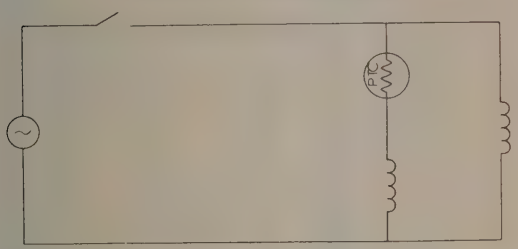
A large resistance change in a small temperature span best describes PTC thermistors. The temperature at which the resistance begins to increase rapidly is known as the "switching temperature." Because of this transformation, PTC's are an ideal component for circuits where the built-in switching temperature can be used to advantage. A few of the many applications are shown on this page.

## NON-DESTRUCTIVE FUSE



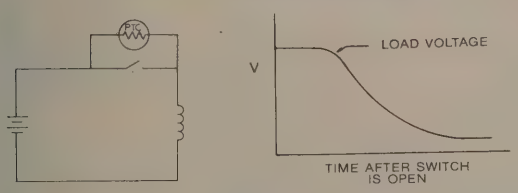
In normal operation the PTC dissipates minimal power keeping its body temperature well below the switch temperature. If a fault of sufficient magnitude occurs, additional power drives the temperature of the PTC up to the switch temperature. At this point additional power becomes available to the PTC, and the only stable operating point is at a much higher resistance than the switch temperature resistance as shown in the illustration above.

## MOTOR STARTING



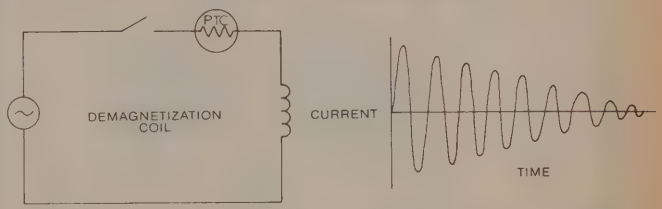
In the above circuit the PTC thermistor replaces the troublesome starting switch in a single-phase motor. When the circuit is energized the PTC has a low resistance and permits most of the line voltage to be applied to the starter winding. As the motor starts, the PTC heats up until the switch temperature is reached at a rate determined by the thermal inertia of the PTC and current flowing through the starting winding. At this point, the thermistor rapidly changes from a low resistance device to a high resistance unit, and the steady state power applied to the PTC is very low causing the current through the starting winding to be negligible.

## ARC SUPPRESSION



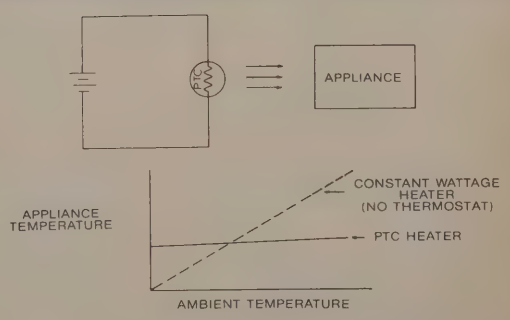
In the above illustrations the PTC switches from a low resistance to a high resistance when the switch is opened. The low resistance of the PTC provides effective arc suppression, and the subsequent PTC switching action transfers essentially all of the power supply voltage from the inductive load to the PTC element.

## AUTOMATIC DEGAUSSING



When the switch on the above circuit is closed, a high percentage of the line voltage is impressed across the demagnetization coil. Within a short period of time, the PTC self-heats, switching from a low resistance level to a high resistance, and thereby decreasing the demagnetization coil current to near zero. The length of time for this switching action to occur is a function of the power applied to the PTC and its thermal inertia.

## COMBINATION HEATER-THERMOSTAT



PTC thermistors provide an economical method of temperature control by combining the function of the heater and thermostat in one ceramic pellet. This thermostatic action is accomplished by the steep PTC characteristic. As the ambient temperature rises, the resistance of the PTC is increased, thus reducing the input power to the circuit maintaining a relatively constant temperature.

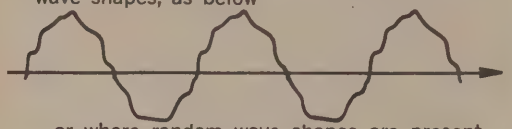
# Guide to types, models and applications of BEST vacuo-junction THERMOCOUPLES

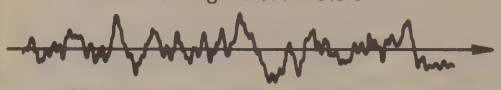
## as used by leading instrument manufacturers for:

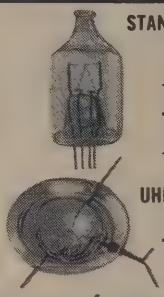
### TRUE RMS MEASUREMENT

—where the signal is periodic with distorted wave shapes, as below



—or where random wave shapes are present, even with high crest factors



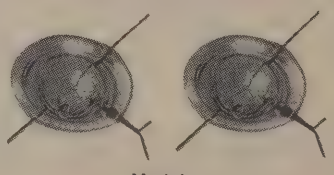


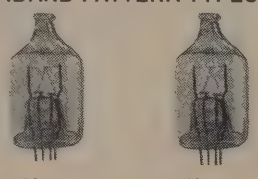
**(Use either standard or UHF pattern, depending upon frequency)**

### LINEAR TRUE RMS MEASUREMENT

MATCHED PAIRS

| | UHF TYPES | STANDARD PATTERN TYPES | |
|---|---|---|---|
| | Model MPU 1 | Model MP1S7 | Model MP219 |
| Tracking accuracy | 0.5% | 0.5% | 0.2% |
| Time constant | 1 sec | 1 sec | 200ms |
| Nominal current | 5mA | 5mA | 6.67mA |





**Tracking accuracy applies over full 25°C temperature range.**

**Single standard patterns** for 5mA and higher, usable to −65MHz; for less than 5mA, usable to 10MHz.

**Single UHF types** usable to 500MHz.

**Temperature coefficient** of output available from −0.2% per °C down to 0.005% per °C in some models.

**Reversal error**, standard 0.2%. Most models available with R/E down to 0.02%, some models to 0.005%.

**Optional special features:** short time constants to 50 ms; double heater devices, ultra miniature sizes.

# TEMPERATURE SENSING SWITCH

## CONVENIENT AND RELIABLE TEMPERATURE CONTROL

Miniature temperature switches use an electro-ceramic element instead of a bimetallic switch. The hermetically sealed sensors are corrosion and explosion proof. Switches may be specified as normally open, normally closed or a combination of both in an SPDT switch configuration. Fast response time is achieved by packaging the devices in a small (0.25x0.5 in.) case. At full rated load, the switches can perform 3-million operations. Switch temperatures from 0°C and up are available.

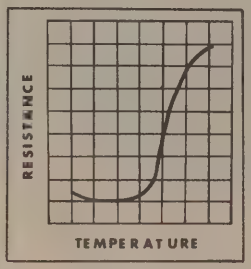
# PTC SWITCHING THERMISTORS

## The Positive Way to SENSE, MEASURE, CONTROL, REGULATE, PROTECT

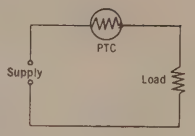


TYPICAL PTC RESISTANCE VS. TEMPERATURE CURVE

### PTC SWITCHING THERMISTOR APPLICATIONS

#### THERMAL OVERLOAD

The PTC Switching Thermistor can be used for thermal overload protection by placing it in close thermal contact to, and electrically in series with the device to be protected.

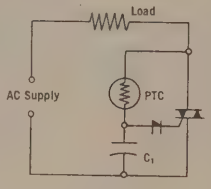


#### HIGH POWER THERMAL OVERLOAD

For high power overload protection, the PTC switching thermistor can be used as a sensor in the gate circuit of a Triac.

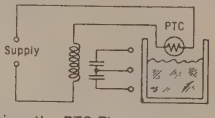
#### TEMPERATURE CONTROL

The above circuit may also be used as a temperature controller. Control temperature will be determined by switch temperature of the thermistor.



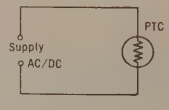
#### LIQUID LEVEL SENSING

A PTC Thermistor can be used to sense liquid level by placing it in series with a relay or in conjunction with other solid state devices. In operation, the PTC is selected to self-heat to its high-resistance mode in free air. When the liquid comes in contact with the thermistor, this heat is dissipated into the liquid, thus cooling the thermistor to its low-resistance mode to energize a solenoid or relay.



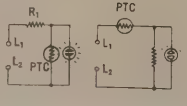
#### HEATER

In this application, the PTC Thermistor is connected directly across the supply. When the circuit is energized, the thermistor quickly heats to its control temperature because of its low base resistance. Once the control temperature is reached, it very accurately maintains that temperature.



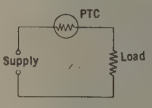
#### SIMPLE TEMPERATURE INDICATOR

Using only a PTC, Indicator Light, and Supply Voltage; a simple indicator can be devised by placing the PTC either in series or parallel with light to give desired on-off indications with temperature.



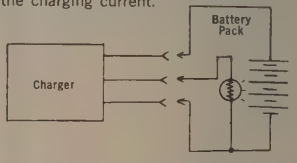
#### CURRENT LIMITING

The PTC Thermistor is placed in series with the load. The thermistor is operated normally in its low-resistance mode until there is an over-current situation. At that time the thermistor quickly self-heats to its high-resistance mode thus limiting current to the load.



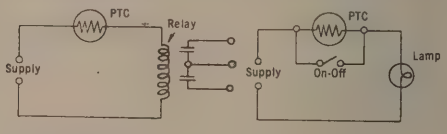
#### OVER-CHARGE PROTECTOR

The PTC Thermistor will easily interface with electronic charging circuitry. By inbedding PTC directly in the battery pack, it will sense the temperature of the pack. When the critical charging temperature is reached, the PTC will trigger the charger to reduce the charging current.



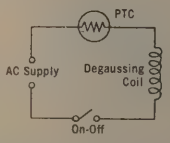
#### TIME DELAY

The PTC Thermistor can be used as the time delay element in a time delay circuit. By placing the thermistor in series with a relay, the relay will pull in immediately and then after a certain time will drop out due to the self-heating and switching action of the thermistor. Another time delay application of the PTC Switching Thermistor is slow turn-off of lighting circuits. When the switch is on, the thermistor remains cold and thus in its low-resistance mode. Once the switch is opened, the thermistor begins to heat and will switch off the lamp.



#### SURGE GENERATION

Because PTC thermistors are available with a very low base resistance, they can deliver very high currents for a short period of time before switching to their high-resistance mode. A typical application of this sort is automatic degaussing of a color TV CRT.



### PTC ENGINEERING APPRAISAL KITS

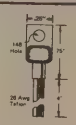
**KIT KPTC-1** Kit contains four PTC devices ranging from break-points of 0°C to 125°C in typical lead configurations. Technical data also included.

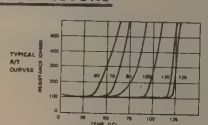
**KIT KPTC-2** Kit contains four PTC devices for use as current limiters or sensors. Protective currents range from 20 to 100 MA. Break-points from 60°C to 125°C.

### OVER TEMPERATURE PROTECTORS

MIDWEST COMPONENTS' Over Temperature Protector provides shutoff or regulation of expensive RF or AF Power Transistors. Protects against over heating that occurs from output stage component failure, antenna breakage, or short conditions.

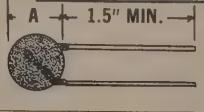
Unlike fuses or bi-metal elements its action is recyclable and has no hysteresis effect.





| ORDER NUMBER | SWITCHING TEMPERATURE (NOM.) | RESISTANCE AT 25°C (OHMS) | RESISTANCE AT SWITCHING TEMPERATURE | MAX. CONT. OPERATING TEMP. |
|---|---|---|---|---|
| OTP60.11 | 60°C | 100 ± 40% | 250 OHMS (min.) | 150°C |
| OTP70.11 | 70°C | 100 ± 40% | 250 OHMS (min.) | 150°C |
| OTP80.11 | 80°C | 100 ± 40% | 250 OHMS (min.) | 150°C |
| OTP100.11 | 100°C | 100 ± 40% | 250 OHMS (min.) | 150°C |
| OTP120.11 | 120°C | 100 ± 40% | 250 OHMS (min.) | 150°C |
| OTP125.11 | 125°C | 100 ± 40% | 250 OHMS (min.) | 150°C |

### CURRENT LIMITERS ACT LIKE A RECOVERABLE FUSE.



The PTC Thermistor is placed in series with the load. The thermistor is operated normally in its low-resistance mode until there is an over-current situation. At that time the thermistor quickly self-heats to its high-resistance mode thus limiting current to the load

| TYPE NO. | OHMS @ 25°C | PROTECTIVE THRESHOLD CURRENT | "A" DIA. |
|---|---|---|---|

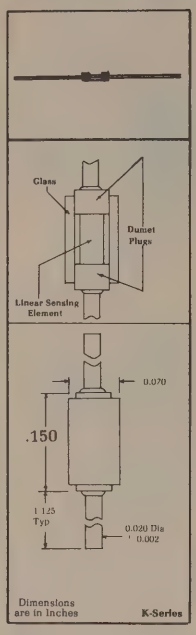
# TEMPSISTOR™

**A SOLID STATE LINEAR TEMPERATURE DEVICE**



**A Solid State Linear Temperature Device that can be used:** TO PROVIDE OUTSTANDING TRACKING & INTERCHANGEABILITY. The Tempsistor™ has a repeatable positive temperature coefficient over the operating temperature range, averaging +0.7%/°C.

TO PROVIDE EASY MATING WITH MICRO-PROCESSOR CIRCUITS. The Tempsistor™ is highly linear over its −65° to 200°C temperature range.

TO CONTROL & MEASURE CIRCUITS. The Tempsistor™ responds exceptionally fast to temperature changes, making it an ideal temperature sensor.

TO STABILIZE DIGITAL & LINEAR INTEGRATED CIRCUITS. The Tempsistor™ temperature coefficient of +0.7%/°C provides compensation for thermal changes because its temperature coefficient is an ideal compliment for silicon devices.

The Tempsistor™ can efficiently be used for all of these functions because it was designed to meet or exceed all electrical requirements of the MIL-T-23648 for positive TC thermistors and because it has a big positive temperature coefficient of resistance that is approx. 0.7%/deg.

**APPLICATIONS FOR THE TEMPSISTOR™.**

**Consumer Products**

| | | |
|---|---|---|
| Automobiles | Televisions | Microwave Ovens |
| Airplanes | Clothes Dryers | Calculators |
| Freezers | Coffee Pots | Battery Chargers |
| Fire & Smoke Detectors | CB Radios | |

**Industrial and Military Products**

| | | |
|---|---|---|
| Telephone Switching Stations | Solar Systems | Missles |
| Photo Copiers | Computers | Volt Meters |
| Commercial Deep Fryers | Electric Typewriters | Watt Meters |

## TEMPSISTOR™ SPECIFICATIONS

| *** Resistance Ratio Temperature Characteristics | | | | | |
|---|---|---|---|---|---|
| Temp. | | $R_T/R_{25}$ Multiplier | | | |
| | | RESISTANCE VALUES (Ohms) | | | |
| °C | °F | 10-56Ω | 68-820Ω | 1-2.7KΩ | 3.3-10KΩ |
| -25 | -13 | .73 | .65 | .65 | .61 |
| 0 | 32 | .86 | .82 | .81 | .83 |
| 25 | 77 | 1.00 | 1.00 | 1.00 | 1.00 |
| 50 | 122 | 1.15 | 1.21 | 1.19 | 1.19 |
| 75 | 167 | 1.32 | 1.44 | 1.39 | 1.37 |
| 100 | 212 | 1.49 | 1.68 | 1.58 | 1.52 |
| 125 | 257 | 1.68 | 1.94 | 1.75 | 1.64 |
| 150 | 302 | 1.89 | 2.21 | 1.89 | N.A. |

To find the resistance of a particular Tempsistor™ at any temperature in this table, multiply its 25°C resistance by the multiplier for that temperature.

## THE TEMPSISTOR™ KIT KLTS-1

Kit contains six **TEMPSISTOR™** devices with resistances of 10, 100, 500, 1000, 5000, and 10,000 ohms. Technical data also included

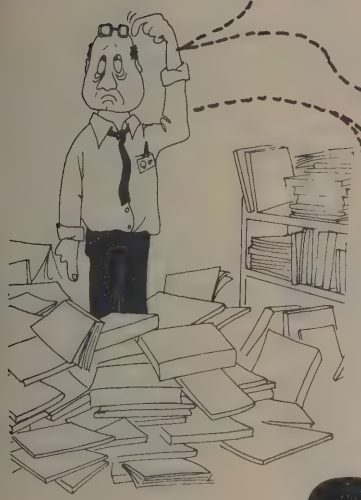
*What can I use to keep all the manufacturers' product data I receive in order?*

*What system makes filing or retrieving manufacturers' catalogs fast and easy?*



*Which file system have thousands of engineers purchased because they know it works?*

# eem FILE SYSTEM

## THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

**Here's how to order your eem FILE SYSTEM:**

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

**WRITE OR PHONE . . .**

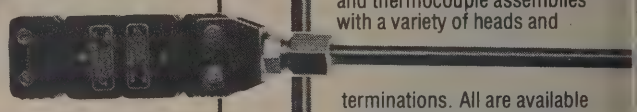
## NEW! FREE!

### THERMOCOUPLE HANDBOOK

**OMEGA'S HANDBOOK and CATALOG . . .**
Most complete listing of over 8,000 temperature measurement products. All prices included.

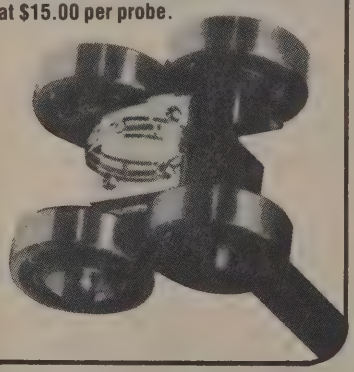
### THERMOCOUPLES AND ASSEMBLIES

OMEGA produces a broad range of thermocouples, probes and assemblies, including a full line of sub-miniature probes, bare wire-type thermocouples with a diameter as fine as 0.0005 inches, quick-disconnect type assemblies, replacement probes and thermocouple assemblies with a variety of heads and terminations. All are available for IMMEDIATE DELIVERY. Refer to FREE catalog for complete listing and prices. **Prices start at $2.50 per thermocouple.**



### SURFACE PROBES AND PYROMETERS

OMEGA offers a number of unique, patented thermocouple probes designed for measuring the precise temperature of moving and stationary surfaces. Also available are companion readout meters, portable pyrometers and companion probes for heavy duty service. New miniature thermometer and its companion probes are in stock also ALL OFF-THE-SHELF. **Prices start at $15.00 per probe.**

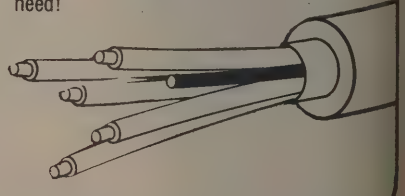


### YOUR THERMOCOUPLE PROBLEMS RECEIVE REALISTIC SOLUTIONS AT OMEGA

**Most thermocouple problems can be solved using Omega's "off-the-shelf" thermocouple products. But, if you have that SPECIAL problem requiring exotic thermocouples, multipoint/profile thermocouples, motorized switches, or anything unusual in thermometry, just send us a print. Omega will quote you realistically. Our years of experience and technology assure you QUICK DELIVERY and the right temperature sensor for the job. AND, WE KEEP OUR PROMISES.**

### THERMOCOUPLE WIRE

OMEGA's broad range of thermocouple wire encompasses just about every conceivable type available, including bare wire, teflon coated wire, metal-sheathed wire, all types of asbestos, glass, plastic covered and enameled wire in sizes from 0.0005" diameter on up. Even tungsten-rhenium, platinum and base metal alloys, plus various extension wire types . . . all ON HAND for IMMEDIATE DELIVERY. Buy as little or as much as you need!



## *FOR IMMEDIATE OFF-THE-SHELF DELIVERY CALL OMEGA . . . (203) 359-1660 or TELEX 996404*

***Ask about "Speed Service": orders shipped within 24 hours when requested. Minimum Order: $10.00.***

# THERMOCOUPLES

## ONE COMPLETE SOURCE FOR ALL YOUR OFF-THE-SHELF THERMOCOUPLE REQUIREMENTS.

### NEW! ELECTRONIC ICE POINT

The OMEGA-MCJ is an incredible Thermocouple Ice Point Reference built into a color-coded thermocouple connector! Available in 9 calibrations, converts from a "female" to a "male" connector in seconds. **Priced at $49.00.**

OMEGA also offers many other types of thermocouple references and cold junctions compensators to fill all of your needs. **Prices begin at $49.00.**

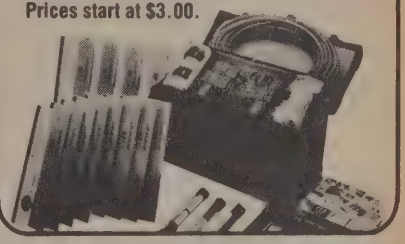
### METERS, AMPLIFIERS AND READOUTS

OMEGA's expanded line of readout meters, digital readouts for thermocouples, thermistors and RTD's, plus thermocouple amplifiers are available now for IMMEDIATE DELIVERY. **Meter prices start at $36.00.**

### THERMOCOUPLE ASSEMBLY KITS

CEMENTS AND LACQUERS

OMEGA offers an expanded variety of kits to cement fine gage thermocouples in place and to build a variety of thermocouple probes and assemblies in only minutes, available OFF-THE-SHELF. **Prices start at $3.00.**

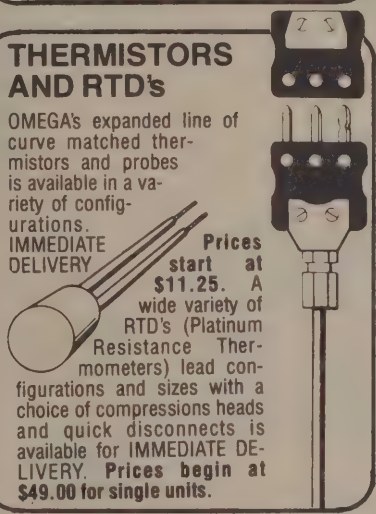


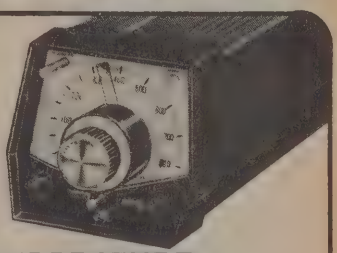
### TEMPERATURE SENSITIVE PAINTS, LACQUERS, CRAYONS, SPRAYS AND PELLETS

If you require any markers to be used as high quality surface temperature indicators, OMEGA has a vast variety of convenient forms, including paints, lacquers, crayons, sprays and pellets OFF-THE-SHELF. **Prices start at $1.00.**

### THERMISTORS AND RTD's

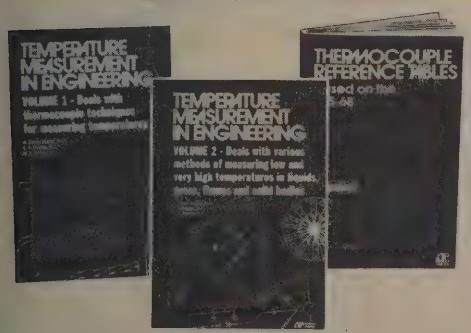
OMEGA's expanded line of curve matched thermistors and probes is available in a variety of configurations. IMMEDIATE DELIVERY **Prices start at $11.25.** A wide variety of RTD's (Platinum Resistance Thermometers) lead configurations and sizes with a choice of compressions heads and quick disconnects is available for IMMEDIATE DELIVERY. **Prices begin at $49.00 for single units.**





### TEMPERATURE CONTROLLERS

OMEGA's solid state plug-in electronic indicating temperature controllers feature full plug-in construction; plug-in relays; full-time, full-scale indication; thermocouple break protection; heating and cooling lights and easy screw terminal wiring. 3 lbs. Available for IMMEDIATE DELIVERY. **Price: $160.00.**



TEMPERATURE MEASUREMENT IN ENGINEERING

TEMPERATURE MEASUREMENT IN ENGINEERING
VOLUME 2 - Deals with various methods of measuring low and very high temperatures in Solids,
THERMOCOUPLE REFERENCE TABLES

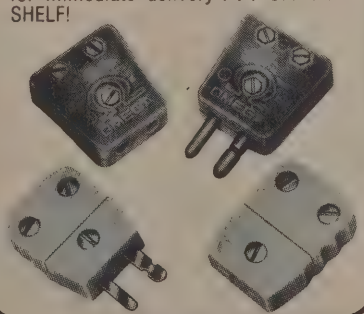
### Some of the MOST USEFUL AND NEEDED BOOKS ON TEMPERATURE MEASUREMENT!

Temperature Measurement in Engineering, volumes 1 & 2, by H. Dean Baker, E.A. Ryder & N.H. Baker, are classics in the field of temperature measurement and should be on the shelf of every serious temperature measurement researcher or engineer. Vol. 1 $4.95, Vol. 2 $9.95.

Thermocouple Reference Tables based on the IPTS-68 completely revised and unabridged reference tables were developed the National Bureau of Standards; in a handy pocket editions. $2.95.

### THERMOCOUPLE CONNECTORS

Omega has the MOST complete selection of Thermocouple CONNECTORS offered today! We can fill your every connector need . . . from Ultra-High Temperature Ceramic Connectors, to our new extra small Sub-Miniature Connectors. And a full selection of every needed thermocouple accessory is also available . . . connectors and accessories are available for immediate delivery . . . OFF-THE-SHELF!



### "OMNI-AMP" THERMOCOUPLE AMPLIFIERS

Just plug a thermocouple into Omega's unique new miniature, portable amplifier. A choice of ranges will enable you to boost any millivolt signal from unity to 100 times. Low cost and inexpensive operation from two small mercury batteries eliminates need for thermocouple and meter impedance matching. Drives any readout device with 1000 ohms or greater input impedance. Lab models too! NOW . . . OFF-THE-SHELF! Nothing like it is available from any other source. **Prices start at only $95.00.**

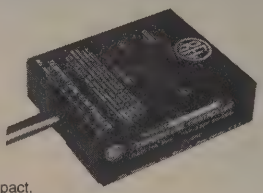
## Temperature Measurement and Control Equipment

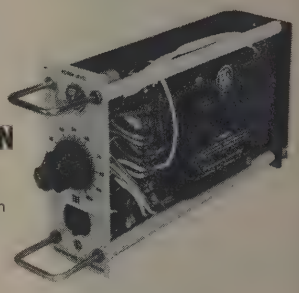
### MINIATURE COMPONENT-TYPE PROPORTIONAL CONTROLLERS



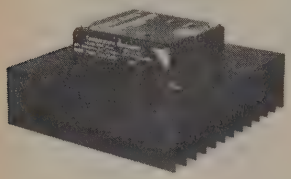
RFL Models 70A, 72A and 75A are compact, nonindicating units capable of precision control of electrically energized heating applications. 70A & 72A units feature proportional bandwidth and coarse and fine temperature set point adjustments. Model 75A low cost model has a single set point adjustment and a fixed, narrow bandwidth.

Current to heating load is controlled by all solid-state components for reliable long life performance. Operates into resistive loads ranging from 1 to 15 amperes using a negative temperature coefficient sensor (Thermistor) as the sensing element. Model 70A's mode of operation is phase angle firing. Models 72A and 75A are zero voltage firing.

### PLUG-IN SYSTEM MODULES FOR MULTIPOINT OPERATION



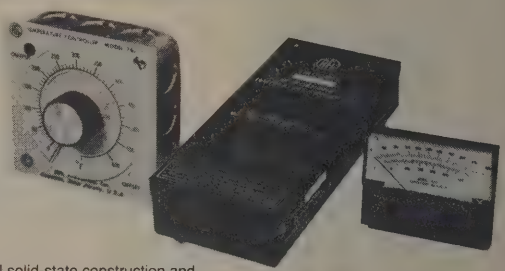
By combining RFL 70A Series Controllers with RFL's new TB-1 Plug-in Modules and TB-3 Chassis, a complete 8-point "do it yourself" control system is possible.



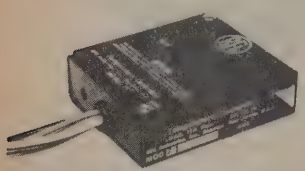
### 9200 WATTS

RFL Model 7040 is a completely solid-state, high load capability, proportional controller. The controller, while small in size, will control resistive loads from 100 to 9,200 watts. Thermistor sensors operating between 8000 ohms and 100 ohms are used providing an operating range of -70°C to +450°C.

### NEW MODEL 76 THERMOCOUPLE/RTD SENSING CONTROLLER

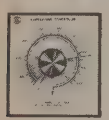


Wide range, all solid-state construction and high accuracy are just a few of the features of the new Model 76. Options include direct setting dials, full range temperature indicator, output level indicator and assorted sensor configurations. Specs: Accuracy to +0.1°C, loads from 1 to 15 amps — 115 or 230 volts, zero voltage firing proportioning mode, size 7¾" × 3⅜" × 1⅝" high.



### DIRECT-SETTING, RTD (WIRE) SENSING, PRECISION CONTROLLER

RFL Model 71A is a completely solid-state, null balance, visual set point, proportional temperature controller. The controller is capable of precisely controlling resistive heaters with one RTD type sensor throughout a visual set point temperature range of 0°C to +500°C (+32°F to +932°F). The controller, while small in size, will control resistive loads from 100 to 3000 watts.



Direct-setting control dial 42065 (Optional)

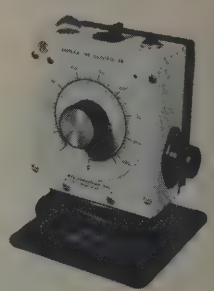
### PORTABLE 800 SERIES TEMPERATURE CONTROLLERS



Available with RFL Models 70A, 71A, 72A, and 75A Temperature Controllers. An ideal unit to evaluate the effectiveness of closer temperature control of your existing equipment. These convenient units consist of the solid-state controller, a control box containing an ON/OFF switch, power level indicator, load-output socket (115 or 230V), sensor jack, set point knob and scale, line fuse and an 8-foot line cord. Select probes from table below.

**RFL SENSORS**

| SENSOR | RANGE (°C) | | | |

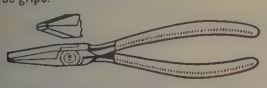
## Specially Designed ELECTRONICS PLIERS

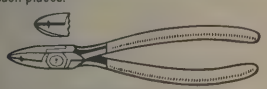
Four matched, long-reach pliers with precision matched jaws, hand honed cutting edges. Drop forged of special analysis steel, properly heat treated. Polished finish. Smooth, dipped plastic, blue grips.

| No. | Size | Net |
|---|---|---|
| 718G | 8″ | $6.94 |
| 728G | 7½″ | 8.10 |
| 738G | 8″ | 6.94 |
| 748G | 8″ | 6.94 |



### NO. 718G FLAT NOSE PLIERS

Precision-matched jaws give firm grip in hard-to-reach places.

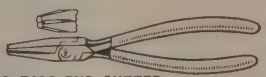


### NO. 728G DIAGONAL CUTTER

Patented wire-stripping notch that really works!

### NO. 738G ROUND NOSE PLIERS

You can pick up a hair with these precision machined points.



### NO. 748G END CUTTER

Fine enough to cut a human hair, sturdy enough to cut 12 gauge copper wire.

## SCREWDRIVERS

Blades forged from tough chrome vanadium steel. Tips ground lengthwise for greater end strength and snug fit in screw slot. Opaque blue plastic (UL) handles are shockproof, breakproof and shaped for non-slip grip.

### ROUND SHANK

| No. | Blade Size, In. | List | No. | Blade Size, In. | Net |

## SCREWDRIVER KIT

Pocket-size, handy bench sets, color coded. Special E-Z Grip handle included.

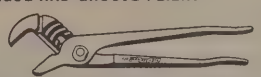
**SCREWDRIVER KIT SD-5**
**Includes:**
**5 Screwdrivers:**
3/32″, 1/8″, 5/32″, 3/16″, 1/4″
**3 Phillips Head:**
**No. 0, No. 1 and No. 2**
**Net: $9.98**

## NUTDRIVER KIT

Pocket-size, handy bench sets, color coded. Special E-Z Grip handle included.

**NUTDRIVER KIT ND-1**
**Includes:**
**10 Nutdrivers:**
3/32″, 1/8″, 5/32″, 3/16″, 7/32″, 1/4″, 9/32″, 5/16″, 11/32″, 3/8″
**Net: $13.64**

## TONGUE AND GROOVE PLIERS



The **original, genuine** tongue and groove plier. Patented, non-slip undercut channels. Patented reinforcing rib for extra strength. Dipped plastic grips optional at slight extra cost.

| No. | Size | Adjust | Capacity | Net |
|---|---|---|---|---|
| 420 | 9½″ | 5 | 1½″ | $6.14 |

## SLIP JOINT PLIERS

**Thin Nose.** Polished steel. Wire cutting shear

| No. | Size | Net |
|---|---|---|
| 516 | 6″ | $4.98 |

**With Side Cutter.** Polished steel. Precision tool with fine cutting edge.

| No. | Size | Net |
|---|---|---|
| 537 | 7″ | $8.10 |

**Heavy Duty With Cutter.** Finest quality. Polished steel.

| No. | Size | Net |
|---|---|---|
| 546 | 6″ | $4.98 |
| 548 | 8″ | 5.78 |
| 5410 | 10″ | 6.14 |

## TOOL HOLSTERS

Highest quality top grain leather. Stress points reinforced with rivets. Convenient knife or wrench snap.

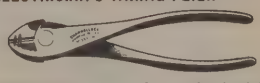
| No. | Size | Pkts. | Net |
|---|---|---|---|
| 1 | 9½″ x 8½″ | 5 | $11.16 |
| 2 | 9¾″ x 10½″ | 5 | 12.42 |

## WIREMASTER PLIER

Finest wire-cutting plier ever made. Joint rivet closer to cutting provides 40% more cutting power than standard design pliers. Special enclosed-joint construction holds cutter edges in perfect alignment for life of plier. Dipped plastic grips optional at slight extra cost.

| No. | Size | Net |
|---|---|---|
| 349 | 9″ | $11.78 |

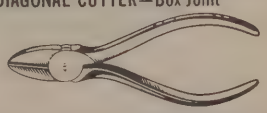
## ELECTRICIAN'S WIRING PLIER



Triple-use wiring plier: Cuts, strips insulation, loops wire. Patented wire stripping notches strip insulation from 14 and 12 gauge copper wire quickly, cleanly. Dipped plastic grips optional at slight extra cost.

| No. | Size | Net |
|---|---|---|
| 337-W | 7″ | $7.86 |

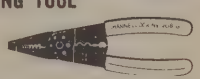
## DIAGONAL CUTTER—Box Joint



Precision honed cutting edges. Polished steel finish. Knurled grips. Dipped plastic grips optional at slight extra cost.

| No. | Size | Net |
|---|---|---|
| 435 | 5″ | $6.36 |
| 436 | 6″ | 6.94 |
| 437 | 7″ | 7.76 |

## WIRING TOOL



Five tools in one: Long nose plier. Wire stripper. Wire cutter, Bolt cutter. Wire crimper. Dipped plastic grips.

| No. | Size | Net |
|---|---|---|
| 908G | 8¼″ | $8.90 |

## ADJUSTABLE WRENCHES

Drop forged of special analysis steel. Chrome plated. Dipped plastic grips optional at slight extra cost.

| No. | Size | Cap. | Net | No. | Size | Cap. | Net |
|---|---|---|---|---|---|---|---|
| 804 | 4″ | ½″ | $6.14 | 810 | 10″ | 1¼″ | $9.02 |

|---|---|---|
| 10 | 4″ | $8.44 |

## SUPERIOR PLASTIC GRIPS

For maximum hand comfort, durable molded plastic grips. Blue color for good visibility, reduce plier loss. Easy to install. Order by desired grip size.

| Plier Size | Grip Size | Net |
|---|---|---|
| 6″ | Small | $1.18 |
| 7″ | Medium | 1.28 |
| 8″, 9½″, 10″ | Large | 1.40 |

# SOLDERING + DESOLDERING + RESOLDERING

FOR HOME AND INDUSTRY — DSV® PRODUCTS

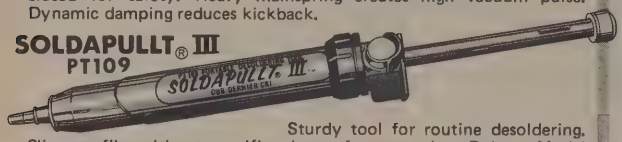
## HOW TO *Choose* A SOLDERING INSTRUMENT

### SOLDAPULLT® DESOLDERING TOOLS

**DELUXE DS017**

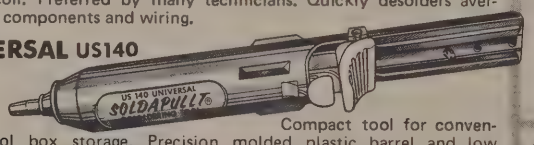
Extremely rugged for volume desoldering. Heavy duty plastic barrel and trigger housing for long, dependable operation. Simple twist-lock separation for fast cleaning. Oversize plunger fully enclosed for safety. Heavy mainspring creates high vacuum pulse. Dynamic damping reduces kickback.

**SOLDAPULLT® III PT109**



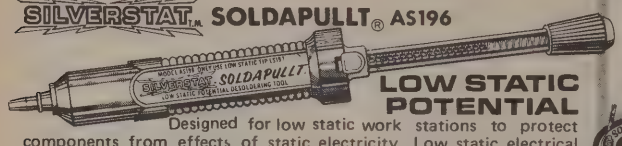
Sturdy tool for routine desoldering. Slim profile without sacrifice in performance has Deluxe Model features; fully enclosed plunger shaft; dynamic damping for very low recoil. Preferred by many technicians. Quickly desolders average size components and wiring.

**UNIVERSAL US140**



Compact tool for convenient tool box storage. Precision molded plastic barrel and low mass plunger creates rapid vacuum impulse with negligible recoil. Three position plunger adjusts loading span to fit large or small hands. Ample vacuum for most circuit board desoldering requirements.

**SILVERSTAT™ SOLDAPULLT® AS196**

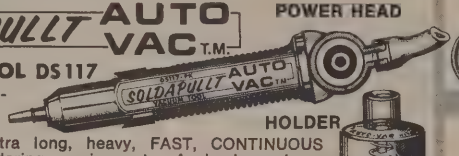


**LOW STATIC POTENTIAL**

Designed for low static work stations to protect components from effects of static electricity. Low static electrical characteristics providing ground path via operator, reducing discharge to susceptible components. Special material protects operator from a direct electrical short or shock.

**SOLDAPULLT AUTO VAC™ POWER HEAD**

**VACUUM TOOL DS117**



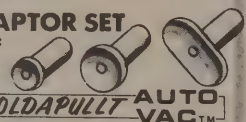
Completely-AUTO-MATIC Vacuum Desoldering Tool. Designed for extra long, heavy, FAST, CONTINUOUS production desoldering requirements. A simple push on the trigger will vacuum up solder-terminal point after point, WITHOUT manual reloading.

**HOLDER**

**POWER HEAD and HOLDER are offered as a set DS117**

**HOLDER** Simply insert Desoldering Tool in Holder pushing trigger. Presto! Tool is SELF-CLEANED! Vacuum Pump VP171 powers both units. New-clean-fast-safe-efficient = time + money saver!

**SP198 PICKUP ADAPTOR SET**

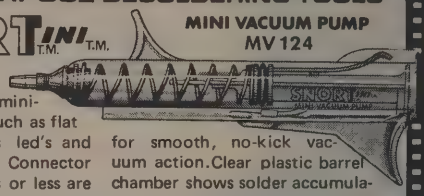


Simplifies pickup of small components

FOR USE ONLY WITH DS117 SOLDAPULLT AUTO VAC™

### SPECIAL PURPOSE DESOLDERING TOOLS

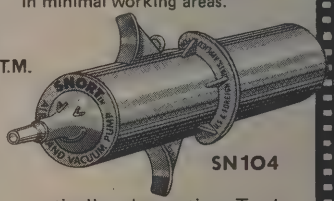
**SNORT™ MINI™ MINI VACUUM PUMP MV 124**



Designed expressly for desoldering micro-miniature components, such as flat pac IC's, pin diodes led's and 28-30 AWG wiring. Connector pins on .100 centers or less are easily desoldered. Features are resilient teflon tip, spring arrestor plunger, with de-acceleration tab for smooth, no-kick vacuum action. Clear plastic barrel chamber shows solder accumulation at all times. Easy tool to manipulate for maximum dexterity in minimal working areas.

**SNORT™**

**AIR and VACUUM PUMP**

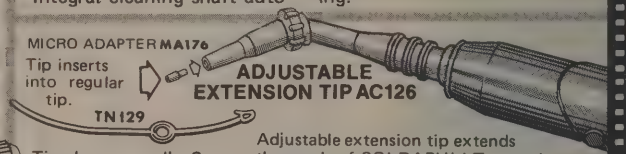


Ideal tool for occasional TV or Hi-Fi repairs and hobby projects. Operates similarly to bellows or squeeze bulb. Two-piece plastic construction with built in spring. Integral cleaning shaft automatically cleans tips. Tool snaps apart for routine cleaning.

**MICRO ADAPTER MA176**

Tip inserts into regular tip.

**ADJUSTABLE EXTENSION TIP AC126**



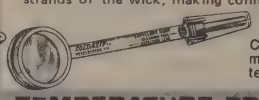
**TN129**

Tip cleaner needle. Special design for fast tying of wire bundles or components with lacing cord.

Adjustable extension tip extends the reach of SOLDAPULLT® and SOLDAVAC® Tools. 360° swivel tip allows angular adjustment without loss of vacuum. Quickly snaps on or off regular tips.

**SOLDASIP® RESOLDERING WICK SW091**

Place SOLDASIP® Wick on solder connection, pressing soldering iron tip against the wick. Solder will flow away from connection and into strands of the wick, making connection ready for removal or resoldering.



**BURNISHING TOOL BT028**

Combination of fine abrasive, high quality magnifying lens plus hi power lens in protective cap.

### TEMPERATURE PROBES and ACCESSORIES

**LONER® TEMPERATURE PROBE TP110**

Essential for obtaining tip temperature. Sensitive probe measures temperature on any flat or curved surface. Slim handle, long tip reaches into recessed areas. Burn resistant cord. **Use only with T1128**

**LONER® DIGITAL TEMPERATURE INDICATOR TI128**

Precision instrument temp. range 0°F to 1600°F Integrated circuit A/D processing ± 0.5°F accuracy. 1/2" high characters. Type J lead. 115 or 220 VAC — 50 Watts.

**LONER® ANALOG (DIAL) METER LTM95**

Dial meter, accurate °C and °F scale covers soldering tip temp. range 400°F to 900°F. Type J. Thermocouple lead, calibration seals included.

## Triple Mate™ PERFECT SOLDERING TIPS

**Designed Exclusively for the LONER® and ERSA Soldering Tools**

Work Rated as GOOD, BETTER or BEST for:
1. HEAT TRANSFER
2. DURABILITY
3. THERMAL LOAD IN WATTS

**IMPORTANT:** WHEN ORDERING TIPS, ALWAYS SPECIFY MODEL NUMBER OF YOUR LONER® OR ERSA™ TOOLS
EXAMPLES: LONER MODEL 950-950A-950B ERSA Tip16

## LONER® SOLDERING INSTRUMENT

*in a class by itself . . . for you alone!*

Model No. 950 CL080

UL LISTED TIP TO PLUG

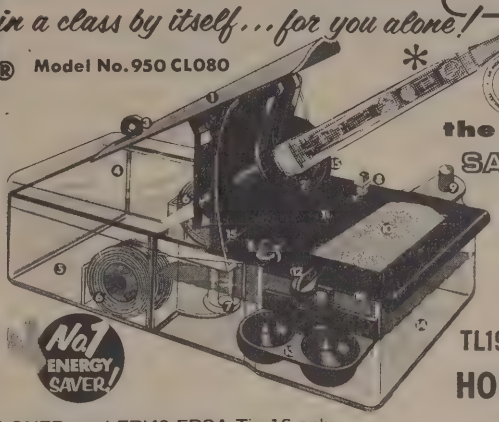
LONER® STORY

**FEATURES:** a soldering instrument with nothing to hide, we left everything in plain view so that you can best see how a soldering instrument differs from a soldering iron. One instrument performs most soldering cycles from heavy to micro termination — The LONER® SOLDERING INSTRUMENT.

**FAST ACCURATE SOLDERING CYCLES:** After a fast 45 second warm-up, each soldering cycle is automatically thermally balanced to match each termination load (range: 590°F to 750°F) with the precise preset soldering temperature.

**ENERGY SAVER:** High power is consumed ONLY during soldering operation and NOT during energy saving idling cycle.

**BASIC DESIGN:** Allows use of a wide variety of tip styles to simplify a maximum of techniques required in working on today's electronic hardware.



Not ENERGY SAVER!

*For UL Listed CL080 Closed Loop LONER® and ERI40 ERSA Tip 16 only

## B-170 *Base1*

**the first FULLY engineered SAFELOCK idle-rest® SOLDERING STATION**

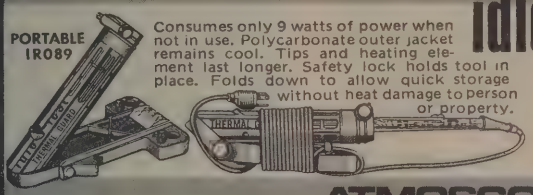
## General Purpose SOLDERING TOOL HOLDER TL194 idle-rest®

**HOLDS MOST TOOLS**

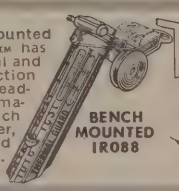
## idle-rest®

PORTABLE IR089

Consumes only 9 watts of power when not in use. Polycarbonate outer jacket remains cool. Tips and heating element last longer. Safety lock holds tool in place. Folds down to allow quick storage without heat damage to person or property.



Bench mounted IDLE-REST™ has same thermal and Polycarbonate construction as portable model. Threaded bushing allows permanent installation on bench top. Two spools of solder, accessory apron and sponge included.



BENCH MOUNTED IR088

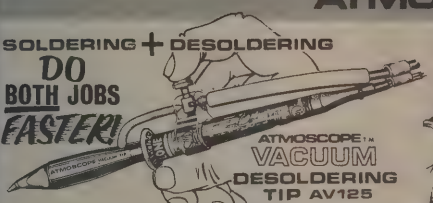
SOLDER AND WICK

TWIP™ T.M. AT FINGER TIPS

TW108

## ATMOSCOPE T.M. ACCESSORIES

SOLDERING + DESOLDERING
DO BOTH JOBS FASTER!

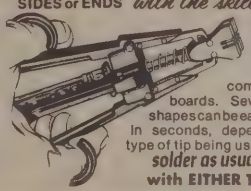


ATMOSCOPE™ VACUUM DESOLDERING TIP AV125

Converts LONER to a dual soldering and desoldering tool. Large mass head provides high-heat reserve for continuous production line work. Unbreakable desoldering chamber allows fast & safe handling. Simple ONE hand, ONE finger operation. NO FOOT PEDAL NEEDED.

## KLATCH™ DIP EXTRACTOR DE180

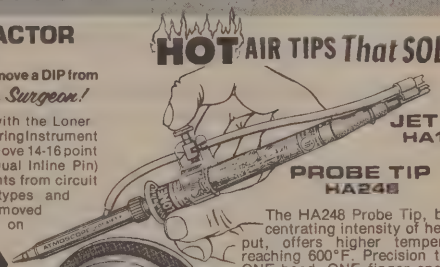
QUADRAMATIC Action allows YOU to remove a DIP from SIDES or ENDS *with the skill of a Surgeon!*



Use with the Loner Soldering Instrument to remove 14-16 point DIP (Dual Inline Pin) components from circuit boards. Several types and shapes can be easily removed in seconds, depending on type of tip being used.

*solder as usual with EITHER TIP*

## HOT AIR TIPS *That SOLDER*



JET TIP HA120

PROBE TIP HA248

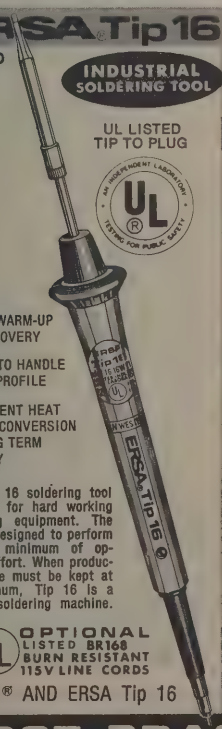
The HA248 Probe Tip, by concentrating intensity of heat output, offers higher temperatures reaching 600°F. Precision trigger, ONE hand, ONE finger operation, NO FOOT PEDAL NEEDED! Operates on low pressure air. Solder as usual.

## ERSA Tip 16

ER140

INDUSTRIAL SOLDERING TOOL

UL LISTED TIP TO PLUG



- FAST WARM-UP AND RECOVERY
- EASY TO HANDLE PENCIL PROFILE
- EFFICIENT HEAT ENERGY CONVERSION FOR LONG TERM ECONOMY

The Tip 16 soldering tool is built for hard working soldering equipment. The tool is designed to perform with a minimum of operator effort. When production time must be kept at a minimum, Tip 16 is a rugged soldering machine.

OPTIONAL LISTED BR168 BURN RESISTANT 115V LINE CORDS

LONER® AND ERSA Tip 16

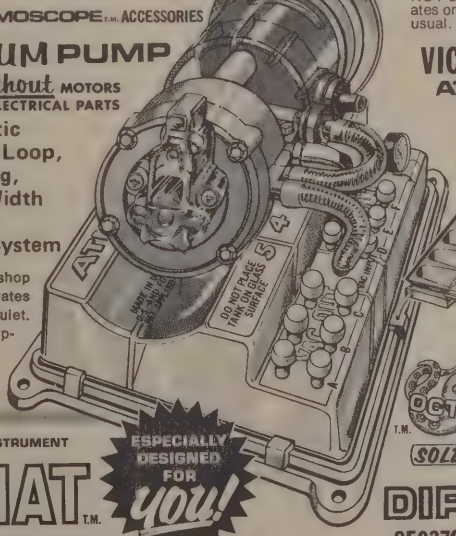
IDEAL SOURCE OF VACUUM FOR ATMOSCOPE™ ACCESSORIES

## ATMOSCOPE™ VP171 VACUUM PUMP

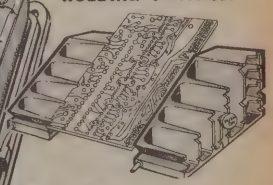
**HIGH VACUUM** without MOTORS or ELECTRICAL PARTS

**100% Pneumatic Automatic Closed Loop, Self-Regulating, Variable Pulse Width Modulation Vacuum Control System**

Vacuum to 22" mercury from shop air supply of 90 to 120 PSI. Operates on demand, compact, whisper quiet. Twelve manifold outlets allow operation of several vacuum tools from one pump.



## VICE less VICE ATMOSCOPE T.M. HF172 VACUUM HOLDING Fixtures



## OCTAVAC™ ACCESSORIES

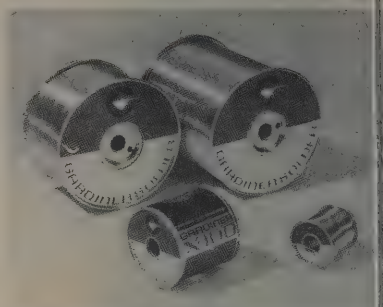
## MOST PRACTICAL SOLDER HANDLING TOOLS

# GARDINER SOLDERING PRODUCTS

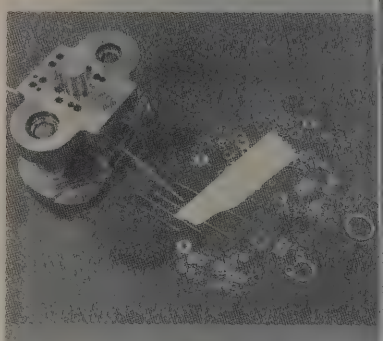
## GARDINER SOLID & FLUX CORED WIRE SOLDERS

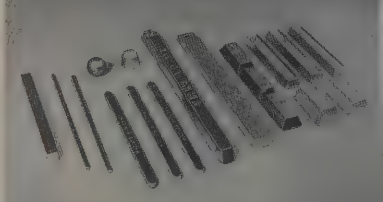
**Solid Wire Solder:** Gardiner solid wire solders are uniform in diameter and alloy and are equal to flux cored solders in purity and quality. Made in all standard diameters.
**WW-300 Rosin Cored Wire Solder:** Pure water-white rosin flux core with non-conductive, non-corrosive, non-hygroscopic flux soldering residues which need not be removed. As with all Gardiner flux cored wire solder, WW-300 is available in any solder alloy and in a broad range of wire sizes and flux core percentages. Conforms to Federal Specification: QQ-S-571, Type R.
**XM-200 Mildly Activated Rosin Cored Wire Solder:** For use with copper, silver, gold, cadmium plate, tinplate and other easily solderable metals whose surface tarnish is not easily removed by natural rosin but where a highly activated flux may present latent complications. Conforms to Federal Specification: QQ-S-571, Type RMA.
**X-45 Highly Active Rosin Cored Wire Solder:** For difficult-to-solder electronic applications. Gardiner's most active rosin core with water resistivity in excess of 50,000 Ohms/Cm. Conforms to Federal Specification: QQ-S-571, Type RA.
**X-55 Activated Rosin Cored Wire Solder:** For super-critical electronic circuits. Extra refinement reduces remaining residual matters to an absolute minimum. Specially formulated activator is "burned off" during soldering to leave only pure rosin residue. Conforms to Federal Specification: QQ-S-571, Type RA.
**X-100 Activated Rosin Cored Wire Solder:** For speed soldering of tarnished electronic parts. Possesses extra fast wetting action. Ideally suited to brass, bronze, copper, silver, gold, cadmium plate, terneplate and tinplate. Conforms to Federal Specification: QQ-S-571, Type RA.
**Mildly Activated and Activated Solder Pastes:** For electrical/electronic soldering. Pre-alloyed, pulverized soft solder is evenly dispersed in rosin flux to produce a homogeneous easy-to-use solder paste. Suspension of solder particles in the flux medium remains stable up to 27°C (80° F). Available in any solder alloy and in particle sizes from 200 to 325 mesh, Mildly Activated and Activated Rosin Flux Pastes adhere to Federal Specification: QQ-S-571, Type RMA or Type RA.
**GSP-5800 Organic and GSP-6800 Inorganic Chloride Solder Pastes:** For non-electronic applications such as flashing, plumbing and sheet metal. The finely granulated pre-alloyed solder particles are uniformly dispersed in a special flux medium, which assures them a non-Newtonic condition up to 27° C (80° F) for GSP-5800 and up to 28° C (82° F) for GSP-6800. Both types are available in all solder alloy and in any particle size from 200 to 325 mesh. Flux residues are water-soluble.



## GARDINER SOLDER PREFORMS

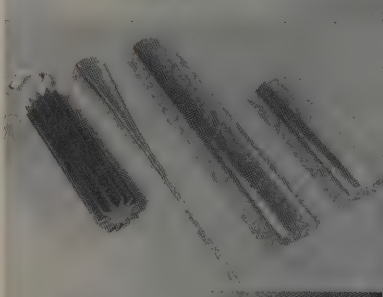
**Solid or Flux Cored Solder Preforms:** Developed to meet the critical demands of high-speed, mass-production soldering, especially in the electronics industry. Preforms are used to great advantage in both fully automated and semi-automatic production setups. They assure absolute uniformity and a high degree of production control. Being of predetermined size, shape, (rings, washers, discs, sleeves, pellets or segments), alloy, flux type and percentage, they yield an extremely high rate of reliability by eliminating the factor of human error. Along with reliability, solder Preforms make possible the cost saving advantages of automated production.





## GARDINER PURE-A-LOY BAR SOLDERS & ANODES

**PURE-A-LOY Cast and Extruded Bar Solders:** As its name implies, PURE-A-LOY is pure solder of the highest order yet attainable on a commercial basis. Supplied in bars, ingots and anodes, its prime purpose is to meet extremely critical demands of the electronics industry where soldering dependability is an absolute must. PURE-A-LOY, with non-metallic inclusions not exceeding 0.0010% (10 PPM) and sulphur content less than .0005% (5 PPM), meets and exceeds QQ-S-571 and ASTM specifications.
**PURE-A-LOY Extruded Anodes:** The extrusion process for PURE-A-LOY anodes insures a complete homogeniety of the alloy and a fine grain structure. Such anodes corrode uniformly and the life of the anode is thus prolonged. This in turn provides a uniform plating of the work-piece, because the number of metallic ions entering the solution at the anode during the electrolysis tends to be equal to that leaving the solution at the cathode. On this behavior depends the stability of the electrolyte. The Gardiner PURE-A-LOY anodes offer the following advantages: 1. A uniform oxidation and maximum life of the anodes. 2. Because they are cleaner and purer they allow the use of higher current densities—faster plating. 3. A reduction of sludging and necking. Necessity for bagging reduced. 4. Bright and uniform plating with a high density of solder coating.



## GARDINER TEST SERVICES

**Gardiner Test Services:** Gardiner's laboratories are well equipped: atomic absorption and colorimeter spectrophotometer techniques are but a few of the methods used by Gardiner in the daily routine inspections of raw materials and finished products for quality compliances. Gardiner has also instituted a Solder Alloys Analysis Program. These laboratories are also staffed with specialists, well versed in the science of their respective fields; be it in chemical analysis of inorganic or organic materials, in the metallurgy of soldering or chemistry of soft soldering fluxing.

## ZEVA PLANAR SOLDERING MACHINES & SYSTEMS

**Zeva Planar Soldering Machines and Systems:** Small, automatic, high-speed laboratory machines fully programmable. Low maintenance cost, low solder usage, no bridges, icicles. No pumps, no oil and one-tenth the dross of wave machines. Soldering time and transport speed are independently adjustable. Complete customer list available.

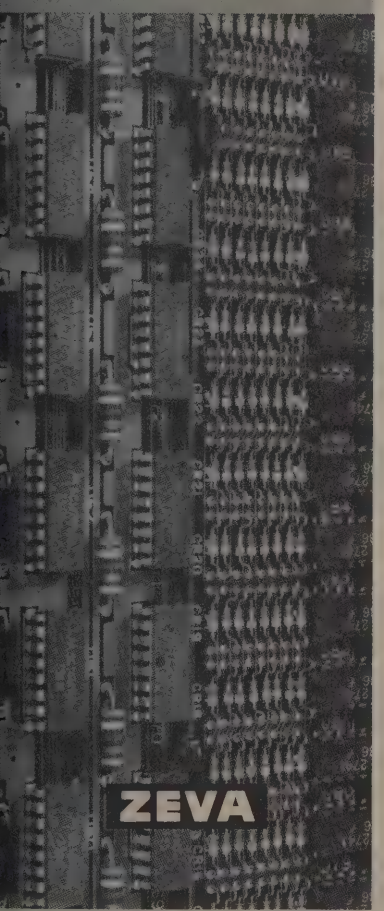
# GARDINER SOLDERING PRODUCTS



## GARDINER FLUXES & RELATED PRODUCTS

**Series GF-1000 Water-white Rosin Flux:** Designed for easy-to-solder metals leaving only minimal easily removable residue. Conforms to Mil-S-14256, Type R, with a flash point of 93° F, open cup.

**Series GF-1100 Water-white Rosin Flux:** Same as GF-1000 but having a much faster drying action.

**Series GF-1200 Mildly Activated Rosin Flux:** Compounded with Electronic Grade Rosin. Its ability to remove the oxide film of the very-easy-to-solder metals group is far better than that of the two previous flux series or any R type flux. Conforms to Mil-S-14256, Type RMA.

**Series GF-2000 Activated Rosin Flux:** Highly stable flux having an excellent wetting action and a high flash point, 97° F, open cup, for the high production soldering and high reliability of electronic circuitry.

**Series GF-2100 Activated Rosin Flux:** For foaming application with an outstanding ability to remove tenacious tarnish films from solderable metals.

**Series GF-2200 Activated Rosin Flux:** Designed for the very-hard-to-handle soldering jobs. Compounded with activated rosin and a blend of alcohols, these fluxes, when properly applied in commercial electronics applications, leave a non-corrosive residue after soldering.

**Series GF-2300 Activated Rosin Flux:** A non-halogen activated rosin flux for automatic soldering where components and boards are very solderable. Under normal conditions its residue is non-corrosive, non-conductive and non-hygroscopic.

**Series GF-2400 Activated Rosin Flux:** A non-halogen activated rosin flux with excellent air drying characteristics. It is often used as a printed circuit board sealer to prevent oxidation before soldering and as a reflow flux for soldering integrated circuits to a circuit board.

**Series GF-2400F Mildly Activated Non-Halogen Rosin Flux:** Chemical properties similar to GF-2400, but designed for foaming application.

**Series GF-2500 Activated Rosin Flux:** The liquid form of the solid activated Rosin Flux used in Gardiner X-45 cored wire solder. This liquid flux is widely used throughout the electronic industry.

**Series GF-2600F Activated Rosin Foam Flux:** Designed for foam applications follows the requirements of Federal Specification QQ-S-571 for RA. It can also be used with any method of application. The high flash point, 97° F, open cup, provides a greater margin of safety.

**Series GF-2700 Activated Rosin Liquid Flux:** Meets the Mil-S-14256 amendment of June 1975. The minimum Water Extract Resistivity is 50,000 Ohm/Cm. It can be applied by any conventional means.

**Series GF-2800 Activated Rosin Flux:** Having a low rate of evaporation and a flash point of 147° F, open cup, makes this flux ideal for the soldering of electronic components. Conforms to QQ-S-571, amendment of June 1975.

**Series GF-5100 Aquasolv Organic Flux:** Formulated to remove from metals to be soldered the tarnish films that resist the action of activated Rosin Fluxes. Flux residues remaining after soldering are water soluble and are easily removable in lukewarm demineralized water.

**Series GF-5300 Aquasolv Organic Flux:** Developed for the automated soldering of printed circuit assemblies and printed circuit cards using the Hydro-squeegee Process. Used on the electronics applications where residues are completely removed, it is suitable for low temperature soldering.

**Series GF-5400 Aquasolv Organic Flux:** A liquid organic flux whose soldering residues are easily and completely soluble in water. This flux has been specially formulated for the soldering of electronic components that are compatible with water.

**Series GF-5500 Aquasolv Organic Flux:** Designed for reflow soldering where radiant heat is used to melt/reflow the plating of solder or tin-plated printed circuit boards. Its soldering residues are water soluble and are easily removable in lukewarm demineralized water.

**Series GF-8000 Surf-Klean Copper Cleaner:** A solution designed for the removal of unusually thick tarnish films from copper or nickel leads, or printed wiring prior to soldering.

**Series GF-8500 Surf-Seal:** An organic lacquer for protecting solderability of printed circuit boards during extended storage. Protective coating is compatible with all rosin fluxes.

**GFT-3000 Rosin Flux Thinner:** For GF-2000 Activated Rosin Flux.

**GFT-3100 Rosin Flux Thinner:** For GF-1000 WW Rosin Flux.

**GFT-3200 Rosin Flux Thinner:** For organic fluxes GF-5132 and GF-5425.

**GFT-3300 Rosin Flux Thinner:** For GF-2100F.

**GFT-3400 Rosin Flux Thinner:** For GF-2300 and GF-2400 Activated Rosin Fluxes.

**GFT-3500 Rosin Flux Thinner:** For GF-2400F and GF-2600F Activated Rosin Fluxes.

**GFT-3600 Rosin Flux Thinner:** For GF-1100 and GF-2200.

**GFT-3700 Rosin Flux Thinner:** For GF-2700F.

**GFT-3800 Rosin Flux Thinner:** For GF-2200.

**GFT-3900 Rosin Flux Thinner:** For GF-2800F.

**GFR-4000 Rosin Flux Remover:** A non-flammable, rosin residue remover having a low evaporation rate. May be used in a vapor degreaser. Biodegradable.

**GFR-4060 Rosin Flux Remover:** Similar to 4000 but a little more active. Biodegradable.

**GFR-4100 Rosin Flux Remover:** A low boiling solvent cleaner and flux remover that removes ionic as well as non-ionic soils. The low boiling point and fast drying action renders its use in a vapor degreaser operation less expensive than the use of other similar products with a high boiling point.

**GFR-4300 Rosin Flux Remover:** The same as 4100 but it permits the cleaning of polycarbonate resins without visible effects.

**GFR-4420 Rosin Flux Remover:** Dissolves rosin residues, ionic activators, greases, oils and picks up any residual water from the work-piece. Can be used in a vapor degreaser operation.

# CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
# DER PRODUKTKATALOG FÜR ELEKTRONIKER
# ELECTRONIC ENGINEERS CATALOGUE

**The 1978 edition is out...and the response is in...**
**IMMEDIATE AND OVERWHELMING**

ACCEPTANCE

The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to—and from—Western Europe.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 product headings & cross-references alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

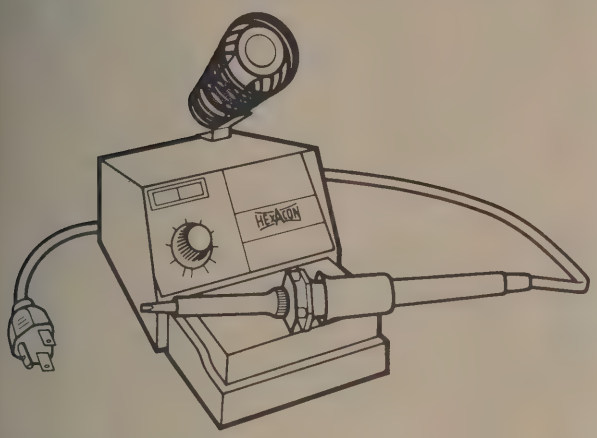
United Technical Publications, Inc., Div. of Cox Broadcasting Corp. 645 Stewart Avenue, Garden City, New York 11530 / 516 222-2500

# SOLDERING IRONS

**VOLTAGE RANGE: 6 to 240 • OPERATE IDENTICALLY ON A.C. OR D.C., ANY CYCLE**
**STANDARD VOLTAGES 110/120, 220/240 • SPECIFY VOLTAGE ON ORDER**

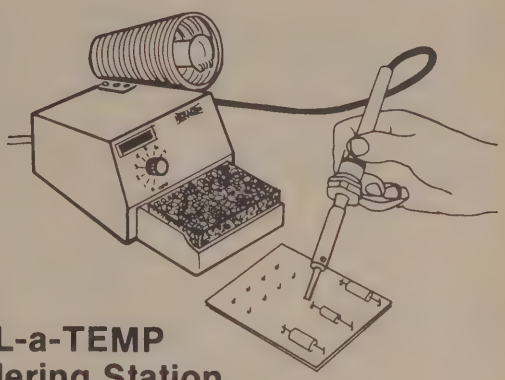
Equipped with extra flexible, high temperature approved cords. Three wire cords standard with all irons. Nickel chromium replaceable heating elements, insulated with finest mica, protected by rugged outer housing. Replaceable tips.

**POSI-GROUND® AVAILABLE TO PROTECT VOLTAGE SENSITIVE COMPONENTS**



## THERM-O-TRAC
### Controlled Heat Soldering Stations

- Temperature sensor "up front" where it belongs
- All solid state electronic switching
- Dial selected temperature to 850°F
- Close control—within 10°F
- No magnetic field or voltage leakage—safe for sensitive circuitry
- Wide selection of XTRADUR Long Life Tips
- Model 1001 500-720°F
- Model 1002 525-850°F



## DIAL-a-TEMP Soldering Station

- Isolated, low voltage power supply
- Posi-Ground® construction eliminates all voltage leakages for protection of sensitive components
- Internally fused for added safety
- Infinitely variable temperatures from 350°F to 950°F easily selected by dialing
- On-Off Switch with Indicator Light
- Five models available: No 1511 (1/8" screw tip), 1520 (3/16" plug tip), 1521 (1/8" plug tip), 1524 (1/4" plug tip), 1575 (1/16" micro tip).
- No special tip requirements—uses standard Xtradur and Durotherm Long-Life plug tips

## HEXACON MINIRONS

- Rugged quality construction that will withstand production line conditions
- Slim-line case promotes maximum visibility
- Lightweight—perfect balance
- Full wattage range 15 to 60 watts

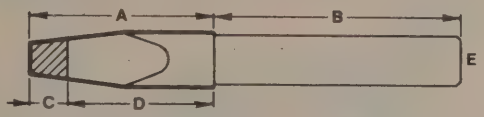
# SOLDERING IRON TIPS

**DUROTHERM** Iron plated with patented stainless steel bonded to copper shank. Precision ground to tolerance of .001. Lectrotin on working surface and immunized over entire surface.

A. Heavy Iron Coating
B. Scale resistant Stainless Steel
C. Pretinned Lectrotin
D. Immunized Nickel and Chrome
E. Iron, Nickel and Chrome coated



**XTRADUR** Heavy Iron plated over OFHC Copper alloy with shank precision ground to tolerance of .001. Pretinned with Lectrotin process and immunized with Nickel and Chrome.

A. Heavy Iron Coating
B. Iron, Nickel and Chrome
C. Pretinned Lectrotin
D. Immunized Nickel and Chrome
E. Iron, Nickel and Chrome coated

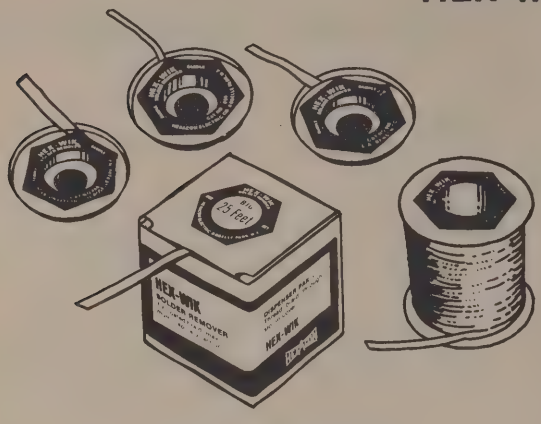
# HEXACON SOLDERING ACCESSORIES HEXACON

## HEX-WIK the superior solder removal braid



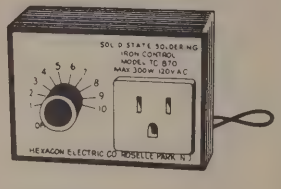
Meets all Military and Government specifications

- The easiest and most economical method of desoldering printed wiring boards without measling, delamination or lifted pads.
- Simplifies removal and replacement of components.
- Can be used for solder removal on plated thru and multi-layer printed wiring board assemblies.
- Braid processed for long shelf life insures greater capillary action.
- Available in 6 sizes 1/32", 3/64" and 1/16" for micro work, 5/64", 1/8" and 5/32" for larger work.
- For convenience ... 6, 10 or 15 ft. on 2" spools.
- For economy ... 25, 50 or 100 ft. in handy Dispenser Paks. Larger spools available on request.

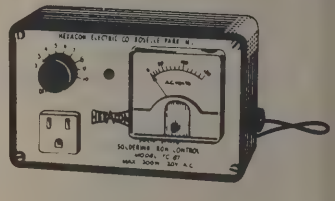
Hexacon manufactures a complete line of soldering accessories: solder suckers, heat sinks, braid cleaners, erasure cleaners, tweezers, tip cleaning sponges, desoldering tips, desoldering wells, mini pots, etc.

## Temperature Control Units

- Controlled AC input provided from 0-95% of line voltage
- Capacity 300 watts on 115 volts
- Solid state circuitry includes built-in fuse protection
- Idling temperature may be readily controlled
- Thermal working zones may be varied by adjusting input control
- Use same iron for different capacity jobs
- Calibrate control settings to maintain proper working ranges as required by government specifications
- Rugged design provides long maintenance, free operational life



**Model 870**
3 wire grounded design.
Size 1⅝" x 4".
Weight 10 oz.



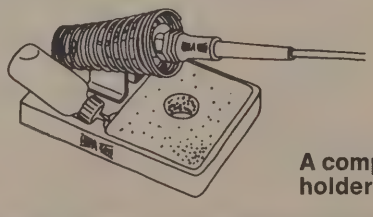
**Model 871**
3 wire design. Comes with voltmeter for visual indication of voltage input to iron. Size 2" x 6¼".
Weight 18 oz.

## HEAT GUARD SOLDERING IRON HOLDERS

- Protect iron and tip
- Conserve energy — nonheat sinking
- Cool, safe holder assembly
- Full operator protection

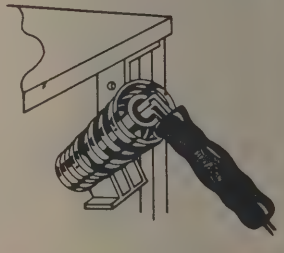
**MODEL 890**
**Ceramic Base with Reservoir and Sponge**

- For instrument irons
- Water injection keeps sponge wet
- Non-skid base — can be used in clean room without marring bench
- Base easily cleaned



**MODEL 893**
**Bench Mounted**

- For under-bench mounting
- Angle adjustable for operator convenience and safety
- Sturdy construction — easily cleaned



**A complete line of iron holders are available.**

**For complete Information on Soldering Irons and Accessories, write for Catalog "Soldering Irons." Write for complete tip catalog with 250 standard sizes and shapes. Custom tips designed to specifications.**

# DIP TOOLS from TECHNI-TOOL

YOUR TOTAL SPECTRUM TOOL SUPPLIER

## Little Dipper™

DIP INSERTER No. 4990

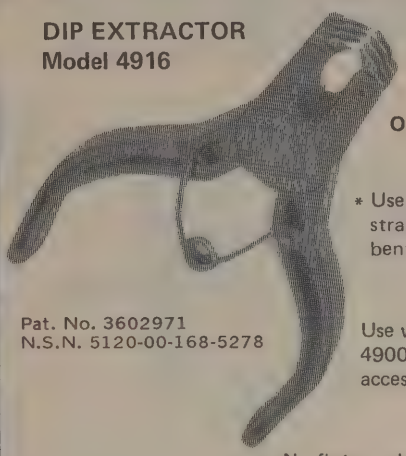
- SPEEDS DIP INSERTIONS
- FASTEST MANUAL DEVICE AVAILABLE
- Aluminum and Stainless Steel Construction
- Adjustable for Package Manufacturers' Varying Production Tolerances
- Models Available for 8, 14/16, 28 and 36/40 Pin Configurations
- Will Not Wear Out
- Safe for All Packages
- Optional Drain Strap

**LOADS** from any surface or magazine

**ALIGNS** leads

**INSERTS** with no stress

## DIP EXTRACTOR
Model 4916



O.A.L. 5"

* Use handle to straighten bent leads

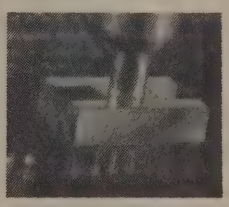
Pat. No. 3602971
N.S.N. 5120-00-168-5278

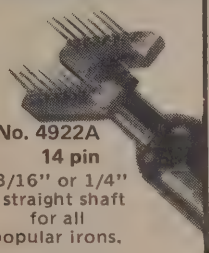
Use with 4900 Series accessories

- Makes extraction a one-hand operation.
- Removes 4-48 pin DIP's.
- Extracts ALL types of components.
- Does not bend leads.
- Lifts DIP vertically.
- Teeth act as heat sink.
- Does not pop up.
- No flying solder.
- Can be used anywhere DIP's butt together.
- Use as close as .250" between rows.
- Grips underneath leads; safe for ceramic DIP's.
- Insulated for live board work.
- Self actuating.

## DIP APERTURE CLEANER
Pat. No. 3,632,972

No. 4922
7 pin





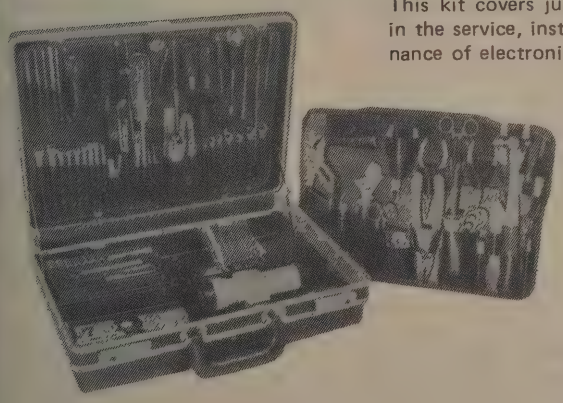
**No. 4922A**
**14 pin**
3/16" or 1/4" straight shaft for all popular irons.

- Opens holes when desoldering multi-layer boards.
- Heats only the aperture area, not surrounding eyelets or plated through holes.
- Will not delaminate boards or lift pads.
- Pushes solder OUT. Solder won't stick to tips.
- Leaves clear hole for component insertion.
- Use hot in iron or cold over solder pot.
- Use with 45 watt iron.

## DIP DESOLDERING TIP
Model 4918
Pat. No. 3,469,809

- Contacts all leads at once.
- Will not delaminate boards.
- Ventilated for heat control.
- Will not lift pads or artwork.
- Solder flows into shallow channel.
- Touches only the DIP leads.
- Does not touch the board.
- Tapered ends can be used for straightening leads and resoldering in 1/4 the time.
- Plated copper contruction.
- 3/16-1/4" and screw type shaft available.
- Accommodates 14-16 pin DIP's.

## GENESIS I — Basic Technician's Tool Kit No. 7609M
**A best seller from our complete line of kits & cases**



18¼" x 13" x 5¾"

This kit covers just about every need in the service, installation and maintenance of electronic equipment — from pinball machines to computers. Packed in a rugged ABS case, it includes the most requested items such as punches & alignment tools, hammers, flashlights, inspection mirrors, scribes, soldering iron, spring hooks, VOM's, parts boxes & much, much more!

# GAUSSMETERS • MAGNETIZERS • POWER TRANSDUCERS F. W. BELL, Inc.

## HALL EFFECT GAUSSMETERS

### DESCRIPTION

Bell Gaussmeters are designed to accurately measure magnetic flux density. Twenty-eight models and 110 standard field probes meet the demanding requirements of most applications.

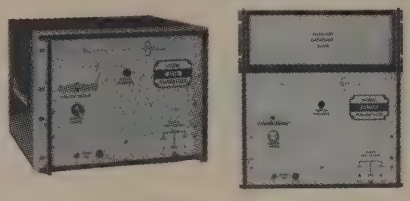
Bell Gaussmeters provide four magnetic field measurement models: direct measurement of absolute magnetic field density, differential measurement of the difference in magnetic field density at two probe locations, incremental field measurements using an expanded scale and summation measurements.

There are 110 standard probe models for each gaussmeter model. Each is a precision, solid-state, magnetic field sensor built into a rugged package for accurate, repeatable, stable, field measurements. Models available for transverse, axial, differential, two-axis, and three-axis measurements with a variety of field ranges, field sensitivities, and configurations for each.

### SPECIFICATIONS

| Gaussmeter model | ranges FS Gauss | accuracy | dc output voltage FS |
|---|---|---|---|
| 811 digital | 10 to 100,000 | ±0.1% FS | 1 Volt |
| 810 field monitor | 10 to 100,000 | ±0.1% FS | 1 Volt |
| 660 digital | 1 to 100,000 | ±0.1% to 10 kG<br>±0.3% to 30 kG | 1 Volt |
| 640 incremental | 0.1 to 30,000 | ±0.25% FS | 1 Volt<br>5 Volts |
| 620 precalibrated | 0.1 to 30,000 | ±0.25% FS | 1 Volt |
| 615 digital | 10 to 100,000 | ±0.5% FS | 100 mV BCD |
| 610 self-calibrated | 1 to 100,000 | ±0.5% FS | 100 mV |
| 600 general purpose | 100 to 30,000 | ±4% FS | 1 Volt |

## MAGNETIZERS



### DESCRIPTION

Bell magnetizers are capacitive discharge power units designed to supply current pulses to a magnetizing fixture coil. The energy level of the pulse is variable and accurately repeatable.

Bell fixtures are designed to apply the proper pulsed magnetic field to the magnet or magnet assembly. The fixtures provide the field shape and direction to accommodate the specific magnet configuration and magnetization direction. Special fixtures that simulate specific magnetic circuits are available. F. W. Bell supplies fixture design assistance.

### FEATURES

- **FULLY SOLID-STATE**

The entirely solid-state units are designed for long life and high reliability.

- **LOW VOLTAGE MAGNETIZER**

The magnetizer operates at high capacity and low voltage for personal safety and long equipment life.

- **MANUAL OR AUTOMATIC OPERATION**

Magnetizer and stabilizer units are usually manually operated, but they may be integrated into automatic systems through the use of optional equipment.

### SPECIFICATIONS

| 870 A | 3000 | |
| 871 A | | |

## REAL POWER TRANSDUCERS

### DESCRIPTION

PX 2000 and PX 4000 series transducers are compact, accurate, and dependable solid-state modules for the measurement and control of single-phase and three-phase power in various frequency ranges. The module output is a power-proportional dc voltage.

The light-weight transducers are epoxied in small nylon cases with through mounting holes and wire leads. This configuration facilitates assembly with associated devices. Simplicity, versatility, high performance, and low cost make these modules ideal for many applications.

### SPECIFICATIONS

| | PX 2000 series | PX 4000 series |
|---|---|---|
| Rated power levels | 50-2000 W | 1000-2000 W |
| Rated current levels | 0.5-20 A | 5 A |
| Rated voltage | 120 V<br>220 V | 220 V |
| Frequencies, nominal | 60-180-360 Hz | 1-3 kHz |
| Frequency range | 25 to 1200 Hz | 0.5 to 10 kHz |
| Rated dc output across 50 ohm | ± 55 mV | ≥ 27 mV |
| Ripple, peak to peak | <200% | <200% |
| Response time to 99% | <50μs | <5μs |
| Rated accuracy | 0.5% | 0.5% |
| Linearity vs. power | ± 0.2% | ± 0.2% |

## ORDERING INFORMATION

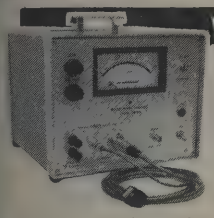
# EQUIPMENT FOR ENERGY, POWER AND CURRENT MEASUREMENT

OSI

## WIDEBAND POWER MONITORS

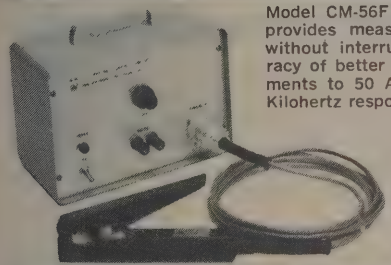


The PM Series Power Monitors are designed to provide measurements of current or power in systems operating from d.c. to 100 Kilohertz frequencies. These units feature response times of less than 1 microsecond so that detailed observation of fast switching waveforms can be observed with an accessory oscilloscope. Currents up to 1000 Amperes peak can be handled by standard models. Meter display of average power is provided. A 0 to ±1 volt output proportional to instantaneous power or instantaneous current is available for detailed observation of waveforms with risetimes of 1 microsecond or more. A bidirectional capability is standard for the instantaneous outputs.

## WIDEBAND d.c. to Megahertz CURRENT MEASURING EQUIPMENT

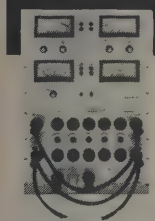
CM Series current measuring units provide an output signal proportional to instantaneous current flowing through the transducer window. The d.c. to Megahertz response and ability to faithfully reproduce 1 micro-second transients provide an ideal way to monitor critical circuits without electrical connection and with minimum interaction caused by measurement. The panel meter provides a display of direct current while the +1 to −1 volt output can be used for monitoring or control purposes with current flow in either direction.

## CLAMP-ON CURRENT TRANSDUCER



Model CM-56F Current Transducer provides measurement of current without interrupting circuit. Accuracy of better than 0.5% measurements to 50 Amperes and d.c. to Kilohertz response are featured. An electrical output providing an analog 0.1 Volt/Ampere signal is available for use in control systems, computer interfacing or recording.

## POWER TEST PANELS

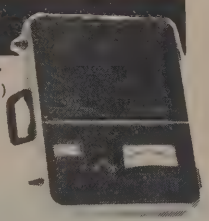


Current
Voltage
Power
VARS

Power Factor
(Phase Angle)
Frequency
Watt-hour
Amp-hour

**MODEL PTP-100**

**MODEL WM-2C5C**

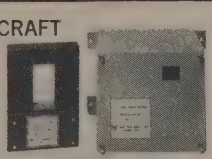


Power test panels are available for DC and AC (2, 3, or 4 wire) system loads. Voltage ranges from 50 to 500 volts and current ranges from 10 to 10,000 Amperes may be specified. Isolated electrical outputs are provided to drive recorders or remote indicators. Packaging methods include 19" rack panel, standard instrument housings and NEMA type enclosures. Available options: Digital meters, BCD outputs, true RMS outputs, set-point switched outputs and data storage for computer interfacing.

## MILITARY EQUIPMENT

SHIPBOARD • AVIONICS • SPACECRAFT
NUCLEAR POWER PLANTS

OSI has an established reputation for building rugged, highly reliable measurement systems to meet government and military specifications. Systems include current, power, amp-hour, watt-hour, etc.



**MODEL AH-10**

# NEW! ENERGY MONITORING INSTRUMENTS

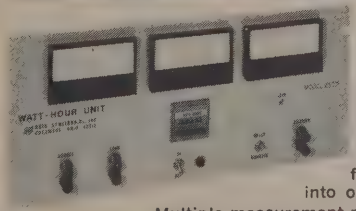
- LOW COST EM SERIES
- ½ PERCENT ACCURACY

The new, low-cost, EM series of instruments provides 0.5 percent accuracy and digital display of direct or alternating current, electrical power, totalized electrical energy or magnetic field. Basic ranges are as shown below.

| Model | Description and Ranges |
|---|---|
| EM-1 | Direct current, 0-100.0 Amps, optional 0-1000 Amps |
| EM-1A | Direct current or RMS, 0-100.0 Amps, optional 0-1000 Amps |
| EM-1F | Direct current, clamp-on, 0-10.00 and 0-100.0 Amps |
| EM-2 | AC Wattmeter, 0-2000 watts, 120/240 Volts, 0-10 Amps |
| EM-3 | AC Multipurpose, 0-150.0 volts, 0-10.00 Amps, 0-1500 watts |
| EM-4 | Gaussmeter, 0-1.000 and 0-10.00 Kilogauss |
| EM-5 | AC Watt-Hour, 0-1200 watts, 0-120 Volts, 0-10 Amps |

A detailed brochure provides information helpful in the selection of optimum units for particular testing or monitoring needs. Some wattmeters have arrangements so an instrument or piece of apparatus can be plugged into receptacle of instrument. The clamp-on feature of the EM-1F permits accurate current measurements without disconnecting power leads to apparatus.

## WATT-HOUR AND AMP-HOUR METERS



Registration of total energy consumption of motors, processes and equipment in a.c. or d.c. circuits is available on resettable counters. Other units provide a registration of charge flow, or Ampere-Hours, into or out of battery systems. Multiple measurement panels are available which provide display and electrical outputs related to instantaneous current, voltage and power in addition to energy registration.

# SEMICONDUCTOR MATERIALS, DEVICES HALL EFFECT-INFRARED-THERMOELECTRIC

## HALLTRON, MAGNETIC FIELD SENSORS

OSI offers a wide variety of standard Hall Effect probes for magnetic sensing or measuring applications. The high linearity, low noise, excellent stability and ruggedness permit optimum use in your most critical applications. Reliability has been proved by years of continuous operation in industrial and military systems. Large quantity production enables OSI to offer high quality units at attractive prices.

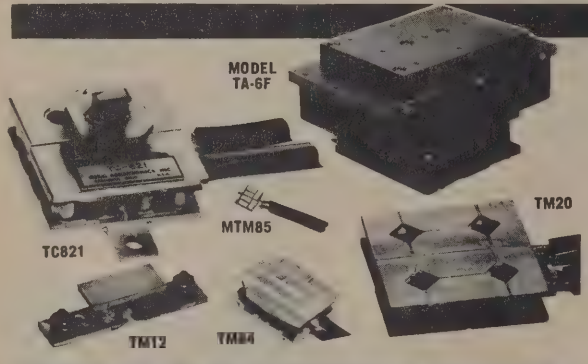
## THERMOELECTRIC DEVICES



O.S.I. offers a variety of thermoelectric cooling units ranging from the TC Series, used in spot cooling applications where up to 115 degree Centigrade temperature depression is needed, to the TA Series which can remove up to 85 watts from chemical bath, electronic package, or enclosure. The controllable, reversible heat pumping properties of thermoelectric devices make them ideally suited for temperature control. The MTM85 and TM84 are suited to IR detector cooling. Two and three stage coolers are also available for lower temperature IR detector cooling.

## ENERGY CONVERSION— IR—DEVICE MATERIALS

Semiconductor compounds and alloys of the following types, covering a wide range of controlled electronic properties for applications such as INFRA-RED DETECTORS, MAGNETIC SENSORS, THERMOELECTRIC COOLING/POWER GENERATION, OPTICAL AND INFRA-RED COATINGS/FILTERS, AND CRYOGENIC SENSORS, are available from stock. High quality electronically characterized materials suitable for PHOTO-CONDUCTIVE and PHOTOVOLTAIC sensors are available.

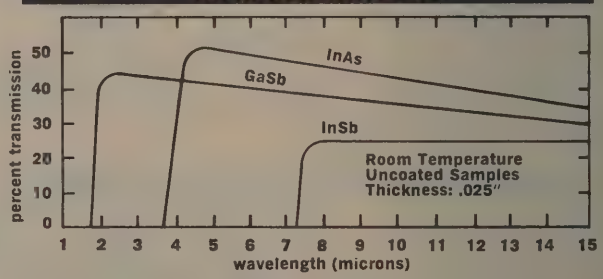
| Material | Carrier Concentration/$cm^3$ |
|---|---|
| InAs | $10^{15}$ - $10^{19}$ |
| InSb | $10^{13}$ - $10^{19}$ |
| GaSb | $10^{16}$ - $10^{18}$ |
| Bi-Te alloys | $10^{18}$ - $10^{19}$ |
| PbTe and PbTe alloys | As Desired |

These materials are available in ingot, rod, slice and polished wafer form. Oriented single crystals of InSb having dislocation densities well below 100/$cm^2$ are available for infra-red sensor construction. High figure of merit p and n type Bi-Te alloys are in stock for thermoelectric applications. InAs with Hall coefficients at R.T. in the range from 10 to 1000$cm^3$/coulomb is immediately available for many device applications.

Any feasible high purity alloy or compound consisting of Pb, Bi, Tl, Tn, As, Sn, Sb, Se or Te with selective doping can be manufactured and supplied on request.

High purity zone refined ingots of most of the above elements used in our electronically characterized compounds can be delivered on request.

## INFRARED WINDOWS



Polished IR windows of single crystal and polycrystalline InSb and polycrystalline InAs and GaSb are available in sizes up to 1" in square or circular shapes and any desired thickness. Applications include broad band transmission for IR detectors and sources at wave lengths above the cutoff value. Anti-reflective coatings are available, on quantity orders, to increase peak transmission to about 90% for InAs and 80% for InSb.

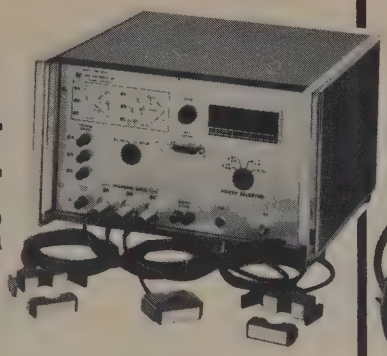
MODEL WM365A

# DIGITAL WATT-METER

D.C. TO 5 KHZ RESPONSE



**APPLICATIONS:**

- TRACTION MOTOR MONITORING
- DRIVE MOTOR MONITORING
- POWER CONVERTERS
- VARIABLE FREQUENCY MOTOR DRIVES
- POWER SYSTEMS WITH DC COMPONENTS
- POWER SYSTEMS WITH NONSYMMETRICAL WAVE SHAPES
- POWER SYSTEM PROTECTION
- POWER DATA FOR COMPUTER INPUT

**DESCRIPTION:**

The Model WM365A Digital Wattmeter measures power in single-phase or three-phase systems where the input power frequency may vary from d.c. to 400 Hertz. The d.c. to 5 kilohertz response insures accurate measurements when harmonics are present due to solid state switching, non symmetrical waveforms or d.c. components.

The digital panel meter displays total power or phase power. BCD and analog signals related to power are provided for computer and recorder interface. The BCD and analog outputs are electrically isolated from the power system.

The WM365A utilizes split-core transducers which can be installed in the system without disconnecting the high current leads.

**SPECIFICATIONS:**

| | |
|---|---|
| Input Voltage Range | 0 to 500 volts d.c. or rms line-to-line or line-to-neutral. |
| Input Current Range | 0 to 100 Amperes d.c. or rms per line through transducer. |
| Frequency Range | d.c. to 400 Hertz. |
| Full Scale Power | 150.0 Kilowatts for 3 phase. 50.0 Kilowatts per phase or in single phase. |
| Meter Indication | 3½ digit display with 0.1 Kilowatt resolution. |
| Electrical Output | 0 to 5 volts d.c. for 0 to 150KW in total power arrangement. 0 to 5 volts d.c. for 0 to 50KW in single phase arrangement. |
| BCD Output | A BCD coded output is available on the front panel. |
| Electrical Isolation | 1000 volts d.c. or rms between any line and output terminals. |
| Accuracy | ±1 per cent of full scale in temperature range of 15 to 35°C and with power factor of .5 lead to .5 lag. |
| Case Size | 17 x 10 x 14 inches. |
| Power Requirements For Electronics | 120 volt 60 Hertz. |

MODEL WM1000 MULTIRANGE

# AC WATT-METER

FOR 120 VAC, 60 HZ LOADS

**APPLICATIONS:**

- PROCESS POWER MONITORING
- PROCESS POWER MEASUREMENT
- TRANSIENT POWER DETERMINATION
- PROTOTYPE CHARACTERIZATION
- PRODUCTION AND QUALITY TESTING

**DESCRIPTION:**

OSI's Model WM1000 Multirange Wattmeter provides an accurate, convenient way to monitor 60 Hertz power supplied to various laboratory and industrial process apparatus. Acting as an in-line extension cord, the WM1000 measures average AC power drawn by the load. Results are indicated on a calibrated four range panel meter. The isolated output provides an electrical signal proportional to the instantaneous power and may be used for recording and display purposes.

Use to measure power consumption of equipment consuming less than 1000 watts of sinusoidal, zero-crossing or SCR controlled waveform power.

**SPECIFICATIONS:**

| | |
|---|---|
| Power Ranges | 50, 100, 500 and 1000 Watt |
| Voltage Input | 75 to 150 VAC, 60 Hz |
| Current Input | 0 to 10 amp |
| Max. Overload Current | 20A Without Damage |
| Power Factor Range | .5 lead to .5 lag |
| Ambient Temperature | 15° to 35°C (60° to 95°F) |
| Output Voltage | 1mV/Watt |
| Recorder Impedance | 1000 ohms or higher |
| Accuracy | ±2% F.S., meter reading ±1% F.S., electrical output |
| Size | 8" x 6" x 8" DWH |
| Weight | 5 pounds |

## APPLICATIONS:

- SCR Controlled Apparatus
- Precision Contour Grinders
- Machine Tool Equipment
- Furnace Loads—Arc Melting
- Torque Drive Systems
- Energy Conversion Systems

## DESCRIPTIONS:

The O.S.I. WH series AC Watt-Hour Meters provide a convenient and highly accurate way to characterize, monitor and control critical manufacturing processes where product quality and cost are related to electrical energy input.

These solid-state units utilize Hall-effect watt-transducers and are especially suitable for watt-hour totalization, power monitoring and observation of power waveforms in applications where SCR chopped, or other non-sinusoidal wave-forms are involved. The power wave shape applied to the load may be sinusoidal with wide power-factor variations, zero-crossing controlled sinusoidal, phase controlled SCR, or other wave-forms derived from a 60 Hertz input.

In addition to the display of totalized watt-hours since last reset, the units provide a panel meter indication of average power in watts.

These units should be invaluable in processes where monitoring can lead to increased yields of quality products. They should lead to elimination of much costly down-time through the early detection of process variations which, if not corrected, could lead to breakdown.

The higher current models obtain the current signal via an external current transducer or transformer (supplied with the instrument).

## SPECIFICATIONS

### INPUT

Overload (Continuous):
Voltage, 1.25 X Rating
Current, 2X Rating (5, 10, 15, 50A Models)
10X Rating (100 thru 2000A Models)

Burden (At Max Rated Input)
Voltage: 1.25VA
Current: 1.25VA

Power Factor Range: 0 Lead to 0 Lag

Frequency Range: 50 to 70Hz

Instrument Power: 115VAC 60Hz 5VA

Response: (Transient—90%) 100 microseconds with models using transducers.
1 millisecond with models using current transformers.

### OUTPUT

Response: 250 milliseconds

Temperature Effect: (+15°C to +35°C) ±0.5% F.S.
(−10°C to +60°C) ±1% F.S.

Wattmeter: 4½" panel meter

Watthour Counter: 6 Digit (Push Button Reset)

Electrical Output: 8V at Calibration Point

Pulse Output: 4V for External Electronic Counter

Accuracy: (Linearity, setpoint, P.F.)
Meter: ±1.5% FS (WH3-1 to WH3-42)
±2.0% FS (WH3-43 to WH3-102)
W-H Counter: ±0.5% FS (WH3-1 to WH3-42)
±1.0% FS (WH3-43 to WH3-102)

Electrical Output: (Watts and W-H)
±0.5% FS (WH3-1 to WH3-42)
±1.0% FS (WH3-43 to WH3-102)

Zero Drift: ±0.1% FS of rated W-H per hour

Instrument Size: 19"x5¼"x11" WHD

**MEASURES AND DISPLAYS WATTS AND WATT-HOURS**

**WH7 SERIES**

MODEL WH7-1

## DESCRIPTION:

The O.S.I. WH series DC Watt-Hour Meters provide a convenient and highly accurate way to characterize, monitor and control critical manufacturing processes where product quality and cost are related to electrical energy input.

These solid state units utilize Hall-effect watt transducers and respond accurately to both A.C. and D.C. components in electrical energy. They are especially suited to complex wave shapes found in SCR power supplies as well as D.C. found in generators, batteries, converters, and solar cell arrays.

The 5, 10, 15, and 50 Amp models are connected to circuits being monitored via a screw type terminal block on the rear of the instrument. The higher current models obtain the current signal via an external current transducer (supplied with the instrument).

## STANDARD DC MODELS

See Page 11 for external transducer dimensions.

## SPECIFICATIONS:

### INPUT

Overload (Continuous):
- Voltage, 1.25 X Rating
- Current, 2 X Rating (5, 10, 15, and 50A Models)
  10 X Rating (100 thru 2000A Models)

Burden (At Max. Rated Input)
- Voltage: .25VA
- Current: .25VA (5 thru 50A),
  O VA (100 thru 2000A)

Frequency Range: DC to 100Hz

Extended Frequency Range: DC to 400Hz†

Instrument Power: 115VAC, 60Hz, 5VA

Response: (Transient) 50 microsecond

### OUTPUT

Response: 250 milliseconds

Temperature Effect (0 to 40° C):
±0.1% FS ±1% Reading

Wattmeter: 4½" panel meter
Watt-hour Counter: 6 Digit (Push Button Reset)
Analog Wattmeter Output: 8V at calibration point.

NOTE: Output not isolated from input voltage
See Option Below††

Watt-hour Pulse Output: 4V (peak) for External Electronic Counter Operation.

Accuracy: (Linearity, setpoint)
- Meter: ±1.5% FS
- Watt-hour Counter: ±0.5% FS
- Electrical Output: (Watts and W-H) ±0.5% FS

†Extended Frequency Range: Add 1% to above accuracy figures

Zero Drift: (Max.) ±0.1% FS of rated watt-hour per hour

Instrument Size: 19"x5¼"x11" WHD

Instrument Panel Color: Gray

††OPTION: Isolated output for watts and watt-hours add "U" after the model number. For example: Requirement is for a 120 volt, 100 amp input with an isolated output. Model to be ordered is WH7-31U.

External Transducer: See Table at right

Instrument Panel Color: Gray

## DESCRIPTION:

The O.S.I. AH series Ampere-Hour Meters provide a convenient and highly accurate way to monitor and control manufacturing and experimental processes. The unique zero dc insertion loss and split-core features on the 100 ampere to 10,000 ampere models increase the applicational possibilities.

The solid-state units utilize Hall-effect transducers and are especially suited for current monitoring of various current wave shapes which may be found riding on dc signals.

In addition to the display of totalized amp-hours since last reset, the unit provides a panel meter indication of the average instantaneous current in amperes and an isolated electrical output signal proportional to instantaneous current. The bipolar models indicate charge and discharge on normal and reverse ampere hours on separate 6 digit counters.

## STANDARD DC MODELS

| MODEL NUMBER AH7- | INPUT CURRENT AMPERES | METER FULL SCALE CURRENT | A-H PER COUNT | *EXTERNAL TRANSDUCER DIMENSIONS |

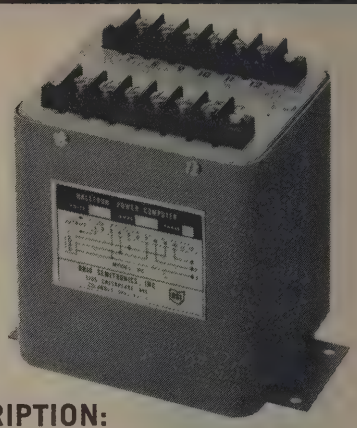
*50 AMPS and ABOVE, 1 EXTERNAL SENSOR IS SUPPLIED, See Page 11.
Standard units have millivolt outputs as indicated. Units having 0 to + 1 milliampere or 0 to + 10 volts are available as options and are ordered by adding the option letter as a suffix to the standard model number. For example PC5-1A has an output of 0 to + 1 milliampere for 500 watt input.



MODEL PC5-4

## DESCRIPTION:

OSI Watt Transducers utilize Hall Effect multipliers in order to provide an output which is proportional to the electrical power consumed in single phase or three phase loads or equipment. The multipliers provide instantaneous multiplication of the voltage times the current on a continuous basis.

The Watt Transducers are especially useful in monitoring, control, protection and regulation circuits. Their fast response results in accurate power measurement even when distorted or chopped waveforms are present.

Various output filtering and signal conditioning features are provided in watt transducer models to permit easy interface with circuits where amplified voltage output or current output is desirable. In all units the output signal is electrically isolated from the power lines to provide maximum flexibility in interfacing with other electrical or electronic circuits.

The unique, four-quadrant, high-accuracy multiplying properties of Hall Effect devices coupled with their demonstrated reliability provides a low-cost approach to power measurement where linearity, repeatability, and long life are important considerations.

## ADJUSTMENTS:

All PC5 series watt transducers have been calibrated at the factory to give the correct output at the specified power rating.

Each unit has an overall "CAL" and an optional "ZERO" adjustment located on the lid. The "CAL" adjustment is set at the factory and should not be adjusted unless recalibration is required. The optional "ZERO" adjustment is provided to correct for an output offset, "at no load condition", without effecting the calibration of the unit.

## OUTPUT OPTIONS:

**A:** 0 to + 1 milliampere DC output. No external amplifier power required. Output load 0 to 10K ohms.

**B:** 0 to +1 milliampere DC output. External amplifier power required. 85—135 VAC at 2 watts. Output load 0 to 10K ohms.

**C:** 0 to + 10 volt DC output. No external amplifier power required. Output load greater than 2K ohms.

**D:** 0 to + 10 volt DC output. External amplifier power required. 85—135 VAC at 2 watt. Output load greater than 2K ohms.

**E:** 4 to 20 milliampere DC output. External amplifier power required. 85—135 VAC at 2 watt. Output load less than 1500 ohms.

**F:** Filtered output. Ripple reduced to <1%. Load on output should be >1 megohm.

**NOTE 1:** For chopped waveforms select only models that use current transducers C, D or E, in Sensor Dimension column.

**NOTE 2:** † Indicates 2 turns thru the external transducer or transformer window.

## PC 5 SERIES

SPECIALISTS IN MEASUREMENT MONITORING, AND CONTROL OF CURRENT, POWER AND ENERGY

OSI

## SPECIFICATIONS:

### INPUT:

VOLTAGE: 0 to 110% FS

CURRENT: 0 to FS

OVERLOAD (Continuous):
- —Voltage 1.25 X Rating
- —Current:
  - —2 X Rating: 1 Ampere thru 15 Ampere Models and All Current Transformers Model W, X, Y
  - —50 X Rating: Current Transducer Models C, D & E

BURDEN (Full scale input):
- —Voltage 1.25 VA
- —Current 1.25 VA
- —Option Amplifier 2 Watts

POWER FACTOR RANGE: Unity to lead, lag 0.

FREQUENCY RANGE: 50 to 70 Hz

DIELECTRIC TEST:
(Input/Output/Case): 1500 VAC

RESPONSE: (Transient—90%)
100 microseconds with models using transducers.
1 millisecond with models using current transformers.

### OUTPUT:

OUTPUT LOADING:
- —Base Unit: > 100K ohms
- —Options A & B: 0-10K ohms
- —Options C & D: > 2K ohms
- —Option F > 1 meg ohms

ADJUSTMENT RANGE: (See Adj. Note Page 8)
- —Base Unit: 0 to 110%
- —With Options: ±10% Min.

RESPONSE TIME:
- —Base Unit: 1 millisecond

With Options: 250 milliseconds

TEMPERATURE EFFECT: (−10° to +60° C)
± 1% of Reading
With Options: ± 1% of Reading
± 0.1% FS

AC COMPONENT AT UNITY P.F.:
- —Base Unit: DC with an AC Component of 200% p to p
- —With Option: DC with an AC Component of < 1% FS

### ACCURACY:

Including power factor, linearity, repeatability and initial set point:
- ±0.5% F.S.: PC5-1 thru PC5-48, PC5-31-2 thru PC5-33-2, PC5-103 thru PC5-108
- ±0.75% F.S.: PC5-49 thru PC5-102

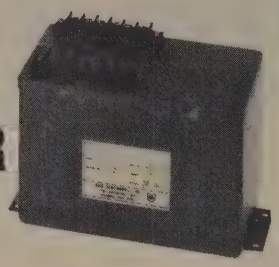
SPECIALISTS IN MEASUREMENT MONITORING, AND CONTROL OF CURRENT, POWER AND ENERGY

# DC WATT TRANSDUCER

## PC8 SERIES



### DESCRIPTION:

The PC8 series of Watt Transducers are unique since they provide an accurate means of monitoring power that contains D.C., A.C. and non-sinusoidal waveforms. The input response of less than 50 microseconds makes these units ideal for use in SCR and other A.C. or D.C. switching circuits operating from d.c. to 400 Hertz. The output is completely isolated thereby offering safety and freedom from interaction with other signals being monitored or recorded.

The output is proportional to the product of the voltage applied and the ampere-turns through the window. Therefore, the seven (7) standard current ranges offered can be adapted to currents of lower values by winding additional turns through the window of the transducer.

### SPECIFICATIONS:

#### INPUT:

Voltage: Check code designation for F.S. voltage ranges from 25 to 600 volts (peak A.C. or D.C.)
Burden: <1 megohm
Current: Check code designation (specify FS range from 100 ampere to 2000 ampere, lower range uses 100 ampere transducer with ampere turns)
DC Insertion Loss: **None**
Overrange Without Damage: 10 times rating
Frequency Range: DC to 400Hz
Response Time: <50 microseconds

#### OUTPUT:

Full Scale Output: 1ma D.C. (0 to 10K ohm)
Response: 250 milliseconds
Ripple: <1% Full Scale
Accuracy: (FS Voltage × FS Current) ± 1.0% FS
Temperature Effect: (0 to 40°C) ±0.1% of FS ±1% of Reading
**Isolation:** Input/Output/Case 1000VDC
Instrument Power: 115VAC ±10% 60Hz
Case Size Drawing: K See Page 11
Transducer Size: Drawing on Page 11
100 amp—Drawing C
200 to 400 amp—Drawing D
600 to 2000 amp—Drawing E

#### Ordering Information:

The part numbers listed in the selection tables are incomplete. The voltage and current designation code must be added.

**Part Number PC8-** ____* — ____△

Example: PC8-3-01, which would be a PC8 transducer with 125VDC @ 100 amperes.

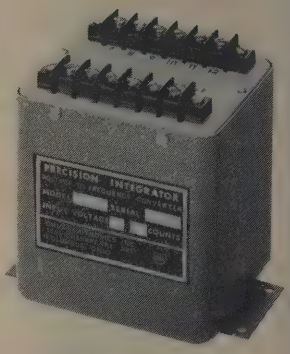
# PRECISION INTEGRATOR

## VOLTAGE TO FREQUENCY TRANSDUCER

## VFC SERIES



### DESCRIPTION:

The VFC Series Precision Integrators are designed to provide an output directly related to the time integral of a d.c., pulsating d.c., or d.c. signal with a.c. ripple. The output is a switch closure for activating external circuits. Each switch closure can be directly related to a specific integrated quantity such as ampere-seconds, kilowatt-hours, or other quantity as desired. Units can be preset at the factory to interface with specific transducer characteristics as indicated by customer.

One of the many applications of integrators is to provide information on electrical energy consumption. The VFC unit may be connected to a PC5 Series Watt Transducer for this application.

### SPECIFICATIONS (common to all):

#### INPUT:

MAX. VOLTAGE: 10V
IMPEDANCE: >1 megohm
USEABLE RANGE: Up to 1.25 x FS
FREQUENCY: DC with up to 100% ripple at 120Hz or higher

#### OUTPUT:

TEMPERATURE EFFECT: (−10°C to +60°C) ±0.5%
ZERO DRIFT: ±0.1%FS
ACCURACY: ±0.25%FS
LINEARITY: ±0.1%FS
RELAY: Normally open
RELAY CONTACT RATING: 15VA Max., 120V Max., .5A Max
RELAY CLOSED PERIOD: 20 milliseconds, typ.
INSTRUMENT POWER: 115 VAC ±10%, 50/60 Hz
CASE SIZE: Drawing H, Page 11
DIELECTRIC TEST: (INPUT/OUTPUT/CASE) 1000 Volts

| MODEL | INPUT | OUTPUT RELAY CLOSURE RATE* |
|---|---|---|
| VFC-1 | 0 to +50 mv | 0 to 10,000 per hour |
| VFC-2 | 0 to +100 mv | 0 to 10,000 per hour |
| VFC-3 | 0 to +150 mv | 0 to 10,000 per hour |
| VFC-4 | 0 to +250 mv | 0 to 10,000 per hour |
| | | |

*NOTE: Option 1—Output closure rate can be set anywhere between 1K to 10K at specified input for a nominal charge.

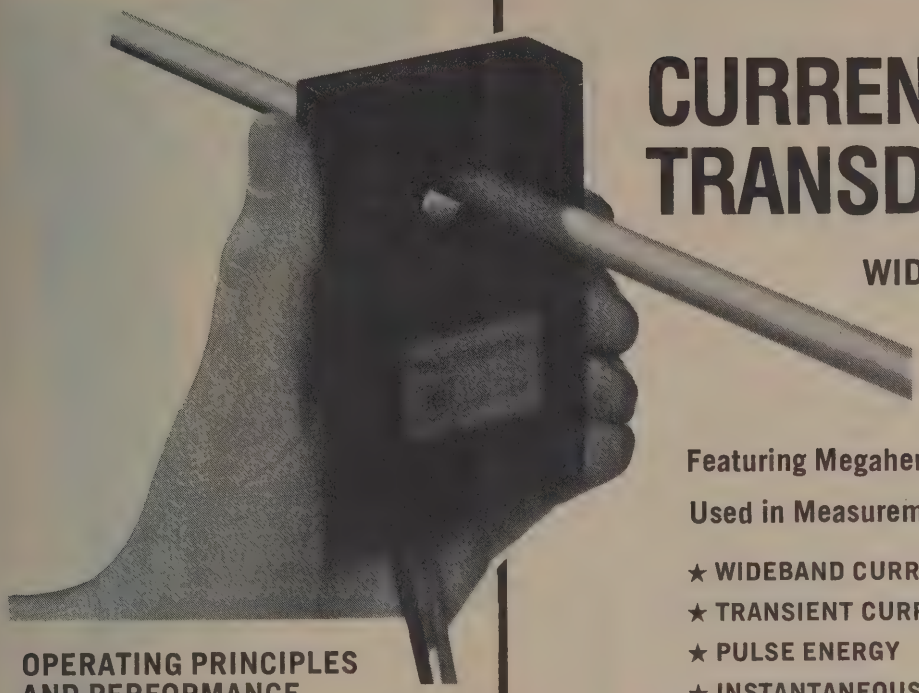
# CURRENT TRANSDUCERS

## WIDEBAND, DC TO MEGAHERTZ

### CT-W SERIES



**Featuring Megahertz Response**

**Used in Measurement of**

- ★ WIDEBAND CURRENT
- ★ TRANSIENT CURRENT WAVEFORM
- ★ PULSE ENERGY
- ★ INSTANTANEOUS POWER
- ★ PEAK CURRENT

## OPERATING PRINCIPLES AND PERFORMANCE

The CT-W Series Wideband Current Transducers provide an output which is the instantaneous product of a control current to the unit and a current flowing in a conductor threaded through the window. With a fixed control current, the output is an exact replica of the waveform or transient present in the conductor with all time-dependent information. If time-dependent signals are applied to both inputs, the output is the true-product of the input signals.

## FEATURES:

The striking applicational features of the Halltron Current Transducers arise from:

1. **Wide Dynamic Range.** The CT7W, for example, has been used to measure from 1 milliampere to 30 amperes peak pulse currents.
2. **Wide Frequency Range.** All units have provided an output of ± 1 db from 5 Hz. to 1 Megahertz with constant amplitude input.
3. **True-Product Output.** Since the output is a true-product; pulse sampling, modulation, and multiplier functions may be achieved.

In operation the units provide an output voltage, $V_H$ of the form

$$V_H = K_t I_c I_m$$

where $K_t$ is a device constant, $I_c$ is the control current, and $I_m$ the current to be measured.

The true-product nature of the units is illustrated by the equation. Either or both currents may be time-dependent or fixed at a d.c. level of either direction. Full four-quadrant operation then results.

# CURRENT TRANSDUCERS

## DC to 5 KILOHERTZ

### CT-L SERIES

### DESCRIPTION:

The OSI line of current transducers includes fixed and split-core models with full-scale ranges of ±50 to ±8000 Amperes.

All units provide an electrically isolated output which is proportional to the instantaneous, direct, alternating or pulse current, flowing through the transducer window. These transducers have features especially suited for monitoring of total, branch or fault currents in DC systems, variable frequency AC systems, AC systems with DC components, chopped wave form systems, zero-crossing switched systems and sinusoidal systems.

The excellent linearity and lack of damage with currents in excess of ten times rating make these rugged units especially attractive for application in industrial and defense-related applications.

The transducer output is proportional to the product of the current through the window times the control current. If desired, the customer can adjust the control current for desired calibration level or gate the control current when desirable for use with data systems.

### FEATURES:

- 5000 VOLT LINE-TO-OUTPUT ISOLATION
- DC TO 5 KILOHERTZ RESPONSE
- BI-DIRECTIONAL OPERATION
- LINEARITY 0.5%, 50 TO 2000 AMP
- SUSTAINED OVERLOAD CAPABILITY
- ± 1% OPERATION OVER TEMPERATURE RANGE
- LESS THAN 50 MICROSECOND RESPONSE TIME FOR 50 TO 2000 AMPERE UNITS
- STABLE DURING SEVERE VIBRATION
- EASY INSTALLATION

**±0.5% FS LINEARITY**

CT8KL

CT50L

CT200L

CT1KLTS SPLIT-CORE OPTION

**NOTES:** The split core option is available on all Models except the 50 Ampere size. To order, add the letter "S" to the Model Number.

The electrical isolation (line to output) is at least 5000 volts for all Models, except the 50 Ampere size which is rated at 600 volts.

### APPLICATION NOTES:

1. Input and output are ohmically related, therefore the excitation power supply should be floating or should not have circuits common with the output terminals of the transducer.
2. Output is directly proportional to both the current through the window and the excitation current. Each transducer is tagged with the exact excitation current required to produce the stated sensitivity. By adjusting the excitation current, the user may adjust the output from 0 to 1.5 X the stated sensitivity.
3. Transducers will withstand sustained 10 X rated current overloads without damage.
4. To measure the current in a conductor, simply pass the conductor through the window, apply excitation current (specified on tag) to the input terminals and measure the millivolt output.
5. The cases of this series are formed of impact resistant plastic and therefore will withstand most hostile environments.
6. Companion signal conditioners are available to supply the excitation current and output amplification. See CTA data bulletin for information.
7. Other current transducers and signal conditioners are available for clamp-on style, true RMS, higher currents, and wider temperature range operation.

## DESCRIPTION:

The CTP series of transducers provides a superior method of non-contact, non-frequency sensitive, completely isolated, and low-cost current sensing. The isolated output feature makes the units especially attractive for control applications. The D.C. to 1 Kilohertz frequency response insures accurate measurements when harmonics are present in power systems.

As replacement for a shunt, CTP current transducers create no power loss to the circuit being monitored since there is zero d.c. insertion-loss.

These transducers respond to ampere-turns, therefore sensitivity can be multiplied by the number of turns passed through the window.

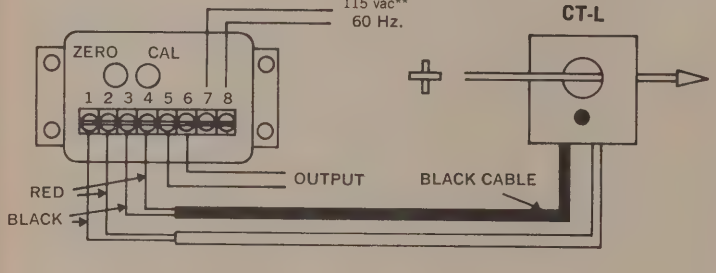
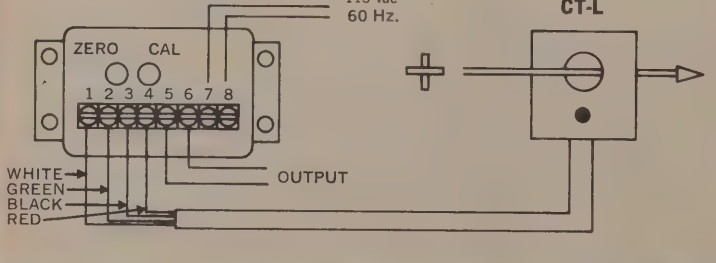
# SIGNAL CONDITIONERS

## CTA SERIES

| MODEL | INPUT SIGNAL | OUTPUT SIGNAL | CONTROL CURRENT OUTPUT | OPERATING POWER |
|---|---|---|---|---|
| CTA 101 | ±50mv | ±10v | 100 ma | 115 vac ±10% |
| CTA 201 | ±50mv | ±10v | 200 ma | 115 vac ±10% |
| CTA 112 | +50mv | 4-20ma | 100 ma | 115 vac ±10% |
| CTA 113 | 50mv ac | +10 vdc | 100 ma | 115 vac ±10% |
| CTA 114 | 50mv ac | +1ma dc | 100 ma | 115 vac ±10% |
| CTA 128 | ±50mv | ±10v | 100 ma | 28 vdc ±10% |
| CTA 501 | ±50mv to 200mv | ±1ma | 100 ma | 115 vac ±10% |





## DESCRIPTION:

The CTA line of signal conditioners was designed for use with OSI current transducers. They provide the control current for the transducer and signal amplification with output suitable for monitoring or control purposes. Outputs of 0 to ±10 volts, 0 to ±1ma and 4 to 20ma are available in standard units.

The CTA113 and CTA114 units provide outputs proportional to the true rms value of the input signal, even with d.c. components.

Calibration and zero adjustments are provided through openings in the top of the case. The calibration control provides a ±30% adjustment of the constant current supply providing excitation to the transducer so the output can be calibrated directly in terms of current flow through transducer window.

## SPECIFICATIONS:

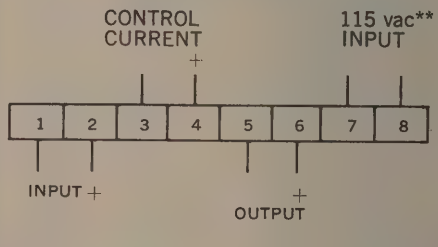
AMPLIFIER (OUTPUT)
- NOISE: <15mv peak-peak
- DRIFT: <2mv/°C
- LOAD
  - VOLTAGE: >2K ohms
  - CURRENT: ≤10v drop
- FREQUENCY RANGE: DC to 5KHZ
- *RESPONSE: 40 microseconds to 90%
- LINEARITY: 0.1%
- GAIN: 200
- TEMPERATURE RANGE: 0-70°C
- OUTPUT IS SHORT-CIRCUIT PROTECTED
- OUTPUT SATURATION: 12.5v

CONTROL CURRENT (CONSTANT)
- ADJUSTMENT: ±30%
- DRIFT: 0.005%/°C

*CTA113 and CTA114
- RESPONSE: 200 milliseconds to 90%

CASE SIZE: DRAWING F, Page 11

## CONNECTIONS



NOTE: Terminals 3 and 5 are internally connected.

NOTE:
(1) If the shield is used, connect it to terminal 5.
(2) Red dot on transducer toward the most positive voltage terminal for a positive output.
**Except for CTA 128 which requires 28 vdc. (positive on terminal 8)

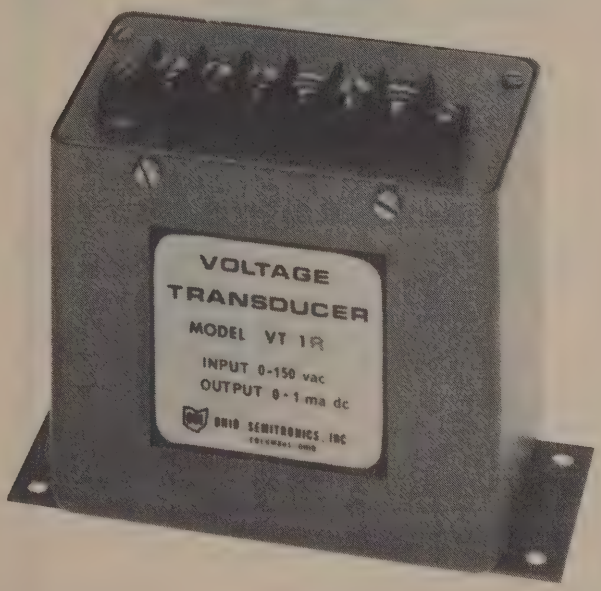
OSI

# RMS VOLTAGE & CURRENT TRANSDUCERS

☐ VT-R SERIES ☐ CT-R SERIES



## DESCRIPTION:

The OSI "RMS" transducers provide an electrical output directly proportional to the rms value of the input waveform. Both Voltage Transducers and Current Transducers can be obtained with either a 0 to 1ma output or a 0 to 10 volt output. Any unit can be calibrated to give 1ma output at 20% higher input.

Current transducers provide 0.5 per cent operation over a 20 to 2000 Hertz range. Voltage transducers can be obtained for 50 to 400 Hertz or 20 to 2000 Hertz operation.

## SPECIFICATIONS:

ACCURACY & LINEARITY: ±0.5% FS

FREQUENCY RANGE:
*VOLTAGE: 50 to 400Hz
CURRENT: 20 to 2KHz

INPUTS:
VOLTAGE: 0 to 480 VAC
CURRENT: 0 to 6 Amps

INPUT SIGNAL BURDEN:
VOLTAGE: 0.12VA FS
CURRENT: 0.5VA FS

DIELECTRIC TEST:
(Input/Output/Case)
VOLTAGE: 1000 VAC Peak
CURRENT: None

OUTPUT RESPONSE:
200 milliseconds to 90%

OUTPUT SHORT CIRCUIT PROTECTED

TEMPERATURE EFFECT: ±0.5%
(—10°C to 60°C)

RIPPLE: <1% FS

EXTERNAL POWER: 115 VAC ±10%
50 to 400Hz

CASE SIZE: DRAWING F, PAGE 11

NOTE: CTR Series output is NOT isolated from input. Caution is advised when making connections.

Calibration and zero adjustments are provided through recess holes in the top of the case.

| MODEL | INPUT SIGNAL | OUTPUT SIGNAL | LOAD OHMS |
|---|---|---|---|
| VT1R | 0-120V | 0-1maDC | 0-6K |
| VT2R | 0-240V | 0-1maDC | 0-6K |
| VT4R | 0-480V | 0-1maDC | 0-6K |
| VT1RV | 0-120V | 0-10VDC | > 2K |
| VT2RV | 0-240V | 0-10VDC | > 2K |
| VT4RV | 0-480V | 0-10VDC | > 2K |
| CT1R | 0-5A | 0-1maDC | 0-6K |
| CT1RV | 0-5A | 0-10VDC | > 2K |

**OPTIONS (VOLTAGE)**

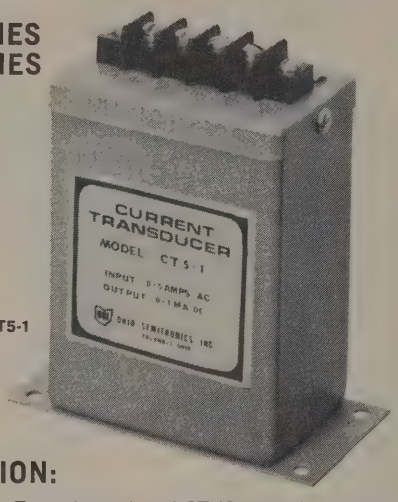
# AC VOLTAGE AND CURRENT TRANSDUCERS

## VT SERIES
## CT SERIES



MODEL CT5-1

## DESCRIPTION:

The VT (Voltage Transducers) and CT (Current Transducers) provide a 0 to 1ma d.c. output related to the a.c. input signal to the transducer. Transducer output is derived from the average absolute value of the input and is calibrated in terms of the rms value for sine wave input.

Voltage transducers are available for 120, 240, 480 volt inputs at 50 to 500 Hz.

Current transducers are available with full-scale current input ranges from 5 to 1000 Amperes rms.

| MODEL | VOLTAGE (VAC) Nominal | Full Scale |
|---|---|---|
| VT120 | 120 | 150 |
| VT240 | 240 | 300 |
| *VT480 | 480 | 575 |

| MODEL | CURRENT (AMPS. AC) (Full Scale) |
|---|---|
| CT5-1 | 5 |

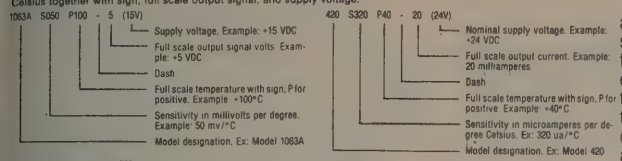
# TEMPERATURE TRANSDUCERS

**How to Specify**

To order, specify the model number, required sensitivity using the Celsius scale of temperatures, full scale temperature in degrees Celsius together with sign, full scale output signal, and supply voltage.



1063A S050 P100 - 5 (15V)
Supply voltage. Example: +15 VDC
Full scale output signal volts Example: +5 VDC
Dash
Full scale temperature with sign, P for positive. Example +100°C
Sensitivity in millivolts per degree. Example: 50 mv/°C
Model designation. Ex: Model 1063A
420 S320 P40 - 20 (24V)
Nominal supply voltage. Example: +24 VDC
Full scale output current. Example: 20 milliamperes
Dash
Full scale temperature with sign, P for positive Example: +40°C
Sensitivity in microamperes per degree Celsius. Ex: 320 ua/°C
Model designation. Ex: Model 420

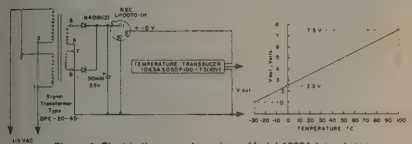


Figure 1. Electric thermometer using a Model 1063A transducer together with graph of the output signal.

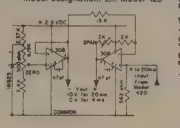

Figure 2. Process interface circuit for use with Model 420

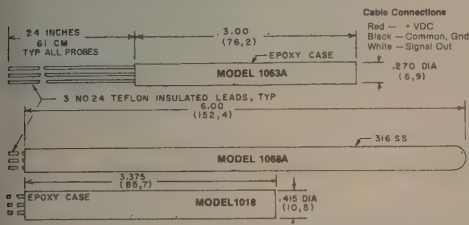
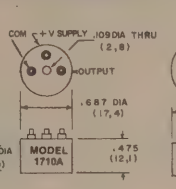
The **solid state temperature transducer** was invented at **Relco Products** and uses a silicon transistor as the temperature sensing element operating in a proprietary circuit made up of a selfadjusting bridge and a feedback amplifier[1]. The result is a very linear temperature transducer having high accuracy and sensitivity without requiring additional external circuitry[2]. The transducer is designed so that less than 50 microwatts is dissipated in the temperature sensing transistor so the selfheating error is less than that of monolithic type temperature transducers now appearing on the scene by a factor of .02 or better, also Mil grade components are used for maximum reliability. Originally developed in 1966 for military and aerospace applications, these transducers have been improved and refined over the last 10 years and are now used worldwide in such diverse applications as petrochemical plants and solar heated homes.

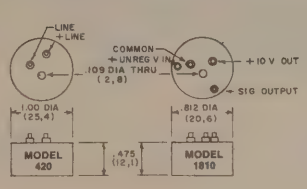
Small quantity prices: 1063A-$19.50; 1068A & 1710A-$29.50; 1810-$39.50; 1067A & 420—$59.50.

1. Robert A. Ruehle, "Solid-State Temperature Sensor Outperforms Previous Transducers," Electronics, March 20, 1957, Volume 48. No. 6, Page 127-130, McGraw-Hill, 1221 Avenue of the Americas, New York, New York.
2. Patented, U.S. 3,708,755; Canada 966,902; G. B. 1,372,917; U.S. and foreign patents pending.

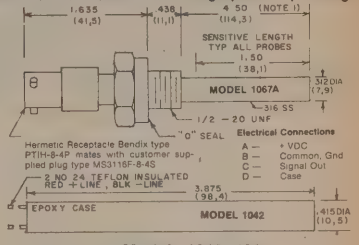


Models 1063A, 1067A, 1068A, 1710A





Models 1810, 1018



Models 1042, 420

| | | | |
|---|---|---|---|
| **RANGE** | Any range between -100 and +150°C (-150 & +300°F). The transducer may be operated intermittently up to +160°C. | Any range between -55 and +125°C (-67 and +257°F) | |
| **ACCURACY** | ±½% F.S. or +.5°C. The transducer can be factory calibrated to an accuracy of ±.1°C within the span of -40 to +110°C. The minimum calibration point always starts at a transducer output of > +.75 volts. | | ±1% F.S. or +1°C; The transducer can be factory calibrated to an accuracy of ±.3°C within the span of -40 to +110°C. |
| **LINEARITY (Note 2)** | ±.15% of span -35 to +110°C; ±.3% of span -60 to +130°C. | ±.15% of span -35 to +110°C; ±.3% of span -55 to +125°C | |
| **OUTPUT SIGNAL** | A linear voltage which increases with increasing temperature ranging from zero volts up to the full scale value specified. (Note 3) | | A linear current which increases with increasing temperature ranging from 4 ma. at 0% of span to 20 ma. at 100% of span. |
| **SENSITIVITY** | Any sensitivity up to 250 millivolts per degree Celsius may be specified (139 mv/°F). | | Any sensitivity between 80 & 320 microamperes/°C (44 & 178 ua/°F) may be specified. |
| **MAXIMUM FULL SCALE OUTPUT (Note 7)** | V supply: +15, +12, +10, +5 — V out max: +12, +9, +7.5, +2.5 | +7.5 volts | 20 milliamperes |
| **SUPPLY VOLTAGE** | Standard: +15, +12, +10 and +5 volts, ±.1% regulated. Optional: Any regulated voltage from +5 to +25 volts, ±.1%. | +15 V unregulated nominal, +12.5 V minimum, +30 V maximum (Note 4) | +24 V unregulated nominal, +12.5 V minimum, +35 V maximum |
| **OUTPUT IMPEDANCE** | 25 ohms typ., 10 ohms minimum, 35 ohms maximum | | The transducer is a current source with a high source impedance. |
| **LOAD IMPEDANCE** | The maximum current drawn from the transducer should not exceed .25 ma. to minimize self heating errors. | | See Figure 2 |
| **TIME CONSTANT (Note 5)** | 1063A 10 seconds, 1067A 1068A and 1710A 15 seconds | 20 seconds | 25 seconds |
| **POWER CONSUMPTION (Note 6)** | 10 to 25 milliwatts typ. | 15 to 35 milliwatts typ. | 85 to 230 milliwatts typ. See Figure 2 |
| **SELF HEATING ERROR** | .004°C per milliwatt power dissipation typical with the transducer mounted in place and operated with standard or nominal supply voltages. | | |
| **STABILITY** | ±.1°C over 90 days | | ±.25°C over 90 days |
| **REFERENCE OUTPUT VOLTAGE** | | The +10 V reference is standard on Model 1810; it can also be brought out on Model 1018 if so specified on ordering. External load on +10 V is limited to 10 ma. maximum and this load will add to transducer self heating error. | |

Note 1. Standard immersion length , longer lengths can be supplied.

Note 2. The maximum error incurred when the best straight line fit is used to approximate the transfer characteristic is as specified. The straight line fit is between +.75 volts out and full scale output. For current output models the fit is between 4 ma. and 20 ma.

Note 3. The output signal departs from the specified linearity at levels of less than +.75 volts due to a drop in amplifier openloop gain as the amplifier approaches negative saturation.

Note 4. The transducer should be operated with the minimum supply voltage consistant with anticipated voltage fluctuations for minimum self heating error.

Note 5. Time Constant: The time required for a 63% response to a step change from 24°C to an oil bath of #200 Dow Corning 1.5 CTSK at 76°C and flowing at 3FPS transverse to the sensing surface is less than the figure given. The inservice response will depend upon how it is mounted and the environment in which it is used.

Note 6. Power consumption depends upon the supply voltage, transducer load and output signal swing.

Note 7. V out max for +5 volt units with sensitivities > 25 mv/°C is +3 volts.

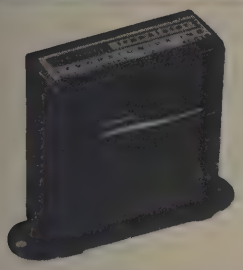
# abbott 60 industrial power transformers



## *specifications*

**INPUT PRIMARY:** 115 VAC standard.
230 VAC at no additional cost. Specify by suffixing "A" to model number.
115/230 VAC dual input at 10% additional. Specify by suffixing "B" to model number.

**INPUT FREQUENCY:** 50 to 400 Hz, 1 phase.

**REGULATION:** 15% max. from no load to full load (6% on units size 8 and larger).

**SECONDARY VOLTAGE TOLERANCE:** Within 5% of listed output voltage when measured at full load and 115 VAC input.

**INSULATION TEST:** 1500 VAC.

**OPERATING TEMPERATURE:** 80°C maximum ambient (70°C on units size 8 and larger).

**APPROXIMATE EFFICIENCY:** Ranges from 80% to 90%.

**CONSTRUCTION:** Commercial grade using Silicon Iron for core and heavy insulated synthetic film magnet wire with class "B" rating impregnated with a high quality insulating varnish having a class "H" rating.
Other outputs and/or inputs available on request.

| Output Volts (F.L.) | Output Current (Amps) Parallel Connection | Output Current (Amps) Series Connection | Size | Weight Lbs. Typ. | Model Number | Price 1-9 pcs. |

| SPECIFICATIONS | 6PC SERIES | 4PC SERIES |
|---|---|---|
| INPUT PRIMARY: | 115 vac, 50-400 Hz, 1 Phase | 115 vac, 380-420 Hz, 1 Phase |
| REGULATION: | 20% or less from no load to full load | 10% or less from no load to full load |
| SECONDARY VOLTAGE TOLERANCE: | Within 5% of listed output voltage when measured at full load and 115 vac input | |
| INSULATION TEST: | 1000 vac | |
| OPERATING TEMPERATURE: | 85°C maximum ambient | |
| CONSTRUCTION: | Printed circuit pin plug-in | |
| TYPICAL EFFICIENCY RANGE: | 72%-76% | 90%-93% |
| OPTIONS AVAILABLE: | Other output voltages, 230 VAC and 115/230 VAC inputs are available. Please consult our nearest office for complete information. | |

## *features*

- For Printed Circuits
- Close Regulation
- 85°C Operation
- Small Size
- Stock Delivery

The miniature power transformers listed on this page are specifically designed for mounting on printed circuit boards. Two lines are available: the 6PC Series for 60 Hz application, and the 4PC Series for 400 Hz. Small size, reliability and sensible prices are major features of these OEM transformers. Take a good look at these Models. If you don't find what you want, call us for a special quotation.

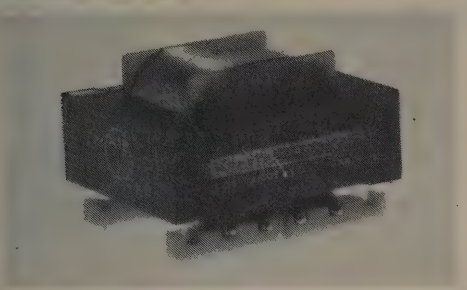
# low profile transformers



These miniature power transformers are specifically designed for use in PC board card racks where height above the board is critical. These low profile transformers have a height of only 1.03 inches for 1.2 watts output, 1.17 inches for 3.25 watts output, and 1.31 inches for 6.0 watts output.

If the exact unit you require is not listed as a standard item, please contact our nearest office and we will be happy to quote on your exact requirements.

## *features*

- Low Profile PC Mounting
- 85°C Operation
- Hi-Reliability

## *specifications*

**INPUT PRIMARY:** 115 VAC standard.
230 VAC at no additional cost. Specify by suffixing "A" to model number.
115/230 VAC dual input at 10% additional. Specify by suffixing "B" to model number.

**INPUT FREQUENCY:** 50 to 400 Hz, 1 phase

**REGULATION:** 20% or less from no load to full load.

**SECONDARY VOLTAGE TOLERANCE:** Within 5% of listed output voltage when measured at full load and 115 VAC input.

**INSULATION TEST:** 1000 VAC.

**OPERATING TEMPERATURE:** 85°C maximum ambient.

**CONSTRUCTION:** Printed circuit pin plug in.

**APPROXIMATE EFFICIENCY:** Ranges from 72% to 76%.

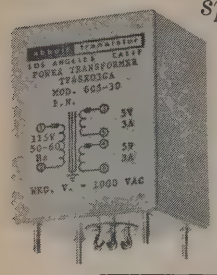
# abbott 60 ~/400 ~ MIL-T-27D power transformers

*specifications*



| Specifications | 6C Series | 4A Series |
|---|---|---|
| INPUT PRIMARY: | 115 VAC, 50 to 65 Hz, 1 Phase | 115V , 400 Hz ±20 Hz, 1 Phase |
| REGULATION: | 10% no load to full load | 10% no load to full load |
| SECONDARY VOLTAGE TOLERANCE: | Within 3% when measured at full load and 115 VAC input | Within 5% when measured at full load and 115 VAC input |
| INSULATION TEST: | 1500 VAC | 1500 VAC |
| OPERATING TEMP.: | 90°C maximum ambient | 105°C maximum ambient |
| CONSTRUCTION: | To MIL-T-27D, grade 4, class "S", life "X", (10,000 hrs.) | To MIL-T-27D, grade 5, class "S", life "X", (10,000 hrs.) |
| EFFICIENCY: | From 80% to 90% | From 90% to 93% |
| ENVIRONMENT: | Encapsulated to meet MIL-STD-810B for vibration, shock, sand, dust, humidity, salt spray, fungus, sunshine, rain, explosion, and altitude (to a vacuum). NOTE: for high altitude operation, encapsulate terminals. | |
| OPTIONS AVAILABLE: | Other output voltages and 230 VAC input are available. Please consult our nearest office for complete information. | |

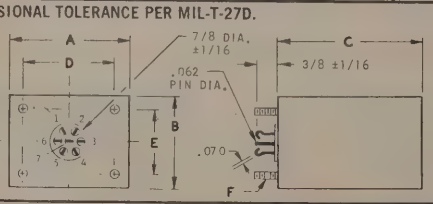
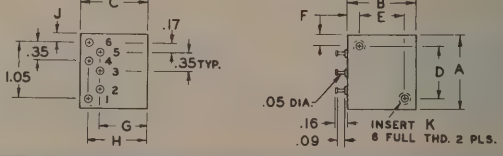
DIMENSIONAL TOLERANCE PER MIL-T-27D.



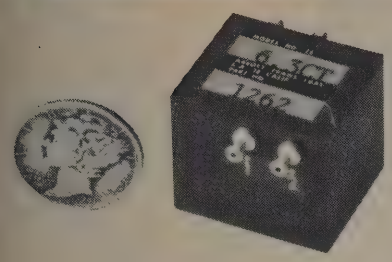
| Size | A | B | C | D | E | F | G | H | J | K |
|---|---|---|---|---|---|---|---|---|---|---|
| 1 | 1.37 | 1.25 | 1.31 | 1.00 | .87 | .19 | 1.00 | 1.19 | .16 | 4-40 |
| 2 | 1.50 | 1.37 | 1.37 | 1.12 | 1.00 | .19 | 1.06 | 1.25 | .22 | 4-40 |
| 3 | 1.75 | 1.50 | 1.56 | 1.25 | 1.00 | .25 | 1.25 | 1.44 | .35 | 6-32 |
| 4 | 2.00 | 1.62 | 1.81 | 1.50 | 1.12 | .25 | 1.50 | 1.69 | .47 | 6-32 |

DIMENSIONAL TOLERANCE = ±.02, EXCEPT F, G, H, J = ±.04



Add Dept. EM to address to tell them you saw it in eem

# abbott 400 ~ transformers



## *features*

- Hermetically sealed
- 105°C operation
- To meet MIL-T-27D
- Designed exclusively for 400 Hz
- For aerospace application
- Molded diallyl phthalate

**DELIVERY IS FROM STOCK**

## *specifications*

**Input Primary**
115V, 400 Hz ±20 Hz, 1 phase

**Regulation**
10% no load to full load

**Secondary Voltage Tolerance**
Within 5% when measured at full load and 115 VAC input

**Insulation Test**
2500 VDC or 150% of secondary voltage (whichever is higher)

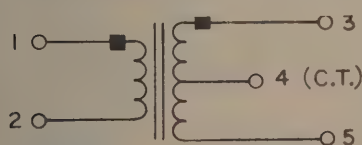
**Construction**
To MIL-T-27D, grade: 5, class: "S", life: "X" (10,000 hrs.) case: smaller

**Environment**
Encapsulated to meet MIL-STD-810B, including vibration to Proc. XII, temperature to 105°C, shock, sand, dust, humidity, saltspray, fungus, sunshine, rain, explosion, and altitude (to a vacuum)

**Output Secondary**
See voltage and current of specific models listed

Other models are available with outputs to 5000V. Contact our nearest office for complete information.

### TYPICAL CIRCUIT DIAGRAM



"■" refers to in-phase points

| Case Size | Width (in.) | Depth (in.) | Height (in.) | Weight (lbs.) |
|---|---|---|---|---|
| A | 0.87 | 0.74 | 0.78 | 0.06 |

# UNITED PRICING REPORTS

## the single source that speeds up invoicing, pricing, quoting, purchasing and estimating

Electronic component prices change so fast, you'd need a team of people just to keep up.

United Pricing Reports is the better way. When you subscribe to Pricing Reports you receive 1500 pricing sheets (3000 pages) of the latest prices, as of the date we ship them to you.

This gives you, in a single source, up-to-the minute selling prices on more than 500,000 electronic components.

United Pricing Reports gives you accurate resale prices at the exact moment you need them. Not hours or days later. So it helps you eliminate frantic phone calls, letter writing and catalog scanning to check on prices when you write an invoice or type a purchase order.

## Twice weekly price updates.

One week after you receive your Pricing Reports source book (1500 pricing sheets) you begin receiving twice weekly price updates. You simply take these new price pages and replace the now obsolete pages with them.

The whole process is simple. All information is organized alphabetically by manufacturer. And each manufacturer's price schedule is listed by part number in numerical/alphabetical sequence.

One more thing. When we promise twice weekly updates, we deliver. 52 weeks a year, consistently. Not monthly or every other month. We have a tradition of delivery on our promises, and we're certainly not going to stop now.

# MAGNETICS PRODUCTS

Bourns Magnetics Products is a recognized leader in the field of magnetic components and assemblies. Advanced engineering techniques and diversification of its product lines serves to continually increase the company's ability to serve the electronics industry. Emphasis on product development has pioneered the 1/8" and 1/4" cube microminiature transformers and inductors. Numerous state-of-the-art advancements ensure high performance and consistent reliability in the volume production of magnetic components and assemblies.

## GENERAL SPECIFICATIONS

Bourns microtransformers and microinductors have been designed and manufactured to meet applicable requirements of MIL-T-27, grade 5.

**Physical Specifications**

Enclosure: High temperature DAP and epoxy
Markings: BMP part numbers, date code and pin numbers

**Environmental Specifications**

Life: Greater than 10,000 hours
MIL-T-27 Environments: Meets or exceeds requirements of grade 5
Moisture Resistance: Cycling from −10° to +65°C in 90-98% relative humidity with vibration following cold shocks
Vibration: 0.06 inch da from 10-80 cps 20Gs from 80-2000 cps (20 hour test)
Shock: 18 drops from 13 inches with impact blocks landing in sand (approximately 30Gs for 11 milliseconds)
Flammability: Torch flame applied for 15 seconds
Insulation Resistance: 10,000 megohms
Sealing: Immersion in 85°C water for 2 minutes
Immersion: Immersion in water bath at temperatures of 65°C and 25°C for 1 hour, 2 cycles

## AVAILABLE SPECIAL ORDER MODIFICATIONS

- Electrostatic shield between windings
- Magnetic shielding-slip on cover
- Up to ten (10) leads on .050" centers
- Special marking, i.e., customer part number, etc.
- Special testing — group A, B, or C
- Special pulse designs
- Rise times as low as .01 μsec.
- Pulse width to 10 μsec.
- ET constants to 25 volt-μsec.
- High Q
- Custom designs for high reliability, pulse, blocking oscillator, power, tuned circuit and various other applications

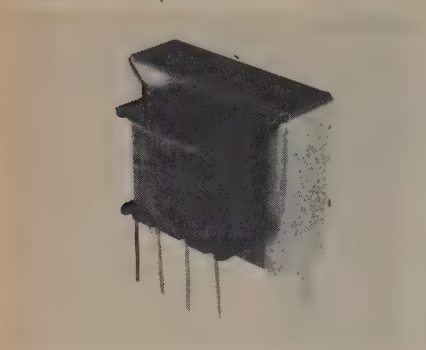
# TRANSFORMERS

Industrial/Commercial



## PW-9000 SERIES

Miniature Power Transformers

### FEATURES

- Dual secondaries
- Less than 20% load regulation
- Primaries rated 50 Hz to 500 Hz
- Printed circuit mounting

This series of power transformers includes units for transistorized control and instrumentation applications. Primaries are rated at 115 V, 50 to 500 Hz and dual secondaries provide voltages from 4 to 38 volts parallel connected, and 8 to 76 volts series connected. Load regulation will not exceed 20%. Also available in 220 and 240 V, 50 Hz to 500 Hz primaries.

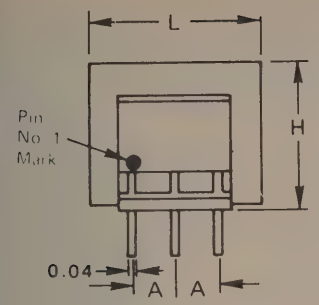
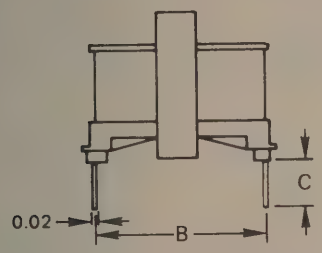
## DIMENSIONS





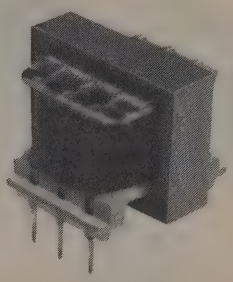
This series of transformers covers input, output and driver applications with a broad frequency response of ±3db from 300-10,000 Hz. It features precision molded terminals for rapid circuit board insertion and the primary and secondary windings may be reversed. These units are ideal impedance matching.

## CONVERTER TRANSFORMERS

These Transformers are designed for use in self saturating DC to DC or DC to AC converters. They can be used at switching frequencies from 15 KHz to 50 KHz. Utilization of ferrite cores yields efficiencies up to 80%.

# AUDIO TRANSFORMERS

Industrial/Commercial



## AU-9000 SERIES

Miniature Audio Transformers

### FEATURES

- Precision molded terminals
- Broad frequency response
- Reversable, primary and secondary windings
- Ideal for impedance matching

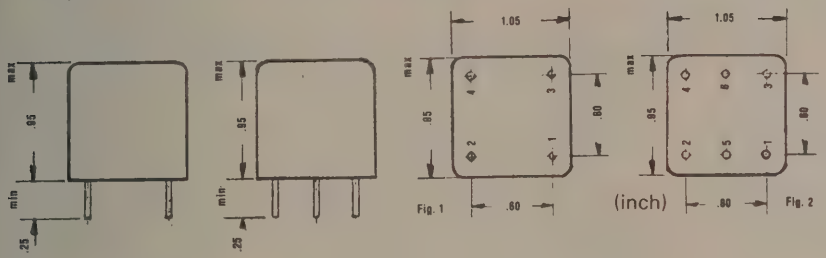
## PL-9100 SERIES

### FEATURES

- 2600 V RMS dielectric strength
- Printed circuit mounting
- High inductance
- Potted construction
- Turns ratio: 1:1, 1:1:1, 2:1, 2:1:1
- Primary inductance (μH): 1000, 5000, 10000
- Temperature range: —10° to +70°C



## PL-9200 SERIES

### FEATURES

Flexible leads of polyurethane insulated magnet wire can be soldered directly to terminals without need for removal of wire insulation.

- Designed to transfer high amplitude or long duration pulses without saturation.
- Turns ratio: 1:1, 1:1:1, 2:1, 2:1:1, 5:1, 5:1:1
- Primary inductance (μH): 200, 500, 1000, 2000, 5000
- Operating voltage to 240 V line
- Dielectric test at 60 Hz: 1600 V RMS

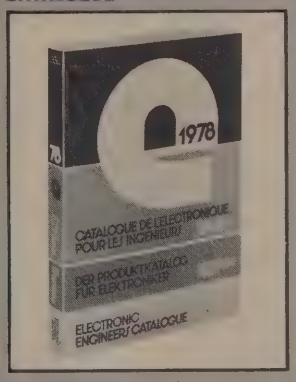
# WE KNOW OUR STUFF

## 41 YEARS OF EXPERIENCE IN CATALOGING, 21 EDITIONS OF eem

### eem/ELECTRONIC ENGINEERS MASTER CATALOG —

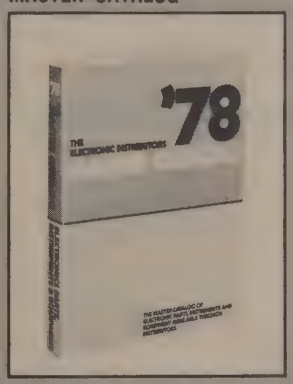
The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

### ELECTRONIC ENGINEERS CATALOGUE



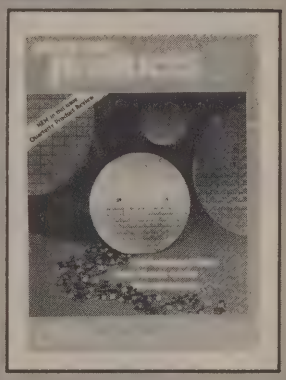
The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.

### ELECTRONIC DISTRIBUTORS MASTER CATALOG —



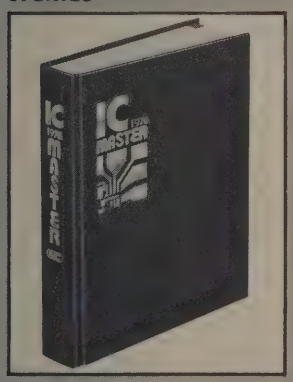
The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

### ELECTRONIC PRODUCTS MAGAZINE —



The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

### IC MASTER AND THE UPDATES —



The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

### eem FILE SYSTEM —

The only filing system designed especially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

### UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

### UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

NOTES:

1. The purpose of the above tables is to help the design engineer to approximate the size and type of the transformer required in the circuit being developed.
2. Electrical outputs are approximate and are based on the following conditions:
   A. Resistive loads.
   B. Break-down voltage 1,500V RMS max.
   C. Transformer installed where air circulation is permitted.
3. Transformers with enclosed coils are available; however, the rating of the transformer will be reduced due to the increase in coil temperature.
4. Transformers noted in the above table are estimated with single secondary and 30V maximum output. Voltage outputs other than 30V and multiple secondaries are available, but the overall VA rating of the transformer must be adjusted accordingly.
5. All transformers are available with various types of termination: leads, solder lugs, quick-disconnect connectors, etc.

## SPECIALTY TRANSFORMERS

Our large engineering staff, laboratory facilities, tool facilities, winding department, molding department and multiple plant production facilities provide the advantage of high volume transformer production not common to the industry. Many of today's transformer manufacturers are not capable of handling the special design or tooling that is required for specialty transformer manufacturing.

Typical examples of special type volume transformers manufactured by Dormeyer Industries are shown above.

Some of these special type transformers are as follows:

Molded transformers • Control transformers • High voltage transformers, fence/chargers and power supplies • Isolation • Step up-step down • Auto transformers • High reactance power transformers

Our Sales and Engineering personnel are always available for consultation on any of your transformer needs.

## DORMEYER COILS

Dormeyer Industries has extensive winding and molding facilities at all plants for the high volume production of coils. These facilities, together with our production know-how and engineering, can assure a high quality product at competitive prices.

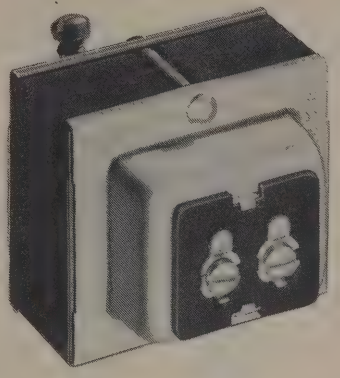
Some of the types of coils manufactured in high volume by Dormeyer Industries are shown above. These are:

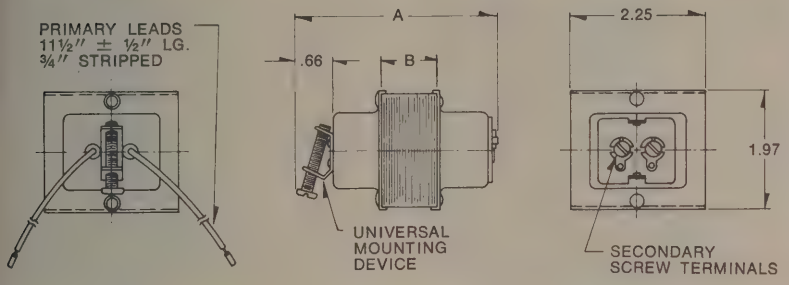
- BOBBIN WOUND
- PAPER SECTION
- ENCAPSULATED

Our Sales and Engineering personnel are always available for consultation on any of your coil requirements.

# TRANSFORMERS

## UNIVERSAL MOUNT CONTROL TRANSFORMERS





Transformers on this page comprise a standardized line of universal mount control transformers. All are priced very competitively, and are manufactured by using highly automated production line techniques.

Raw materials and sub-assemblies for the complete product line are carried in stock. Those transformers marked with an * are carried in stock as completed units and are available for immediate shipment. Sub-assemblies are carried in stock for all remaining transformers, and complete units are available on a reduced lead time basis.

Various mounting accessories are available from stock. Special mounting plates and styles are available on special order.

This transformer line carries UL and CSA individual listings. They are shipped bearing the UL and CSA seal, except that in some special mounting and termination variations where they are component approved and total acceptability must be evaluated in the end product.

**FEATURES:**

Wide range of voltage and wattage ratings available to meet virtually any requirement for which a control transformer can be used.

No costly mounting devices are required for most installations.

Construction is UL listed and CSA certified.

Sturdily built for long, trouble-free service life.

**MOUNTING DEVICE:**

Unless otherwise specified, all Dormeyer Control Transformers are equipped with a universal mounting device that permits mounting the transformer in the ⅞″ knockout hole of any junction box.

**MOUNTING SUPPORTS:**

A variety of mounting devices are available, including several universal mounting plates for junction boxes, a plug-in device and a conduit fitting.

## SPECIFICATIONS AND LOAD CHARACTERISTICS

### DCT-5 SERIES

| Cat. No. | Primary (Input) Voltage | Secondary (Output) Voltage | VA Rating (Wattage) | Ship. Wght. | DIMENSIONS (inches) A | B |
|---|---|---|---|---|---|---|
| DCT-5-120* | 120V | 10V | 5 VA | 10 oz. | 2.6 | .31 |

NOTES: 1. DCT-5-120 is carried in stock as a complete transformer.
2. For mounting accessories, see next page.

### DCT-10 SERIES

| Cat. No. | Primary (Input) Voltage | Secondary (Output) Voltage | VA Rating (Wattage) | Ship. Wght. | DIMENSIONS (inches) A | B |
|---|---|---|---|---|---|---|
| DCT-10-120* | 120V | 16V | 10 VA | 11 oz. | 2.6 | .31 |

NOTES: 1. DCT-10-120 Series is carried in stock as a completed transformer.
2. For mounting accessories, see next page.

### DCT-12 SERIES

| Cat. No. | Primary (Input) Voltage | Secondary (Output) Voltage | VA Rating (Wattage) | Ship. Wght. | DIMENSIONS (inches) A | B |
|---|---|---|---|---|---|---|
| DCT-12-120* | 120V | 24V | 12 VA | 12 oz. | 2.65 | .36 |
| DCT-12-208 | 208V | 24V | 12 VA | 12 oz. | 2.65 | .36 |
| DCT-12-240 | 240V | 24V | 12 VA | 12 oz. | 2.65 | .36 |
| DCT-12-284 | 208/240V† | 24V | 12 VA | 12 oz. | 2.65 | .36 |
| DCT-12-480 | 480V | 24V | 12 VA | 12 oz. | 2.65 | .36 |

NOTES: 1. DCT-12-120 is carried in stock as a completed transformer.
2. For mounting accessories, see next page.
3. Transformers marked with a † are dual voltage (208V-240V) and are equipped with 3 primary leads: common — white, 208V — yellow and 240V — black.

### DCT-20 SERIES

| Cat. No. | Primary (Input) Voltage | Secondary (Output) Voltage | VA Rating (Wattage) | Ship. Wght. | DIMENSIONS (inches) A | B |
|---|---|---|---|---|---|---|
| DCT-20-120* | 120V | 24V | 20 VA | 15 oz. | 2.90 | .61 |
| DCT-20-208 | 208V | 24V | 20 VA | 15 oz. | 2.90 | .61 |
| DCT-20-240 | 240V | 24V | 20 VA | 15 oz. | 2.90 | .61 |
| DCT-20-284 | 208/240V† | 24V | 20 VA | 15 oz. | 2.90 | .61 |
| DCT-20-480 | 480V | 24V | 20 VA | 15 oz. | 2.90 | .61 |

NOTES: 1. DCT-20-120 is carried in stock as a completed transformer.
2. For mounting accessories, see next page.
3. Transformers marked with a † are dual voltage (208V-240V) and are equipped with 3 primary leads: common — white, 208V — yellow and 240V — black.

### DCT-40 SERIES

| Cat. No. | Primary (Input) Voltage | Secondary (Output) Voltage | VA Rating (Wattage) | Ship. Wght. | DIMENSIONS (inches) A | B |
|---|---|---|---|---|---|---|
| DCT-40-120* | 120V | 24V | 40 VA | 22 oz. | 3.30 | 1.01 |
| DCT-40-208 | 208V | 24V | 40 VA | 22 oz. | 3.30 | 1.01 |
| DCT-40-240 | 240V | 24V | 40 VA | 22 oz. | 3.30 | 1.01 |
| DCT-40-284 | 208/240V† | 24V | 40 VA | 22 oz. | 3.30 | 1.01 |
| DCT-40-480 | 480V | 24V | 40 VA | 22 oz. | 3.30 | 1.01 |

NOTES: 1. DCT-40-120 is carried in stock as a completed transformer.
2. For mounting accessories, see next page.
3. Transformers marked with a † are dual voltage (208V-240V) and are equipped with 3 primary leads: common — white, 208V — yellow and 240V — black.

### DCT-55 SERIES

| Cat. No. | Primary (Input) Voltage | Senondary (Output) Voltage | VA Rating (Wattage) | Ship. Wght. | DIMENSIONS (inches) A | B |
|---|---|---|---|---|---|---|
| DCT-55-120* | 120V | 24V | 55 VA | 33 oz. | 3.83 | 1.64 |
| DCT-55-208 | 208V | 24V | 55 VA | 33 oz. | 3.83 | 1.64 |
| DCT-55-240 | 240V | 24V | 55 VA | 33 oz. | 3.83 | 1.64 |
| DCT-55-284 | 208/240V† | 24V | 55 VA | 33 oz. | 3.83 | 1.64 |
| DCT-55-480 | 480V | 24V | 55 VA | 33 oz. | 3.83 | 1.64 |

NOTES: 1. DCT-55-120 is carried in stock as a completed transformer.
2. For mounting accessories, see next page.
3. Transformers marked with a † are dual voltage (208V-240V) and are equipped with 3 primary leads: common — white, 208V — yellow and 240V — black.

# DORMEYER INDUSTRIES

*A Division of A. F. Dormeyer Mfg. Co., Inc.*

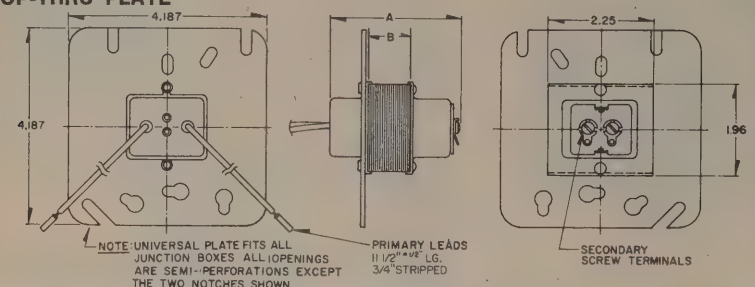
# TRANSFORMERS

## CONTROL TRANSFORMERS

### SPECIAL MOUNTING PLATES

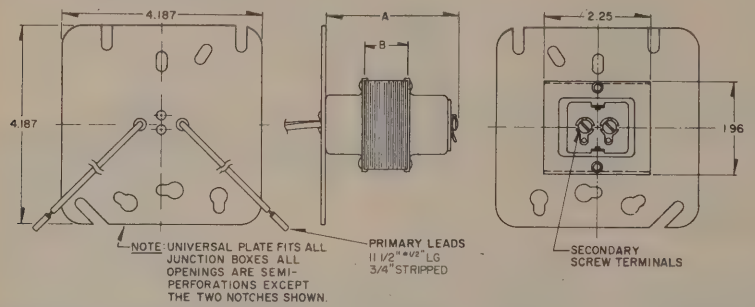
In addition to the standard mounting plate shown on page 10, several styles of special plates for mounting the transformer are available. All are designed for mounting on any square, round or octagonal junction box. Two examples are shown on this page.

### DROP-THRU PLATE



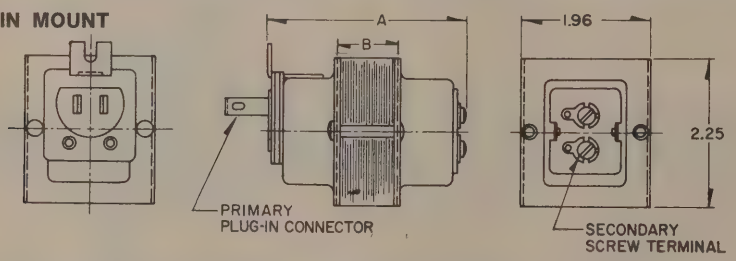
This plate is for use where there is sufficient room inside the box for the primary side of the transformer. It is furnished assembled to the transformer at nominal extra cost. For approximate transformer dimensions refer to preceding page.

### SURFACE MOUNTED PLATES



Where there is no room for the "Drop-Thru" plate, a surface mount plate can be furnished assembled to the transformer cover at nominal extra cost. For approximate transformer dimensions refer to preceding page.

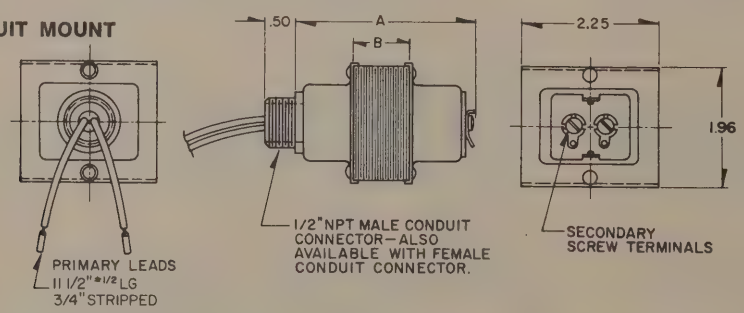
### PLUG-IN MOUNT



All 120V primary models are available with a plug-in mount that can be plugged into any standard wall outlet, thus eliminating the need for line cords or mounting brackets.

UL and CSA listing on this style is limited. If listing is required, consult Dormeyer Engineerng Department. For approximate transformer dimensions, refer to preceding page.

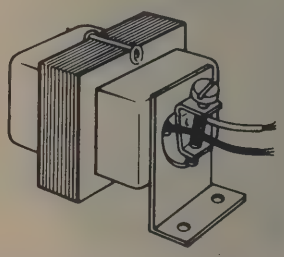
### CONDUIT MOUNT



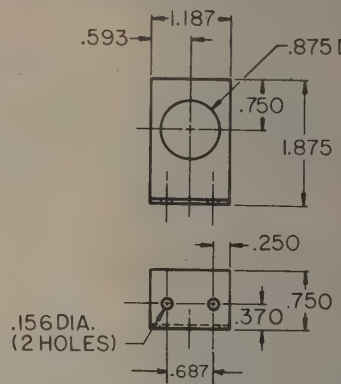
This mount permits the transformer to be connected directly to the conduit or pipe that encloses the primary conductors. It is available with either male or female thread at nominal extra cost. For approximate transformer dimensions, refer to preceding page.

## MOUNTING ACCESSORIES

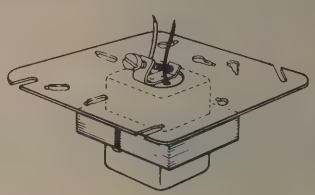
### MOUNTING FOOT (CAT. NO. TR-138)



For mounting on wall, post or a foot that permits the transformer to be mounted horizontally or vertically is available at nominal extra cost. Post opening required for this mounting is the same size as knockout in junction box.



### MOUNTING PLATE (CAT. NO. TR-146)



For mounting on the front of a junction box, a universal plate is available at nominal extra cost.

Knockout openings are provided that will permit its use with square, round or octagonal junction boxes. The center opening is sized to take the universal mounting device.

**EWC for fast service.** Efficient and speedy response to customer needs is what EWC is all about. In addition to our standard line, we welcome inquiries about problems calling for custom designs. Cutting through red tape with person-to-person discussions has established EWC as an ideal supplier of quality products for quality-conscious companies.

EWC INC.

Dept. EM / 725 Federal Ave. / Kenilworth, NJ 07033 / (201) 245-3200 / TWX 710-996-5993

# FREED TRANSFORMER CO., INC.

## MIL-T-27 COMPONENTS

### TRANSISTOR SUPPLY TRANSFORMERS
### TST SERIES

Manufactured and Guaranteed to Specifications MIL-T-27

TST-6 — Frequency 57 Hz to 63 Hz — Primary 115 volts units with * primary 115 and/or 230 volts

TST-4 — Frequency 380 Hz to 1000 Hz — Primary 115 volts

TST units can be supplied in commercial type construction (channel or shell type with leads).

**When ordering specify (6) for 57 to 63 Hz and (4) for 380 to 1000 Hz

**D.C. to RMS Conversion Chart**

| Resistive or Inductive Loads | | Capacitive Loads | |
|---|---|---|---|
| Full Wave Center Tapped | Full Wave Bridge | Full Wave Center Tapped | Full Wave Bridge |
| $E_{RMS} = 2.22$ Edc | $E_{RMS} = 1.11$ Edc | $E_{RMS} = 1.6$ Edc | $E_{RMS} = 8$ Edc |
| $I_{RMS} = .75$ Idc | $I_{RMS} = 1.05$ Idc | $I_{RMS} = 1.1$ Idc | $I_{RMS} = 1.55$ Idc |

Edc – should include voltage drop across reactor and voltage drop across one diode for F W C T and voltage drop across two diodes for F-W Bridge

# HERMETICALLY SEALED MINIATURE AND SUB-MINIATURE FILTERS TO MIL-F-18327

Freed Standard Filters are **Hermetically Sealed Miniature and Sub-Miniature** high performance components designed for both production and laboratory applications in the Communications and Electronic industry. In order to achieve attenuation requirements not obtainable with one single filter, one can combine several standard filters of different transmission characteristics. Wide Band Pass characteristics are obtainable by combining low and high Pass Units. The astatic construction of inductive components together with special shielding reduces the hum pick-up of the standard filters.

**Low Pass Filters:** The attenuation characteristics of Low Pass Filters are 6db or less at cut-off frequency • **ILP-ILM Interstage Low Pass Filter.** Characteristic impedance 10,000 ohms, in and out • **LLP-LLM Line Low Pass Filter.** Characteristic Impedance 500 to 600 ohms, in and out • **High Pass Filters:** The attenuation characteristics of High Pass Filters are 6db or less at cut-off frequency • **IHP-IHM Interstage High Pass Filter.** Characteristic Impedance 10,000 ohms, in and out. • **LHP-LHM Line High Pass Filter.** Characteristic Impedance 500 to 600 ohms, in and out • **Band Pass Filters:** The attenuation characteristics of Band Pass Filters are 2db or less at plus or minus 3% of center frequency • **IBP-IBM Interstage Band Pass Filter.** Normal input impedance — 10,000 ohms. Output impedance .5 megohms. Effective voltage step-up 2:1. (Output voltage to source voltage.) • **LBP-LBM Line Band Pass Filter.** Nominal input impedance 500 to 600 ohms. Output impedance .5 megohms. Effective voltage step-up 5:1. (Output voltage to source voltage.)

**Special filters in all six types are available upon request.**

## NULL "T" FILTERS SERIES 1950

Standard models are available for 30, 60 and 120 cycles in a wide range of impedances. Each network will give a minimum of 50 db attenuation at the null frequency.

The null frequency is adjusted to a tolerance of ±2%.

All Null T Filters are hermetically sealed.

Prices on request.

| Catalog No. | Frequency |
|---|---|
| NTF- 30 | 30 Hz |
| NTF- 60 | 60 Hz |
| NTF-120 | 120 Hz |

FREED TRANSFORMER COMPANY, INC. 1795 WEIRFIELD ST. (Ridgewood) Brooklyn, N. Y. 11227

# FREED TRANSFORMER CO., INC.

## TOROIDAL INDUCTORS

Using the latest developments in the field of magnetic materials and new impregnation and molding techniques the Freed Transformer Co. makes available to the industry the most extensive line of toroidal inductors.

Freed toroids are available in three types of constructions. Open units coated with a special high temperature extremely low loss compound, hermetically sealed in metal cases or molded in special **Freed Epoxy Resin.** Both hermetically sealed and molded units meet the latest military specification MIL-T-27A(graded 1 or 4 and 2 or 5 respectively.)Freed toroidal inductors are supplied with either molypermalloy or carbonyl iron powder cores

**1. Temperature Stabilization:**

The molypermalloy and carbonyl iron powder cores have a temperature coefficient of inductance. Depending on the degree of temperature stabilization the cores have different temperature coefficients. The degree of stabilization is denoted by a two-letter code.

SF Non-stabilized cores, ±2½% inductance variations from —55°C to +85°C.
SN Non-stabilized cores, +2% inductance variations from —55°C to +85°C.
SE Temperature stabilized cores, +0.1% to —0.4% inductance variations from —1.5°C to +54°C.
SB Temperature stabilized cores, ±0.1% inductance variations from +13°C to +35°C.
SD Temperature stabilized cores, ±0.1% inductance variations from —1.5°C to +54°C.
SW Temperature stabilized cores, ±0.25% inductance variations from —54°C to +85°C.
SM Temperature stabilized cores, ±.25% —65°C to +125°C.
SP Temperature stable carbonyl iron cores, ±0.3% inductance variations from —55°C to +85°C.

The temperature (stabilization) coefficient of an inductor will depend upon the nominal inductance value, operating frequency and A.C. voltage across the coil. Under some unfavorable working conditions the temperature coefficient of inductance corresponding to a given stability characteristic may be exceeded.

**Toroids with special requirements such as tapped toroids, toroidal transformers, molded and cased units with dimensions other than standard sizes and high temperature toroids can be supplied on request. Our engineering and laboratory facilities are available for consultation, research and development.**

*TI-20 through TI-23 have a very low voltage coefficient and inductance will change very little with voltage. Because of high frequency application, the maximum voltage is limited rather by breakdown than by saturation.

$$\text{Normalized } V_{AC} = \frac{V}{F}\,\frac{1}{\sqrt{L_H}}$$

$$\text{Normalized } I_{AC} = I_{AC}\sqrt{L_H}$$

$$\text{Normalized } I_{DC} = I_{DC}\sqrt{L_H}$$

where F —operating frequency in Hz
$L_H$ —inductance in henries
Iac—A.C. current in MA
Idc—D.C. current in MA
V —A.C. voltage across the core

## COMMERCIAL GRADE COMPONENTS

These components are designed to meet the demand for low-cost replacement parts for commercial electronic equipment.

The best commercially available materials have been utilized in the design of these units, to insure reliability and excellent performance characteristics. Vacuum impregnation with a non-hygroscopic varnish to prevent penetration of humidity are employed to give these units long life and trouble-free performance.

230-115 V, 50-60 C.P.S. Stepdown Transformers rated from 25 V A up to 5,000 V A Rating and line booster transformers are included in this series.

All units, with only a few exceptions, are uncased or of shell-type construction.

Isolation transformers and Stepdown transformers are equipped with line cord and receptacle.

## MCV – CONSTANT VOLTAGE TRANSFORMERS – MCV
### (FERRO-RESONANT TRANSFORMERS)

The MCV line of constant voltage transformers provides accurate regulation against line and/or load variations, without the use of tubes or moving parts.

**Input Voltage Range**
**95 to 130**

Rated output within ± 2% of nominal value. Regulation automatically maintained within ± 1%. Regulation from 25% to full load ± 2%.

- MILITARY SPECIFICATIONS
- NO TUBES
- COMMERCIAL
- NO MOVING PARTS
- ACCURATE REGULATIONS
- FAST RESPONSE
- FULLY AUTOMATIC
- SUPPLIED WITH CONDENSERS

# Variac® Adjustable Autotransformers

## VARIAC® MANUALLY OPERATED AUTOTRANSFORMERS

The GenRad Variac autotransformer is a continuously variable unit used to control AC voltage. Features the Duratrak® contact surface, a uniform silver-alloy coating to prevent injurious high-temperature oxidation and resultant brush-track deterioration — track will show no significant wear after 1,000,000 cycles of brush operation. Variac autotransformers are highly efficient, have high thermal capacity, can withstand very high short-term overloads, and do not affect waveform or power factor. Other features: Good regulation; smooth control; long life; linear output voltage; low maintenance; easy installation. All necessary mounting hardware is included with each unit. Portable types, indicated by T in Model No., have an overload protection reset switch, line switch, convenience outlet, and a 6-ft. two- or three-wire line cord. Manually operated and motor-driven Variacs are available in a wide variety of voltage and current ratings, with or without cases. All except portable units can be equipped with ball bearings at slightly higher prices; ball bearings, indicated by BB in Model No. of manually operated units, are included with 4- and 6-gang types. **Angle of Rotation:** 320°. **Line Frequency:** 50 and/or 60 Hz unless otherwise specified. **Input Voltages:** 120, 208, 240 or 280 volts. **Output Voltages:** 0-120/140, 0-208, 0-240/280, 0-480 or 0-560 volts, continuously adjustable. **Current Ratings:** 2 to 300 amps.

*kVA ratings — normal input line voltage times maximum current; maximum current can be drawn at maximum voltage for line voltage connection only. †CSA Approved. ††Listed ratings are for metal panel mountings, ratings in air, 2.0 and 2.5 amps respectively. §Listed under Re-examination Service of UL. ¶For 60 Hz only; no overvoltage connection supplied. • Series-connected windings; do not use with grounded load. ▲ Parallel-connected windings; one or more W50-P1 chokes required (see below). ■Also can be used at 120-volt input with 2x the output ratings shown. ↓Depth behind panel except cased types (excluding knobs).

### MODEL W50-P1 CHOKE FOR PARALLEL COMBINATIONS

When windings of identical Variacs are paralleled to obtain higher load ratings, it is recommended to use one or more chokes to limit excess circulating current in the event that brushes accidentally get out of line. Use 1 choke for 2 Variacs in parallel; 3 chokes for 3 Variacs; 4 chokes for 5 Variacs; 6 chokes for 6 Variacs. Parallel operation of units smaller than Model W30 is not recommended since the next larger unit is more economical. For W50 Series Variacs, the choke can be mounted directly on the terminal plates.

### W-TYPE MANUAL THREE-PHASE GANGED MODELS

#### 240-VOLT INPUT GANGED UNITS

All units listed require an input of 240 volts except W5LG3M, W5LG3, and W8LG3, which require 208 volts. All have an output range of 0-240 volts except types with H in Model No., 0-280 volts, and types with L in Model No., 0-208 volts. Ball bearings are included with 4- and 6-gang types; available for other types at extra cost.

| Model No. | Output Amps Rated | Output Amps Max. | kVA* | Description | Size, Inches W. | Size, Inches D.♦ | Size, Inches H. | Shpg. Lbs. |

#### 480-VOLT INPUT GANGED UNITS

All Variacs listed are for "Y" connection. Overvoltage circuits are not recommended. Ball bearings are included with 6-gang types; available for remaining types at extra cost. Output voltage range, 0-480 volts.

| Model No. | Output Amps Rated | Output Amps Max. | kVA* | Description | Sizes, Inches W. | Sizes, Inches D.♦ | Sizes, Inches H. | Shpg. Lbs. |

* kVA ratings — normal input line voltage times maximum current; maximum current can be drawn at maximum voltage for line voltage connection only. † "Y"-circuit connected. ‡ For 60 Hz only; no overvoltage connection. § Open-delta circuit connected. ¶ Overvoltage connection not recommended. ▲ See previous page for W50-P1 Choke for parallel combinations. ♦ Depth behind panel except cased types (excluding knobs). # Also for single-phase 120-volts input.

### SINGLE-PHASE PORTABLE VARIACS

Portable, metered, cased Variacs with 2-wire or 3-wire cord and receptacle, and convenient carrying handle. Meter accuracy is 3% of full scale except 5% for ammetered Model W20HMT3A. Power switch disconnects both sides of line. Meters are switchable under load. Types MT and MT3 have overvoltage connections and corresponding dial scales; line-voltage connections and dial scales on special order.

#### 120-VOLT INPUT

All units have max. output voltage range of 0-140 volts except W5LMT3 which has 0-120 volts. Models W5MT and W10MT come in 2-wire version; all others in 3-wire version.

| Model No. | Rated Output, Amps | Meter Range (full-scale) Amps | Meter Range (full-scale) Watts | V | Size, Inches W. | Size, Inches D. | Size, Inches H. | Shpg. Weight Lbs. |

# Variac® Adjustable Autotransformers

## VARIAC® MANUAL AND MOTOR-DRIVEN AUTOTRANSFORMERS

### M-TYPE MANUAL MODELS FOR 350-1200 Hz OPERATION

For use at line frequencies between 350 and 1200 Hz. Equivalent to their Type-W counterparts, but smaller and lighter, and provide better regulation at 400 Hz than 60 Hz models. Conform to most military specifications for shock, vibration, salt spray, tropicalization, altitude, humidity and temperature.

#### SINGLE-PHASE 120-VOLT INPUT UNITS

Line voltage connection output, 0-120 volts; overvoltage connection output, 0-140 volts.

| Model No. | Output Amps Rated | Output Amps Max. | kVA* | Description | Shpg. Wt. Lbs. |
|---|---|---|---|---|---|
| M2 | 2.4 | 3.1 | 0.37 | Uncased | 4 |
| M5 | 6.0 | 7.8 | 0.94 | Uncased | 6 |
| M10 | 10.0 | 13.0 | 1.56 | Uncased | 11 |
| M20 | 20.0 | 26.0 | 3.12 | Uncased | 18 |

* kVA ratings — normal input line voltage times maximum current; maximum current can be drawn at maximum voltage for line voltage connection only.

#### SINGLE-PHASE 240-VOLT INPUT UNITS

Line voltage connection output, 0-240 volts; overvoltage connection output, 0-280 volts.

| Model No. | Output Amps Rated | Output Amps Max. | kVA* | Description | Shpg. Wt. Lbs. |
|---|---|---|---|---|---|
| M2G2 | 2.4 | 3.1 | 0.74 | 2-Gang M2 | 6 |
| M5G2 | 6.0 | 7.8 | 1.88 | 2-Gang M5 | 12 |
| M10G2 | 10.0 | 13.0 | 3.12 | 2-Gang M10 | 18 |
| M20G2 | 20.0 | 26.0 | 6.24 | 2-Gang M20 | 34 |

#### THREE-PHASE 240-VOLT INPUT UNITS

Line voltage connection output, 0-240 volts; overvoltage connection not recommended.

| Model No. | Output Amps Rated | Output Amps Max. | kVA* | Description | Shpg. Wt. Lbs. |
|---|---|---|---|---|---|
| M2G3 | 2.4 | 3.1 | 1.29 | 3-Gang M2 | 9 |
| M5G3 | 6.0 | 7.8 | 3.24 | 3-Gang M5 | 14 |
| M10G3 | 10.0 | 13.0 | 5.40 | 3-Gang M10 | 27 |
| M20G3 | 20.0 | 26.0 | 10.80 | 3-Gang M20 | 48 |

### MOTOR DRIVEN MODELS

All W- and M-type Variac autotransformers, both single and ganged, can be supplied with motor drives. Motors are fully enclosed, two-phase gear-reduction servo types having very low moments of inertia; the motor mounting plate is attached to the base end of the autotransformer by means of four heavy corner posts. Gear coupling is used to facilitate precise alignment, eliminate phase shift problems, and permit a number of drive speeds by simple change of gears. Three basic internal-geared motor speeds are available which, with a selection of standard coupling gears, makes possible the assembly of units having nominal full-traverse (320°) speeds of 2, 4, 8, 16, 32, 64 or 128 seconds at 60 Hz (approximately 20% slower at 50 Hz). The 2- and 4-second units are intended for high-speed servo applications; slower speed models are primarily for remote positioning. Cases are available for most models as indicated. **All motor-driven Variacs are furnished complete with ball bearings, a 120-volt phase-shift capacitor, and an adjustable microswitch for setting traverse limits.**

### HOW TO ORDER

**W 5 H G 3** (A) **D 8 C K** (B) **M** (C)

A **Basic Unit Prefix:** Select from table below the desired basic Variac unit, as described elsewhere in these pages.

| Variac Prefix No. | Motor Indicator: D ( ) CK 2 | 4 | 8 | 16 | 32 | 32 | 64 | 128 |
|---|---|---|---|---|---|---|---|---|
| M2 | X | X | X | X | ..... | X | X | ..... |
| M2G2 | X | X | X | X | ..... | X | X | ..... |
| M2G3 | ..... | X | X | X | ..... | X | X | ..... |
| M5 | X | X | X | X | ..... | X | X | ..... |
| M5G2 | X | X | X | X | ..... | X | X | ..... |

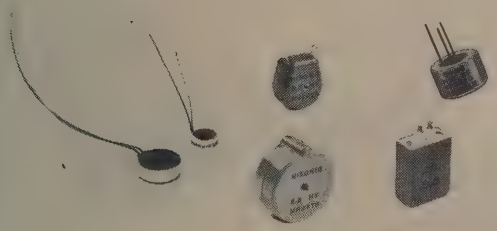
## INDUCTORS

Hisonic has long been a leader in the custom development and manufacture of high Q precision inductors. Originally confined to MPP and PI toroidal types, capabilities have been expanded to include ferrite pot core and laminated alloy core types and cover virtually every known construction that applications may require.

Although Hisonic stocks several series (primarily toroidal) most are custom made to specific requirements which results in less compromise in your applications and usually lower cost.

STANDARD

UNCASED MOLDED METAL CASED



| *Toroidal Series | Ind. Range | Max Q | Freq Range | DC R Ohms/MH | Uncased Size |

## TRANSFORMERS

Hisonic has recognized capabilities in the design and manufacture of transformers, particularly for technically sophisticated custom applications. Thousands of Hisonic converter transformers are "flying" over the world, powering aircraft com/nav equipment. Special signal and matching transformers for both voice and wide video ranges are in use in communication systems.

Constructions include toroidal, pot core and laminated core to commercial and MIL specifications.

There are few "stock" items, but hundreds of designs and our engineering staff are ready to solve your transformer problems quickly.

EXAMPLE DC CONV/AC POWER

| P/N | Input | OP Freq | VA Rating | Output Volts Peak (or RMS) | Size |

## REGULATION AND TEMPERATURE RISE

To determine the actual voltage output (E) of any transformer (listed in the chart above) when the required load current (I) is other than rated ($I_L$), refer to the graphs shown. Use of these curves enables the designer to predict, with useful accuracy, the actual voltage output and expected temperature rise of the transformer under consideration as a function of load current. All data shown represents operation at nominal voltage input, (115 or 230V) 60 Hz sine wave, with free convection cooling in still air at 25°C. ambient.

To use the curves, first determine the ratio of the required load current (I) to the rated load current ($I_L$). Enter the graphs at the extreme left vertical axis ($I/I_L$) at the appropriate ratio and read ratio of $E/E_O$ and $\triangle T$°C.

The following example is illustrated in dotted lines on the graphs:
Transformer model selected — U32-012-X-X
From above chart — $E_O$ = 12 volts at $I_L$ = 360 MA.
Required load current — I = 450 MA.
$I/I_L = 450/360 = 1.25$ ∴ $E/E_O = .95$ or $E = .95 \times E_O$
$E_O = .95 \times 12 \approx 11.4$ volts and $\triangle T \approx 37$°C.

To summarize, A **U32-012-X-X** transformer will deliver approximately 11.4 volts at a load current of 450 MA and will exhibit a temperature rise of approximately 37°C above ambient at that load.

Series U transformers are rated for continuous operation at 105°C. Therefore, the maximum permissible ambient temperature in which the U-32-012-X-X transformer can be operated when delivering 450 MA load current is 105° - 37° = 68°C (154°F).

All Series U transformers **(except style -E)** are varnish impregnated and finished with a special black polyurethane overcoat for added moisture resistance. All models are tested for primary to secondary and winding to core dielectric strength of **1500** VRMS.

For operation at 400 Hz, the rated load current ($I_L$) shown in the chart above can be increased **by as much as 1.8 times. Contact factory for specific data.**

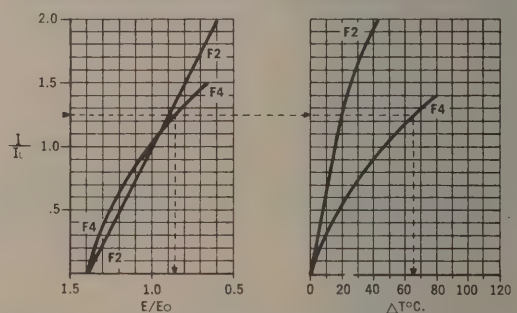
### REGULATION AND TEMPERATURE RISE



To determine the actual voltage output (E) of any listed transformer when the load current (I) is other than rated ($I_L$), first determine the ratio of required load current (I) to the rated current ($I_L$). Enter the graphs at the extreme left vertical axis ($I/I_L$) at the ratio determined above and read ratio of $E/E_O$ and $\triangle T°C$.

The dotted lines illustrate the following example:

Transformer model selected — F44-020-X-X
From chart (to left) — $E_O$ = 20 volts at $I_L$ = 175 MA (per secondary)
Required load current (per secondary) — 220 MA
$I/I_L = 220/175 = 1.26 \therefore E/E_O = .86$ or $E = .86 \times E_O$
$E = .86 \times 20 \approx 17.2$ volts and $\triangle T \approx 65°C$.

To summarize, an F44-020-X-X transformer will deliver ≈ 17.2 volts at a load current of 220 MA (per secondary) and will exhibit a temperature rise of ≈ 65°C above ambient.

Series F transformers are rated for continuous operation at 130°C. Thus, the maximum permissible ambient temperature in which the F44-020-X-X unit can be operated when delivering 220 MA (per secondary) is 130°-65°=65°C (149°F). For operation at 400/500 Hz the load current shown can be increased by ≈ 1.5; consult factory for specific data.

■ CONSTRUCTION: ALL MODELS VACUUM VARNISHED AND FURNISHED WITH SPECIAL BLACK POLYURETHANE OVERCOAT. ■ RATINGS: $E_O$ AND $I_L$ GIVEN FOR 115V 50/60 HZ SINE WAVE INPUT. ■ HI-POT: 1500V RMS WINDING TO WINDING & WINDING TO CORE. ■ DELIVERY: MODELS MARKED • FOLLOWING $I_L$ RATING ARE AVAILABLE FROM STOCK (STYLE F-N). OTHER MODELS — STOCK TO ONE WEEK. ■ CONSULT CURRENT PRICE LIST, REP OR FACTORY FOR NET PRICES & QUANTITY DISCOUNTS. ■ NO MINIMUM ORDER FOR STOCK • UNITS. ■ SPECIFICATIONS AND PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

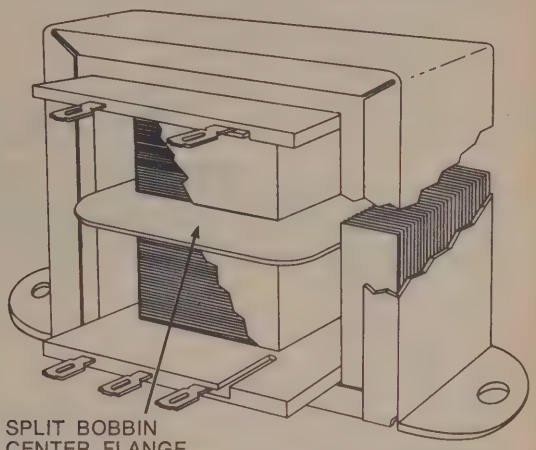
- **TRANSFORMERS WITH RATING TO 1200 VA**
- **Available with secondary voltages up to 500 V**
- **Available with secondary current ratings to 20 Amps**
- **PROTOTYPES AVAILABLE WITHIN ONE WEEK**
- **No set-up charges on special orders**
- **CHECK OUR LOW PRICES!**

## SPLIT BOBBIN POWER TRANSFORMERS

- 50/60 Hz
- Power Ratings to 200 VA
- 115 V and 230 V Primaries
- Terminals and Flexible Leads Available
- Non-Concentric Winding — Lower Capacitance — Better Insulation — 2500 VRMS Hipot — No need for Electro-static Shield
- Also useful for Medical Applications

See Stock Low Profile Type at bottom of this page

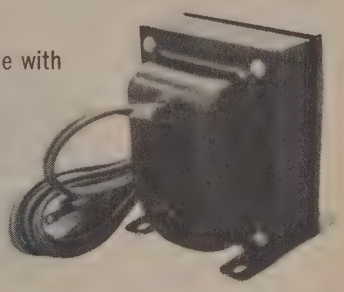


## RECTIFIER POWER TRANSFORMERS WITH FLEXIBLE LEADS

- 50/500 Hz
- Power Ratings up to 500 VA
- Wide Range of Voltages
- Single, Dual, and Tapped Primaries
- Single and Multiple Outputs
- Available with End Bells
- Terminals also available

## STEP DOWN AUTO TRANSFORMERS

- 50/60 Hz
- 230/115 V
- 100-1200 VA
- Also available with open frame construction



## LOW PROFILE SPLIT BOBBIN POWER TRANSFORMERS with 4" Flexible Leads

- Only 1.1 inches high — Wt. ½ lb.
- Ideal for PC Board and Chassis Mounting where low height is required

Stock Transformers:
115 V 50/60 Hz Primary — 10 VA

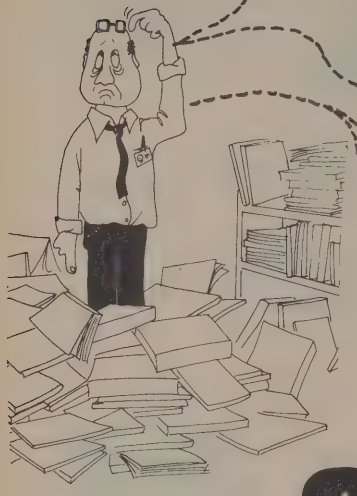
- Single or Dual Secondaries

***What can I use to keep all the manufacturers' product data I receive in order?***

***What system makes filing or retrieving manufacturers' catalogs fast and easy?***



***Which file system have thousands of engineers purchased because they know it works?***

# eem FILE SYSTEM

## THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

**Here's how to order your eem FILE SYSTEM:**

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

## LC FILTERS — LOW PASS / HIGH PASS / BAND PASS / BAND STOP

**Filters:** All types of filters, 200 Hz to 30 MHz, including high performance elliptic function filters.

**For prompt quote provide:** Type, Insertion Loss, Desired Attention Characteristic, Source Z and Load Z, Quantity and delivery requirements.

## AUDIO HYBRID PART No. 50819

**Frequency Response:** ±0.5 dB 300 to 3500 Hz.
**Long. Bal.:** 45 dB Min.
**Distortion:** 0.5% Max.
**Return Loss:** 26 dB Min.
**Trans-Hybrid Loss:** 45 dB typical.
**Operating Level:** −30 to +10 DBM.

## SELF REGULATING TRANSFORMERS REGULATED DC OUTPUT

**Application:** For operation into external FWB with capacitor filters.
**DC Voltage:** Fixed, from 5 to 30 VDC.
**Line Reg:** ±1% DC for 115 ±10% VRMS, 60 Hz input.
**Ripple:** RMS, 10% of DC average.
**Load Regulation:** ±10%.

## LOW PROFILE PRINTED CIRCUIT TRANSFORMERS

Input 115 V 60 Hz

For Special Units, ask for 52 Series and Specify AC or DC Load Voltage, Type Filter and Current.

| Part No. | For Typical DC Output | Size |
|---|---|---|
| 52470 | 7 VDC with 1 A | 1 3/16 x 1⅝ x 1 3/16 Hi |
| 52540 | 2X 17 VDC with .15 A | 1 3/16 x 1⅝ x 1 3/16 Hi |
| 52564 | 7 VDC with 1½ A | 1 3/16 x 1⅞ x 1⅜ Hi |
| 52565 | 2X 17 VDC with .215 A | 1 3/16 x 1⅞ x 1⅜ Hi |

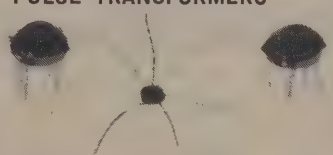
## SWITCHING & FILTER INDUCTORS

Types 10871 thru 10877, 10 μH to 5 MH, to 30 Amp DC Rated.
⅝ x ⅝ x 5/16 thru 2½ x 2½ x 1¾.
Write for Spec Sheet 10871-7.

## MINIATURE TOROIDAL INDUCTORS

- 5 mh to 5 H.
- Unequalled Temperature Stability.
- −55 to +125°C operation.
- Military Designation TF5RX20ZZ.

## PULSE TRANSFORMERS



**12999 Series:** 10 kHz to 2 MHz
**Primary L:** 1 Millihenry
**Ratio:** 1:1, 2:1 4:1 Standard
**Rise Times:** .2 Micro Sec Typical
**Size:** ⅜ D x ¼ Hi, PC Mount

## 400 Hz TOROIDAL PC POWER TRANSFORMERS (Fig. W)

Ideal for applications requiring minimum size and weight. Feature epoxy molded case and printed circuit pins which can be bent for chassis mounting. Toroidal cores provide greater efficiency and low phase shift. All have 115V primary windings and center .170" clearance hole for #8 screw. MIL Type TF5SX01ZZ.

‡Full-wave and CT loads may be simultaneously drawn, but for continuous duty, total V.A. output should not be exceeded.
■For positive and negative voltage supply as utilized in op-amp and similar circuitry.
**Based on approximately 1 volt drop per rectifier.
†Frequency depends on load and bias conditions.
▲M8050, M8051, M8073, M8074 are blocking oscillator types.

★Quantity pricing schedule is as follows: 1-9 net, 10-49 less 10%, 50-99 less 16⅔%, 100-249 less 33⅓%. Contact factory for prices over 249.

†+8.5 and ±20 DC output volts are for inputs to +5V and ±15V IC Voltage Regulators.

**TRANSFORMERS SUPPLIED WITH ENGINEERING BULLETIN PROVIDING SCHEMATICS AND SUGGESTED COMPONENTS.** Latest 3-terminal IC regulators permit manufacture of power supplies, using only 5 components, with typical regulation of 0.1% load and line, and 1 mV ripple.

## TELEPHONE COUPLING TRANSFORMERS

FIG. U

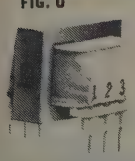

FIG. Q-F

### DESIGNED TO MEET FCC PART 68

For interconnect of voice/data modem terminals to telephone lines. Permits optimum use of voice-grade telephone lines for broadband computer modems over a wide dynamic signal range with minimum distortion. PC construction.

- **Frequency Response:** 300-3500 Hz ±0.5 dB.
- **Level:** −45 dBm to +7 dBm.
- **Return Loss:** 26 dB min.
- **Impedance Matching:** ±10% over entire frequency range.
- **Distortion:** 0.5% max.
- **Long Balance:** Per FCC 68.310.

**DIMENSIONS**

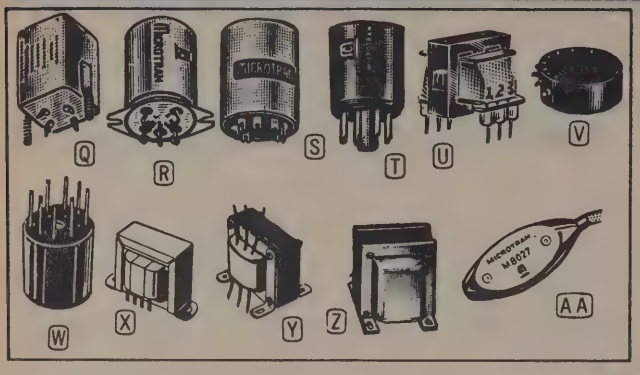
## MINIATURIZED AUDIO TRANSFORMERS

Dept. EM • 145 E. Mineola Ave. • P.O. Box 236 • Valley Stream, N.Y. 11582 • Phone: (516) 561-6050 • TWX: 510-225-8412



## MINIATURE TRANSISTOR AND AUDIO TRANSFORMERS — M AND MT SERIES

**M-M (Fig. O):** Molded, for P.C. use. Cast epoxy resin provides highest resistance to temperature extremes. MIL Types TF5RX—ZZ. Max. Size, 1⁹⁄₃₂" x ⅞" x ⅞". Wt., 1¾ oz. **M-AG (Fig. Q):** Enclosed in modified MIL-T-27 AG case with compression sealed ceramic terminals. MIL Type TF4RX—YY. Max. Size, 1" x 1" x 1⅜". Wt., 2⅜ oz. **M-H (Fig. R):** Hermetically sealed with high compression glass terminals, gray enamel finish. Available on special order with .120" holes. MIL Type TF4RX—YY. Size, 1⁵⁄₁₆" dia. x 1⁷⁄₁₆" max. Wt., 1¼ oz. **M-A (Fig. S):** Aluminum case with 2-56 screws. MIL Type TF3RX—YY. Size, .875" dia. x 1³⁄₁₆". Wt., 1.25 oz. **M-FB (Fig. L):** Open frame with channel. Available with plug-in tab channel or without channel on special order. MIL Type TF6RX—ZZ. Size, 1³⁄₆₄" x 1³⁄₁₆" x 2⁷⁄₃₂" max., plus tabs. Wt., 1.13 oz. **M-P (Fig. T):** Octal plug-in type in sealed plastic housing. MIL Type TF6RX—ZZ. Size, 1³⁄₃₂" dia. x 1¹⁵⁄₃₂". Wt., 2 oz. **M90 Shield (Fig. E):** 25 db magnetic shield for Type M-A. Two clearance holes on 1¹⁄₁₆" centers. **M-PC (Fig. U):** Open frame PC with terminals molded into bobbin to maintain accurate dimensions for PC board. MIL Type TF6RX—ZZ. Size, ⅞" x 1¹⁄₃₂" x 1"; terminals ³⁄₁₆" below bobbin. Wt., 1.2 oz. See PC4400 Series for dimensions.

## SUBMINIATURE AUDIO AND TRANSISTOR TRANSFORMERS — SM AND SMT SERIES

**SM-AF (Fig. N):** MIL-T-27B-AF modified case; compression sealed ceramic terminals; gray enamel finish. MIL Type TF4RX—YY. Size, ¾" x ¾" x 1¼" max. with two 4-40NC-2 spade mtg. bolts. Wt., 1⅛ oz. **SM-H (Fig. K):** Hermetically sealed; high compression glass terminals; Gray enamel finish. MIL Type TF4RX—YY. Size, 1⁵⁄₁₆" dia. x 1⁵⁄₁₆" h. Wt., 1 oz. **SM-FB (Fig. L):** Open frame with channel. With plug-in tab mounted channel or without channel on special order. MIL Type TF6RX—ZZ. Size, 1⁵⁄₁₆" x 1¹⁵⁄₃₂" x ¾", plus tabs. Wt., 0.750 oz. **SM-M (Fig. O):** Molded, for plug-in PC applications. MIL Type TF5RX—ZZ. Size, 1⁵⁄₃₂" x ⅞" x ¾" max. Wt., 1½ oz.

Dept. EM • 145 E. Mineola Ave. • P.O. Box 236 • Valley Stream, N.Y. 11582 • Phone: (516) 561-6050 • TWX: 510-225-8412

## MICROPHONE/TRANSDUCER INPUT TRANSFORMERS

**FOR PROFESSIONAL SOUND STUDIOS**
**BROADCAST MIXING CONSOLES**
**CONTROL & INSTRUMENT AMPLIFIERS**

**Fig. -SP**
**PRINTED CIRCUIT MOUNTED**
Double Mu-metal Shielded. ¾" D x 1 1/16" H. 7-.040 pins ⅛" H.

**Fig. -S**
**SINGLE THREADED STUD MOUNTING**
Double Mu-metal shielding. 3/8" color coded leads. 5/8" D x 1 3/4" H. 3/16" D stud.

Wide bandwidth — Broad frequency response — Hi efficiency. Extremely low distortion. Power level range up to +0 dBm. Negligible hum pick-up due to nested Mu-metal shields and unique gapless core construction. Ease of mounting and orientation for minimum hum pick-up. Polarizing voltage connection for condenser microphones. Subminiature size permits close spacing to adjacent circuitry. Low microphonics.

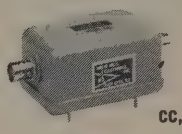
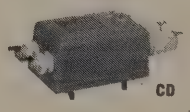
**MANY VARIATIONS AND CUSTOM DESIGNS TO 1 GHz ALSO AVAILABLE**

## ISOLATION TRANSFORMERS UNBALANCED TO UNBALANCED

**Ground Isolation in 50 and 75Ω Coaxial Systems**



CC, PA



CD

- Flat frequency, linear phase response.
- Insulated BNC connectors.
- 140 dB isolation at power frequencies.

| Type No. | Impedance Unb/Unb(Ω) | Bandwidth |
|---|---|---|
| 0005-CC | 50:50 | 1 kHz - 25 MHz |
| 1103-CC | 75:75 | 1 kHz - 25 MHz |
| 0112-CC | 50:75 | 1 kHz - 25 MHz |
| 0017-CC | 50:50 | 10 Hz - 5 MHz |
| 1117-CC | 75:75 | 10 Hz - 5 MHz |
| 0016-PA | 50:50 | 20 Hz - 20 MHz |
| 1116-PA | 75:75 | 20 Hz - 20 MHz |

**10 KV Isolation for Public Utility Data Transmission**
1 kHz to 6 MHz bandwidths.
1115-CD: 75Ω coax to 75Ω coax.
1313-CD: 75Ω coax to 124Ω balanced line.

## HUMBUCKING CHOKES

75:75 ohms, Insulated BNC connectors

| Type | Bandwidth | Rejection at 60 Hz |
|---|---|---|
| 1119-PA | DC to 15 MHz | 50 dB min. |
| 1120-CC | DC to 20 MHz | 40 dB min. |

## ULTRA-WIDE COAXIAL MATCHING TRANSFORMERS

Unbalanced to unbalanced. BNC male and female input and output connectors in all combinations. Low VSWR. JA case.

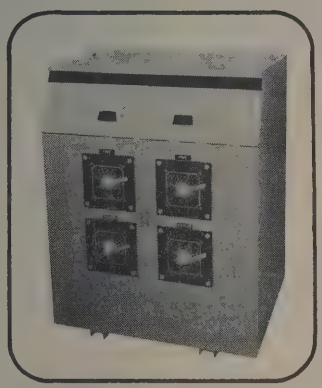
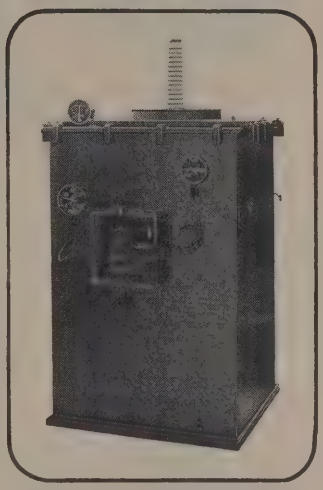
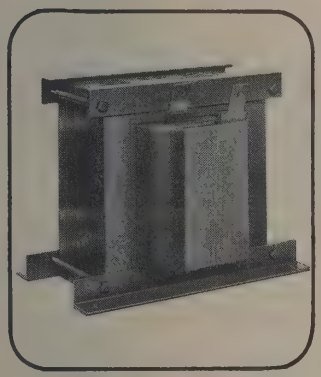
# NWL ...the source for industrial and electronic transformers



Heating transformers for resistance and induction furnaces

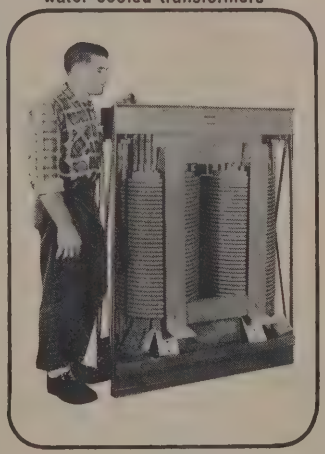


Oil filled high voltage transformers

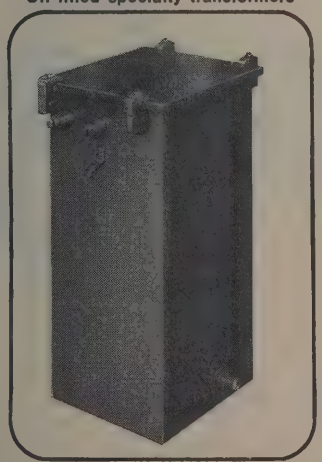


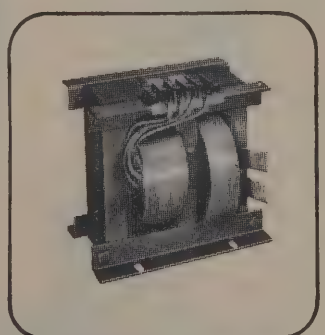
Current limiting reactors

High power and high current water cooled transformers



Oil filled specialty transformers





High impedance transformers

Since 1929, NWL has consistently been in the forefront of transformer design and manufacture.

High voltage, high frequency and high current transformers are particular strengths at NWL — whether for prototype, standard or special applications.

There's another reason you should look to NWL for solutions to your specific transformer problems. We've never hesitated to tackle the tough design problems head-on. In fact, NWL's technological superiority is a recognized fact in the precipitator, furnace, desalting, nuclear, and other fields requiring high technology.

## NWL ...the source for:

**TRANSFORMERS ● Furnace ● Filament ● Heating ● Lighting ● SCR Controls ● Plate ● High Frequency ● Instrument ● Phase Changing ● Welding ● High Voltage ● Testing ● High Reactance ● Output**

**PLUS ● Saturable Core Reactors ● Chokes ● Packaged Controls ● AC Reactors ● Air Core Reactors**

**NWL ... transformers from the ordinary to the extraordinary**

**NWL TRANSFORMERS**

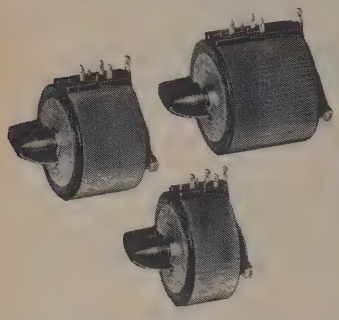
**Rising Sun Road, Bordentown, N.J.**

**609-298-7300**

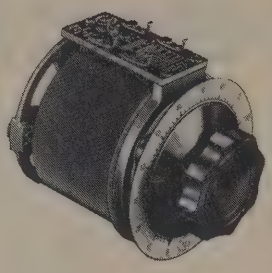
**Call us for quote or specs**

NWL also designs and manufactures custom built AC/DC power supplies, laboratory and industrial types. See our ad under DC POWER SOURCES.

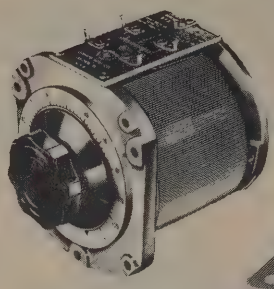
# OHMITE® variable transformers



VT1, VT02, VT3 SERIES, SINGLE UNCASED
The VT1, rated 1 ampere, is the smallest commercial variable transformer available.



VT5 SERIES, SINGLE, UNCASED



VT10 SERIES, SINGLE, UNCASED

VT25 SERIES, UNCASED

Unique for the design innovations they incorporate, Ohmite "OHMITRAN" v.t.® variable transformers include exclusive field-proven features. They offer long, low maintenance operation with excellent regulation at any voltage setting within the rated load plus an output free of waveform distortion. (Ratings shown at right are for use in free air.) Enclosed units, units with meters, 2 & 3 in tandem and 3 phase models are available in most models in the basic series.

## FEATURES

- Positive current transfer — specially designed brushes are connected through high conductivity contact arms to large slip ring which contacts a wide area of the collector ring.
- Adjustable shaft extends from either side.
- Mounts interchangeable with virtually all other comparable types.
- Direct reading, two scale dial — calibrated for overvoltage connection on front, line voltage connection on reverse side.
- Overvoltage options available.
- UL and CSA listings available in certain models.
- Easily replaceable brushes
- Clockwise or counter-clockwise operation on Series VT5, VT10 and VT25

## ENCLOSURES

## PRECISION TOROIDAL TRANSFORMERS

- INPUT SCOTT T
- REFERENCE ISOLATION
- OUTPUT SCOTT T
- DIGITALLY TAPPED
- COMBINATION
- PRECISION RATIO
- RESOLVER ISOLATION
- CUSTOM DESIGNS

The Electronic Products Department of the Perkin-Elmer Corporation is in a unique position to provide Custom Precision Signal Transformers as a result of 20 years of experience designing and manufacturing very special transformers for the Vernistat® a.c. potentiometer and allied products. **High Performance in small size has always been a successful objective.** Our State of The Art Winding Equipment and Techniques enable close control of turns and taps for close matching of windings and repeatibility of product.

Perkin-Elmer can provide Custom Signal Transformers with high accuracies over the full MIL temperature range. For example, exponential function units with 80 taps to an accuracy of ±0.003% can be provided. SCOTT T Transformers have been built to an accuracy of 5 seconds of arc with a null of 0.1 millivolt. The transformers are fully encapsulated toroidal units and are available with contact pins for PC board mounting. They are manufactured in accordance with MIL-T-27C Grade 5. High input impedance and low output impedance can be matched to specifications. Operating frequency can also be per specifications.

### SCOTT T TRANSFORMERS

The SCOTT T input transformers converts 3 wire synchro inputs to 4 wire resolver outputs (sin $\theta$ and cos $\theta$) with high transformation accuracy and minimum quadrature. SCOTT T Transformers for converting 4 wire resolver inputs to 3 wire synchro outputs can also be supplied. Our output SCOTT T Transformers maintain high accuracies even under heavy load conditions. These units are useful in solid state synchro to digital and digital to synchro converter applications and are particularly applicable in multiplexed conversion systems.

Operating Temperature Range −55°C to +125°C.
Frequencies 400 Hz except as otherwise stated.

Manufactured in accordance with MIL-T-27 Grade 5.
Specified transformation accuracies are with stated load.

**For information on price, delivery and other standard or custom designed transformers call or write**

# PICO Catalog Contents

19 PAGES OF MINIATURIZED TRANSFORMERS OPERATING OVER THE FREQUENCY RANGE OF 20 Hz TO 250 KHz, WITH PULSE TRANSFORMERS OPERATING TO 32MHz.

AUDIO TRANSFORMERS ARE ARRANGED ACCORDING TO SIZE WITH 1/4" X 1/4" (400 Hz-250 KHz) SHOWN FIRST, AND THE 3/4" X 13/16" (20 Hz-25 KHz) SHOWN LAST.

PULSE TRANSFORMERS .05μSEC TO 100μSEC WITH MINIATURIZED PLUG-IN CONSTRUCTION.

400 Hz POWER TRANSFORMERS. PRIMARY VOLTAGES OF 115V OR 26V. PLUG-IN CONSTRUCTION. ULTRA-MINIATURE SIZE.

LISTING OF TRANSFORMERS INTERCHANGEABLE WITH UNITS MADE BY UTC/TRW. D1-T, D0-T, 1-D1-T, 1-D0-T.

* INCLUDES ELECTROSTATIC SHIELD

SPECIFICATIONS

- MIL-T-27: All Units Are Designed to MIL-T-27 and Are Hermetically Sealed in a Metal Case Transformers are Type TF5R21ZZ.
- FREQUENCY RESPONSE: ±3 db, 400 Hz - 250 KHz at 1.0 milliwatt
- MAXIMUM DISTORTION: 5% With Rated Power Level at 1 KHz
- DIELECTRIC STRENGTH: All Units Tested at 200 V RMS
- INSULATION RESISTANCE: Greater than 10,000 Megohms at 300 V DC
- WEIGHT: 1.1 Grams
- OPERATING TEMPERATURE: -55°c to 105°c (All Units Can Be Supplied to Class S Requirements 130°c maximum)
- TERMINALS: Solid .012 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D.
- THERMAL SHOCK: 25 Cycles, Method 107C, MIL-STD-202D. Test Condition A-1

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- 5 MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

# PICO's ultra-miniature transformers

## B SERIES
Insulated Leads

## C SERIES
Plug-In

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS

*(All PICO Products are patented)*

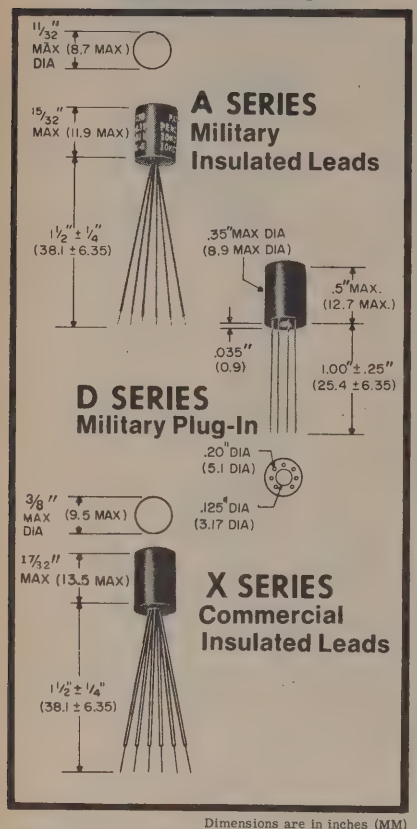
# PICO's ultra-miniature transformers



Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-27 . . . . . .
  All **MILITARY** Units Are Designed to MIL-T-27 and Are Hermetically Sealed in a Metal Case
  Transformers are Type TF5R21ZZ.
  Inductors are TF5R20ZZ.
- FREQUENCY RESPONSE: . . . . .
  ±3 db, 300 Hz - 100 KHz At 1.0 Milliwatt
- MAXIMUM DISTORTION: . . . . .
  5% With Rated Power Level at 1 KHz
- DIELECTRIC STRENGTH: . . . .
  All Units Tested at 200 V RMS
- INSULATION RESISTANCE: . . . .
  Greater than 10,000 Megohms at 300 V DC
- WEIGHT: . . . . . .
  1/10 Ounce
- OPERATING TEMPERATURE: . .
  -55° c to 105° c (All Units Can Be Supplied to Class S Requirements 130° c maximum)
  Commercial Units have maximum operating temperature of +85°C
- TERMINALS: . . . . . .
  Solid .016 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D
- THERMAL SHOCK: . . . . . .
  25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

## INDUCTORS

TWO VALUES OF INDUCTANCE, EACH AT A PARTICULAR VALUE OF DC CURRENT, ARE LISTED FOR EACH INDUCTOR. ALL INDUCTORS WITH SPLIT WINDINGS HAVE MEASUREMENTS LISTED FOR BOTH SERIES CONNECTIONS AND PARALLEL CONNECTIONS.

# PICO's ultra-miniature transformers

## A SERIES
### Military Insulated Leads
## D SERIES Military Plug-In
## X SERIES
### Commercial Insulated Leads

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS

### SPECIFICATIONS

- **MIL-T-27** . . . . . All Units are Designed to MIL-T-27 and are Hermetically Sealed in a Metal Case. Audio Transformers are Type TF5R21ZZ.
- **FREQUENCY RESPONSE:** . . . . ±3db, 300 Hz - 75 KHz At 1.0 Milliwatt
- **MAXIMUM DISTORTION:** . . . . . 5% With Rated Power Level at 1 KHz, 400 Hz and 300 Hz
- **DIELECTRIC STRENGTH:** . . . . All Units Tested at 200 V RMS
- **INSULATION RESISTANCE:** . . . Greater than 10,000 Megohms at 300 V DC
- **WEIGHT:** . . . . . 5 Grams
- **OPERATING TEMPERATURE:** . . -55°C to 105°C (All Units Can Be Supplied to Class S Requirements 130°C maximum)
- **TERMINALS:** . . . . . Solid .016 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D
- **THERMAL SHOCK:** . . . . . 25 Cycles, Method 107C. MIL-STD-202D, Test Condition A-1

*(All PICO Products are patented)*

* Discount Prices: 1-9 Net; 10-24 less 10%; 25-49 less 16%; 50-99 less 23%; 100-499 less 30% •INCLUDES ELECTROSTATIC SHIELD

Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York. P.O. Box 1206

*For immediate engineering assistance or to place an order—* ***Call Toll Free 800-431-1064***

Delivery— stock to one week

## PICO's ultra-miniature transformers

### L SERIES Plug-In

### P SERIES Insulated Leads

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.
- ALL POSSIBLE LEAD SPACINGS AVAILABLE - CONTACT FACTORY FOR PIN LAYOUT SAME AS DUAL IN-LINE INTEGRATED CIRCUITS ("DIP" PACKAGE).

*(All PICO Products are patented)*

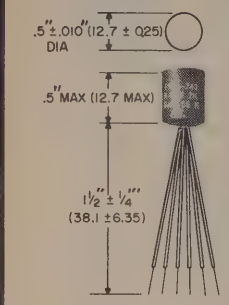
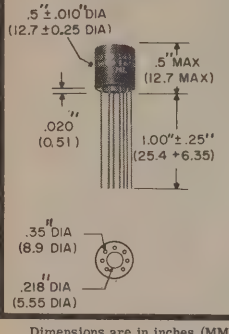
# PICO's ultra-miniature transformers

## K SERIES Insulated Leads



## N SERIES Plug-In



Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-27 . . . . . All Units Are Designed to MIL-T-27 and Are Hermetically Sealed in a Metal Case, Audio Transformers Are Type TF5R21ZZ.
- FREQUENCY RESPONSE: . . . ±3 db, 150 Hz - 75 KHz at 1.0 Milliwatt (When Primary Impedance ≥ 50K Ohms, ±3 db 150 Hz to 20 KHz)
- MAXIMUM DISTORTION: . . . . 5% With Rated Power Level at 1 KHz, 400 Hz and 150 Hz
- DIELECTRIC STRENGTH: . . . . All Units Tested at 200 V RMS
- INSULATION RESISTANCE: . . . Greater Than 10,000 Megohms at 300 V DC
- WEIGHT: . . . . . 7.5 Grams
- OPERATING TEMPERATURE: . . -55°c to 105°c (All Units Can Be Supplied to Class S Requirements 130°c maximum)
- TERMINALS: . . . . . Solid .016 Diameter Conductor Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D
- THERMAL SHOCK: . . . . . 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

*(All PICO Products are patented)*

**PICO's ultra-miniature transformers**

**K SERIES Insulated Leads**

**N SERIES Plug-In**

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

*(All PICO Products are patented)*

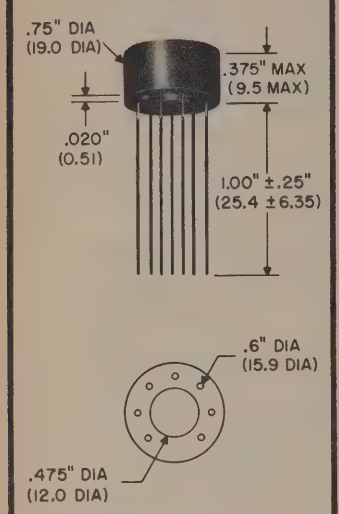
# PICO's ultra-miniature transformers

## R SERIES Plug-In



Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-27: . . . . . All Units Are Designed to MIL-T-27 And Are Hermetically Sealed in a Metal Case, Audio Transformers Are Type TF5R21ZZ.
- FREQUENCY RESPONSE: . . . ± 3 db, 75 Hz - 30 KHz at 1.0 Milliwatt.
- MAXIMUM DISTORTION: . . . 5% With Rated Power Level at 1 KHz, 300 Hz and 75 Hz
- DIELECTRIC STRENGTH: . . . All Units Tested at 200 V RMS.
- INSULATION RESISTANCE: . . Greater Than 10,000 Megohms at 300 V DC.
- WEIGHT: . . . . . 12 Grams
- OPERATING TEMPERATURE: . -55°c to 105°c (All Units Can Be Supplied to Class S Requirements 130°c Maximum).
- TERMINALS: . . . . . Solid .016 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance With MIL-STD-1276 Type D.
- THERMAL SHOCK: . . . . . 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

*(All PICO Products are patented)*

*INCLUDES ELECTROSTATIC SHIELD
**MINIATURIZED TELEPHONE COUPLING APPLICATION

***Discount Prices: 1-9 Net; 10-24 less 10%; 25-49 less 16%; 50-99 less 23%; 100-499 less 30%**

**Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon. New York. P.O. Box 1206**

**PICO's ultra-miniature transformers**

**R SERIES**
**Plug-In**

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

*(All PICO Products are patented)*

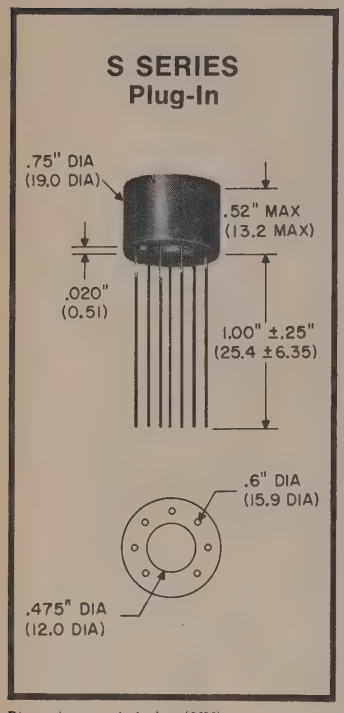
# PICO's ultra-miniature transformers



Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-27: . . . . . All Units Are Designed to MIL-T-27 And Are Hermetically Sealed in a Metal Case, Audio Transformers Are Type TF5R21ZZ.
- FREQUENCY RESPONSE: . . . ± 3 db, 50 Hz - 30 KHz at 1.0 Milliwatt.
- MAXIMUM DISTORTION: . . . 5% With Rated Power Level at 1 KHz, 300 Hz and 50 Hz.
- DIELECTRIC STRENGTH: . . . All Units Tested at 200 V RMS.
- INSULATION RESISTANCE: . . Greater Than 10,000 Megohms at 300 V DC.
- WEIGHT: . . . . . 17 Grams
- OPERATING TEMPERATURE: . -55°c to 105°c (All Units Can Be Supplied to Class S Requirements 130°c Maximum).
- TERMINALS: . . . . . Solid .016 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance With MIL-STD-1276 Type D.
- THERMAL SHOCK: . . . . . 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

*(All PICO Products are patented)*

*INCLUDES ELECTROSTATIC SHIELD
**MINIATURIZED TELEPHONE COUPLING APPLICATION

*** Discount Prices: 1-9 Net; 10-24 less 10%; 25-49 less 16%; 50-99 less 23%; 100-499 less 30%**

**Ordering Instructions: No minimum. Net 30 days. F.O.B. Mt. Vernon, New York. P.O. Box 1206**

# PICO's ultra-miniature transformers

## S SERIES Plug-In

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

*(All PICO Products are patented)*

**Send for new 68 page Pico Catalog**

**Delivery— stock to one week**

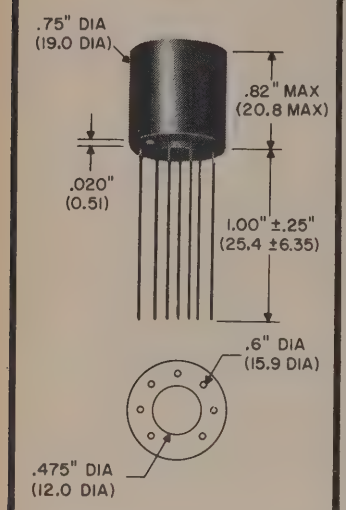
# PICO's ultra-miniature transformers

## T SERIES Plug-In



Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-27: . . . . . All Units Are Designed to MIL-T-27 And Are Hermetically Sealed in a Metal Case, Audio Transformers Are Type TF5R21ZZ.
- FREQUENCY RESPONSE: . . . ± 3 db, 20 Hz - 25 KHz at 1.0 Milliwatt.
- MAXIMUM DISTORTION: . . . 5% With Rated Power Level at 1 KHz and 300 Hz. 10% Distortion at 20 Hz.
- DIELECTRIC STRENGTH: . . . All Units Tested at 200 V RMS.
- INSULATION RESISTANCE: . . Greater Than 10,000 Megohms at 300 V DC.
- WEIGHT: . . . . . 28 Grams
- OPERATING TEMPERATURE: . -55°c to 105°c (All Units Can Be Supplied to Class S Requirements 130°c Maximum).
- TERMINALS: . . . . . Solid Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance With MIL-STD-1276 Type D.
- THERMAL SHOCK: . . . . . 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

*(All PICO Products are patented)*

# PICO's ultra-miniature transformers

## T SERIES Plug-In

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

*(All PICO Products are patented)*

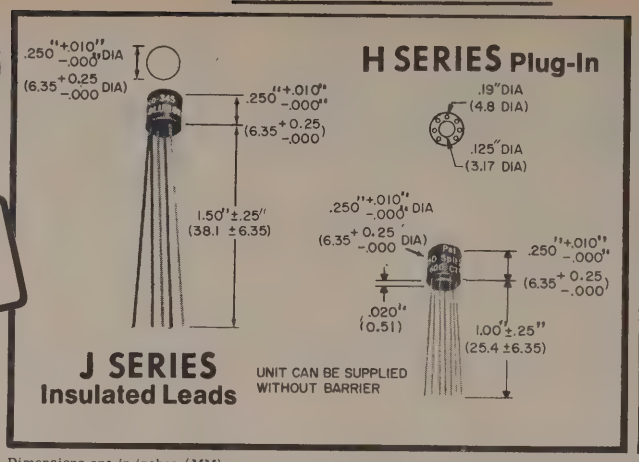
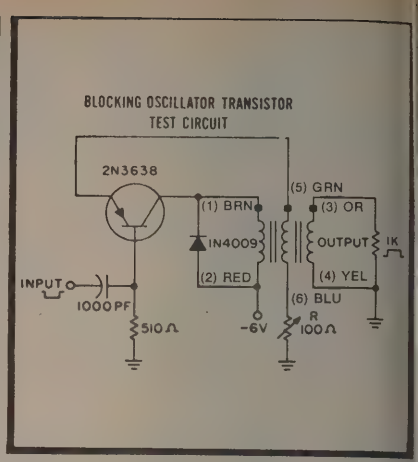
# PICO's ultra-miniature PULSE transformers

1/4" x 1/4"





Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-21038: All Units are Designed to MIL-T-21038 and are Hermetically Sealed in a Metal Case
- DIELECTRIC STRENGTH: All Units tested at 200 V RMS
- INSULATION RESISTANCE: Greater than 10,000 Megohms at 300 V DC
- WEIGHT: 1.1 Grams
- OPERATING TEMPERATURE: -55°c to 105°c (All Units Can be Supplied to Class S Requirements 130°c maximum)
- TERMINALS: Solid .012 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-STD-1276 Type D
- THERMAL SHOCK: 25 Cycles, Method 107C, MIL-STD-202D. Test Conduction A-1

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- BUILT TO MIL-T-21038
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

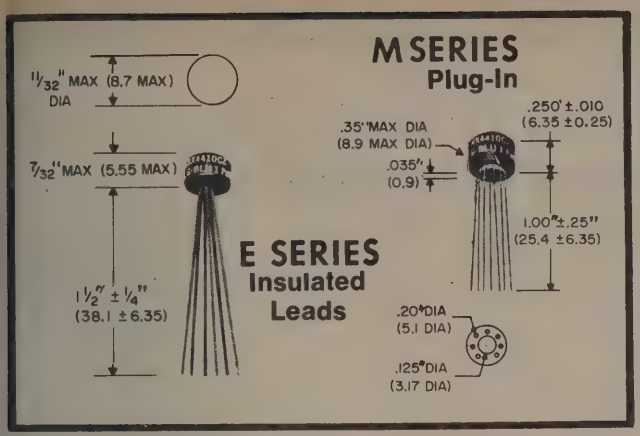
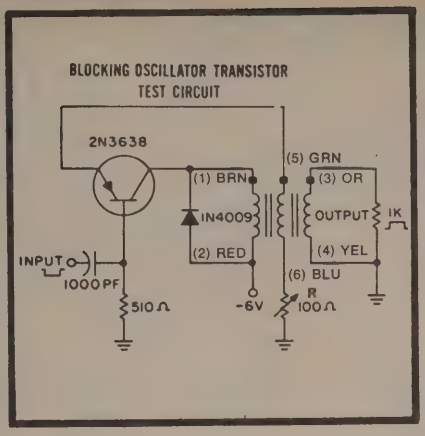
## PICO Electronics, Inc.

P.O. Box 1206, Mt. Vernon, New York 10551 • phone 914-699-5514





# PICO's ultra-miniature PULSE transformers

Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-21038: All Units are Designed to MIL-T-21038 and are Hermetically Sealed in a Metal Case
- DIELECTRIC STRENGTH: All Units tested at 200 V RMS
- INSULATION RESISTANCE: Greater than 10,000 Megohms at 300 V DC
- WEIGHT: 1/20 Ounce
- OPERATING TEMPERATURE: -55°c to 105°c (All Units Can be Supplied to Class S Requirements 130°c maximum)
- TERMINALS: Solid .012 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core. Wire (Dumet) in Accordance with MIL-STD-STD-1276 Type D
- THERMAL SHOCK: 25 Cycles, Method 107C, MIL-STD-202D. Test Conduction A-1

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- BUILT TO MIL-T-21038
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

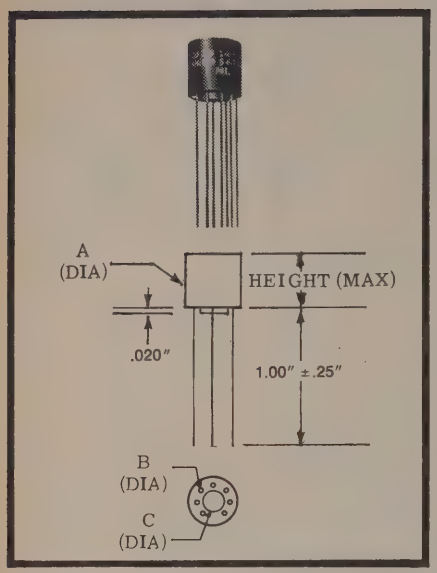
# PICO's miniature 400 Hz transformers

## 115V/26V Primary Printed Circuit Construction



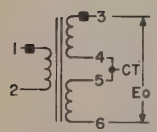
| CASE SIZE | HEIGHT (MAX) | A (DIA) MAX | B (DIA) | C (DIA) |
|---|---|---|---|---|
| L | .35 | .51 | .35 | .218 |
| N | .5 | .51 | .35 | .218 |
| R | .375 | .75 | .6 | .475 |
| S | .52 | .75 | .6 | .475 |
| T | .82 | .75 | .75 | .475 |

FEATURES

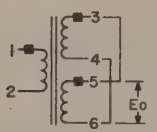
- 400 Hz Aerospace Application
- Smallest Possible Size
- Printed Circuit Plug-In Construction
- Secondary Has Split Winding (Secondary can Be Used at Half Voltage Twice the Current.)

SPECIFICATIONS

- MIL-T-27D (TF5S03ZZ)
- 100°c Ambient
- Input Primary 115v-400 Hz ±20 Hz or 26V-400HZ-±20 Hz (Your Choice-Just Choose The Proper Part No.)
- Regulation is 24% (T Units Have Regulation of 17%)
- Secondary Voltage Adjusted to Nominal Value at Half Load.



SERIES CONNECTED SECONDARY



PARALLEL CONNECTED SECONDARY

# Dot and Dit Interchangeable Listing

# PICO vs UTC/TRW

The following part numbers are electrically and mechanically interchangeable with units produced by United Transformer Company, division of TRW Inc. Every Pico Electronics device has the added reliability feature of being guaranteed for thermal shock (MIL-STD 202D, method 107C, test condition A1, 25 cycles).

## PICO Electronics, Inc.

P.O. Box 1206, Mt. Vernon, New York 10551 • phone 914-699-5514

# CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
# DER PRODUKTKATALOG FÜR ELEKTRONIKER
# ELECTRONIC ENGINEERS CATALOGUE

## The 1978 edition is out...and the response is in...
## IMMEDIATE AND OVERWHELMING

# ACCEPTANCE

The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to—and from—Western Europe.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 product headings & cross-references alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. 645 Stewart Avenue, Garden City, New York 11530 / 516 222-2500

# p.c. board transformers for triple-output regulated supplies

## IDEAL FOR MICROPROCESSOR APPLICATIONS

"MP" types have been developed specifically for use in triple-output regulated DC supplies that are commonly used in **Microprocessor Circuits** and other logic, op-amp combinations. Two output combinations have been provided, namely 5V and ±12V, and 5V and ±15V.

All "MP" units are rated in terms of the final **DC** output after a standard three terminal IC regulator. They are designed to provide these outputs with AC line inputs of 100 to 130V 50/60 Hz (or 200 to 260V for nominal 230V lines).

Two basic mechanical configurations are available. Standard PC types (MPC or DMPC) are tested to pass 1500V RMS hipot. Optional mounting brackets are available. MPL types are based on Signal's "flat-head" style and feature low profile, 115/230V primaries, hum-bucking construction, 1500V RMS hipot and the advantages of non-concentric winding (low inter-winding capacitance, high isolation, and no need for an electro-static shield).

All MP's are stocked in depth for immediate delivery. In addition, special variations can be supplied with reasonable delivery times.

BLACK DOT ON LABEL INDICATES POSITION OF TERMINAL #1.

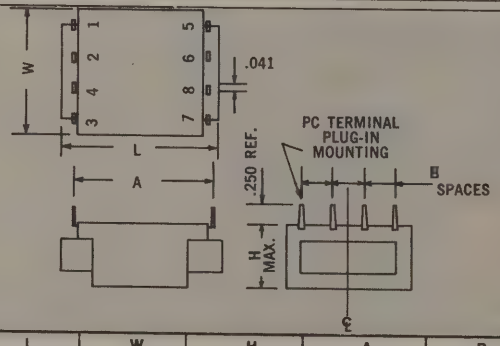
* Regulation of Size 6 units is 30%, i.e., no load-secondary voltage is 30% higher than full load. Regulation of Size 12 units is 20%.



| Size | L | W | H | A | B | Oz. |
|---|---|---|---|---|---|---|
| 6 | 1⅞ | 1⅝ | 0.850 | 1.600 | 0.375 | 7 |
| 12 | 2½ | 2 | 1.065 | 2.000 | 0.500 | 11 |

LOW PROFILE: Allows 1 inch card spacing for 6va units or 1¼ inch card spacing for 12va units.

DUAL PRIMARIES: 115/230v, 50/60 Hz.

NON-CONCENTRIC WINDING: Where secondary is wound alongside primary rather than directly over it. This added isolation reduces inter-winding capacitance and **eliminates the need for an electro-static shield.**

1500V. RMS HIPOT: Is standard because of the advantage of non-concentric windings.

HUM-BUCKING CONSTRUCTION: (Semi-toroidal) results in reduced radiated magnetic field and balanced windings.

The LP line of transformers is ideal for low height, critical pc board power applications in semi-conductor control and instrumentation. They are used extensively in single or dual output dc supplies and isolated control circuit and reference supplies.

* Available from Signal: Part No. ST-MS (Screw) & Part No. ST-MN (Nut).

"Split-Tran" transformers combine the best features of our "2-4-1" Series and Signal's pioneering line of pc board miniature transformers.

The use of a "split bobbin" allows the primaries and secondaries to be wound non-concentrically, i.e., side by side rather than one over the other. This results in cost savings and superior performance, namely:

- High isolation — 2500V hipot is standard.
- Low capacitive coupling — no electro-static shield necessary.
- Less manufacturing time — no cross-overs of primary and secondary leads.
- PC pins — allow direct insertion in PC boards.
- Class S insulation — 130°C.

Each transformer is available with single 115V or dual 115/230V primaries. In addition, secondaries are split so that they can be series or parallel connected.

**Special variations will be quoted and shipped promptly.**

# for printed circuits applications

Signal has the most complete and diversified selection of miniature plug-in power transformers. **All items are stocked in depth for immediate off-the-shelf delivery.**

Primary ratings of 115V (Style PC - 6 Pin) or Dual 115/230V (Style DPC -8 Pin) are standard for the entire line. 1000V. Hipot is standard.

Size 1.0 is used extensively where height is a limiting factor since its height of 0.83 inches allows 1 inch spacing of PC boards. Size 24 is unusual since 24 watt PC transformers are not readily available, especially with a height of 1⅜ inches.

The RMS current ratings are based on a load regulation of 15-20% and not on temperature rise (except for the largest item, size 24). Therefore, these ratings may be exceeded without overheating, if the additional drop in full load voltage is acceptable. There is, of course, a limit and it would be best to check with our engineering department on specific units.

BLACK DOT ON LABEL INDICATES POSITION OF TERMINAL #1.

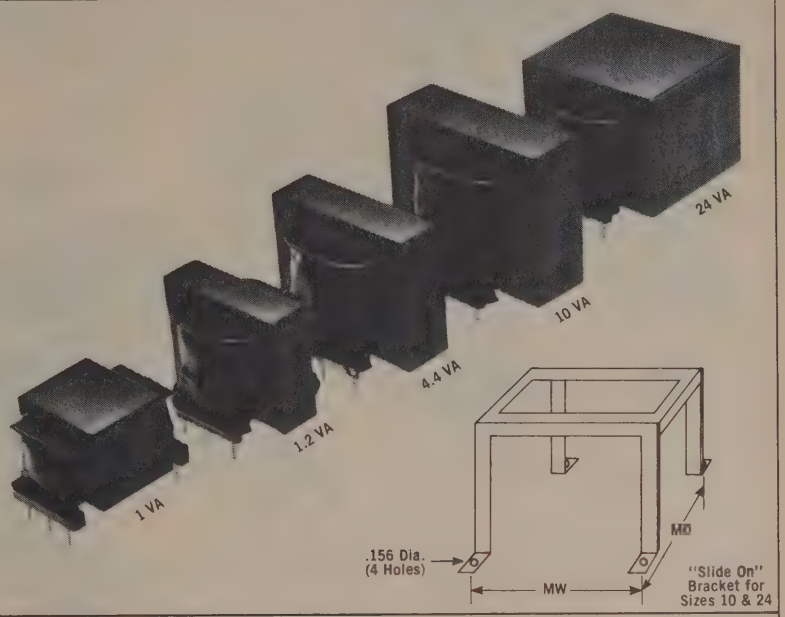
SIZE 24 (24VA) UNIT WITH 24-BR SLIDE-ON MOUNTING BRACKET

METHOD OF DETERMINING SECONDARY CURRENT RATINGS

The secondary currents shown in the tables are RMS ratings. Depending upon rectifier circuit configurations, the RMS secondary current is different than the DC output current. This is indicated in the chart below:

| Rectifier Type | Filter Type | RMS Secondary Current Is |
|---|---|---|
| Full Wave Center-Tap | Choke Input | = 0.7 x DC Amps |
| Full Wave Center-Tap | Capacitor Input | = 1 to 1.2 x DC Amps |
| Full Wave Bridge | Choke Input | = DC Amps |
| Full Wave Bridge | Capacitor Input | = 1.6 to 1.8 x DC Amps |

For example, in a F.W. Bridge circuit with a capacitive filter, if the load is 1 Amp DC, the RMS Secondary current is 1.6 to 1.8 Amp RMS.



DIMENSIONS

| Size (VA) | L | W | H | A-6 (6 Pin) | A-8 (8 Pin) | B | WT. (oz.) | OPTIONAL BRACKET* No. | MW | MD |
|---|---|---|---|---|---|---|---|---|---|---|

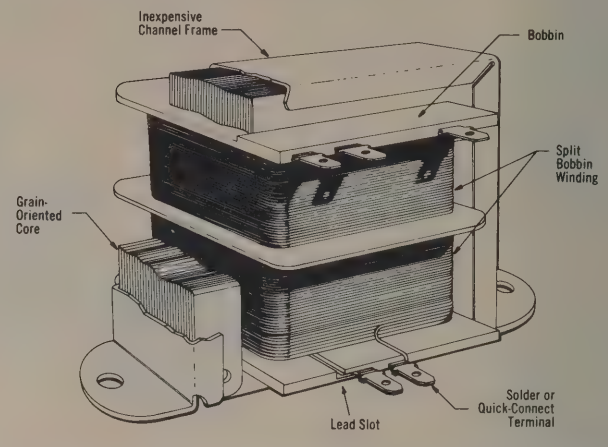
# cut size and weight with "2-4-1"

The 2-4-1 series is an illustration of the use of creative design applied to small power transformers. The result is a line where, for a given va rating, size and weight are reduced almost 50%. Hence the name "241" series.

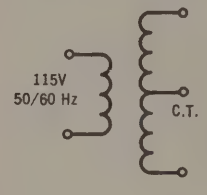
- GRAIN ORIENTED CORE — High Saturation Density — Lower Core Loss — Less Steel and Copper.
- BOBBIN WOUND — Maximum Utilization of Winding Area — Space and Size Reduced.
- SPLIT BOBBIN — NON-CONCENTRIC WINDING — Lower Capacitance — Better Insulation — 2500V RMS Hipot — No need for Electro-Static Shield — High Isolation and Insulation Resistance. No Cross-Overs of Primary and Secondary Leads.
- SPECIAL TERMINAL — Solder or Quick-Connect.

The series is available with single 115V or dual 115/230V primary, rated 50/60 Hz. Class S insulation is used for a maximum total temperature rating of 130°C continuous.

## AVAILABLE WITH SINGLE (115V) OR DUAL (115/230V) PRIMARIES



SINGLE PRIMARY



DUAL PRIMARY

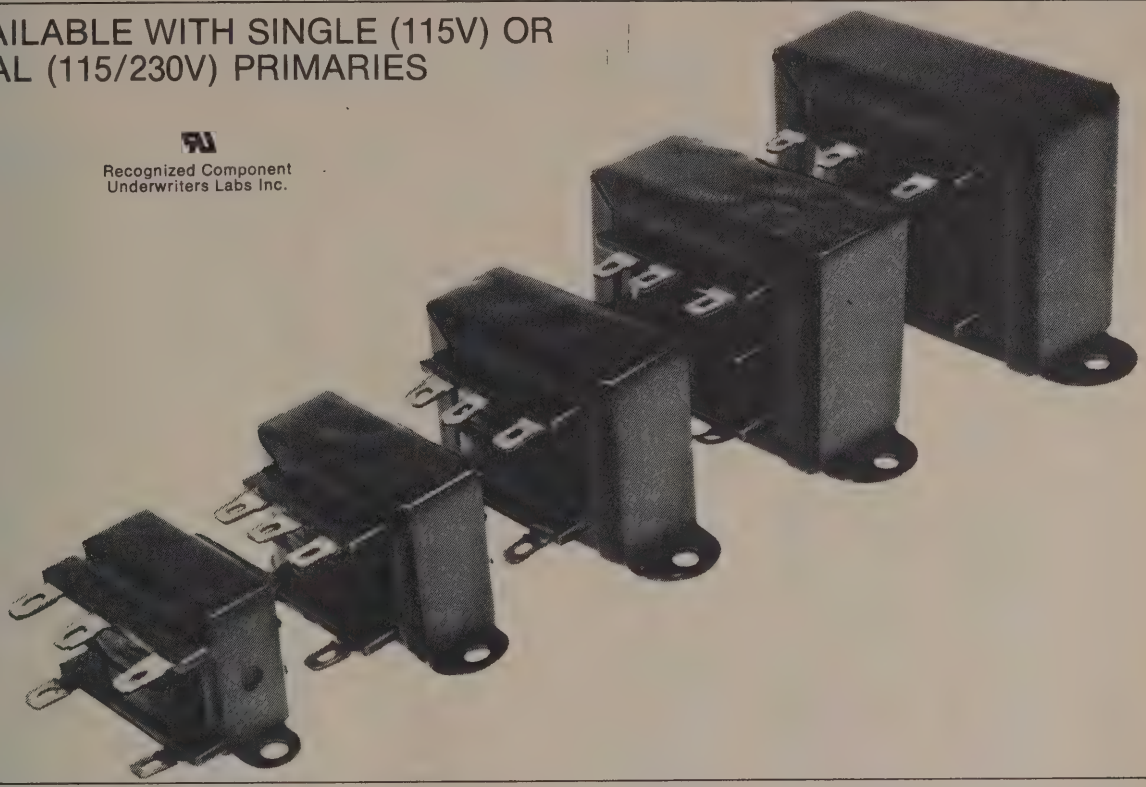
# series of small power transformers

## AVAILABLE WITH SINGLE (115V) OR DUAL (115/230V) PRIMARIES

Recognized Component
Underwriters Labs Inc.



METHOD OF DETERMINING SECONDARY CURRENT RATINGS

The secondary currents shown in the tables are RMS ratings. Depending upon rectifier circuit configurations, the RMS secondary current is different than the DC output current. This is indicated in the chart below:

| Rectifier Type | Filter Type | RMS Secondary Current Is |
|---|---|---|
| Full Wave Center-Tap | Choke Input | = 0.7 x DC Amps |
| Full Wave Center-Tap | Capacitor Input | = 1 to 1.2 x DC Amps |
| Full Wave Bridge | Choke Input | = DC Amps |
| Full Wave Bridge | Capacitor Input | = 1.6 to 1.8 x DC Amps |

For example, in a F. W. Bridge circuit with a capacitive filter, if the load is 1 Amp DC, the RMS Secondary current is 1.6 to 1.8 Amp RMS.

CUSTOM VARIATIONS

Signal is equipped to quite on Custom Variations of "241" types. The secondary combinations are restricted by the number of secondary terminals available, as follows:

| Size | Maximum Number of Secondary Terminals | VA Rating |
|---|---|---|
| 3 | 3 | 2.4 |
| 4 | 4 | 6 |
| 5 | 4 | 12 |
| 6 | 5 | 30 |
| 7 | 3 | 56 |
| 8 | 5 | 100 |

We answer requests promptly and can deliver prototypes in one to three weeks. Production lead times can be scheduled with very reasonable lead times.

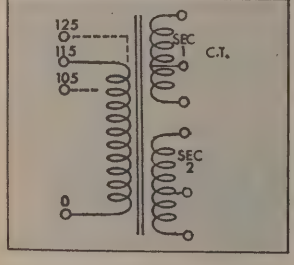
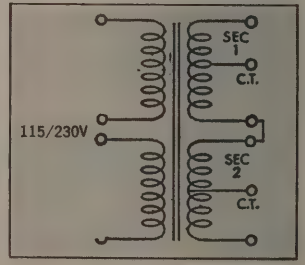
△Available with dual primary only. Therefore, prefix "DL" is not required.
‡ Nominal 115V primary has added taps, I.E., 105/115/125V, Dual (DL) version is 115/230V only.

*The DL (Dual Primary versions) are not stock items but are standard designs generally available on 2-3 week delivery.



All transformers are designed conservatively for a max of 45°C rise above ambient and are rated for 50/60 Hz. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers and chokes are rugged in construction, well insulated, and have a consistently uniform appearance. All ratings are at full load current continuous operation. Hipot rating of 1500V RMS is standard.

Electrical ratings have been chosen to cover a wide range of applications. All transformers have two center-tapped secondary windings, which may be series or parallel connected as indicated in rating chart.



# rectifier power transformers

## IDEAL FOR USE IN SINGLE OR DUAL DC POWER SUPPLIES

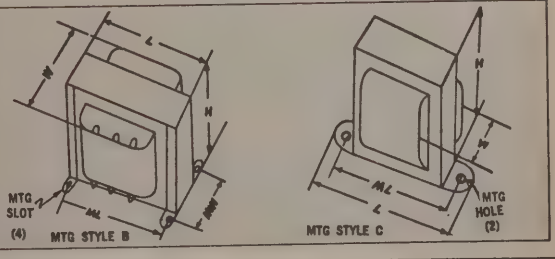
△Available with dual primary only. Therefore, prefix "DL" is not required.
‡ Nominal 115V primary has added taps, I.E., 105/115/125V, Dual (DL) version is 115/230V only.

*The DL (Dual Primary versions) are not stock items but are standard designs generally available on 2-3 week delivery, plus there will be a $20 set-up charge per order.

*The secondary currents shown in the tables are RMS ratings. Depending upon rectifier circuit configurations, the RMS secondary current is different than the DC output current. This is indicated in the chart below:

| Rectifier Type | Filter Type | RMS Secondary Current Is |
|---|---|---|
| Full Wave Center-Tap | Choke Input | = 0.7 x DC Amps |
| Full Wave Center-Tap | Capacitor Input | = 1 to 1.2 x DC Amps |
| Full Wave Bridge | Choke Input | = DC Amps |
| Full Wave Bridge | Capacitor Input | = 1.6 to 1.8 x DC Amps |

For example, in a F.W. Bridge circuit with a capacitive filter, if the load is 1 Amp DC, the RMS Secondary current is 1.6 to 1.8 Amp RMS.



Always in Stock —"THE PRONTO CHALLENGE":—We ship your order (up to 4 pieces) in 48 hours and that's a promise we intend to keep."

# filter chokes

## 0.5 TO 1000 AMPS

Signal's line of filter chokes is the most extensive available. It is designed to complement the selection of Rectifier Power Transformers so that a set may be specified for power supplies using inductive filters.

The inductance ratings given are minimum values guaranteed at full DC current. All resistance ratings are maximum values. Special variations or intermediate values of inductance, current, or resistance can be supplied promptly and accurately.

Signal's Dual Chokes are supplied with 2 windings which may be series or parallel connected with rating shown on chart. This line is basically designed for applications requiring lower inductance values at high currents, such as low voltage, DC supplies or SCR filters.

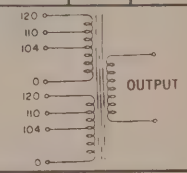
As shown on the schematic diagram dual primaries are provided. This permits parallel connection for 104, 110, or 120 volts or series connection for 208, 214, 220, 230, and 240 volts. Frequency range is 50 to 500 cps.

It is important to note that primary taps may be used to adjust the secondary voltages. Line voltages up to 125V (parallel) or 250V (series) may be used on the lowest primary tap. Nickel plated screw terminals are provided on a heavy phenolic board for easy primary connections.



# 3 phase high current rectifier transformers

At higher power loads (above 2-3 KVA) it becomes inefficient to use single phase 115 or 230 volt standard lines. With this in mind, our engineering staff has developed a line of 3 phase transformers for use off 208 or 220V 3 phase power lines. These offer the significantly higher conversion efficiency and lighter power line drain of 3 phase systems. Since the principal applicaiton of these items is in high power dc power supplies, output ratings are given in dc voltage and current assuming the use of a 3 phase full wave rectifier.

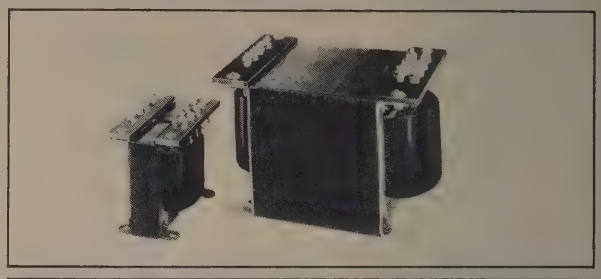
# power isolation transformers

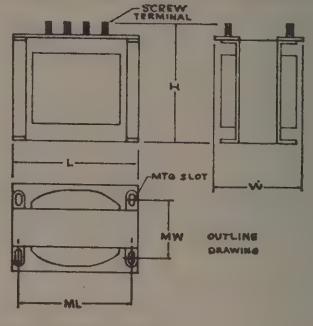
## INDUSTRIAL GRADE/STEP-UP OR STEP-DOWN. MANY POSSIBLE VOLTAGE RATINGS.



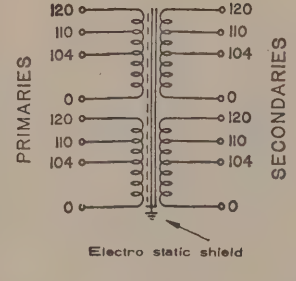
AVAILABLE FROM STOCK FOR IMMEDIATE SHIPMENT

The "DU" and "SU" lines are designed for a maximum of 55°C rise above ambient for use on standard power lines from 50 to 500 Cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers are rugged in construction, well-insulated and have a consistently uniform appearance. All ratings are at full load current, continuous operation. 2500V. RMS Hipot is standard.

Heavy ¼ inch phenolic terminal boards are provided with plated brass screws and flat washers (10-32 on ¼ and ½ KVA, ¼-20 on larger sizes). Connections can be easily made with a nut driver. It is also simple to alter the interconnections to change transformer ratings. **Electro static shields are provided grounded to the core.** The connection is made with a lug to ground and may be opened if an ungrounded shield is desired.



## DU SERIES 110/220 Dual Primary to 110/220V. Dual Sec. (Primary & Secondary may be reversed)



As shown on the schematic diagram the "DU" line is designed with dual primaries and secondaries. All four windings are identically rated at 0/104/110/120 volts. This permits series or parallel connections on either primary or secondary. Therefore, a nominal 110 to 110 volt, 220 to 220 volt, 110 to 220 volt, or 220 to 110 volt transformer can be set up. The winding taps permit intermediate series ratings such as 208, 214, or 230 volts. It is also possible to make auto-transformer connections by connecting a primary group in series with a secondary group. Such nominal ratings as 440 to 220 volts or 220 to 440 volts can be set-up, in addition to the standard ratings described above. A further advantage to auto-transformer connection is the fact that the KVA rating of a particular type is doubled.

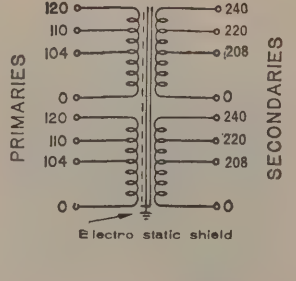
* Maximum. † ±1/32. ‡ ±1/16.

## SU SERIES 110/220 Dual Primary to 220/440V. Dual Sec. (Primary & Secondary may be reversed)



"SU" transformers are similar to "DU" types except that a 220/240V secondary is provided.

| Part No. | KVA | Series Secondaries Volts | Series Secondaries Max. Amps | Parallel Secondaries Volts | Parallel Secondaries Max. Amps | Mechanical Dimensions L * | W * | H * | ML † | MW ‡ | Mtg. & Term. Screw | Appr. Lbs. |

FIG. H

Staco variable transformers offer the versatility and reliability you want from variable voltage controls. Staco controls are used worldwide for industrial and laboratory applications to control voltage, current, power, heat, speed, light and electro-mechanical force. Staco variable transformers provide continuously adjustable output voltage from AC power sources without wave form distortions or SCR generated noise. Outstanding features include precious metal-plated commutators, precise regulation, high efficiency, conservative ratings and rugged construction.

You can select from panel mounted types, cord and plug types, ganged and/or motor driven types, metered types, and fully portable power supplies with or without meters, and ratings from 0.8 amps to 540 amps, 40 volts to 560 volts for single or three phase applications.

Staco has a nationwide network of distributors qualified to offer technical assistance whenever you need it. Additionally, the Staco Engineering Staff is available to help you with special or non-standard applications. Staco's Variable Voltage Controls handbook will be sent to you upon request ... it's loaded with illustrations, engineering data, specifications and ordering information on standard voltage controls. Prices shown are list prices. Contact your local Staco distributor or representative for quantity discounts.

## PANEL OR BENCH MOUNTING MODELS *120 VOLT INPUT SINGLE PHASE*

Available in cased or uncased units designed for mounting on panels ¼" to ⅝" thick. Most units also can be bench mounted.

## METERED PORTABLE MODELS *120 VOLT & 240 VOLT INPUT SINGLE PHASE*

Staco's new series of Metered Cord & Plug type variable transformers eliminate the need for separate metering. Featuring an accurate, high quality pivot and jewel meter conveniently located atop the enclosure for easy, accurate readout. 120V models have 0-150V meter, 240V models have 0-300V meter.

## VARIABLE ISOLATION TRANSFORMERS *120 VOLT INPUT SINGLE PHASE*

An exclusive by STACO, for use where the safety of isolation is required. The output voltage is completely isolated from the power line (input voltage). Additional outputs are available on uncased models. When proper external connections are made between windings, it is possible to increase the voltage or current ratings of the isolated variable through non-isolated, voltage doubler, or series connection.

## AC POWER SUPPLIES *120 VOLT SINGLE PHASE*

Portable AC Power Supplies are ideal for labs or test bench use. Housed in a ventilated steel and aluminum enclosure with carrying handle, each model is complete with a three-conductor line cord, plug & matching receptacle, pilot light, switch and circuit breaker. Metered models are available with Voltmeter, Ammeter or a Wattmeter (or a combination of meters).

## ISOLATED AC/DC POWER SUPPLIES *120 VOLT SINGLE PHASE*

The isolated variable transformer used in these AC/DC Power Supplies have a separate primary winding which is electrically isolated from the secondary or output winding. There is no common connection between the input and output of the transformers; either side of the output can be grounded independently of the supply line. Each unit has all the features of the AC Power Supplies, plus a 0-150V direct rating output voltmeter. 0-140V AC and 0-120V DC isolated outputs at full rated current available from banana jacks located on front panel.

| MFG. TYPE NO. | FIG. | OUTPUT VOLTS | OUTPUT AMPS | KVA | SIZE (INCHES) H x W x D | WT. LBS. | PRICE EACH |
|---|---|---|---|---|---|---|---|

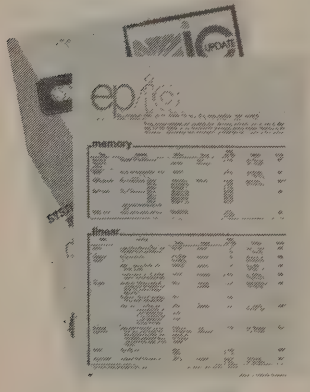
**SUBSCRIBE TO ELECTRONIC PRODUCTS MAGAZINE. IT'S YOUR *COMPLETE* GUIDE TO EVERYTHING THAT'S NEW IN THE FAST-CHANGING WORLD OF ELECTRONIC PRODUCTS AND SYSTEMS.**

**FEATURE STORIES** every month on electronic products, applications and availability.

**FORUMS**—Reports on meetings of manufacturers, users and distributors. Get the very latest news on a wide variety of products.

**NEW PRODUCT NEWS**—Hundreds of new products are introduced each month. You'll get the facts on not only what the new product is, but also where to get it, basic prices and current delivery.

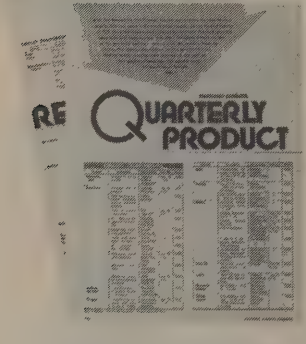
**EP/IC UPDATE**—Exclusive in ELECTRONIC PRODUCTS. A monthly report on *everything* that's new in the fast-moving world of integrated circuits.



**QUARTERLY PRODUCT REVIEW**—Another exclusive in ELECTRONIC PRODUCTS. A complete report of *every* new electronic product introduced in the previous quarter. This feature is in the January, April, July and October issues.

**QUARTERLY PRODUCT PLANNING DIRECTORY**—A compilation of the latest catalogs of a wide variety of electronic products and systems.

**OUTLOOK**—Important industry news affecting electronic products and systems.



**COMPONENT CAPERS**—A humorous look at the strange and wonderful world of electronics.

**MINI-GLOSSARIES,** Quizzes and more—Each and every month for over twenty years the readers of ELECTRONIC PRODUCTS learn something new about the products they work with and specify.

Note 1 —
SM Series are two hole mounting with holes on center line. #4-40 Pem nuts are fastened to the bracket.

Note 2 —
#6-32 Pem nuts on bracket are standard.

Note 3 —
#8-32 Pem nuts on bracket are standard.

- All primaries 380-1000 cps
- Dielectric test voltages:
  PRIMARIES 1500 Volts RMS
  SECONDARIES 1500 Volts RMS
- Epoxy resin used as encapsulant
- Prices subject to change without notice

STERLING TRANSFORMER

## UNIVERSAL DC POWER MODULE TRANSFORMERS

High reliability transformers having a tapped primary and single or dual secondary windings which may be connected F.W. bridge or F.W. center tap so as to obtain a wide range of DC voltages and current ratings.

**INPUT PRIMARY 115 volts 50-500 cps**

# POWERSTAT® Variable Transformers now

New epoxy-coated POWERKOTE Coils make the POWERSTAT line the most outstanding value in variable transformers today. *Without increase in price, size or weight,* only POWERSTAT Variable Transformers give an average of 20% higher current ratings, 10:1 greater overload capability, longer life, greater resistance to fungus, salt spray and other contaminating atmospheres. POWERKOTE Coil commutator bars are embedded in place preventing steady-state operating temperature and severe overloads from distorting the commutator.

POWERSTAT Variable Transformers are designed to deliver continuously adjustable voltage from a-c power lines. They introduce no waveform distortion and feature rugged construction, precious metal plated commutators, excellent regulation, high efficiency and conservative ratings. All manually operated types listed in the charts except the 10B-12, EN116B-EN216B and EN117B-EN217B Series are available with motor drives if desired. Motor-driven speeds are 5, 15, 30 or 60 seconds for full range travel on all except types having -4, -5, or -6 suffixes which do not offer the 5-second speed. Single types in the 116B-216B, 117B-217B, 126-226 and 136B-236B Series are also offered with 2- or 3-wire cord-plug sets. 1156D-1256D Series types are available in ratings to 244 kva.

## STATIONARY METERED KNOB TYPES

Single units (those listed in charts without -2 or -3 suffixes) in the 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 series are also available with metered knobs. Stationary voltmeter does not turn with knob. Voltmeter accurate within ±3% of full scale and insensitive to stray magnetic fields. When ordering, add VS prefix to type number. *Back-of-panel* mounted types in the 21-22 through 146-246 series can be combined with Metered Knob Assemblies. Existing models can be retrofitted also. Assembly type VS150 has a 0-150 volt scale and type VS300 has 0-300. Types VS116B, VS3PN116B and VS3PN136B are available off-the-shelf from distributor stock.

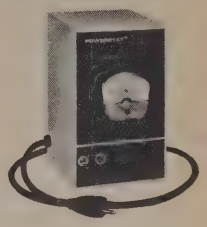
## ENCLOSED LABORATORY TYPES

TYPE N116B



TYPE N116BK

Portable 120 volt, single-phase units having grounded NEMA cord-plug assembly, on-off switch, output receptacle, pilot light and fuse, recessed panel controls and integral handle. Slot at rear for wall hanger brackets. Type N10B rated 0-132 volts, 1.75 amp; type N21 rated 0-140 volts, 4.5 amp; type N116B and N116BK rated 0-140 volts, 10 amp. Type N116BK has knob with nonturning voltmeter to conveniently measure load voltage without necessity of providing separate units. All available off-the-shelf from distributor stock.

# *Technitrol* -TOTAL TRANSFORMER CAPABILITIES

For over 30 years, Technitrol and its merged groups have originated many advanced transformer designs, and are constantly pushing the state-of-the-art. Recent examples of this are the **three-phase ferroresonant,** the DIP concept and inhouse original transformer computer design programs. When a critical component means the difference between a clean circuit design and a compromised functional approach, you'll welcome the Technitrol engineering ability on your team.

Technitrol's size and excellence means the following to you: availability of the latest technology, total manufacturing capability and that can-do factor that gets you the component you need, on time, meeting specifications and at a competitive price.

Contact the Technitrol Rep nearest you or the factory direct and see how Technitrol can best supply your transformer needs.

NOTE
LEADS # 22 AWG WIRE

The Technitrol catalog lists a wide variety of general use miniature and subminiature transformers in a number of form factors. Write for it or contact our nearest representative. We can design a unit for your individual application in computers, data communications, avionics, industrial control, etc.

For transformers from commercial to tough hi-rel military types, simple to stringent electrical and environmental requirements, units packaged individually or in multiples, Technitrol's engineers are as close as your telephone.

Call us.

# UNITED PRICING REPORTS

## the single source that speeds up invoicing, pricing, quoting, purchasing and estimating

Electronic component prices change so fast, you'd need a team of people just to keep up.

United Pricing Reports is the better way. When you subscribe to Pricing Reports you receive 1500 pricing sheets (3000 pages) of the latest prices, as of the date we ship them to you.

This gives you, in a single source, up-to-the minute selling prices on more than 500,000 electronic components.

United Pricing Reports gives you accurate resale prices at the exact moment you need them. Not hours or days later. So it helps you eliminate frantic phone calls, letter writing and catalog scanning to check on prices when you write an invoice or type a purchase order.

## Twice weekly price updates.

One week after you receive your Pricing Reports source book (1500 pricing sheets) you begin receiving twice weekly price updates. You simply take these new price pages and replace the now obsolete pages with them.

The whole process is simple. All information is organized alphabetically by manufacturer. And each manufacturer's price schedule is listed by part number in numerical/alphabetical sequence.

One more thing. When we promise twice weekly updates, we deliver. 52 weeks a year, consistently. Not monthly or every other month. We have a tradition of delivery on our promises, and we're certainly not going to stop now.

## SILICON RECTIFIER — 117V 50/60 Hz PRIMARY

These transformers have been designed to fill the gap between the electronic tube — high voltage, low current — type of transformer and the transistor — low voltage, high current — type unit. The two 6.3 volt windings may be connected in series or in parallel to provide either 6.3 volts or 12.6 volts C.T. They may also be used with suitable rectifiers to supply a low voltage DC source.

## REPLACEMENT PARTS

THORDARSON maintains the most complete line of replacement transformers in the industry. Television flybacks, yokes, vertical output and power transformers are stocked in-depth plus thousands of other hard-to-get transformers and chokes for consumer, commercial, industrial, medical, and military applications. Your THORDARSON distributor has up-to-date TV replacement info.

†Has receptacle for voltage adjustment. *Complete with tap switch for voltage adjustment.

## FLYBACKS AND YOKES FOR DISPLAY INFORMATION SYSTEMS AND MONITORS

THORDARSON designs and manufactures flybacks and yokes to customer specifications for a broad range of display applications. Our high voltage transformers feature flame retardant construction in all configurations. Contact factory with your display requirements.

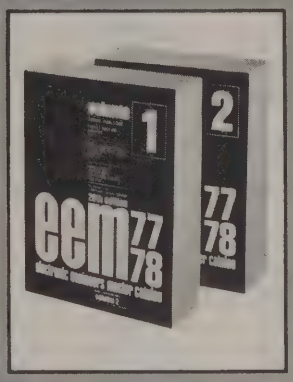
# WE KNOW OUR STUFF

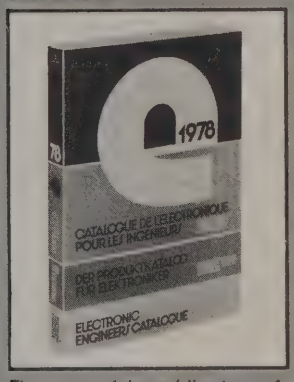
## 41 YEARS OF EXPERIENCE IN CATALOGING, 21 EDITIONS OF eem

### eem/ELECTRONIC ENGINEERS MASTER CATALOG —



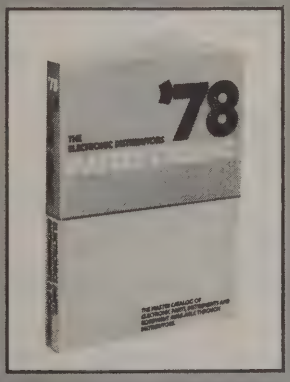
The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

### ELECTRONIC ENGINEERS CATALOGUE



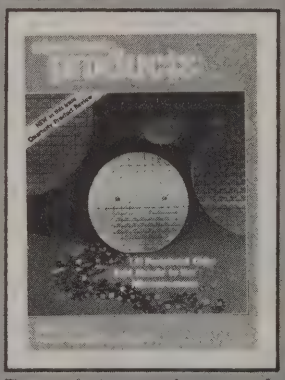
The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.

### ELECTRONIC DISTRIBUTORS MASTER CATALOG —



The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

### ELECTRONIC PRODUCTS MAGAZINE —



The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

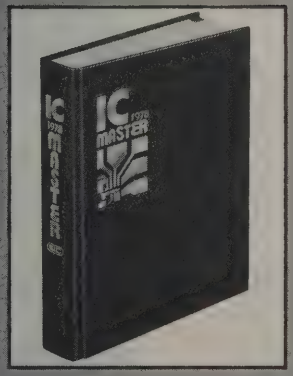
### eem FILE SYSTEM —

The only filing system designed especially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

### UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

### IC MASTER AND THE UPDATES —



The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

### UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

CERTIFIED DATA AVAILABLE

**CUSTOM VARIATIONS QUOTED PROMPTLY**

TODD SYSTEMS "HIGH CURRENT TRANSFORMERS & CHOKES" are designed for use in high power rectifier circuits, and high current A.C. applications. "TODD ENGINEERED" designs feature a nominal temperature rise of 45°C., at full load, thus providing outstanding overload capacity. All designs utilize extremely low regulation, varying from 10% in the smallest to 1% in the larger units.
Four styles . . . select the type best suited for your lab, test rigs, OEM or production equipment

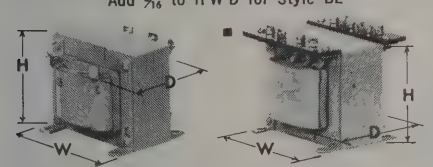
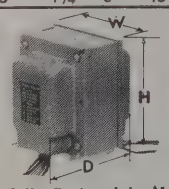
Add 3/16 to H W D for Style BE

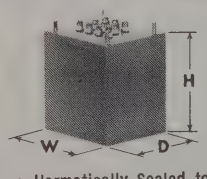


**STYLE B:** • "Open Frame" Bracket Mounted • Double Vacuum Varnish Impregnated

**STYLE BE:** • Conforms to MIL-T-27B • Epoxy Encapsulation added to Style B



**STYLE V:** • Fully Enclosed in Metal Shells • Ease of "Wiring with Leads" • Attractive Appearance • Dbl Vacuum Varnish Impregnated



**STYLE CM:** • Hermetically Sealed to MIL-T-27B • Environment Proof • Attractive Gray Finish • Permanent Name Plate

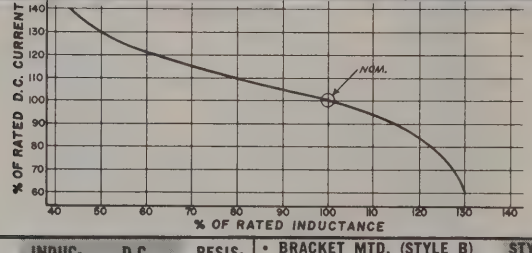
## HIGH CURRENT CHOKES — 50/500 HERTZ — DIMENSIONS REFER TO HIGH CURRENT XFMR SKETCHES



- **Matching styles complement high current transformers**
- **Wide variety of compatible current ratings**

### INDUCTANCE VARIATION

Graph indicates typical variation of inductance (%) when used at D.C. currents (%) other than the rated values.

Chokes operated at D. C. currents higher than rated value must be run on an intermittent basis to avoid overheating.

# 400 HZ MINIATURE POWER TRANSFORMERS

## Reference for all Industrial and Military Standard 400 Hz Miniature Power Transformers

These 400 Hz Miniature Power Transformers are selected for use in all Military and Industrial applications requiring high performance in the smallest possible package size. They conform to all of the requirements of MIL-T-27, Class S (−55 °C to +130 °C). The minimum continuous operating life expectancy is 10,000 hours. This series is available having power ratings of 0.5 VA through 250 VA. The primaries are 115 Vrms with secondary voltages ranging from 5 Vrms through 300 Vrms.

**It is recommended that these transformers be specified for all applications where space, weight, and cost effectiveness are prime considerations.**

# 400 HZ MINIATURE POWER TRANSFORMERS

## PHYSICAL SPECIFICATIONS

**Size:**
Sizes for Standard VA Types are given in Table I, and Outline Drawings on the preceding pages.

**Construction:**
Package Styles E, P, and S: Encapsulated, Epoxy (MIL-T-27, Grade 5).
Package Styles H and M: Hermetically sealed in drawn steel case (MIL-T-27, Grade 4).

**Terminals:**
Package Styles E, P, and S: Printed circuit pins—tinned brass.
Package Styles H and M: Ceramic-silicone rubber.

**Terminal Strength (Method 211 of MIL-STD-202, test condition A):**
Package Styles E, P, and S: 2.0 pounds
Package Styles H and M: 4.5 pounds

**Finish:**
Package Styles E, P, and S: Epoxy, black.
Package Styles H and M: MIL-F-14072 with grey color in accordance with No. 26152, Federal Standard No. 595.

**Marking:**
Includes MIL-T-27 Type Designation, winding ratings, maximum working voltage, maximum altitude, schematic, Torotel name, and part number.

## ELECTRICAL SPECIFICATIONS

**Primary Voltage:**
115 Volts RMS ± 10%.

**Frequency:** 400 Hz ± 5%

**Secondary Voltage and Tolerance:**
Standard Secondary Voltage: See Table II.
Secondary Voltage Tolerance: ± 3% at full load and 115 volts, 400 Hz applied to primary.

**Electrostatic Shielding (Schematics S and X):**
5 to 1 minimum voltage ratio at 20 kHz.

**Phase Shift:**
1.0 electrical degree between primary and secondary voltage at rated load, maximum.

**Insulation Resistance:**
10,000 megohms minimum at 500 VDC.

**Dielectric Strength:**
At sea level: 2.8 times the maximum working voltage.
At reduced barometric pressure: 1.25 times the maximum working voltage.

## ENVIRONMENTAL SPECIFICATIONS

**Operating Temperature Range:**
−55 °C to +130 °C (ambient plus temperature rise).

**Altitude:**
70,000 feet, maximum.

**Vibration:**
MIL-STD-202, method 204, test condition C.

**Life Expectancy:**
10,000 hours, minimum.

**Other Environmental Specifications:**
In accordance with MIL-T-27, Grade 4 (Package Style H and M) and Grade 5 (Package Style E, P, and S), Class S, Family 03.

**TABLE II. Industry Standard Secondary Voltages**

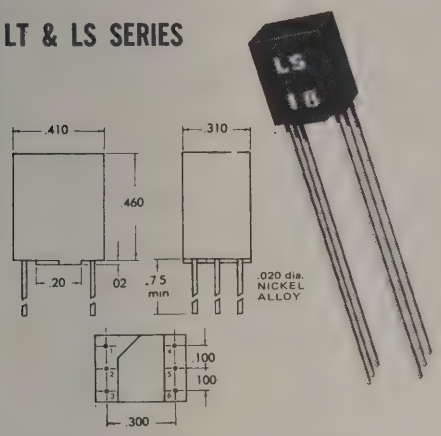
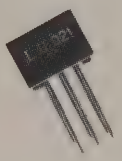
# SUBMINIATURE AUDIO TRANSFORMERS

## PROTOTYPES IN 48 HOURS UPON REQUEST

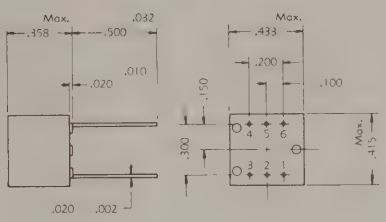
### LT & LS SERIES

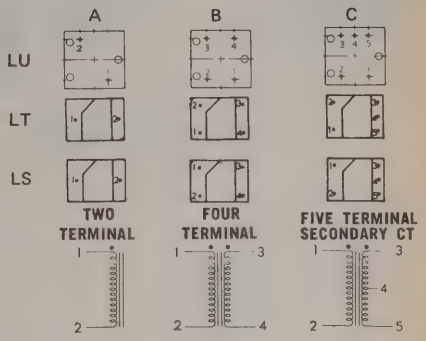


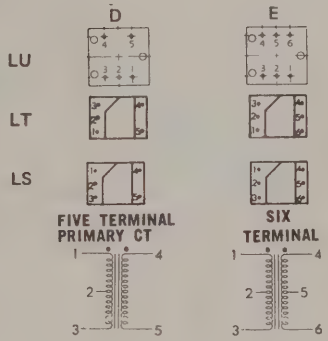
### LU SERIES



Wt. 0.1 oz.







The LS Series is electrically and mechanically the same as the LT Series except for phase relationships between terminals.

LS, LT, and LU Series transformers have successfully passed the rigid requirements of MIL-T-27, Class R, Grade 5.

Subminiature in size, weighing less than 0.1 ounce, these transformers have tenth inch grid spacing between terminals and are ideally suited for transistor circuit applications which utilize printed circuit board design. All three series have risers on mounting surfaces to facilitate inspection and board cleaning, and also to prevent moisture traps.

A wide range of standard designs are available which meet the requirements of most common applications and allow for rapid delivery of prototype quantities. Special designs are also available in all three types.

The new LU Series exhibits the same electrical characteristics as the LS and LT Series but has been packaged in a "thin line" configuration to allow for closer board spacing for "card cage" applications or where height dimensions are critical.

### MAGNETIC SHIELDING

LS and LT Series transformers are available with magnetic shields when required. Overall dimensions of transformers with the magnetic shield added are .365 max. x .465 max. x .531 max.

To order transformers with shields installed add 500 to dash numbers shown in the table below. For example: to order an LS-22 with shield, specify LS-522.

| LS, LT or LU No. | MIL-T-27 Designation | Application | Primary Impedance | DC Res. Pri. Ohms | DC ma Pri. | Secondary Impedance | Max. Power MW | Term. Layout |

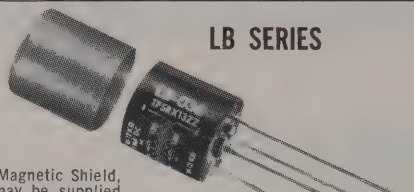
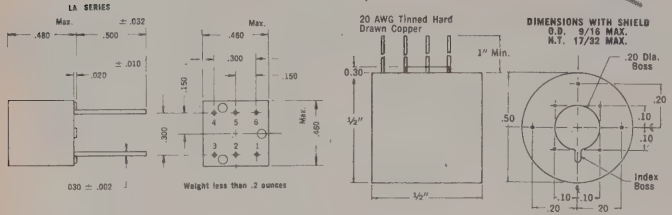
## LA SERIES

## LB SERIES



The LB-500 Magnetic Shield, as shown, may be supplied for all LB Types. Add 500 to Dash Number (i.e. LB-001 with Shield. Order LB-501).



Torotel LA and LB Series Transformers are manufactured to MIL-T-27, Grade 5, Class S specification. These series have 0.1 grid spaced terminals for printed circuit application. Both types have risers on mounting surfaces to prevent the formation of moisture traps and to facilitate cleaning of board assemblies.

The LA Series is electrically the same as the LB Series, but is packaged in a .460 inch cube with smaller outline dimensions for application where this configuration is more suitable.

Leads are made of 20 AWG Tinned Hard Drawn Copper. Units utilizing Dumet Wire are available on special request.

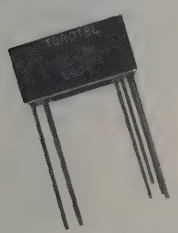
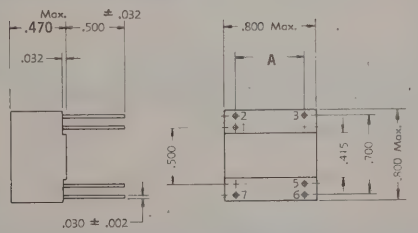
## AUDIO TRANSFORMERS — LH & LK SERIES





"LK/LH" Series transformers are the ultimate in compactness and their .470 HT and 0.1 grid spacing provide a most efficient .5" board spacing unit. Designed to meet MIL-T-27C, Grade 5, Class S.

RESPONSE: ±1 db 200 to 10,000 Hz
DISTORTION: 10% Max. at rated power, 200 to 10,000 Hz
WEIGHT: 0.75 OZ

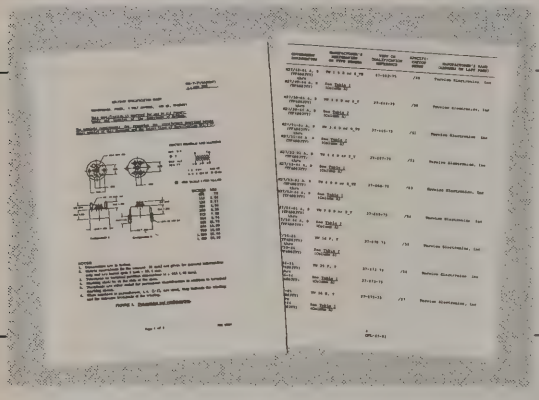
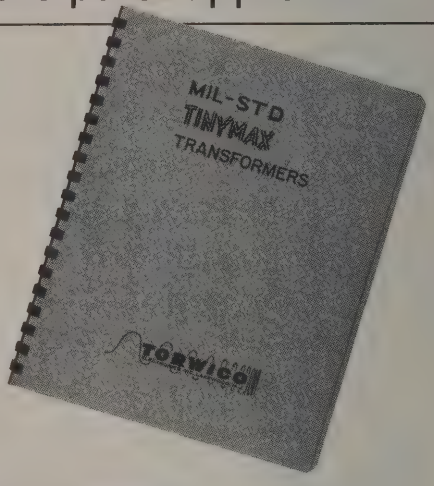
TORWICO ELECTRONICS INC.

LEADER IN MAGNETIC COMPONENTS

# TINYMAX Transformers have QPL Status on Qualified Product List 27.



## Now you can specify Military Standard Transformers without the need for Qualification Testing or requests for non-standard parts approval.



These miniature transformers are of toroidal construction and offer a size and weight reduction when compared to conventional laminated and "C" core designs. Yet, the prices on these custom engineered transformers are competitive with off-the-shelf stock items.

So, when you need a 115V, 400 Hz transformer having a specific secondary voltage don't settle for an off-the-shelf item that may only approximate your requirement. Torwico has over 2,000 MIL/STD units and an almost infinite selection of STD TINYMAX.

What's more, Torwico offers fast delivery and competitive pricing. Selection, delivery and price--Torwico has it all.

**STD TINYMAX -- MIL-T-27,** Grade 4 and Grade 5, Class S, 115 volt, 400 Hz transformers available in power ratings ranging from 1.5 VA through 250 VA, with an almost infinite combination of secondary voltages of 6V through 300V.

**MIL-STD TINYMAX** -- Grade 4 and Grade 5, Class S, 115 Volt, 400 Hz transformers. Reference M27/37 through M27/66. Over 2,000 choices of secondary voltages.

**EXTENSION OF APPROVAL** -- Any design selected directly from, or based, on our MIL/STD TINYMAX transformer may be qualified to MIL-T-27 by similarity.

**PROCUREMENT NOTE** -- Catalog information and cross referenced sheets may be obtained from the factory or for MIL-STD units, refer directly to specification sheets M27/37 through M27/66.

**PROTOTYPE DELIVERIES** -- A large assortment of TINYMAX transformers is always maintained in stock for immediate delivery. Others can be shipped within 10 days.

For a copy of Towico's MIL-STD TINYMAX catalog, contact your local Torwico representative. He'll show you why Torwico is the easy way to deal with military standards.

* Windings may be connected in series to obtain their combined voltage when properly phased. Current will be equal to the current of the lowest winding. Example: Two 6.3V windings @ 2A in series would be 12.6V @ 2A. Windings may also be connected in parallel to obtain combined current. Example: Two 6.3V windings @ 2A in parallel would be 6.3V @ 4A. ¶ Tapped primary 105-115-125. ‡ 60 cycle operation.

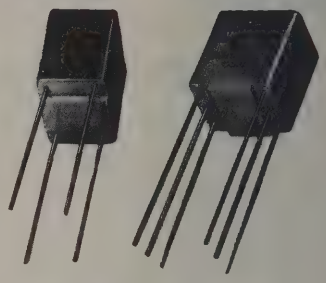
## RED SPEC TRANSISTOR TRANSFORMERS



All Red Spec transformers are designed and constructed to conform to the rigid requirements of Specification MIL-T-27B. Features are: solid epoxy molded case . . . legible, permanent circuit data on every unit . . . base mounting pad for ready inspection of all solder joints . . . High-strength .020-diameter nickel alloy leads . . . no stripping or tinning required . . . operating voltage: 150V DC . . . exceptional operation from 100 to 100,000 cycles . . . base dimensions of only .310 by .410 inch . . . total height of just .465 inch . . . weight: 1/10 ounce . . . lowest possible fatigue factor . . . dry hydrogen-annealed Trialloy, deep-drawn .020-inch case (SP-310) available for providing as much as 20 to 45 db magnetic shielding.

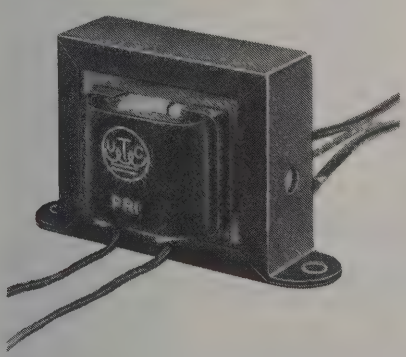
| 38 | 17 | Hipermalloy shield, split fit over Ouncer, 1" O. dia. provides 25 db shielding. | | | | |

*Not available in PC Style.



**PACKAGING** High lustre black enamel.

**APPLICATION** Industrial type. Primary 117 V 50/60 Hz.

**CONSTRUCTION** Designed for low temp. rise. Vacuum sealed against humidity. Special impregnation prevents corrosion and electrolysis.

## ULTRA-COMPACT AUDIO UNITS

**TYPE A CASE**
Length .....1½″
Width .....1½″
Height .....2″
Mounting .....1⅝″ sq.
Screws .....4-40
Cutout .....1⅜″ dia.
Unit Weight .....½ lb.

**PACKAGING** High quality rugged die cast zinc alloy case with both top and bottom mounting facilities. Asterisked items (see Type No.) have multiple alloy shield.

**APPLICATIONS** Compact amplifiers and equipments.

**APPLICATION NOTE** Included in line are filament/transistor supply units.

**NOTE** All units except those carrying DC in primary employ a true hum bucking coil structure, which provides electrical balance and effects good inductive shielding.

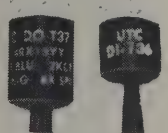
## TRANSISTOR TRANSFORMERS
## DO-T* AND DI-T*



DO-T (Actual Size) DI-T

Revolutionary transistor transformers hermetically sealed to MIL-T-27C specs. Plastic insulated solderable leads, firmly anchored to withstand 10 pound pull. Ideal for printed circuits. DO-T: 5/16" dia. x 13/32" long, wt., 1/10 oz. DI-T: 5/16" dia. x 1/4" long, wt., 1/15 oz. These compact units provide frequency response, high efficiency and low distortion. U.S. Pat. No. 2,949,591.

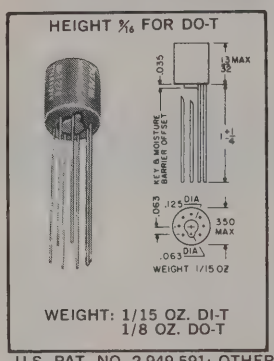
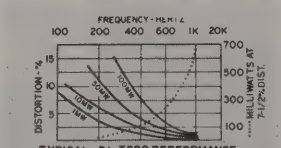
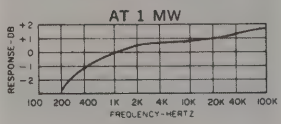
# TRW UTC TRANSFORMERS — TRANSFORMERS

## DO-T200 AND DI-T200 SERIES TRANSFORMERS AND INDUCTORS



WEIGHT: 1/15 OZ. DI-T
1/8 OZ. DO-T





**PACKAGING** Metal encased. DO-T family unit. See page 10.

**MIL SPECS** To complete MIL-T-27D Specs. Ruggedized, metal encased to MIL Grade 5, Class R. See pages 80, 81.

**FREQUENCY RESPONSE** At 1 mw ±3 db, 300 Hz to 20 kHz, DO Type; ±3 db, 400 Hz to 100 kHz, DI Type.

**TERMINALS** Leads are .016 Dumet wire, gold plated, and may be either welded or soldered. They are uninsulated and are spaced on a .1" radius circle, conforming to the termination pattern of the "TO-76" cased semiconductors and micrologic elements.

**PACKAGING** TRW/UTC's plastic casing is designed for protection to 85°C. The bobbin is completely rigid and the wire turns are circular to reduce turn corner stress and assure uniform wire lay. External leads are rigidly anchored internally. No tapes are used. Insulated leads are .016" diameter tinned copper. Units mount vertically or on side and can be wave soldered.

**I-DO-T** and **I-DI-T** transformers are industrial quality counterparts of TRW/UTC's DO-T and DI-T line of MIL-Spec transformers. Environmental specifications, such as hermetic sealing, have been relaxed to reduce the cost. Electrical performance is identical. See pages 11 and 12.

**WORKING VOLTAGE** All units = 50 V.

**FREQUENCY RESPONSE** Frequency response is ±3 db, 300 Hz to 20 kHz (I-DO-T). Frequency response is ±3 db, 400 Hz to 100 kHz (I-DI-T).

**TEMPERATURE RANGE** Maximum operating temperature is +85°C.

**SHIELDING** Hipermalloy electromagnetic shield is available from stock for all I-DO-T and I-DI-T units.

**PERFORMANCE** In power handling capability and reliability coupled with small size, I-DO-T and I-DI-T transformers are unprecedented for industrial use. Electrical parameters and areas of application exceed conventional transformer capabilities.

# TRW UTC TRANSFORMERS — TRANSFORMERS

## PIP* SERIES TRANSISTOR PULSE TRANSFORMERS

UTC's PIP series of subminiature transistor type pulse transformers is designed to give a maximum of component density in equipments, their configuration being especially compatible with transistors. The design is based on the UTC DO-T and DI-T series to impart exceptional reliability. PIP-1 through PIP-9 have a ratio of 4:4:1, PIP-10 through PIP-12 have a ratio of 5:3:1. All units are checked and adjusted in a transistor test circuit to give the required pulse width.

Hermetically sealed, manufactured and guaranteed to MIL-T-20138B by full environmental testing . . . all units, completely METAL CASED, MIL Type TP6RX4410CZ. See UTC page 3015 for other miniature pulse transformers.

U.S. Pat. No. 2,949,591

5/16" Dia. x 3/16" high. Weight 1/20 oz.

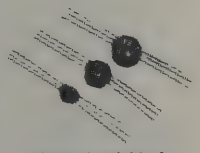
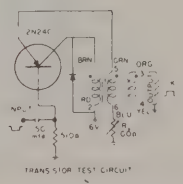
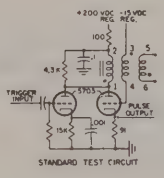
## PRECISION MINIATURE WIDE APPLICATION PULSE TRANSFORMERS



Size and weight of these units same as H-45.





**MANUFACTURED AND GUARANTEED TO COMPLETE MIL-T-21038B**

UTC miniature, wound core, pulse transformers are indivdually precision adjusted in standard test circuits to close tolerances. They are high reliability units, hermetically sealed by vacuum molding and suited for service from −70°C to +130°C. Wound core structure provides excellent temperature stability (unlike ferrite). Designs are high inductance type to provide minimum of droop and assure true pulse width. H-45 thru H-57 ratio 1:1:1. Others ratio 4:4:1 and 5:3:1.

**ALL UNITS INDIVIDUALLY ADJUSTED TO PARAMETERS SHOWN IN TABLES**

# TRW UTC TRANSFORMERS

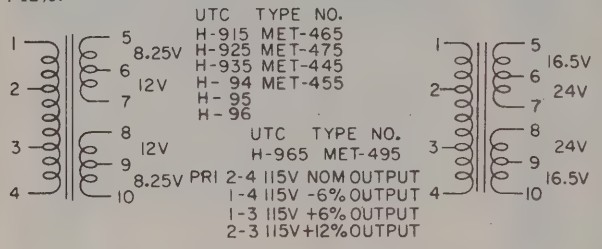
## UNIVERSAL TRANSISTOR SUPPLY TRANSFORMERS

**PACKAGING** Hermetically sealed. Drawn metal case to Mil Grade 4.

**MIL SPECS.** To complete MIL-T-27 Specs. Mil Type: TF4SX02 plus two letter case code.

**NOTES** Chart, below, shows the secondary AC voltages available, and the approximate DC voltages resulting, in typical capacitive filter silicon rectifier circuits (at the indicated currents). Since the capacitor following the rectifier affects the DC, voltage values used (in 1000 mfd) are shown in parenthesis ( ) after each current rating.

Primary taps can modify nominal AC voltages by −6%, +6%, and +12%.



**INCLUDING MET™ SERIES**

**Primary 115 Volts, 50/60 Hz Nominal Sec. Volts, 8.25 to 40.5**

*THE ANSWER PEOPLE IN CRT'S.*

Over the years Clinton has developed more than 500 distinct tube types with over 200,000 variations to meet a wide variety of applications including Alpha-Numeric Data Displays, Video Monitors, Electronic Games, Projection, Photography and others. It would be virtually impossible to include in details the specifications for each of these pre-engineered designs. Therefore, we have included in this brochure some of the most commonly used tube types and their basic characteristics. When your application calls for a CRT which varies from those listed, contact our Sales or Engineering departments. In many cases there is a tube already designed which will meet your exact needs.

We will be most happy to supply complete specifications on the tube sizes listed. Whether your needs can be filled by one of the hundreds of current designs, or your requirement calls for a special design, our engineers welcome the opportunity to work with you on any project you may have.

## ELECTRICAL CONSIDERATIONS:

To achieve the optimum performance for each application, the electrical characteristics of both the Cathode Ray Tube and the chassis must be carefully chosen to complement each other. CRT cutoff voltage, Grid #2 voltage, resolution, and drive characteristics are all interrelated and must be considered for each specific design.

Charts 1 and 2 illustrate the possible ranges of operation.

CHART 1 used for Alpha-Numeric Data Displays, Video Monitors, Electronic Games, and Waveform Monitors.

CHART 2 used for Flying Spot Scanners and Projection Tubes.

Our engineering staff can supply complete specifications on existing tube types or develop new designs and specifications to fit your specific requirements. We welcome the opportunity to work with your design group on any project you may have.

## CHART #1

| Tube Neck Size | Anode Voltage Ranges | Focus Voltage Ranges | Grid #2 Voltage Ranges | Available Heater Ratings |
|---|---|---|---|---|
| 20 mm Neck Diameter | 4KV to 12KV | 0 to 400V | 100 to 1000V | 6.3V @ 300ma<br>6.3V @ 450ma<br>12.6V @ 83ma<br>12.6V @ 150ma<br>(Quick Heat)<br>11.0V @ 140ma<br>12.0V @ 75ma |
| 29mm Neck Diameter | 8KV to 18KV | 0 to 500V | 100 to 1000V | 6.3V @ 300ma<br>6.3V @ 450ma<br>12.6V @ 150ma<br>(Quick Heat)<br>11.0V @ 140ma<br>12.0V @ 75ma |
| 35mm or 37mm Neck Diameter | 8KV to 20KV | 0 to 500V (Low Voltage Focus Designs)<br>2KV to 6KV (High Voltage Focus Designs | 100 to 1000V | 6.3V @ 450ma<br>6.3V @ 600ma |

## CHART #2

| Tube Neck Size | Anode Voltage Ranges | Focus Voltage Ranges | Grid #2 Voltage Ranges | Available Heater Ratings |
|---|---|---|---|---|
| 35mm or 37mm Neck Diameter | 12K to 30KV | 0 to 500V (Low Voltage Focus Designs)<br>2KV to 7KV (High Voltage Focus Designs) | 100 to 1000V | 6.3V @ 450ma |

## IMPLOSION PROTECTION AND MOUNTING HARDWARE:

Many Clinton tubes can be supplied with a wide choice of implosion protection systems; Kimcode, Shelbond, laminated panel or tension band with or without mounting ears. Laminated panels are available in a variety of colors and light transmissions for contrast enhancement. Etched or coated panels are also available for glare reduction. All Clinton tubes using these implosion protection systems meet UL and CSA standards.

In addition to mounting features available on the Shelbond and Kimcode, Clinton Electronics has designed special mounting ears which are used in conjunction with the tension band. These mounting ears facilitate tube mounting in chassis and are available on most sizes.

5" & 6" Diagonal Bulb with Ears

7" & 9" Diagonal Bulb with Ears

9" & 12" Diagonal Bulb with Shelbond

12" Diagonal Bulb with Ears

15" Diagonal Bulb with Ears

20" & 23" Diagonal Bulb with Kimcode and Ears

Low Profile Bulb with Ears

## PHOSPHORS:

Clinton Electronics Corporation offers one of the broadest selections of Phosphors for standard and unique applications. In addition to the standard E.I.A. phosphors available Clinton offers many special proprietary phosphors with characteristics to meet special requirements, including our new Datastar™ high contrast phosphor.

BRIMAR

## high quality INSTRUMENT TUBES

**TWENTY-ONE DIFFERENT PHOSPHORS / INTERNAL & EXTERNAL GRATICULES / FLASHOVER PROTECTION / IMPLOSION PROTECTION (5 Different Constructions)**

Accessories offered for Brimar cathode ray tubes include sockets, connectors, yokes, focusing coils and twist coils. Substantial savings can be offered when Magnetic Shields and Tubes are purchased as assemblies.

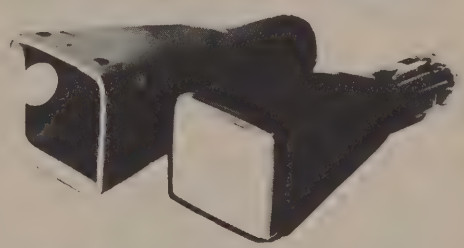
Thorn Radio Valves and Tubes Limited is one of Britain's largest manufacturers of industrial cathode ray tubes. Examine a BRIMAR catalog and you will find about the widest range of tubes, one of which is likely to be a perfect fit for your requirement. But if you have something unusual in mind it is probable that BRIMAR can make it.

### PARTIAL LISTING OF AVAILABLE TYPES

| Selected Types | Application and Description | Face Shape & Dia. (Min.) | Useful Min. Screen Area (Inch) |
|---|---|---|---|
| **FLYING SPOT SCANNER TUBES** | | | |
| Q7-100GU | Electrostatic focus. High resolution. | 3 ● | 4.7 |
| Q13-202GS | Electrostatic focus. Document readers or telecine EHT connection by CT8 socket. | 5 ● | 3.5x2.7 |
| **SMALL ELECTROSTATIC DISPLAY TUBES** | | | |
| D3-130 | General purpose indicating device. | 1 ● | 1.1 |
| D7-200 | Indicators. Oscilloscopes. CCTV. Alpha-numerical readout. | 3 ■ | 2x1.6 |
| D7-201 | Low power, 8 to 10 mil spot. Inexpensive. For portable scopes. | 3 ■ | 2x1.6 |
| D9-110 | Low power, letter box format. | 3½ ■ | 2.6x1.6 |
| **INSTRUMENT TUBES — SINGLE GUN** | | | |
| D10-210 | Compact, low power, mesh p.d.a. | 4 ■ | 2.75x2 |
| D10-230 | Low cost, high quality, flat face. Short (10.25″), low X deflection voltage requirement. | 4 ● | 3.15x2.5 |
| D10-240 | Low power, short (10.25″), spiral p.d.a., good line width and deflection coefficients, deflection blanking. | 4 ■ | 2.75x2 |
| D10-293 | High bandwidth. Portable small compact size. | 4 ■ | 2.75x2 |
| D13-47 | Medium bandwidth. For transistor scan circuits. Spiral p.d.a. | 5 ■ | 4x2.4 |
| D13-471 | Low voltage heater version of D13-47. | 5 ■ | 4x2.4 |
| D13-600 | General purpose. Short length. Large screen area. | 5 ● | 4x3.1 |
| D13-601 | Same as D13-600 but with low wattage heater. | 5 ● | 4x3.1 |
| D13-610 | Medium bandwidth for transistor scan circuits. Spiral p.d.a. | 5 ● | 4x3.1 |
| D13-611 | General purpose, medium bandwidth, spiral p.d.a. | 5 ● | 4x3.1 |
| D13-630 | Short length monoaccelerator. | 5 ● | 4x3.1 |
| D14-172 | General purpose. Short length. | 5½ ■ | 4x3.1 |
| D14-173 | Low wattage heater version of D14-172. | 5½ ■ | 4x3.1 |
| D14-180 | Medium bandwidth for transistor scan circuits. | 5½ ■ | 4x3.1 |
| D14-200 | High bandwidth, mesh p.d.a., squared-off face-plate. | 5½ ■ | 4x3.1 |
| D14-270 | Short, low cost monoaccelerator. | 5½ ■ | 4x3.1 |
| D14-280 | Medium to high bandwidth, mesh p.d.a. | 5½ ■ | 4x3.1 |
| D14-310 | High bandwidth, superior spot size. | 5½ ■ | 4x3.1 |
| D16-100 | X-Y plotter. Square faced tube. | 5½ ■ | 4x4 |
| D18-130 | Short (12.2″), large screen, spiral p.d.a. General purpose applications. | 7 ■ | 4.7x3.9 |

### INSTRUMENT TUBES

### D14-172/D18-130 SHORT RECTANGULAR TUBES



Short overall lengths (12 and 12.2 inches) / Rectangular 3.9 x 3.15- and 4.7 x 3.9-inch displays (10 x 8- and 12 x 10-cm / Spiral p.d.a. for bright trace / Internal graticules available / For general purpose applications/Shown above with TELFORM shield.

### ALSO AVAILABLE

## Magnetically-deflected tubes for:

Alpha-numeric and graphic displays
Medical waveforms
Airborne displays
Closed circuit TV
Security surveillance
Mobile monitors
PPI display radars
Sector display radars
Self-labeling radars

### MAGNETIC SHIELDS UP TO 30″ DIAMETER FOR CATHODE RAY TUBES & TRANSFORMERS by Telcon Metals Ltd.

Telcon Metals, Ltd., has its own in-plant facilities to handle every phase of the magnetic shield manufacturing process from start to finish. This means 100% Telcon supervision all the way — from the melting and rolling of the raw material to the fabrication and annealing of the magnetic shield. Telcon's total production method is based on a century of experience in the manufacture of alloys. All these factors are your assurance that you get a sensibly priced, high quality product.

### A NEW CONCEPT IN MAGNETIC SHIELD CONSTRUCTION

Specially developed for quantity production of high efficiency complex shields, new TELFORM construction utilizes precision drawn segments to drastically reduce welded seams. The result is extra close fitting shields with improved shielding characteristics. This new technique is applicable for CRT tubes up to approximately 20″ long. No premium charge even though dimensions, finish and appearance are far more uniform throughout batches than conventionally fabricated shields. Rapid delivery after initial tooling. Available in 80%, 50% and 36% nickel-iron alloys.

**Extremely Competitive Prices on Custom Shields.**
**Send for Illustrated Catalog and Ask for a Quotation.**

# THE BROADEST PRODUCT LINE IN THE COUNTRY

alpha

Alpha is the one-stop source for your requirements in communications, control, military, aerospace, installation maintenance and repair • Widest selection of wire, cable and tubing in electronics industry • 3 styles of flat cable for mass termination; 80 styles of matching connectors including new card edge series • Bonded and laminated ribbon cables • New line of over 400 UL listed, CSA certified, OSHA acceptable cables; over 1000 types of instrumentation cables • Revolutionary plastic blade wire stripper • Tubing: shrinkable, non-shrinkable, zipper • Widest selection of sizes, packages, spools and colors to suit your technical and economic needs • Alpha has the necessary MIL, UL, CSA and OSHA approvals to meet your most stringent requirements.

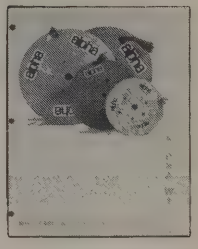
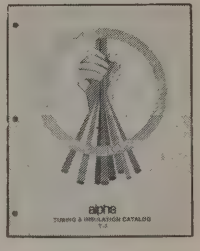
**THESE CATALOGS MAY BE OBTAINED FROM YOUR LOCAL ALPHA DISTRIBUTOR OR DIRECTLY FROM ALPHA.**



## FULL-LINE CATALOG

The electronic industry's broadest line of wire, cable and tubing is detailed in Alpha's full-line catalog. 128 pages, over 2500 different items in more than 13,000 sizes, packages and colors.

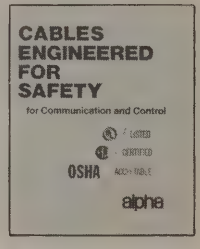
Ask for W-8.



## TUBING CATALOG

Solve all your tubing needs with Alpha. Catalog contains industry's largest selection of tubing — shrinkable, non-shrinkable, zipper, caps, boots, seals, markers, heating devices.

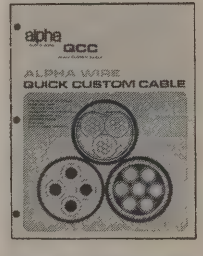
Ask for T-2.



## UL/OSHA/CABLES

The industry's broadest line of UL listed, CSA certified, OSHA acceptable multiconductor and multipair electronic cables.

Ask for UL-1.



## QUICK CUSTOM CABLE

Solve your special prototype and custom cable needs. Alpha can make virtually any type of cable you need, in quantities from one foot to production runs. And expect fast delivery.

Ask for 722.

## FLAT CABLE AND CONNECTORS

Alpha Flat Cable and Connector System includes 3 styles of flat cable — Gray Laminated, Color-Coded, Ground Plane — in 10 to 60 conductor sizes with a full complement of insulation displacement connectors and assembly tools.

Ask for FC-2.

# COMPUTER CABLES

## 80°C MULTICONDUCTOR COMPUTER CABLES UL2343

UL® LISTED
CSA CERTIFIED
OSHA ACCEPTABLE

### UNSHIELDED

**Description:** Each conductor stranded tinned copper, color coded PVC insulation, mylar wrap, nylon rip cord, gray PVC jacket overall with measurement indicator at 1′ intervals.

**Characteristics:** 80°C maximum operating temperature. UL rates maximum only; cable is suitable for use at −40°C. No UL specified operating voltage. CSA rated at 80°C, 300 volts. Passes FR-1 flame test.

### SHIELDED

**Description:** Each conductor stranded tinned copper, color coded PVC insulation, shield 85-90% coverage, mylar wrap, nylon rip cord, PVC jacket overall with measurement indicator at 1′ intervals.

**Characteristics:** 80°C maximum operating temperature. UL rates maximum only; cable is suitable for use at −40°C. No UL specified operating voltage. CSA rated at 80°C, 300 volts. Passes FR-1 flame test.

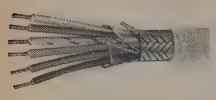
## MULTICONDUCTOR SHIELDED CABLE



Wiring cable suitable for industrial control equipment, business machines and many other uses. Conductor is stranded, annealed, tinned copper; insulation is PVC rated at 80°C (105°C for Type 2501) and 300 volts (600V for Type 2501); tape wrap is 0.001″ clear mylar; nylon rip cord; jacket is gray PVC thickness as listed and marked at one foot intervals.

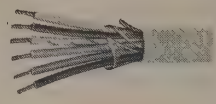
## MULTICONDUCTOR UNSHIELDED CABLE



Appliance wiring cable; suitable for interconnection of business machines, switch gear, intercoms, air conditioners and many other uses. Stranded, annealed, tinned copper conductors. PVC insulation; rated 80°C (105°C for Type 2501); 300V (600V for Type 2501). .001″ thick, clear mylar tape wrap. Gray PVC jacket; thickness as listed. Cable marked at 1′ intervals.

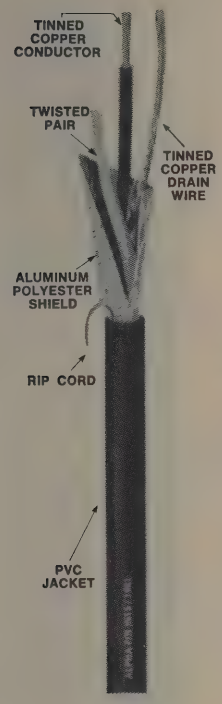
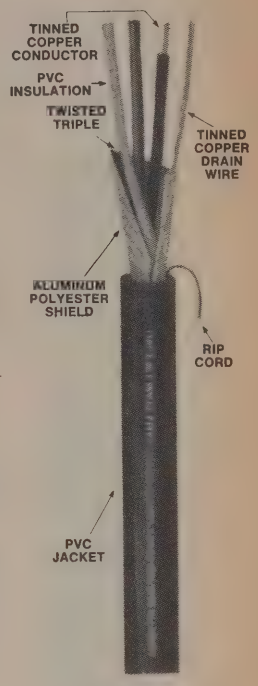
# INSTRUMENTATION CABLES

## SINGLE PAIR AND TRIPLE SHIELDED AND UNSHIELDED



Instrumentation cables act as an important link between sensing devices and read-out equipment or as external interconnection of process control stations. Alpha instrumentation cables utilize stranded tinned copper conductors and extruded black PVC jackets. All pairs are color coded black and white; triples are black, white and red.

Aluminum-polyester tape shield and drain wire provides 100% coverage. This page details a wide variety of AWG sizes, insulation materials, and temperature and voltage ratings. The particular advantages of each type are as follows.



**90°C 300 Volt PVC** — An economical, general purpose, flame retardant construction with good chemical and abrasion resistance. These cables pass the FR-1 vertical flame test, are UL listed under Subject 13, and comply with NEC Article 725.

**80°C 300 Volt PE** — Polyethylene insulation offers superior electrical characteristics minimizing at the same time cable diameter and capacitance. These cables are listed under UL Style 2667 approved for general electronic use in non-hazardous locations.

**90°C 600 Volt PVC/Nylon** — This construction offers a minimum diameter cable with 600 volt rating. Nylon jacketing of each conductor provides increased chemical and abrasion resistance as well as added electrical strength. Listed as tray cable under UL Subject 1277 and NEC Article 340.

**80°C 600 Volt PE** — Same excellent electrical characteristics as 300 volt construction but with increased capability for heavy duty control applications.

# UNSHIELDED INTERCOM CABLES

## UNSHIELDED INTERCOM CABLE

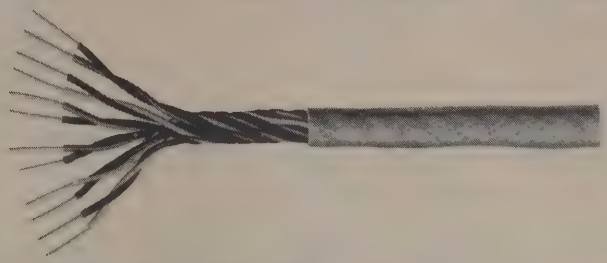
### Paired Conductors — Plastic Jacket

**Passes FR-1 Vertical Flame Test**

**DESCRIPTION:** Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted into pairs, gray polyvinylchloride jacket overall.

**APPLICATIONS:** Balanced Intercom Systems, Annunciators, Telephones, Nurses Call Systems, Control Circuit Cable, Electronic Computer Cable, Multiple Speaker Cable, Signal Systems, Alarm Systems.

**CHARACTERISTICS:** Suggested Operating Temperature: −20°C to +80°C.



**22 GAUGE** — SOLID CONDUCTORS — UL 2576, 80°C, 150 VOLTS

## UNSHIELDED AUDIO CABLE

### Multi-Conductor — Plastic Jacket

### UL 2509, 80°C, 300 Volts

**Passes FR-1 Vertical Flame Test —**

**DESCRIPTION:** Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted, gray polyvinylchloride jacket overall.

**APPLICATIONS:** Intercoms, Interconnecting Cables, Remote Control Circuits, Telephones, Telemetering Connecting Cable, "Baby Sitter" Intercom.

**CHARACTERISTICS:** Suggested Operating Temperature: −20°C to +80°C.

# FOIL SHIELDED CABLES

## FOIL SHIELDED JACKETED CABLE

### UL STYLE 2092, 2093 & 2094*

**MYLAR SUPPORTED ALUMINUM FOIL SHIELD**

**DESCRIPTION:** Each conductor stranded tinned copper, color coded polyethylene insulation, conductors cabled, wrapped mylar supported aluminum foil shield, 100% coverage with drain wire laid parallel, aluminum foil facing outward to provide maximum ground, gray PVC jacket overall.

**CHARACTERISTICS:** Operating Temperature: −20°C to +60°C. Operating Voltage: 300 volts. Lightweight, reduces cable diameter, and provides 100% shield coverage.

## MINIATURE FOIL SHIELDED CABLE

### TWO 22 GAUGE CONDUCTORS

**DESCRIPTION:** Each conductor tinned solid or stranded copper, color coded polypropolene insulation, aluminum/Mylar foil shield, drain wire, gray vinyl jacket overall.

**APPLICATIONS:** Designed for space-saving in miniature and subminiature instrumentation and audio applications.

**200 VOLTS, −55°C, +105°C**

## FOIL SHIELDED AUDIO AND DATA CABLE UL 2493 60°C

**INDIVIDUALLY SHIELDED MULTIPLE PAIRS — PLASTIC JACKET**

**DESCRIPTION:** Each conductor, tinned copper, color coded, high density polyethylene conductors twisted into pairs, tinned copper drain wire. Mylar supported aluminum foil shield, aluminum facing inward. Chrome gray PVC jacket overall.

**CHARACTERISTICS:** Mutual capacitance between conductors of a pair, 25 pf/ft. Capacitance of a single conductor to shield, 45 pf/ft.

**APPLICATIONS:** For audio, R.F. and pulse applications requiring superior circuit isolation.

# SPIRAL—BRAIDED SHIELDED CABLES

alpha

## UL 1108 (Single Conductor)
## SPIRAL SHIELDED PLASTIC JACKETED CABLE

**Passes FR-1 Vertical Flame Test**

**DESCRIPTION:** Each conductor stranded or solid tinned copper, color coded polyvinylchloride insulation, conductors twisted, spiral wrapped copper shield, gray polyvinylchloride jacket. Nominal Jacket Thickness: .020.

**CHARACTERISTICS:** Use of spiral pigtailing off extremely simple and fast. Excellent for production line work. Provides 95% shielded coverage for audio and RF frequencies. Suggested Operating Temperature: −20°C to +80°C.

## UL 2095 (Multi-Conductor), 80°C, 300 Volts
## BRAIDED SHIELDED JACKETED CABLE

**Passes FR-1 Vertical Flame Test**

**DESCRIPTION:** Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted, braided copper shield, gray polyvinylchloride jacket overall.

**CHARACTERISTICS:** A conventional type of braided shield providing approximately 75% coverage is particularly desirable where flexibility is required. The copper shield allows ease of pigtail soldering. Shield construction provides additional cable strength. Operating Temperature: −20°C to +80°C. Nominal Jacket Thickness: .020.

# RIBBON CABLES

## BONDED RIBBON CABLE

**DESCRIPTION:** 22, 24, 26, 28 and 30 AWG stranded tinned copper conductors insulated with either .010″ or .016″ of PVC, insulated conductors are bonded into a flat configuration to form a ribbon cable. This configuration allows easy termination, ease of location and simplifies routing, while saving space over typical round cable.

- 22 AWG 19/34; 22 AWG 7/30; 24 AWG 19/36; 26 AWG 7/34; 28 AWG 7/36; and 30 AWG 7/38 stranded tinned copper conductors.
- 22 AWG 7/30 insulated with .016″ of PVC.
- 22 AWG 19/34; 24 AWG 19/36; 26 AWG 7/34; 28 AWG 7/36; and 30 AWG 7/38 insulated with .010″ of PVC.
- 10, 15, 20 and 30 conductor size.

**CHARACTERISTICS:**

- Temperature Rating: −55°C to 105°C
- Voltage Rating: .010 (MIL-W-16878 Type B) 600V
  .016 (MIL-W-16878 Type C) 1000V
- Passes FR-1 Vertical Flame Test
- Color Code: Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, Black (repeat)

## TWISTED PAIR LAMINATED RIBBON CABLE

**DESCRIPTION:** 26 AWG stranded tinned copper conductors insulated with .010″ of PVC, twisted into pairs and intermittently laminated between layers of .005″ clear PVC film. The intermittent laminations allow easy access to the pairs while maintaining the shape and integrity of the cable.

- 26 AWG (7/34) stranded tinned copper conductor
- Conductors insulated with 0.010″ (.13mm) PVC rated FR-1
- Conductors twisted into pairs
- Pairs are laminated between two .005″ strips of clear PVC film
- Laminating interval .750″ (19mm) nominal
- Conductors pairs are .100″ apart (2.54mm)

**CHARACTERISTICS:**

- Temperature Rating: 80°C
- Voltage Rating: 300 Volts
- Capacitance: 21 pf/ft (69 pf/m)
- Propagation Delay: 1.7 ns/ft (5.6 ns/m)
- Impedance: 95 ohms nominal
- Cross Talk: 10 ft. (30.48cm) with two adjacent lines driven and a 1.3 ns rise time, 12% near end, 13% far end
- Color Code: Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White, Black (repeat). First conductor, common conductor is tan.

**APPLICATIONS:** Used in situations where reduced cross-talk is necessary, such as high speed data transmission in computers and communications equipment, but where easy mass termination is not necessary.

# FCC* FLAT CABLES

alpha

## FCC* COLOR-CODED FLAT CABLE

*Flat Cable and Connectors

Termination flexibility is the unique property of Alpha's FCC Color-Coded Flat Cable. Precise conductor spacing allows you to terminate this cable to any major brand of insulation displacement connectors on .050 in. (1.27mm) centers, including Alpha's. Color-coded insulation and excellent teardown characteristics permit you to terminate it like conventional hookup wire. Or take the best of both worlds and use both techniques on the same cable. Alpha FCC Color-Coded Flat Cable lets you expand your design capabilities.

**DESCRIPTION:** Alpha Color-Coded Laminated Ribbon Cable consists of PVC insulated round conductors on .050 in. (1.27mm) centers laminated between two sheets of clear PVC film. The lamination process results in controlled electrical characteristics with the advantage of color-coding, ease of separation and mass termination. Cable can be terminated with any major brand of IDC (insulation displacement connectors) on .050 in. (1.27mm) centers.

- 28 AWG (7/36) stranded tinned copper conductor
- .010 in. (.25mm) nom. wall PVC
- Conductors laminated to a sheet of .005 in. (0.13mm) nom. clear PVC film
- Color Code: Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White, Black. Color code repeats beyond 10 conductors.
- UL listed
- Passes FR-1 Vertical Flame Test

**CHARACTERISTICS:**

- Temperature Rating: 80°C
- Voltage Rating: 300 volts
- Capacitance: 14 pf/ft. nom.
- Propagation Delay: 1.4 ns/ft.
- Impedance: 103 ohms nom.
- Cross Talk: Nom. between two adjacent signal lines @ 5 ns rise time over 10 ft. (3.05m) length; near end 5.2%, far end 7.3%
- Environmental: Resists acids, alkalis, oils, moisture, solvents, ozone and fungus

**APPLICATIONS:** Ideal for applications in digital data and signal transmission system where termination speed and termination flexibility are required.

**SPECIAL CONSTRUCTIONS:**

- Other color combinations available

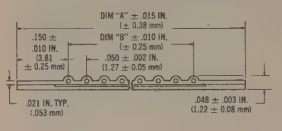
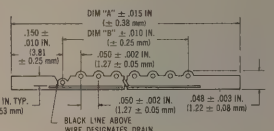
## GROUND PLANE GRAY LAMINATED FLAT CABLE

Alpha Ground Plane Flat Cable is applicable for computer and communications utilizing high speed logic signals. This construction results in reduced crosstalk, thereby assuring transmission integrity.

**ALPHA 3583 AND 3584 SERIES**



**ALPHA 3585 SERIES**



**DESCRIPTION:** Grounded gray laminated flat cable consists of laminated gray flat cable with a copper mesh shield laminated to the bottom. This cable has all the characteristics of gray laminated flat cable plus reduced cross-talk and better high speed data transmission.

- 28 AWG (7/36) stranded or 30 AWG solid tinned copper conductor
- Conductor laminated between layers of PVC film
- 0.005" (0.13mm) expanded copper mesh laminated to the cable with PVC sheet
- Choice of either with drain wire or without
- Gray PVC with black edge (drain wire) or red edge (no drain wire)
- UL listed

**CHARACTERISTICS:**

- Temperature rating: 105°C
- Voltage rating: 300 volts
- Capacitance: 25.3 pf/ft (83.0 pf/m) for 28 AWG (7/36); 25.7 pf/ft (84.3 pf/m) for 30 AWG solid
- Propagation delay: 1.65 ns/ft (5.6 ns/m)
- Impedance: 65 ohms nominal for 28 AWG (7/36); 93 ohms for 30 AWG solid
- Environmental: resists acids, alkalis, oil, moisture, solvents, ozone, and fungus

**APPLICATIONS:**
Used in situations where reduced cross-talk is necessary such as high speed data transmission in computers and communications equipment.

**SPECIAL CONSTRUCTION:**
Other conductor configurations available upon request.

100 foot (30.48m) spools with exclusive footage remaining window.

## FCC* GRAY LAMINATED FLAT CABLE

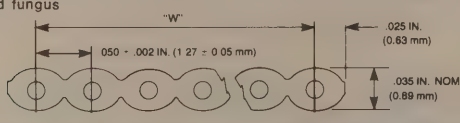
*Flat Cable and Connectors

**DESCRIPTION:** Laminated Gray Flat Cable consisting of stranded conductors laminated between layers of gray PVC film to form a flat ribbon. The laminate is formed precisely around the conductors so that wires, each surrounded by insulation film, may be easily and quickly separated or terminated with any major brand of IDC (insulation displacement connectors) on .050 in. (1.27mm) centers.

- 28 AWG (7/36) stranded tinned copper conductor
- Conductors laminated between layers of PVC film
- Gray PVC with Red stripe on leading edge
- UL listed
- Passes FR-1 Vertical Flame Test

**CHARACTERISTICS:**

- Temperature Rating: 105°C
- Voltage Rating: 300 volts
- Capacitance: 14 pf/ft. nom.
- Propagation Delay: 1.4 ns/ft.
- Impedance: 105 ohms nom.
- Cross Talk: Nom. between two adjacent signal lines @ 5 ns rise time over 10 ft. (3.05mm) length; near end 5.2%, far end 6.5%
- Environmental: Resists acids, alkalis, oil, moisture, solvents, ozone and fungus



**APPLICATIONS:** A general purpose flat cable designed for use in electronic products such as computers and business machines where speed of termination and economy is required.

**SPECIAL CONSTRUCTIONS:**

- 30 AWG solid tinned copper available

Here's the cable that started the whole system of flat cable design for mass termination. Alpha's Gray Laminated Flat Cable is designed for general purpose interconnections. It combines low-cost with consistently reliable performance. It features excellent tear-down characteristics with high flexibility for applications requiring intricate cable routing. Mirror image profile permits reverse plane termination ability on same cable length. Alpha's Gray Laminated Flat Cable fits your all-around design requirements.

**ALPHA FCC GRAY LAMINATED FLAT CABLE**

| Alpha No. | No. of Conductors | Nom. Width "W" (Inch) | Approx. Wt./Roll (Lbs.) |

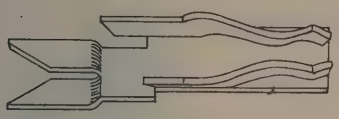
# alpha FLAT CABLE CONNECTORS



**OFF-SET TINES**
Patented off-set tines place forces on the conductor in opposite directions in two different planes, keeping the conductor under constant tension, ensuring a gas-tight connection.

**DUAL CANTILEVERED CONTACTS**
The Female Socket Connectors feature dual cantilevered contacts insuring good electrical contact when inserted into a header. The design provides two surfaces for wiping action which will remove any oxides or dirt that may have built up on the contacts.

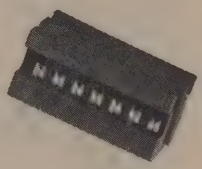
**FAST** Alpha Connectors simultaneously terminate up to 50 conductors in seconds.

**LOW COST** Simultaneous termination reduces labor cost and error by eliminating the need for individual crimping and stripping conductors.

**RELIABLE** Alpha's patented off-set tine design pieces, separates, strips the insulation from the conductor and holds it under tension, assuring a gas-tight connection. Each tine is micro-etched to remove any burrs or rough edges which could sever strands of the conductors.

**UNIQUE PACKAGING** Alpha DIP, PCB and Female Socket Connectors are packaged in specially designed clear plastic tubes to protect them in transit and storage. Your connector inventory is easy to check and always in perfect condition. Four connectors are packed in each tube. Header connectors and Card Edge connectors are individually protected in extra-thick airtight clear polyethylene. All connector tubes and bags are then packed in shipping containers for added protection.

## DIP CONNECTORS



DIP (Dual-In Line-Package) Connectors are compatible with standard IC component spacing and will mate with standard 14 and 16 pin IC sockets. A low cost hand tool or bench press can be used for assembly. DIP Connectors will accept 28-30 AWG stranded or solid conductors.

**SPECIFICATIONS:**

Contacts: Phosphor Bronze
Plating: 10μ in. Gold over 50μ in. Nickel
Material: UL 94 V-O flame retardant thermoplastic
Color: Blue
Temperature: −55°C to +105°C
Current Rating: 1 Amp (maximum)
Dielectric Withstand Voltage: Greater than 500 Volts DC at sea level
Insulation Resistance: 5 x $10^6$ Ohms

| No. of Pins | Part No. |
|---|---|
| 14 | FCC-130-14 |
| 16 | FCC-130-16 |
| 24 | FCC-130-24 |

Put-Up: 20 connectors per box, packed in 5 four-pack protective tubes. Also available in bulk pack.

## PCB CONNECTORS

The PCB (Printed Circuit Board) Connector is designed to make a permanent connection. It is used where the application calls for the cable to be directly terminated to the Printed Circuit Board. After the cable is crimped onto the connector, the connector is soldered to the PC Board. A detailed hole pattern is shown on the following page. The PCB Connectors will accept 28-30 AWG stranded or solid conductors.

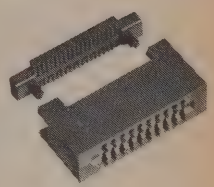
**SPECIFICATIONS:**

Contacts: 725 Nickel Silver alloy
Material: UL 94 V-O flame retardant plastic
Color: Blue
Temperature: −55°C to +105°C
Current Rating: 1 Amp (maximum)
Dielectric Withstand Voltage: Greater than 500 Volts DC at sea level
Insulation Resistance: 5 x $10^6$ Ohms

| No. of Pins | Part No. |
|---|---|
| 10 | FCC-140-10 |
| 20 | FCC-140-20 |
| 26 | FCC-140-26 |
| 34 | FCC-140-34 |
| 40 | FCC-140-40 |
| 50 | FCC-140-50 |

Put-Up: 20 conductors per box, packed in 5 four-pack protective tubes.
Also available in bulk pack.

## CARD EDGE CONNECTORS



Alpha card edge connectors are mateable with stranded .062″ (1.57mm) printed circuit boards and will mate with boards ranging in thickness from .032″ (.81mm) to .075″ (1.91mm). The connectors will accept 28 or 30 AWG solid or stranded conductors on .050″ (1.27mm) centers providing a direct, reliable access to PCB pads on .100″ (2.54mm) centers. Alpha card edge connectors are available with and without mounting flanges.

**SPECIFICATIONS:**

Contacts: Phosphor Bronze
Plating: 20μ in. Gold over 50μ in. Nickel
Material: UL 94 V-O flame retardant thermoplastic
Color: Blue
Temperature: −55°C to +105°C
Current Rating: 1 Amp (maximum)
Dielectric Withstand Voltage: Greater than 500 Volts DC at sea level
Insulation Resistance: 5 x $10^6$ Ohms

| No. of Contacts | Part No. Without Mounting Flanges | Part No. With Mounting Flanges |

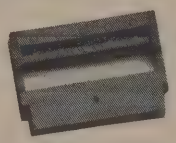
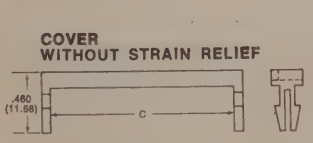
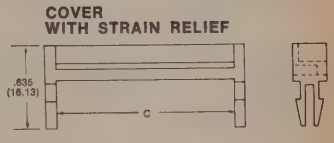
## FEMALE SOCKET CONNECTORS

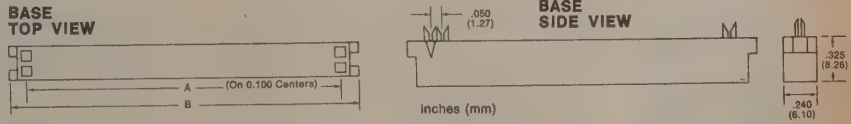
**FEATURES:**

- 10, 20, 26, 34, 50 pin versions
- Mates with all standard headers and 0.025″ wire wrap posts
- Available with or without integral strain relief
- Recessed cover design allows cable to remain within connector profile
- Self-locking removable cover
- Patented off-set tine design insures reliable gas tight termination
- Gold plated phosphor bronze contacts
- Terminations can be inspected before cover is put on









**SPECIFICATIONS:**

Contacts: Phosphor Bronze
Plating: 20μ in. Gold over 50μ in. Nickel
Insertion Force: 0.50 lbs. (.23kg) per contact
Withdrawal Force: 0.50 lbs. (.23kg) per contact
Material: UL 94 V-O flame retardant thermoplastic
Color: Blue
Temperature: −55°C to +105°C
Current Rating: 1 Amp (maximum)
Dielectric Withstand Voltage: Greater than 500 Volts DC at sea level
Insulation Resistance: 5 x $10^6$ Ohms

Put-Up: 10 per box, individually packaged. Also available in bulk pack.

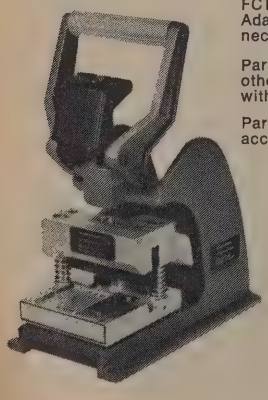
## ASSEMBLY TOOLS

Alpha has designed the easiest to use assembly system available. One universal adaptor accepts **all** connectors without additional components or adjustments. Any Alpha connector of any size can be inserted and crimped in seconds. The Alpha flat cable system offers you this feature. It will save valuable time, particularly in the operations where a variety of short run or complex harnesses are used.

A low cost hand tool designed to accept DIP Connectors is also available. Ideal for field replacement.



FCT-10 Bench Press complete with Universal Adapter, designed to accept all Alpha Connectors.

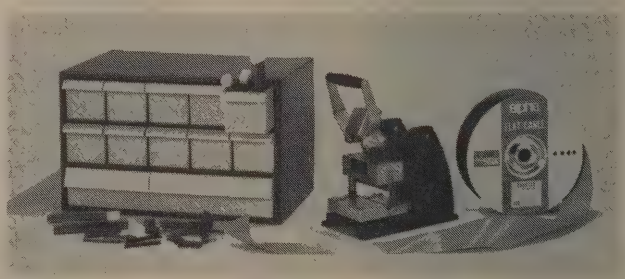
Part No. FCT-60 Universal Adapter adapts other bench presses to the Alpha System without modification.

Part No. FCT-61DIP Adaptor required to accept 24 Pin DIP Connectors.

Part No. FCT-30 designed to accept Alpha 14 and 16 pin DIP Connectors.

## DESIGNER KIT

The designer kits make it easy to have available all the components needed to make a wide range of flat cable assemblies. It is ideal for use in schools, research labs and design groups for prototype applications.



The Alpha System Designer Kit, FCT-80, includes cables, over 140 connectors, and termination tooling. You get a representative sample of all connector types, 100 feet of 50 conductor flat cable, and a bench press with Alpha's exclusive universal adapter. The Designer Kit is packaged in its own storage cabinet, made with a gray baked enamel finish and heavy-duty welded steel frame. The molded styrene drawers are virtually unbreakable and will not crack, break or dent.

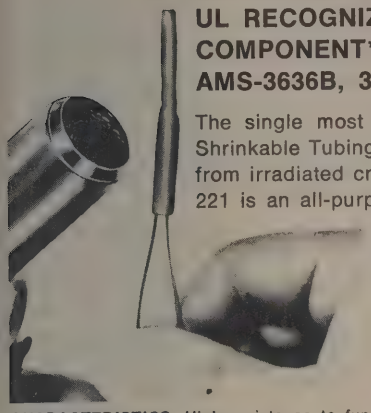
# SHRINKABLE TUBING

## IRRADIATED POLYOLEFIN SHRINKABLE TUBING



### MIL-I-23053C/5A
### UL RECOGNIZED COMPONENT*
### AMS-3636B, 3637B

The single most widely used type of FIT Shrinkable Tubing, FIT-221 is manufactured from irradiated cross-linked polyolefin. FIT-221 is an all-purpose tubing with excellent physical, chemical and electrical properties. It meets the most stringent military and industrial requirements for a highly reliable, thin wall insulation.

**CHARACTERISTICS:** High resistance to fungus and chemicals. Self-extinguishing. Will not crack or peel.

**APPLICATIONS:** General purpose insulation, strain relief, jacketing material and as component insulation. Material is easily and permanently marked.

**SPECIFICATIONS:** Operating Temperature: −55°C to +135°C. Shrinkage Temperature: 135°C. Tensile Strength: 2500 psi. Ultimate Elongation: 400%. Longitudinal Shrinkage: 5% maximum. Dielectric Strength: 1300 volts/mil. Non-flammable — self-extinguishing. Specific Gravity: 1.3 maximum.

## IRRADIATED VINYL SHRINKABLE TUBING

### MINIMAL LONGITUDINAL SHRINKAGE
### MIL-I-23053C/2C, AMS-3582

A specially formulated polyvinylchloride tubing, that is mechanically strong, extremely flexible and significantly different from non-irradiated heat shrinkable tubing. Unlike non-irradiated PVC tubing, FIT-105 shrinks evenly and will not split when shrunk. Non-irradiated tubing has a much greater waste factor, with longitudinal shrinkage approximately 20%. FIT-105 will shrink less than 10% of its original length.

**CHARACTERISTICS:** Extremely flexible. Will not cold flow or melt. Easily marked.

**SHRINKAGE RATIO:** To 50% of original size (2:1) when temperature of 175°C (347°F) is applied.

Controlled shrinkage within seven seconds at 166°C (325°F).

**LONGITUDINAL SHRINKAGE:** Less than 10%.

**APPLICATIONS:** Jacketing of cable harnesses, insulation and covering of components, bus bar insulation, tab disconnects, jacketing of cable cores with many of the qualities of the finest extruded plastic jackets.

**SPECIFICATIONS:** Temperature Operating Range: −35°C to +105°C. Minimum Shrink Temperature: 175°C. Tensile Strength: 2600 PSI. Elongation: 250%. Dielectric Strength: 750 volts/mil. Flame Resistance: Non-burning. Fungus Resistant; Fluid Resistant To: Hydrocarbons, solvents, aqueous solutions, acids, bases.

alpha

## PVC-105 POLYVINYLCHLORIDE PLASTIC TUBING

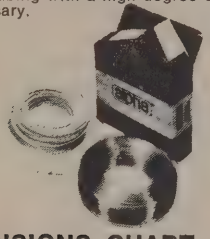
### UL LISTED, ASTMD-876, D-9222 MIL-I-631D TYPE F, FORM U, GRADE C, CLASS 1, CATEGORY 1

**DESCRIPTION:** The superior mechanical, thermal, and electrical properties of Alpha PVC-105, coupled with its economical cost have led to an ever increasing use of this all-purpose insulating material. Another major advantage of Alpha PVC-105 is its high degree of flexibility, which is maintained even under severe environmental conditions.

Rated for temperatures as high as 105°C, PVC-105 has a high dielectric strength that remains unaffected by increasing temperature throughout its range. PVC-105 maintains a high resistance to the agents of heat, oil, chemical corrosion and fungi with no loss in tensile strength, or flexibility. Other features include an exceptional resistance to abrasion and indefinite shelf life.

Alpha PVC-105 is compounded with first quality, non-migratory resinous type plasticizers. Carefully selected stabilizers and modifiers added in the manufacturing process, counteract chemical and environmental degradation. Under adverse conditions Alpha PVC-105 retains its flexibility which permits it to cling to and protect irregular shapes. An unusually simple to handle insulating material, PVC-105 "snakes" well under all environmental conditions.

**APPLICATIONS:** Designed and manufactured for general electronic, aircraft and electrical applications involving temperatures as high as 105°C. Especially useful to protect wires and cables subject to abrasion or where a flexible tubing with a high degree of resistivity to oil, chemicals or solvents is necessary.



### CUT-PIECES

Pre-cut, ready to use tubing pieces in ½″ and 1″ lengths are available from stock. Cut pieces are available from stock in packages of 100, 500, 1000 pieces. When ordering specify Alpha No., add suffix CP, lgth. of cut piece, ½″ or 1″ and quantity (100, 500, 1000).

## TFT 200-250 EXTRUDED TEFLON TUBING (TFE)

### MIL-I-22129C, AMS-3651B, 3655, 3653 — FED. SPEC. P-403A OPERATING TEMPERATURE: −65°C TO +260°C

Alpha Teflon Tubing offers all the unique thermal, electrical and mechanical properties of Teflon. Teflon Tubing is rated for continuous operation at 260°C and retains an exceptional toughness and flexibility throughout its range. At high frequencies, the dielectric strength of Teflon is many times that of other insulating materials. Teflon Tubing is completely inert and has zero moisture absorbtion. Standard wall Teflon (TFT-250) has the same characteristics as thin wall tubing (TFT-200) but is used where higher dielectric values and additional mechanical strength is required.

**CHARACTERISTICS:** Operating Temperature: −65°C to +260°C. High dielectric strength. Chemically inert. Zero moisture absorbtion.

**APPLICATIONS:** Insulation of components, connectors, all electrical and electronic apparatus requiring high thermal insulation and superior dielectric qualities.

**SPECIFICATIONS:** Tensile Strength: 5000-75000 PSI. Completely non-flammable. Min. Vol. Res.: $10^{17}$ Ohm-cm. Ultimate Elongation: 300-500%. Dielectric Strength: 1400V/Mil. Dielectric Constant: 2.2. Abrasion Resistance: Fair.

# ZIPPER TUBING

## MAKE A CABLE JACKET IN JUST SECONDS

Standard

Loc-Trac

With Alpha Zipper Tubing, you can protect or jacket any group of wires or cables in only seconds. Zipper tubing is supplied on spools in a flat ribbon configuration. Both edges of the zipper tubing have a special plastic track. The zipper tubing is cut to the size required, folded around the wires or cable to be jacketed so that the two tracks face each other. A special slider (zipper) is affixed at one end of the track and as it is pulled, it draws the two tracks together and locks them in much the same way an ordinary zipper operates. The result is a permanent jacket, or protective cover.

Zipper tubing is available in two types of tracks. Standard track allows the material to be easily opened at any point to make breakouts, or bring other cable lines into the cable line being jacketed.

Now, Alpha has dveloped a new type of track, Loc-Trac®, that provides a permanent, flex-resistant track. This track will not pop open even when the jacketed material is bent in a U-shape. It requires no sealant or any adhesive to hold together.

Passes FR-1 flame test

- UL Listed • Easy to Use
- Ideal for prototypes — short run cables
- Adds extra mechanical protection
- Eliminates tape-wrapping, or other 'make-do' jacketing material
- Available in wide selection of types and tracks

**SPECIFICATIONS FOR ALL TYPES OF ALPHA ZIPPER TUBING:**

| | |
|---|---|
| Material | Polyvinylchloride |
| Track Thickness (when closed) | Std. .092" Loc. Trac® .150 |
| Dielectric Strength V/mil | 759 |
| Tensile Strength P.S.I. | 3810 |
| Ultimate Elongation | 255% |
| Operating Temperature Upper Limit | 106°C |
| Cold Brittleness | −86°C |
| Fungus-proof | will not support fungus |
| Flammability | self-extinguishing |
| Lateral Pull Strength (unsealed) | 42.7 pounds/inch |
| Lateral Pull Strength (permanently sealed) | 59.8 pounds/inch |

**ACCESSORIES:**

**PB-200** Special Compound Liquid Sealer. Available in sizes: 1 oz., 2 oz., 4 oz., 1 pt., 1 qt., 1 gal. Each container is supplied with a brush for easy application of the sealer. 4 oz. of PB-200 will seal approximately 1000 ft.

**AB-295** — Standard Track. **AB-395** — Loc-Trac® Metal Sliders. 1 supplied free with every 25 feet. Additional sliders may be ordered separately.

**ZIP-CLIP** — Package of 10 additional Shield Termination Assemblies — 2 supplied with each spool of Zip 50 and Zip 60.

**STANDARD PUT-UP:** 100 FT.

**ALPHA WIRE Corporation** Elizabeth, N.J. 07207 Telephone (201) 925-8000

BELDEN | multi-conductor unshielded cable

**Applications:**
- Control systems
- Processing equipment
- Audio (not paired)

# Multi-conductor Unshielded Cable

## VINYL CONTROL & AUDIO CABLE

### 22 GAGE
### SOLID CONDUCTORS .64 mm diam.

**PRODUCT DESCRIPTION:** *Bare copper, polyethylene insulated. Conductors cabled, rose gray vinyl jacket.*

**PRODUCT DESCRIPTION:**

*Solid copper, GEOSOL™ insulated (solderable–no stripping required), twisted pair, BELDFOIL aluminum-polyester shield, 30 AWG solid tinned copper covered steel drain wire, white vinyl jacket. Maximum operating temperature 105°C. Ideal for Instrumentation and Audio Console Work where Subminiaturization is Required. The BELDFOIL shield combines high cable reliability with ease of termination. Color code: Black, Red.* ***Suggested working voltage: 100***

**PRODUCT DESCRIPTION:**

*Tinned copper, polypropylene insulated, twisted pair, noise reducing tape, 24 AWG stranded tinned copper drain wire, BELDFOIL aluminum-polyester shield, black vinyl jacket. Balanced pair instrumentation cable featuring short lay cabling to minimize pick-up of electromagnetic interference and special conductive textile tape to minimize microphonic noise. Color code: Black, Red.* ***Suggested working voltage: 200***

**PRODUCT DESCRIPTION:**

*Tinned copper, polyethylene insulated, twisted pair, BELDFOIL aluminum-polyester shield, stranded tinned copper drain wire, chrome vinyl jacket. The BELDFOIL shield combines high cable reliability with ease of termination. Color code: Black, Clear.* ***Suggested working voltage: 350***

**PRODUCT DESCRIPTION:**

*Tinned copper, vinyl insulated, twisted pairs, overall BELDFOIL aluminum-polyester shield, stranded tinned copper drain wire, chrome vinyl jacket. For color coding, please refer to page 6.*

**PRODUCT DESCRIPTION:**

*Tinned copper, vinyl insulated, twisted pairs, overall BELDFOIL aluminum-polyester shield, stranded tinned copper drain wire, chrome vinyl jacket. For color coding, please refer to page 6.*

- Process control systems

# Individually Shielded Pair Cables

## SHIELDED AUDIO AND CONTROL CABLES

### 22 GAGE
### SOLID CONDUCTORS .64 mm diam.

**PRODUCT DESCRIPTION:** *22 AWG tinned copper, vinyl insulated, twisted pairs, each pair and its drain wire under BELDFOIL aluminum-polyester shield, overall chrome vinyl jacket. Color code chart on page 00. Insulation resistance between shields. 100 megohms/M nom. Capacitance between adjacent shields. 1500 pF/ft. nom. Voltage breakdown between adjacent shields. 115 volts nom. Working voltage between adjacent shields. 50 volts max. Vinyl insulation is used for ease of stripping and soldering. Recommended for audio frequency applications requiring excellent circuit isolation.* ***Suggested working voltage: 300*** *Color code: page 6.*

SUBJECT 13 fire alarm and trav cables BELDEN

# Fire Alarm & Tray Cables

## POWER LIMITED 105°C-300°C
## FIRE PROTECTIVE SIGNALING CIRCUIT CABLE

Power limited fire protective signaling circuit cable for use in accordance with NEC article 760 power limited circuits and also suitable for use as a power limited circuit cable for use in accordance with NEC article 725 class 2 or 3 circuits, but these cables are marked as suitable for appropriate tray cable installations. All cables in this section pass the UL 70,000 BTU flame and tray cable test which is comparable to IEEE 383 flame test. All cables in this section are listed by the California State Fire Marshall listing service.

# Power-Limited Circuit Cable
## UL SUBJECT 13

Power Limited Circuit Cable Tri-rated UL Subject 13, and Appliance Wiring Material Style 2464.
Certified to CSA standards as Appliance Wiring Material TR-64.

105°, 300V meets Article 725 of the NEC. Also marked as Tray Cable suitable for class 2 & 3 circuits.
Passes the UL 70,000 BTU Flame and Tray Cable test which is comparable to the IEEE 383 Flame Test.

## TWO CONDUCTOR UNSHIELDED CABLES

BELDEN | tray cables

# Tray Cable

## SUBJECT 1277

Tray Cable 90°C, 600V UL Listed as Tray Cable under Subject 1277 for use as Tray Cable in accordance with NEC Article 340.

Passes the UL 70,000 BTU Flame Test which is comparable to the IEEE 383 Flame Test. Also suitable for outdoor use.

## TWO CONDUCTOR UNSHIELDED

**PRODUCT DESCRIPTION:** *Stranded, tinned copper, PVC insulation nylon overcoat, conductors cabled, black PVC jacket.*
***Conductor pairs are color coded black and red. Multipairs are numbered at one inch intervals.***

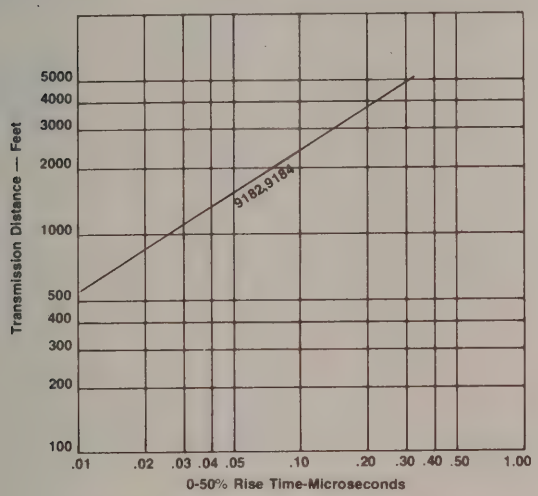
# Datalene™ Cables

## INDIVIDUALLY SHIELDED PAIRS

### RISE TIME

Cables are terminated in their characteristic impedance. Balanced signal source electrical characteristics: 50 ohms and 10% to 90% rise time less than 5 seconds.



### BIT RATE

Charts assume 5% peak to peak jitter as determined by eye pattern measurements.

# GPIB Cables

**General Purpose Interface Bus Cable**

**IEEE 488**

Belden GPIB cables provide a fast, simple way to interface computer power with test and measurement hardware — without resorting to time-consuming patchwork wiring. Belden IEEE 488 UL recognized GPIB cables are fast becoming essential tools in research and development, quality control and on-the-job troubleshooting.

Belden GPIB cables can be used to interconnect up to 15 programmable instruments at one time in star or daisy chain networks. They're especially recommended for applications involving counters, signal generators, calculators, digital multimeters — in fact, any instrument equipped with standard IEEE 488 interfaces. Complete UL approved molded cable assemblies are available in five standard lengths, the longest of which is 16 m (52.5′). Bulk put-ups are also available.

### Physical Specifications

24 conductor cable (including all functions)

6 pair (26 AWG)
10 single conductor (26 AWG) 1 single conductor (26 AWG)
Braid shield with 24 AWG drain wire (91% coverage)

Semi-rigid PVC insulation and PVC jacket (gray) O.D.: 8.9 mm (.350″)

24-pin AMP connectors—male and female—at ends (U.L. recognized)

Contact pins: Gold over nickel-plated beryllium copper
Connectors: Self-extinguishing plastic

Mounting screws: Metric cadmium-plated finish

### Electrical/Electronic Specifications

| | | |
|---|---|---|
| Capacitance— | 10 single conductor: | 35 pF/ft nom. |
| | 6 pair: | 38 pF/ft nom. |
| Impedance— | 10 single conductor: | 70 ohms nom. |
| | 6 pair: | 75 ohms nom. |

Pin-to-pin voltage rating: 300 vdc/conductor

Maximum effective cable length: 20 m (66′)

### Conductor Functions

| | |
|---|---|
| General interface management | 8 conductors (3 pairs, 2 single): 5 lines 3 grounds |
| Date byte transfer control | 6 conductors (3 pair): 3 lines 3 grounds |
| Data input/output | 8 conductors (all single): 8 lines |
| Logic ground | 1 conductor (24 AWG) |
| Earth ground | 1 conductor (drain wire) |
| Total | 24 |

★ New Item

BELDEN | microphone cables

# Microphone Cables

Belden microphone cables are designed for flexibility, service and reliable signal transmission at audio frequencies. They are not only used for microphones, but also for home entertainment equipment, musical instruments, tape recorders and shielded power supplies.

Shielded single conductor cables are used in high impedance systems, while multiple conductor cables are generally used in low impedance applications.

All cables are precision engineered to transmit clear signals while cancelling out hum and cross-talk interference. They're especially designed to withstand the flexing and normal abuse of studio, laboratory and home usage.

*PLASTIC CABLES RECOMMENDED FOR: Lower capacitance, lower loss, greater ozone and oil resistance, lighter weight, smaller diameter.*
*RUBBER CABLES RECOMMENDED FOR: Greater abrasion and impact resistance and extra limpness so cable will lie flat on stage or studio floor.*
*NEOPRENE AND HYPALON CABLES RECOMMENDED FOR: Outside use, cold weather applications. Resistant to effects of sun, oil and ozone.*

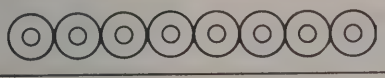
•*See 8421 page 52 for spiral wrapped shield version of 8401–Recommended for Hi-Fi use.* †***Passes the FR-1 vertical flame test.***
**Capacitance between conductors.* ***Capacitance between 1 conductor and other conductor connected to shield*

bonded flat cable | BELDEN

# Bonded Flat Cable



**UL LISTED 2697**

Belden Bonded Flat Cable meets Underwriters Laboratories, Inc. Listed Style No. 2697. Passes FR-1 Vertical Flame Test.

**Conductors:**
Available in stranded tinned copper conductors. 10 to 30 conductors per cable.
22 AWG STRANDED
24 AWG STRANDED
26 AWG STRANDED

**Temperature Rating:** 80°C.

**Voltage Rating:** 300V.

**Conductor Insulation:**
.010" (.25mm)

**Color Code:**
Brown / Red / Orange / Yellow / Green / Blue / Violet / Grey / White / Black. Colors repeat.

**Lengths:**
Standard 100' put-ups. Other lengths available on a special order basis.

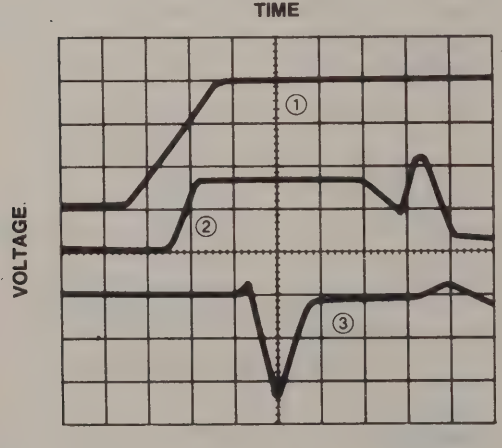
## LAMINATED PULSE CROSS TALK

**3 NANOSECONDS PULSE TR(10-90) = 3NS**

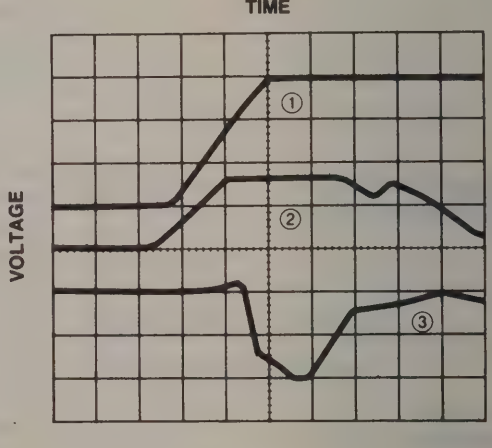


① Drive pulse of 300 millivolts. Vertical is 100 mv/division and horizontal is 2 nanoseconds per division.

② Near end cross talk of 3.6%. Vertical is 5 mv/division and horizontal is 5 nanoseconds per division.

③ Far end cross talk of 7.3%. Vertical is 10 mv/division and horizontal is 5 nanoseconds per division.

**7 NANOSECONDS PULSE TR(10-90) = 7NS**



① Drive pulse of 300 millivolts. Vertical is 100 mv/division and horizontal is 5 nanoseconds per division.

② Near end cross talk of 2.5%. Vertical is 5 mv/division and horizontal is 5 nanoseconds per division.

③ Far end cross talk of 3.3%. Vertical is 5 mv/division and horizontal is 5 nanoseconds per division.

# MATV Coaxial Cables

Belden has a wide variety of coaxial cables to satisfy the requirements of CATV-MATV applications. One or more of the cables in this group will fulfill the physical and electrical requirements of your system. We offer a range of cable sizes including a variety of materials to meet your exact needs — copper and copper covered steel center conductors, Duofoil® and braid shields, polyvinyl-chloride and polyethylene jackets and galvanized steel messengers for overhead runs.

All of the cables in this group, except 8241, are sweep tested using the Structural Return Loss Method (5 to 300 Mhz) to insure consistent cable performance and uniform electrical characteristics.

BREEZE-ILLINOIS, INCORPORATED
Designs and Manufactures
Interconnector assemblies
that are Shielded Against
EMI, EMP, RFI, Nuclear
Radiation, Compromising
Eminations (TEMPEST),
Mechanical Stressing,
Chemical Environments,
Weather and Temperature

Breeze-Illinois, Inc. has over 50 years experience in the manufacture of quality interconnection systems including design, development, manufacturing and evaluation for wide-ranging applications in industry, NASA, and the military. The company specializes in protected cable assemblies. These systems include all types of electrical and optical systems, pneumatic links and hybrid combinations. They are produced under the Breeze-Illinois trade names of:

- **Bi-LINK**™ Complete interconnector systems custom designed to fulfill the requirements of specific customer applications.
- **BiSHIELD**™ Cable assemblies designed to customer specifications or Breeze-Illinois standards to fulfill specific protection requirements.
- **Bi-PRO**™ Metallic and non-metallic flexible convoluted conduit wire-ways that protects transfer media against all outside influences.
- **Bi-OPTIC**™ Fiber optic interconnectors and hybrid systems using combinations of fiber optics and conventional transfer media.
- **Bi-TEST**™ Precision test cables specifically consturcted to fulfill the rigid requirements of test environments.
- **Bi-SHELL**™ Backshell terminations and other hardware that pertains to the termination of protective wire coverings.

Interconnectors are our only product line. We offer quality components off-the-shelf or we can study your systems requirements and prepare trouble-free, reliable and efficient interconnections for you. We will prepare proposals, write reports, build prototypes and make complete test and evaluation studies.

So contact us for any interconnector need—large or small. Breeze-Illinois can save you money, space, weight and time and eliminate or avoid your interference and/or environmental protection problems too.

## The name Breeze-Illinois is synonymous with wiring protection.

Our experience in manufacturing our own hardware such as coupling nuts, backshell assemblies, junction boxes, branches and connectors has established the name Breeze as the standard in the protected cable assembly field. We are highly competitive and best qualified to construct custom designed assemblies for our customers—from one assembly to thousands of copies. If you wish to assemble your own interconnectors, we manufacture individual components and can supply many off-the-shelf items for your interconnector needs. We also braid textiles such as Nylon and Dacron to wire bundles from your simplest design to your most complicated system.

We have a nationwide network of sales representatives anxious to serve you—Call or write us today.

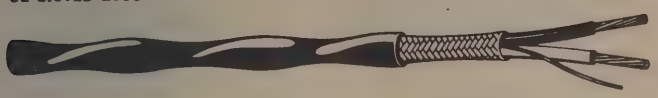
## SHIELDED AUDIO CABLE

### BRAID SHIELD, PVC JACKET, DRAIN WIRE

**UL LISTED 2095**



**Stock Color:** Black jacket.

**Construction:** Tinned copper conductors, color-coded PVC insulation, conductors cabled, tinned copper braid shield, tinned copper drain wire, PVC jacket overall.

**Specifications:** −20°C to +60°C. Entire cable passes VW-1 vertical flame test.

**Color Code:** Black, Red.

**Applications:** Shielded cable for recording studios, radio transmitters, sound systems, broadcast use.

**Put-up:** 100′, 500′ and 1000′ spools (other Put-ups also available).

| Columbia No. | No. of Cond. | Size AWG | Stranding | Nom. Insul. Thck. | Nom. Jkt. Thck. | Nom. O.D. In. |

### BRAID SHIELD, PVC JACKET

**Stock Color:** Chrome gray jacket.

**Construction:** Tinned copper conductors, color-coded PVC insulation, conductors cabled, tinned copper braid shield, PVC jacket overall.

**Specifications:** −20°C to +60°C. Entire cable passes VW-1 vertical flame test.

**Color Code:** Black, Red, White, Green.

**Applications:** Shielded cable for recording studios, radio transmitters, sound systems and electronic circuits where shielding is required.

**Put-up:** 100′, 500′ and 1000′ spools (other Put-ups also available).

### SPIRAL SHIELD, PVC JACKET

**Stock Color:** Chrome gray jacket.

**Construction:** Tinned copper conductors, color-coded PVC insulation, conductors cabled, tinned copper spiral wrapped shield, PVC jacket overall.

### SPIRAL SHIELD, PVC JACKET (CONT'D)

**Specifications:** −20°C to +60°C. Entire cable passes VW-1 vertical flame test.

**Color Code:** Black, Red, White, Green, Yellow, Blue.

**Applications:** Cable for recording studios, radio transmitters, sound systems and electronic circuits where shielding is required. Spiral shield allows ease of pigtail soldering.

**Put-up:** 100′, 500′ and 1000′ spools (other Put-ups also available).

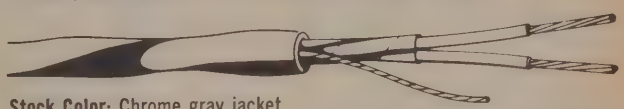
### MYLAR/ALUMINUM FOIL SHIELDED AUDIO CABLE



**Stock Color:** Chrome gray jacket.

**Construction:** Tinned copper conductors, color-coded polyethylene insulation, conductors cabled, wrapped with Flexfoil® mylar supported aluminum foil shield with foil facing to outside, stranded tinned copper drain wire, PVC jacket overall.

**Specifications:** −20°C to +60°C. Entire cable passes VW-1 vertical flame test.

**Color Code:** Black, Clear, Red, Green.

**Applications:** 100% shielded cable for recording studios, broadcast sound systems and electronic circuits where RF shielding is required.

**Put-up:** 100′, 500′ and 1000′ spools (other Put-ups also available).

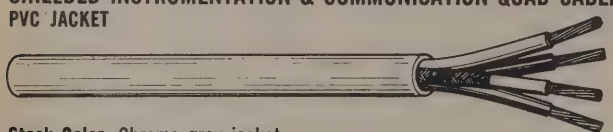
## SHIELDED INSTRUMENTATION & COMMUNICATION QUAD CABLE
**PVC JACKET**



**Stock Color:** Chrome gray jacket.
**Construction:** Tinned copper conductors, color-coded polypropylene insulation, each pair shielded with Flexfoil® aluminum polyester shield, stranded tinned copper drain wire, cables paired on common axis to reduce O.D., PVC jacket overall. Foil facing to outside. Drain wire 24 gauge, 7/32.
**Specifications:** −20°C to +60°C.
**Color Code: No. 1 Pair** — Black, Red.
**No. 2 pair** — Green, White.
**Applications:** Special cable for audio, communications and instrumentation use.
**Put-up:** 100′, 500′ and 1000′ spools. (Other put-ups also available.)

| Cat. No. | No. of Cond. | Cond. Size | Cond. Strand. | Nom. Insul. Thck. (In.) | Nom. Jkt. Thck. (In.) | % Shld. Cov. | Sugg. Work. Volt. | Nom. O.D. (In.) | Nom. Cap.* PF/ Ft. | Nom. Cap.** PF/ Ft. |

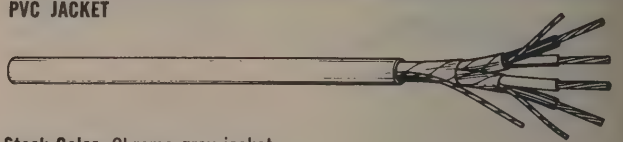
## SHIELDED INSTRUMENTATION & COMMUNICATION QUAD CABLE
**PVC JACKET**



**Stock Color:** Chrome gray jacket.
**Construction:** Tinned copper conductors, color-coded polypropylene insulation, cabled in pairs, each pair Flexfoil® alumuminum/polyester shielded, with stranded tinned copper drain wire, overall Flexfoil® aluminum fail/polyester shields and stranded, 24 gauge, 7/32, tinned copper drain wire, cabled on common axis to reduce O.D., PVC jacket overall.
**Specifications:** −20°C to +60°C.
**Color Code: No. 1 Pair** — Black, Red.
**No. 2 pair** — Green, White.
**Applications:** Special cable for audio, communications and instrumentation use.
**Put-up:** 500′ and 1000′ spools. (Available put-ups also available.)

## SHIELDED INSTRUMENTATION & COMMUNICATION QUAD CABLE
### PVC JACKET

**UL 2094**

**Stock Color:** Chrome gray jacket.
**Construction:** Tinned copper conductors, color-coded polyethylene insulation, cabled, filled where required, clear mylar wrap, tinned copper braid shield, PVC jacket overall.
**Specifications:** −20°C to +60°C. Suggested working voltage 600V.
**Color Code:** Black, white, red, green.
**Applications:** Special cable for audio, communications and instrumentation use.
**Put-up:** 100′, 500′ and 1000′ spools. (Other put-ups also available.)

| Cat. No. | No. of Cond. | Cond. Size | Cond. Strand. | Nom. Insul. Thck. (In.) | Nom. Jkt. Thck. (In.) | App. % Shld. Cov. | Sugg. Work. Volt. | Nom. O.D. (In. | Nom. Cap. * PF/ FT. | Nom. Cap. ** PF/ FT. |

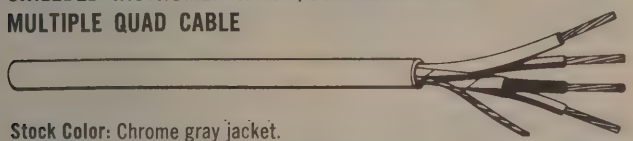
*Capacitance between conductors.
**Capacitance between one conductor and other conductor connected to shield.

## SHIELDED INSTRUMENTATION/COMMUNICATION MULTIPLE QUAD CABLE



**Stock Color:** Chrome gray jacket.
**Construction:** Tinned copper conductors. Cat. No. C1340 color-coded polypropylene insulation, Cat. No. C1331 color coded PVC insulation. Cat. No. C1343 color coded polyethylene insulation. Flexfoil® aluminum foil/polyester shield (foil facing to outside) over 2 conductors, stranded tinned copper drain wire (Cat. No. C1340 - 24 gauge, Cat. No. C1331 and C1343 - 22 gauge), one shielded pair and 2 singles cabled on common axis to reduce O.D., PVC jacket overall.
**Specifications:** −20°C to +60°C. Suggested working voltage: Cat. No. C1340—200V, Ca. No. C1331 and C1343—350V, Cat. No. C1331 entire cable passes VW-1, Cat. Nos. C1340 and C1343 jacket only passes VW-1.
**Color Code:** Shielded – Black Red; Unshielded – Green White.
**Applications:** Special cable for audio, communications and instrumentation use.
**Put-up:** 100′, 250′, 500′ and 1000′ spools (other Put-ups also available).

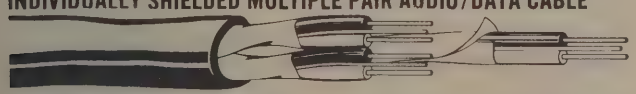
## INDIVIDUALLY SHIELDED MULTIPLE PAIR AUDIO/DATA CABLE



**Stock Color:** Chrome gray jacket.
**Construction:** Tinned copper conductors, color-coded polypropylene insulation, cabled in pairs, each pair and its drain wire under Flexfoil® aluminum foil/polyester shield, PVC jacket overall.
**Jacket:** +60°C. Conductors: +105°C. Suggested working voltage: 22 gauge — 300V; 20 gauge — 350V: 18 gauge — 400V. 100 Megohms/M insulation resistance between shields. 115PF/FT. capacitance between adjacent shields. 1500V voltage breakdowns between adjacent shields. 50V working voltage between adjacent shields. 22 gauge and 20 gauge series — 22 gauge drain wire; 18 gauge series — 20 gauge drain wire. JACKET ONLY PASSES VW-1 VERTICAL FLAME TEST.
**Color Code:** Chart I, Page 4544.
**Applications:** For audio RF and pulse applications requiring superior circuit isolation. The use of polypropylene insulation results in excellent high frequency properties and mechanical durability.
**Put-up:** 100′, 500′ and 1000′ spools.**

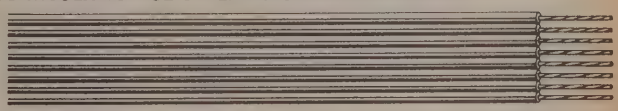
## CONTROL CABLE MULTI-CONDUCTOR FLAT RIBBON PVC INSULATION UL STYLE 2476 AND MIL-W-16878



**Stock Color:** See table Page 4546.
**Construction UL 2476:** Tinned copper conductors, color-coded PVC insulation per UL 1061, conductors bonded to form flat ribbon cable. Nominal insulation thickness .010″.
**Construction MIL-W-16878:** Tinned copper conductors, color-coded PVC insulation per MIL-W-16878 Type B, conductors bonded to form flat ribbon cable. Nominal insulation thickness .010″.
**Specifications UL 2476:** −55°C to +80°C. Suggested working voltage, 300V.
**Specifications MIL-W-16878:** −55°C to +105°C. Suggested working voltage 600V.
**Applications:** Circuit connections, interconnecting assemblies; wiring harnesses for sliding drawers, drop panels and racks. Reduces installation time, space and weight. Conductors easily separated for termination. Resistant to oil, flame, acids, moisture, fungus and solvents. Contact factory for custom designed ribbon cables consisting of different gauge sizes and number of conductors.
**Put-up:** 100′, 500′ and 1000′ spools. (Other put-ups also available.)

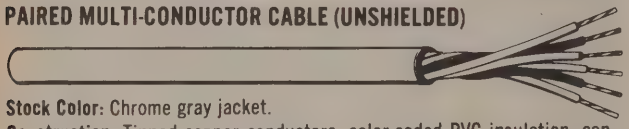
## PAIRED MULTI-CONDUCTOR CABLE (UNSHIELDED)



**Stock Color:** Chrome gray jacket.

**Construction:** Tinned copper conductors, color-coded PVC insulation, conductors paired with a short lay twist for conductor balance providing a circuit free from cross talk, pairs cabled, PVC jacket overall.

**Specifications:** −20°C to +60°C. Entire cable passes VW-1 vertical flame test.

**Color Code:** See Chart II, this page.

**Applications:** Heavy-duty intercom and audio cable for intercom systems, signal systems, annunciators, nurse's call systems, multiple speaker systems, control circuit cables.

**Put-up:** 100′, 500′ and 1000′ spools.**

| 16 | Green, Yellow | 33 | Purple, Yellow | 50 | W/B*, Orange |
| 17 | Green, Brown | 34 | Purple, Orange | 51 | W/B*, Purple |

* White body with black stripe.

## TWO-CONDUCTOR MICROPHONE CABLE
### SPIRAL SHIELD

**Stock Color:** Silver gray jacket.

**Construction:** Tinned copper conductors, color-coded polyethylene insulation, cabled with fillers, textile wrap, spiral tinned copper shield, high gloss Flexlife® jacket.

**Specifications:** −20°C to +60°C.

**Color Code:** White, Black.

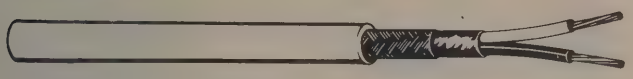
**Applications:** For use with low impedance microphones. Flexlife jacket provides extreme flexibility, high abrasion resistance and outstanding appearance.

**Put-up:** 100′, 250′, 500′ and 1000′spools (other Put-ups also available).

| Columbia No. | Impedance | AWG (Stranding) | Nom. Insul. Thick. In. | Jkt. Thick. In. | Nom. O.D. In. |
|---|---|---|---|---|---|
| C1323 | Low | 22 (16/34) | .025 | .025 | .225 |
| C1328 | Min. Low | 24 (10/34) | .016 | .030 | .190 |

COLUMBIA ELECTRONIC CABLES • Dept. EM, 11 Cove St., New Bedford, Mass. 02744 • Phone: (617) 999-4451 • Telex: 92-9411
Los Angeles, CA 90058 • Phone (213) 583-9825
**HOT LINE 800-225-8540**

## BRAIDED SHIELD



**Stock Color:** Silver gray jacket.

**Construction:** Tinned copper conductors, color-coded polyethylene insulation, cabled with fillers, textile wrap, braided tinned copper shield, high gloss Flexlife jacket.

**Specifications:** −20°C to +60°C.

**Color Code:** White, Black.

**Applications:** For use with low impedance microphones. Flexlife jacket provides extreme flexibility, high abrasion resistance and outstanding appearance.

**Put-up:** 100′, 250′, 500′ and 1000′ spools (other Put-ups also available).

| Columbia No. | Impedance | AWG (Stranding) | Nom. Insul. Thick. In. | Jkt. Thick. In. | Nom. O.D. In. |
|---|---|---|---|---|---|
| **C1322** | Low | 22 (16/34) | .025 | .025 | .235 |

## ONE-CONDUCTOR MICROPHONE CABLE
### SPIRAL SHIELD

**Stock Color:** Silver gray jacket. (Cat. No. C1359 available in black jacket.)

**Construction:** Single conductor 3/33 strands tinned copper, 4/33 strands tinned copperweld, white foam polyethylene dielectric, spiral tinned copper shield, high gloss Flexlife® jacket.

**Specifications:** −20°C to +60°C.

**Applications:** For use with high impedance microphones and hi-fi interconnecting cables. Flexfoam dielectric (foam polyethylene) provides as much as 35% lower capacitance than the best standard solid polyethylene dielectric microphone cables. Flexfoam cables are the most flexible plastic microphone cable available, with limpness almost equal to rubber and with better abrasion resistance.

**Put-up:** 100′, 250′, 500′ and 1000′ spools (other Put-ups also available).

| Columbia No. | Microphone Type | Thick. In. | | Nom. Cap. MMF/Ft. | Nom. O.D. In. |
|---|---|---|---|---|---|
| | | Insulation | Jacket | | |
| **C1359** | Min. | .016 | .012 | 29 | .085 |
| **C1369** | Lapel | .030 | .020 | 19 | .130 |

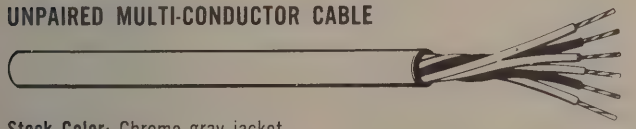
| **C1395** | Crystal | .075 | .030 | 13 | .245 |
| **C1314*** | Crystal | .040 | .020 | 25 | .155 |

* Solid polyethylene dielectric.

## UNPAIRED MULTI-CONDUCTOR CABLE



**Stock Color:** Chrome gray jacket.

**Construction:** Tinned copper conductors (Cat. Nos. C2754 and C2755 are bare copper), color-coded PVC insulation, PVC jacket overall, conductors cabled.

**Specifications:** −20°C to +60°C. All items pass VW-1 vertical flame test.

**Color Code:** Chart III.

**Applications:** PA systems, unbalanced intercom systems, interconnecting cables, remote control circuits, telephones, low-voltage relay control cables.

**Put-up:** 100′, 500′ and 1000′ spools (other Put-ups also available).

**CONDUCTOR COLOR CODE CHART III.**

No. C2754 has red and white conductors; No. C2755 has red, white and green; Nos. C2830, C2405, C2409 and C2410 have black and white. All other cables above have conductors as indicated in this table. First color is body; second or third colors are stripes.

| No. | Color | No. | Color | No. | Color | No. | Color |
|---|---|---|---|---|---|---|---|
| 1 | Black | 7 | Brown | 13 | Red/Green | 19 | White/Yellow |
| 2 | Red | 8 | Yellow | 14 | Red/Yellow | 20 | White/Blue |
| 3 | White | 9 | Purple | 15 | Red/Black | 21 | White/Brown |
| 4 | Green | 10 | Gray | 16 | White/Black | 22 | White/Orange |
| 5 | Orange | 11 | Pink | 17 | White/Red | 23 | White/Gray |
| 6 | Blue | 12 | Tan | 18 | White/Green | 24 | White/Violet |
| | | | | | | 25 | White/Black/Red |

## SHIELDED CONTROL CABLE

**Stock Color:** Black jacket.

**Construction:** Tinned copper conductors, color-coded rubber insulation, cabled, filled where required, clear mylar wrap, tinned copper braided shield, cotton wrap, neoprene jacket or rubber jacket.

**Specifications:** −20°C to +60°C. Suggested working voltage 350V.

**Color Code:** Chart IV, Page 4548.

**Applications:** Control circuits, video and audio interconnecting cables, broadcast and studio use. Precision engineered to prevent cross-talk and eliminate hum pick-up. Neoprene and rubber jackets are resistant to impact and abrasion and have extra limpness. For outside installations, neoprene is recommended being resistant to oil, ozone, moisture and sunlight.

**Put-up:** 100′, 500′ and 1000′ spools (other Put-ups also available).

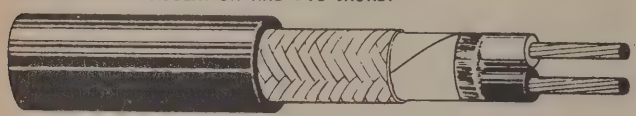
### POLYETHYLENE INSULATION AND PVC JACKET



**Stock Color:** Chrome gray jacket.
**Construction:** Tinned copper conductors, color-coded polyethylene insulation, cabled, filled where required, clear mylar wrap, tinned copper braid shield, PVC jacket overall.
**Specifications:** −20°C to +60°C. Suggested working voltage 600V. Jacket only passes VW-1 vertical flame test.
**Color Code:** Chart IV.
**Applications:** Low capacity cable for control circuits, video and audio interconnecting cables, broadcast and studio use. Precision engineered to prevent cross-talk and eliminate hum pick-up. Low capacitance, light weight.
**Put-up:** 100′, 500′ and 1000′ spools. (Other put-ups also available.)

## UNSHIELDED COMPUTER & CONTROL CABLE

### MULTI-CONDUCTOR AND PAIRED CABLES

UL 2343
CSA SR-PVC 80°C

**Stock Color:** Chrome gray jacket.

**Construction:** Tinned copper conductors, semi-rigid PVC insulation to UL Style 1061, CSA Type SR-PVC. Cabled in pairs. Clear mylar wrap, nylon ripcord. PVC jacket overall. Nominal insulation thickness, .010 inches.

**Specifications:** 80°C, no specified voltage*. Individual conductors rated at 80°C, 300 volts. Entire cable passes VW-1 Vertical Flame Test.

**Color Code:** Multiconductor, Chart VI; Paired, Chart VII.

**Applications:** For control and signal application in computers, industrial equipment and instrumentation.

**Put-up:** 100′, 500′ and 1000′ spools (no deposit). Other Put-ups available.

* Although computer cables are not voltage rated by UL, inner conductors rated at 300 volts.

## SHIELDED COMPUTER & CONTROL CABLE

### MULTI-CONDUCTOR AND PAIRED CABLES

UL 2343
CSA SR-PVC 80°C

**Stock Color:** Chrome gray jacket.

**Construction:** Tinned copper conductors, semi-rigid PVC insulation to UL Style 1061, CSA Type SR-PVC. Cabled in pairs. Clear mylar wrap, nylon ripcord. Braided, tinned copper shield. PVC jacket overall. Nominal insulation thickness, .010 inches.

**Specifications:** 80°C, no specified voltage*. Individual conductors rated at 80°C, 300 volts. Entire cable passes VW-1 Vertical Flame Test.

**Color Code:** Multiconductor, Chart VI; Paired, Chart VII.

**Applications:** For control and signal application in computers, industrial equipment and instrumentation.

**Put-up:** 100′, 50′0 and 1000′ reels (no deposit). Other Put-ups available.

## UL HOOK UP WIRE STYLE 1015, CSA TYPE TEW

**Stock Colors:** See table below. Chart VIII.

**Construction:** Tinned copper conductor, color-coded PVC insulation.

**Specifications:** —40°C to +105°C, 600V. Resistant to acids, oil, alkalis, flame, moisture and fungus. Entire cable passes VW-1 vertical flame test.

**Applications:** Internal wiring of electronic and electrical equipment.

**Put-up:** 100′ and 1000′ spools (other Put-ups also available).

| Columbia No. | AWG (Stranding) | Nom. Insul. Thick. In. | Voltage Rating | Nom. O.D. In. |

## UL HOOK UP WIRE UL STYLE 1007 CSA TR-64

**Stock Colors:** See table below Chart VIII.

**Construction:** Tinned copper conductor, color-coded PVC insulation.

**Specifications:** —40°C to +80°C, 300V. Resistant to acids, oil, alkalis, flame, moisture and fungus. Entire cable passes VW-1.

**Applications:** Internal wiring of electronic and electrical equipment.

**Put-up:** 100′ and 1000′ spools (other Put-ups also available).

| Columbia No. | AWG (Stranding) | Nom. Insul. Thick. In. | Voltage Rating | Nom. O.D. In. |

Stripe combinations also available — consult factory.

## RUBBER TEST LEAD WIRE

**Stock Color:** Black or Red. (Other colors available on special order.)

**Construction:** Extra flexible stranded tinned soft annealed copper conductor, color-coded rubber insulation.

**Specifications:** —20°C to +60°C. All breakdown voltages and suggested working voltages are AC RMS values.

**Applications:** Test lead wire for use in multimeters, analyzers, oscillators and other applications requiring extra flexible insulated wire.

**Put-up:** 250′, 500′ and 1000′ spools (other Put-ups also available).

| Columbia No. | Color* | AWG (Stranding) | Nom. Insul. Thick. In. | Sug. Working Voltage | Nom. O.D. In. |
|---|---|---|---|---|---|
| C1326 | " | 20 (41/36) | .040 | 1,500V | .125 |
| C1319 | " | 20 (41/36) | .047 | 3,000V | .140 |
| C1321 | " | 18 (65/36) | .045 | 5,000V | .140 |
| C1318 | " | 18 (65/36) | .088 | 10,000V | .230 |

* Available in red or black; please specify.

## PLASTIC TEST LEAD WIRE

**Stock Color:** Black or red. (Other colors available on special order.)

**Construction:** Extra flexible stranded tinned soft annealed copper conductor, color-coded extra flexible, high gloss Flexlife® plastic insulation.

**Specifications:** —20°C to +60°C, 5000V. Insulation resistant to acids, oil, alkalis, flame, moisture and fungus. All breakdown voltages and suggested working are AC RMS values.

**Applications:** Test lead wire for use in multimeters, analyzers, oscillators, and other applications requiring extra flexible insulated wire. Flexlife plastic insulation is durable and has a high-gloss finish.

## PLASTIC TEST LEAD WIRE (CONT'D)

**Put-up:** 250′ and 500′ spools (other Put-ups also available).

| Columbia No. | Color* | AWG (Stranding) | Nom. Insul. Thick. In. | Sug. Working Voltage | Nom. O.D. In. |
|---|---|---|---|---|---|
| C1320 | Black or Red | 18 (65/36) | .045 | 5,000V | .140 |

## PORTABLE SERVICE AND POWER CORD

**Copper:** Bare soft annealed. Stranding per ASTM-B-174 and ASTM-B-172.

**Insulation of inner conductors:** Synthetic Rubber (SBR) per IPCEA Pub. No. S-19-81 (5th Edition) Part 3.7.1 (SBR); N.E.M.A. Publication No. WC-3-1969; and UL Subject 62, Class 3.

**Temperature Range:** 60°C (140°F) to —37°C (—35°F).

**Color Code Conductors:** 2 conductor — Black, White; 3 conductor — Black, White, Green; 4 conductor — Black, White, Green, Red.

**Foundation:** Conductors twisted together with fillers to make a round core; separator over core.

**Neoprene Jacket:** Black Neoprene: 60°C (140°F to —37°C (—35°F) per IPCEA Pub. No. S-19-81 (5th Edition) Part 7.7.5.1; NEMA Pub. No. WC-3-1969, ASTM D-752; and UL Subject 62, Class 15.

**Rubber Jacket:** Black Synthetic Rubber (SBR) 60°C (140°F) to —37°C (—35°F) per IPCEA Pub. No. S-19-81 (5th Edition) Part 7.7.5.1; NEMA Pub. No. WC-3-1969, and UL Subject 62, Class 6.

**Jacket Marking:** All sizes surface printed* showing gauge, number of conductors, voltage and type.

**Neoprene Use:** For heavy (SO) and light (SJO) service such as tools, power extensions, motor and welding leads, portable machinery, floor polishers and sanders, battery chargers, portable stage light, garage portable lights, sound equipment, washing machines, refrigerators, sewing machines, and other electrical equipment. Type SVO — for vacuum cleaners, home food mixers, office equipment, and other light duty requirements.

**Rubber Use:** For heavy (S) and light (SJ) service such as tools, power extensions, motor and welding leads, portable machinery, floor polishers and sanders, battery chargers, portable stage lights, garage portable lights, sound equipment, washing machines, refrigerators, sewing machines, and other electrical equipment. Type SV — For vacuum cleaners, home food mixers, office equipment, and other light duty requirements.

**Neoprene Environment:** For use in areas where exposed to oil, ozone, grease, chemicals or solvents.

**Rubber Environment:** Useful cord life is reduced where exposed to oil, ozone, grease, chemicals or solvents. Cords to be used in such environments are Neoprene SO.

## RUBBER JACKET (CONT'D)

| Columbia No. | No. of Cond. | Size AWG | Type | Volt Rating | Nom. Insul. | Current Amps | Nom. O.D. In. |
|---|---|---|---|---|---|---|---|
| C1517 | 2 | 10 | S | 600V | 3/64 | 30 | .637 |
| C1519 | 3 | 10 | S | 600V | 3/64 | 25 | .687 |

## PLASTIC JACKET CONSTRUCTION

**Copper:** Bare soft drawn annealed, Class K stranding per ASTM-B-174 and ASTM-B-172.

**Insulation:** Polyvinyl chloride, resistant to oils, water, acids, alkalies and ozone. 60°C — UL Class II. Black, gray and white SVT.

**Temperature Range:** 60°C (140°F) to −20°C (−4°F).

**Color Code Conductors:** 2 conductor — black, white.
3 conductor — black, white, green.

**Foundation:** Conductors twisted together with fillers to make a round core; separator over core.

**Jacket:** 60°C. Black, gray or white (SVT) or black (SJT) UL Class II, non marking 60°C (140°F) to −20°C (−4°F) polyvinyl chloride, resistant to oil, water, acid, alkali, ozone and abrasion. Jacket meets specifications per ASTM-D-1047. SVT jacket ribbed to help cord remain clean.

| Columbia No. | No. of Cond. | Size AWG | Type | Voltage Ra. ng | Nom. Insul. | Current Amps | Nom. O.D. In. |
|---|---|---|---|---|---|---|---|
| C1554 | 2 | 18 | SVT | 300V | 1/64 | 10 | .245 |

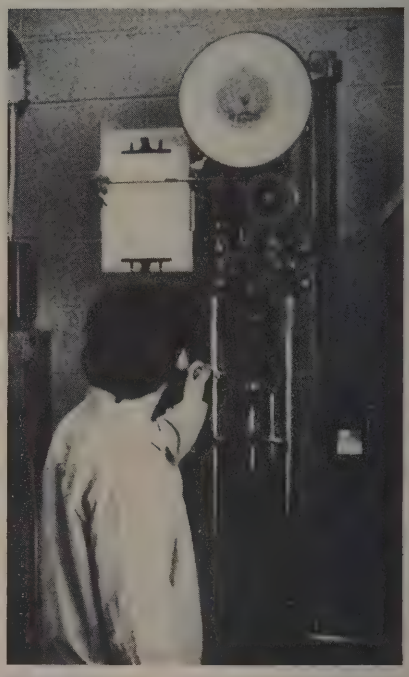
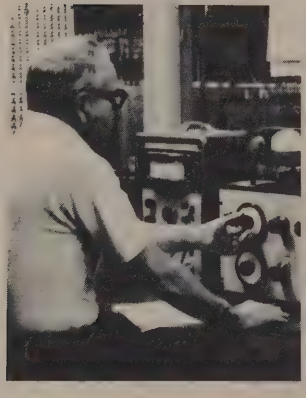
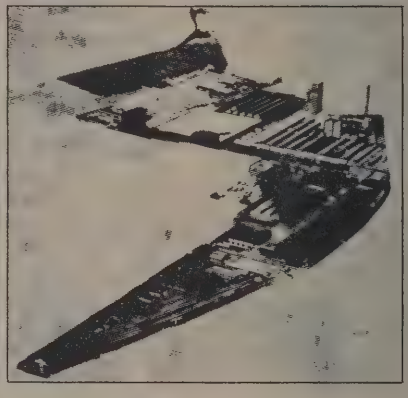
# RESEARCH AND DEVELOPMENT... PRODUCTION...







Consolidated's recognized reputation for high-quality merchandise and its own engineering and testing facilities are supported by the modern research and development laboratories at Cyprus' R&D Center. Here metallurgists, electrical engineers, chemists and scientists of many disciplines combine their talents to develop better products for you.

The never-ending search for new and better materials for Consolidated Wire products is a way of life at Cyprus' R&D Laboratories. This is where the quality control we're so proud of begins.

Supporting this program of research and development at the laboratory level, every foot of wire that leaves the plant must pass rigid inspections. These products meet or exceed all relevant Underwriters Laboratories, IPCEA, NEMA and other standards.

DESCRIPTION: Each conductor, stranded bare copper, .020" polyethylene insulation, .010" polyvinylchloride jacket over each conductor, color coded, cabled with fillers where necessary, moisture resistant tape, black polyvinylchloride jacket overall. 600 volt operating voltage. Approved per IPCEA-NEMA standards.

* Flat Dimension .233" x .366"

** Flat Dimension .252" x .404"

# TELEPHONE AND COMMUNICATION CABLE

CONSOLIDATED

## AERIAL AND DUCT INSTALLATION — MEETS REA-PE-22

**DESCRIPTION:** Each conductor bare solid copper, color coded polyethylene insulation, insulated conductors paired, pairs cabled with non-hygroscopic tape wrap, .008" corrugated aluminum shield, black polyethylene jacket overall.

**CHARACTERISTICS:** Average mutual capacitance — .083 microfarads/mile. Minimal cross talk.

**APPLICATIONS:** A tough, long lasting communication cable that can withstand moisture, ultra-violet and weathering.

## DIRECT BURIAL INSTALLATION — MEETS REA-PE-23

**DESCRIPTION:** Each conductor bare solid copper, color coded polyethylene insulation, insulated conductors paired, pairs cabled with non-tygroscopic tape wrap, polyethylene inner jacket, .005" corrugated copper, or .010" corrugated aluminum shield, black polyethylene jacket overall.

**CHARACTERISTICS:** Average mutual capacitance .166 microfarads/mile. Minimal cross talk.

**APPLICATIONS:** Impervious to moisture, abrasion resistant, suitable for direct burial.

# TELEMETERING AND DATA SHIELDED CONTROL CABLE

CONSOLIDATED

**DESCRIPTION:** Each conductor bare solid copper, high molecular weight polyethylene insulation, color coded, twisted into pairs, cabled with a non-hygroscopic binder tape .008" aluminum shield, black polyethylene jacket overall. Operating voltage 300 volts.

Double jacketed types (8306-8420 below), same except for additional inner black polyethylene jacket over binder, and .005" copper shield, or .010" aluminum shield.

**APPLICATIONS:** Remote control of rocket recording data and test-firing control, transmission of signals which telemeter temperature, voltage pressure, etc. control of multiple circuits, measuring devices, quality control equipment, radar antenna. For aerial, duct and conduit installations.

Double jacketed types have higher dielectric strength and suited for direct burial installations.

STANDARD PUT-UP: 25 FT., 50 FT., 100 FT., 250 FT.

#### SPECIFICATIONS AND APPLICATION

Same specifications as 4200 Series except black Neoprene jacket.

For all types of equipment exposed to oils, acid and excessive moisture.

## SHIELDED AND UNSHIELDED – "CONCO-FOAM"
## (Low Loss Foam Polyethylene All Channel Color TV Cable)

Conco-Foam assures excellent VHF, UHF, Color and B/W TV reception in uncongested and fringe regions. Will provide far greater signal than any other unshielded twin lead cable. Assures highest efficiency even when exposed to weathering and atmospheric conditions.

Conco-Foam assures excellent VHF, UHF, Color and B/W TV reception in crowded areas where reception is critical. Mylar-aluminum shielding provides strong and clean signals, eliminating electrical noise and ghost signals. Conco-Foam can be attached to mast, installed in gutters, conduit, or underground.

## KYNAR INSULATED HOOK-UP WIRE FOR WIRE WRAP APPLICATIONS

Especially suited for computer, business machine usage and other areas where space is limited. (For automatic point to point application.)

The conductor is OFHC (Oxygen Free High Conductivity) Annealed Copper, Silver Plated.

The insulation is Kynar, a Vinylidene Fluoride Plastic with unique characteristics.

Mechanically Tough; Operating Temperature Up to 125°C Continuous, Assigned U.L. Rating 105°C.

# TEFLON MIL SPEC HOOK-UP WIRE AND CABLES
## MIL-W-16878 TYPE E, EE, MULTICONDUCTOR
## SHIELDED TEFLON CABLES

| Catalog Number | Number of Conductors | Size & (Stranding) | Nom. O.D. (Inch) |
|---|---|---|---|

Each conductor stranded silver plated copper Type E extruded Teflon .010" insulation. 90% braided silver copper shield supplied with either a Teflon impregnated Fiberglass braid or Teflon fused tape overall jacket. Voltage rating 600 volts. Temperature rating –65°C to +260°C.

## PROTECTA-METAL SPOOLS

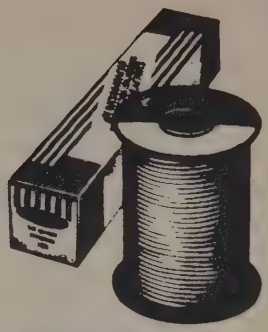
Popular, profitable specialty wire packaged for easy selling in radio-electrical, scientific, specialty and hardware.

Wide variety of sizes and insulations.

Keeps stock in perfect order, always saleable.

Supplied on spools as shown and in heavier weights.

Here is a handy and convenient way to stock small quantities of wire. It prevents wire from matting or tangling.



## MAGNET WIRE No. 2000

The correct wire for practically any application. Magnet wire is indispensible in the manufacture and repair of both radio and audio frequency coils, transformers, chokes, speaker field coils, short wave coils, tuners, transmitters, etc. Also widely used in the construction and repair of motors, generators, dynamos, etc.

**Larger Quantities At Same Per Pound List**

**SPECIAL MAGNET WIRES**

In addition to the standard listing shown here, we maintain an extensive stock of all other sizes in round rectangular and square magnet wire.

## ANNUNCIATOR (BELL) WIRE

SUPPLIED IN ASSORTED COLORS

An all around utility wire consisting of a single and two conductors of No. 18 wire, plastic insulation.

| Catalog Number | Type |
|---|---|
| 1450 | Single Conductor |
| 1445 | Two Conductor Twisted |

STANDARD SPOOL PUT-UP:
¼ LB., ½ LB., 1 LB., 7 LB.

## PHOSPHOR BRONZE DIAL CABLE

BRAIDED phosphor bronze over a pure black linen, lubricated core for exceptional strength and wearing qualities.

| Cat. No. | Size (Ins.) | Stranding | Dia. (Ins.) |
|---|---|---|---|
| 1436 | ⅛ | 16x36 | .125 |

STRANDED phosphor bronze over a concealed white nylon core for exceptional flexibility. Manufactured to highest precision standards, insuring utmost accuracy.

| Cat. No. | Size (Ins.) | Stranding | Dia. (Ins.) |
|---|---|---|---|
| 1440 | ⅛ | 42x35 | .125 |

STANDARD SPOOL PUT-UP:
25 FT., 100 FT., 500 FT., 1000 FT.

### PHOSPHOR BRONZE

Recommended for short wave and transmitting aerials.

Tested and used by Army and Navy.

Amazing improvement for reception and transmission.

Phosphor bronze is recognized as the most efficient, practical wire obtainable for short wave and transmitting aerials. It will not stretch or sag and is superinductive.

## HEAT SHRINKABLE TEFLON* TUBING • FEP • TFE • DUAL WALL

### DUAL-WALL TEFLON* ENCAPSULATING SHRINKABLE TUBING

**NEW** DAFLON SM-450 is a new dual wall shrink and melt Teflon tubing which gives a tight, moisture-proof seal. It is made from two types of Teflon. The outer wall is TFE Teflon and the inner lining is FEP Teflon. When heated to 400°F the FEP melts and at 621°F the TFE shrinks tightly. The FEP is squeezed into a solid or near solid mechanical encapsulation. DAFLON SM-450 tubing protects against most environmental hazards involving pull, vibration, moisture, chemicals, etc. It may be used over wires, terminals, splices, connectors and as a strain relief and end cap.

**Operating Temperature:** 450°F.

**Standard Package:** 100' in 1 to 3 ft. lengths. Special lengths available to order.
**Will fully close off.

## DAFLON SH-400 (FEP)

Made with Modified TEFLON‡ FEP will shrink over inserted objects upon exposure to moderate heat. Heretofore, many joints, parts, components, devices could not be protected because of hi temperature required for shrinkage. FEP TEFLON‡, which has a continuous service temperature of 400°F., will shrink at 300°F. Supplied in natural (transparent) color. Complete shrinkage at 350°F. Now, many heat sensitive products can use the permanent protection of TEFLON.* Will not burn or support flame, long lengths available. Will not split or melt. Extruded. Meets MIL-I-23053/11.

## DAFLON SHRINK SERIES SH-621

### TFE TUBING MIL-I-23053/12

Made of modified TEFLON‡ polytetrafluorethylene will shrink when heated to 621°F. Suitable where hi temp protection is required. Extruded. Will not support combustion, dielectric strength (20 Mil Wall) 850 V/M, low temp. brittle point −66°F, superior chemical resistance. Operating Temp: −67°C to +250°C.

## DAFLON 4:1 SHRINKABLE PTFE TUBING

DAFLON SH-421 Shrinkable Teflon Tubing recovers to approximately 25% of its expanded size when heated to the gel point (621°F). Thus it is now possible to use shrinkable Teflon tubing, with its excellent chemical and physical properties, over objects which require more than the standard 2:1 shrinkdown ratio (see SH-621).

NOTE: Tubing should be allowed to recover **at least 50%.**
Conforms to MIL-I-23053/12 and AMS-3584. **Operating Temp.:** −85°F to +500°F.

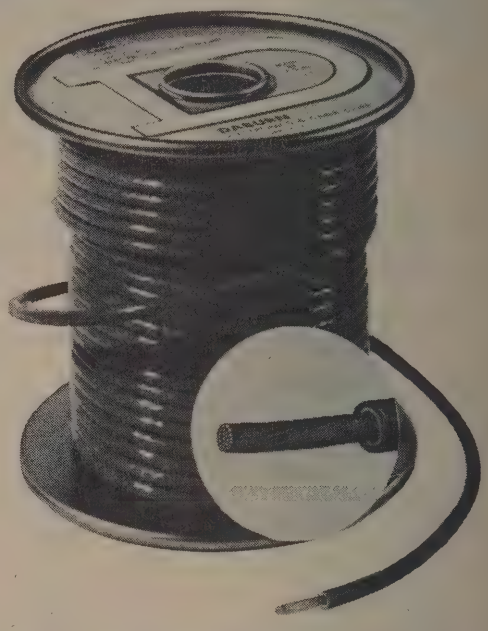
# DABURN electronics & cable corp.

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

## HI-VOLT CORONA RESISTANT TEFLON* CABLE©

Voltage Rating at Sea Level • Voltage Rating at 80,000 feet, approximately 1/3 lower • Minimum life expectancy: 10,000 hours.



**SMALL SIZE:**
You do not need bulky, thick, insulation jacketing as used with silicone rubber and polyethylene insulations to get your hi-voltage requirements. Wire used is MIL-SPEC QQ-W-343 and MIL-W-16878D. Insulation used conforms to and surpasses MIL-SPEC-W-16878D

**AVOID CORONA PROBLEMS:**
Corona Resistant Teflon construction is specifically designed to retard and prevent corona penetration. Temperature variations from −60° to +300°C have no life effect on the corona resistant Teflon. In addition, there is no stress or crack failure under severe, adverse conditions including mechanical strain, moisture, corona or chemical conditions.

**DESCRIPTION:**
Single Conductor, Stranded Silver Plated Copper, Corona Resistant Teflon* Insulation.

**TEMPERATURE RATING:**
−90°C to +250°C.

**VOLTAGE RATING:**
Based on insulation thickness.

**AVAILABLE COLORS:**
White, Black, Red, Green, Yellow, Lt. Blue, Brown, Orange, Gray, Violet. (Also available in tracer colors)

**PUT-UP:** 250′, 500′, 1000′

*DUPONT

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

## TFE • FEP TEFLON* CABLES • H FILM KAPTON* WIRE

### MIL-W-16878D INSTRUMENTATION — SHIELDED • UNSHIELDED

**DESCRIPTION:** One or more conductors, each conductor silver plated concentrically stranded copper wire, Type E Extruded TFE .010″ insulation. When shielded, braided silver plated copper shield over conductor(s), 90% shield coverage. When covered, either a TEFLON* impregnated fiberglass braid or a .010″ TEFLON* fused, double tape jacket overall. Fungus, solvent, moisture, flame, acid, alkali and oil resistant. Multiconductors are twisted. **TEMP. RATING:** −65°C to +260°C. **VOLT. RATING:** 600V.

### H FILM KAPTON* WIRE — DALITE™

#### HIGH TEMPERATURE HOOK-UP AND AIRFRAME WIRE 200°C CONTINUOUS TEMPERATURE RATING (a)

**INSULATED WITH DUPONT KAPTON* POLYIMIDE FILM WITH TEFLON* — FEP HEAT SEALED COATING CONFORMS TO MIL-W-60904 & MIL-W-81381.**
**CHARACTERISTICS:** Dalite™ insulated wire provides high temperature stability, low temperature flexibility, high radiation resistance, resistance to cold flow, impervious to most chemicals, high dielectric strength, low dielectric constant, smaller diameters and lighter weight than any other comparable wire used for continuous operation up to 200°C. This hook-up wire meets the test requirements of MIL-W-16878 for 300 V, 600 V and 1000 V with **smaller wall thicknesses, weight and dimensions.**
(a) Temperature based on lowest temperature rating of materials in the insulation — FEP 200°C. Will pass 96 hour heat age tests at 250°C per MIL-W-16878.
**DESCRIPTION:** Single conductor, silver plated annealed copper conductors, Type H* Polyimide film with Teflon* FEP coating tape wrapped.

## RETRACTILE POWER & COMMUNICATION CORDS — UL & CSA

Long Lasting Service — useful wherever cords must change length or position. Extend to approximately six times its retracted length. Returns to its original shape or length when released. Eliminates tangling, twisting or knots. Cords are UL and CSA approved.

### POWER CORDS

**RETRACTED LENGTHS: 1, 2, 3 & 4 FT. EXTENDED LENGTHS: 6, 12, 18 & 25 FT.**
**UL APPROVED — NEOPRENE JACKETED CORD**
Operating Temperature: −20°C to +60°C

### RETRACTILE COMMUNICATION CORDS

**Retracted Lengths 2, 3 & 4 Ft. — Extended Lengths 12, 18 & 25 Ft.**

Multi-conductors stranded extra flexible #23 AWG 21/36 tinned soft copper for long flex life. Neoprene or "Danyon" plastic jacketed cable for long life. 120 volt working, current carrying capacity 1 amp. Nom. cond. resist. .022 ohms per linear foot, .185 ohms per retracted foot. For communication equipment such as ham operations, telephone car carriers, radio equipment, head sets, etc.
Operating Temp: −20°C to +60°C
Maximum Voltage: 100V

## FLAT RIBBON CABLE • TYPES B & C PER MIL-W-16878D•UL FR-1 • STIK KLIPS

**DESCRIPTION:** Each conductor is stranded tinned copper with extruded PVC insulation bonded together to Form A Flat Ribbon Cable. Conductors separate easily for clean terminations with standard wire connectors, jacks and pins. Ribbon cable saves space and time on circuit interconnecting assemblies, wiring harnesses, sliding draws and drop assemblies, and simplifies identification. Resists acid, alkalis, flame, moisture, oil, solvents and fungus. Insulation passes U/L FR-1 Flame Test.

**TEMPERATURE RATING:** −55°C to +105°C.

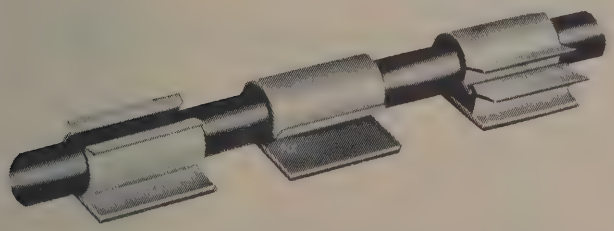
**RIBBON CABLE STIK KLIPS AVAILABLE FROM STOCK**

## STIK KLIPS™ • TENSION CLIPS • COMPONENT CLIPS

### DABURN STIK KLIPS™ — SELF ADHESIVE



For fast secure mounting on smooth surfaces. No need to screw, nail or staple in place. Fastens in a flash — just peel off the protective backing and press in place on a clean, dry surface. For best results allow a few seconds for adhesive to set before applying load.

These plastic clips are insulating, strong and elastic. They have many uses, such as keeping telephone wires off the floor, holding wire, cable, tubing, rods, etc. in position.

Material: PVC
Color: Gray
Temp. Range: −10°F to +175°F

# DEARBORN WIRE AND CABLE

**We Stock one of the most comprehensive inventories of wire, cable and insulation in the United States. In most cases we can ship your needs within 24 hours.**

Dearborn will also custom fabricate to your specifications. Our services include Special Cables, Neoprene Jacketing, Striping, Marking, Numbering, Lettering, Cutting and Stripping, Terminating, Harness Assemblies, Molded Plugs and Cord Sets, and Cabling. Any combination of conductors with special braids or shields can be made into a cable to your exact requirements by our special order department. We will be pleased to quote on your blueprints, sketches, or job specifications.

**Yes. We Have It!** The vast selection of merchandise listed on the following pages represents only a partial amount of the thousands of wire, cable and insulation items stocked by Dearborn.

Our 52 page catalog will give you full details on the complete Dearborn line. Send for it, or call us for information on stock or special constructions.

**Remember, Dearborn Offers Immediate Delivery From One of the Industry's Most Complete Wire & Cable Inventories.**

**MIL-SPEC, U.L. AND CSA APPROVED**

- Aircraft Wire
- Appliance Wire
- Audio Cable
- Automotive Wire
- Coaxial Cable
- Computer Cable
- Control Cable
- Foil Shielded Cable
- Hookup Wire
- Instrumentation Cable
- Intercom Cable

# DEARBORN WIRE AND CABLE COMPANY

# Multi-conductor Shielded and Unshielded Control Cables

**• RUBBER • NEOPRENE • PLASTIC**

### RUBBER — UNSHIELDED

Stranded tinned copper conductors, color coded rubber insulation. Cabled with fillers; cotton wrapped; tough rubber jacket overall. These cables are extremely flexible and are suitable for heavy duty usage. **Temperature rating:** −20°C to +60°C. Insulation thickness on individual conductors is .020″.

### RUBBER — SHIELDED

**RUBBER JACKETED.** Conductors of stranded tinned copper, with color coded .020″ rubber insulation*. Cabled with fillers; cotton wrapped; braided tinned copper shield. Cotton wrap and tough black rubber jacket overall. Used for control circuit, studios, audio circuits, etc., where shielded cable is necessary. **Temperature rating:** −20° to +60°C.
* .040 on single conductor.

### PLASTIC SHIELDED

**PLASTIC JACKETED.** Conductors of stranded tinned copper, with color coded .014″ thick Polythylene insulation. Cabled with fillers; wrapped with rayon; shielded with braided tinned copper shield. Covered with chrome grey Polyvinylchloride jacket overall. **Temperature rating:** −20°C to +60°C. **Operating voltage:** 600 volts.

### NEOPRENE — SHIELDED

**NEOPRENE JACKETED.** Stranded tinned copper conductors, with color coded .020″ rubber insulation*. Cabled with fillers; cotton wrapped; braided tinned copper shield. Cotton wrap and tough black neoprene jacket overall. Used for control circuits, studios, audio circuits, etc., where shielded cable is necessary. **Temperature rating:** −20°C to +60°C
* .040 on single conductor.

# Computer Type Control Cables Miniature Styles 2343 and 2344

The cables listed below, either cabled pairs or multiconductor (not paired), with or without shield are suited for computer use.

The individual conductors are stranded tinned copper. Numbers 22, 24 are 7 strand, No. 20 is 19 strand. Insulated with .010″ wall of PVC to MIL-W-16878D Type B. On this usage, conductors are rated 105°C and 600 V. working voltage. The conductors also meet UL Style 1061, rated 80°C, 300 V. working voltage.

Conductors are cabled by the planetary method and laid contrahelically for best flexibility, with a Mylar tape barrier placed under shields. All shielded cables are of tinned copper braid overall of 85% - 90% coverage per MIL-C-7078.

The jacket over the shield is black 105°C Vinyl per MIL-I-631 Type F. All materials are fungus resistant and self extinguishing.

All items approved under UL STYLE 2343 or 2344* for computer usage: +80°C, 300 volts. On non-UL service can be used at 40°C to +105°C, 600 volts.

## MIL-SPEC MIL-W-16878D Hookup Wire Types B & C

**Single conductor, stranded tinned copper**

**TYPE B**
Insulation PVC .010" wall thickness, color coded. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 600 volts.

**TYPE B — NYLON**
Same as above but with clear nylon jacket (.003" wall) over PVC insulation increasing temperature rating to +115°C.

**TYPE B — PREBONDED**
Double tinned strands are heated which fuses the individual strands together in order to prevent fraying. Allows easy stripping and insertion in holes in lugs, circuit boards, etc. Color coded .010" PVC insulation to MIL-W-16878D. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 600 volts.

**TYPE C**
Insulation PVC .017" wall thickness. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 1000 volts.

**TYPE C — NYLON**
Same as above but with clear nylon jacket which increases temperature rating to +115°C.

**TYPE C — SHIELD AND NYLON JACKET**
Basic type C with 90% coverage braided tinned copper shield and clear nylon .005" jacket overall.

**COLOR CODE ON HOOKUP WIRE:** 0—Black • 1—Brown • 2—Red • 3—Orange • 4—Yellow • 5—Green • 6—Blue • 7—Violet • 8—Grey • 9—White • 90—White/Black • 91—White/Brown • 92—White/Red • 93—White/Orange • 94—White/Yellow • 95—White/Green • 96—White/Blue • 97—White/Violet • 98—White/Gray

## THE XLV IS ESPECIALLY SUITABLE FOR AEROSPACE, MILITARY AND INDUSTRIAL ELECTRONIC EQUIPMENT

Dual service hook-up wire insulated with a polyvinyl chloride which has been cross-linked by an irradiation process. This process changes the linear molecular configuration of the PVC and connects molecules through a network of chemical bonds. This specially processed insulation "XLV" becomes extremely burn-thru and heat resistant. The shrinkback or heat flow normally encountered when applying a hot soldering iron does not occur when using "XLV" hook-up wire.

This resistance to heat also prevents distortion of the insulation when the wire is subjected to temporary overloads and high temperatures.

Cross linking the PVC by irradiation also increases the abrasion resistance and makes it much superior to regular vinyl insulations.

The table below lists both the UL and military specifications to which "XLV" wire is manufactured.

**Note** that since the military and U.L. specifications vary, the temperature and voltage ratings assigned differ for the same wire as per the chart.

| SPECIFICATIONS | MAX. OPER. TEMPS. | MAXIMUM VOLTAGE |
|---|---|---|
| MIL-W-16878/1 TYPE B | 105°C | 600 V. RMS |
| U.L. AWM STYLE 1429 | 80°C | Voltage not specified for general appliance hook-up usage. 300 volt peak for electronic use only. |
| MIL-W-16878/2 TYPE C | 105°C | 1000 V. RMS. |
| U.L. AWM STYLE 1430 | 105°C | 300 VOLT RMS<br>600 VOLT PEAK<br>For electronic use only. |

# DEARBORN WIRE AND CABLE COMPANY

## CORONA RESISTANT HIGH VOLTAGE WIRE

- High Dielectric Strength
- Abrasion Resistant
- Flame Retardant
- Easy to Strip

**CONSTRUCTION**

**Conductors:** All conductors are tinned copper, flexible stranding. Also available on special order with: silver plated copper conductors, nickel plated copper conductors and pure nickel conductors. Pure nickel increases rating to 260°C (500°F). **Insulation:** High temperature, high voltage silicone rubber for easy stripping. High dielectric strength, flame retardant.

**APPLICATIONS**

Recommended for stoves, heaters, furnaces, dryers, motors, therapeutic devices, signs, lighting fixtures and special electronic devices where high temperatures are incurred. Military applications include use on jet aircraft, atomic submarines and related equipment

**COLOR:** Natural

**200°C SILICONE HIGH TEMPERATURE, HIGH VOLTAGE WIRE**

## Unshielded Audio Cable

**MULTICONDUCTOR PLASTIC JACKETED**
Stranded or solid tinned copper conductors. Color coded polyvinylchloride insulation. Conductors cabled and covered with a gray PVC jacket overall. Suitable for outdoor usage. Recommended for P.A. systems, intercom connecting cables, remote control circuits, relay circuits, telephones, and telemetering circuits.

**All inner conductors are U.L. styles as follows: No. 22 - Style 1061, Nos. 20, 18 and 16 are Style 1007, No. 14 and No. 12 are Styles 1335 and 1336.**
**Temperature ratings**
On Style 1061 and 1007 are −10°C to +80°C; on Styles 1335 and 1336 ratings are −10°C to +90°C.

## Unshielded Paired Conductors Intercom Cables, Plastic Jacketed

Stranded or solid tinned copper conductors. Color coded polyvinylchloride .010″ insulation. Conductors are twisted into pairs, cabled and jacketed overall with a gray PVC jacket. Temperature rating: −20°C to +80°C. Conductors are **U.L. Style 1061.**

Suitable for outdoor usage. Recommended for remote control circuits, relay circuits, balanced intercom systems, multiple speaker cable, telephones, call systems, etc. **Suggested operating voltage:** 300 volts maximum.

## KYNAR (UL)

## Insulated Hookup Wire for Wire Wrap Applications

Especially suited for computer, business machine usage and other areas where space is limited. (For automatic point to point application.)

The miniaturization of computers and business machines has created special problems in the wiring of components and associated programming equipment. Essentially there is a need for wire with a tough insulation that is resistant to abrasion and cold flow. It should function at operating temperatures up to 125°C. The Wire-Wrap type of termination requires a high conductivity low corrosive surface on the conductor. Dearborn Kynar insulated wire fulfills these needs.

## Service, Power and Replacement Cords and Cordage

### U.L. PARALLEL LAMP CORD

Stranded extra-flexible bare copper, parallel conductors, insulated with Rubber, (SP-1), or Polyvinyl (SPT-1 -SPT-2) or Neoprene (HPN). JACKET OVERALL. Slit in jacket between conductors for ease in separation. Applications: Small appliances, radios, clocks; the HPN is suitable for coffeemakers, fry pans, soldering irons, etc.
**Temperature Rating:** 20°C to +60°C. **Suggested Operating Voltage:** 300 V.

Construction: 18/2 SPT-1 or HPN cord with a molded plastic plug on one end and other end conductor split 1" stripped; twisted 5/8"

### EXTENSION CORD SETS

Flexible, 2 or 3 conductor, high quality black rubber cords. Black molded plastic male plug on one end, molded plastic female plug on other end. Will fit conventional sockets and plugs. **Voltage rating:** 300 volts. The 3 conductor cord is used where 1 conductor requires grounding, such as for hand tools, garden edgers, etc.
* This item supplied in grey.

### REPLACEMENT CORDS

Flexible high quality black Rubber, Plastic and Neoprene Cords. Types SV and SJ are rubber insulated and jacketed. Types SVT and SJT are plastic insulated and jacketed. Type SJO is rubber insulated and neoprene jacketed. One end has molded black plastic straight plug (either 2 prong or 3 prong depending on 2 or 3 conductor cable). The other end of the jacket is stripped back 1½" with 5/8" of the conductors stripped. **Voltage rating:** 300 volts. The 3 conductor cord is used where 1 conductor is required for grounding.
* This item supplied in grey.

## Shielded Microphone, Sound and Intercom Cables

### SOUND AND INTERCOM CABLES

Each conductor is solid or stranded tinned copper (See Chart), insulated with color coded polyvinylchloride. Conductors are twisted and shielded with either a spiral wrapped tinned copper shield or a tinned copper braided shield —20°C to +60°C. Ideal for all types of public address or sound work, recording studios, and other types of audio circuits requiring shielding. Sizes 16 thru 22 rated at 350 V working voltage. Sizes 14 and 12 are rated at 450 Volts working voltage. **.020" nom. jacket,** thk. of chrome PVC.

# DEARBORN WIRE AND CABLE COMPANY

## Multi-Conductor Unshielded Control Cable

## Neoprene or Plastic

### PLASTIC JACKETED 15/5 CONTROL CABLES, 600 VOLT, VN20, 90°C

Stranded bare copper conductors, insulated with .015"* PVC color coded insulation and .005" Nylon jacket over each conductor; cabled with fillers. Moisture resistant tape, and a black Polyvinyl-chloride jacket overall. Used for controlling temperature, voltage, pressure and relay circuits and many other electronic and electrical circuits. **All conductors color coded to IPCEA Standards (see bottom, this page).**

* .020" on sizes 14 and 12; .015" on size 16.

### RUBBER INSULATED CONDUCTORS, NEOPRENE JACKETED

Stranded bare copper conductors, with color coded rubber insulation; cabled with fillers; cotton wrapped; tough Neoprene jacket overall. Used for remote control circuits. Flexible stranding and heavy duty Neoprene jacket combined, make this cable suitable for outdoor usage under extreme conditions. Neoprene jacket resists sunlight, oil, moisture, ozone, abrasion and impact.

## Data and Audio Cable Miniature Sound Cable

### INDIVIDUALLY SHIELDED MULTIPLE PAIRS

Tinned copper conductors, either stranded or solid (see tables), insulated with high density color coded *.010" Polyethylene, conductors twisted into pairs. Along with a †22 gauge stranded tinned copper drain wire, each pair is shielded with a Mylar supported aluminum foil shield. Covered with a Grey PVC jacket overall. Used for all circuits requiring isolation between pairs. Especially suitable for multiple audio and data control circuits. Mylar Wrap between shields and jacket.

* .016" on #18 gauge † #20 on #18 gauge

### FOIL SHIELDED, PLASTIC JACKETED, MULTI-CONDUCTOR CABLE

Stranded tinned copper conductors, insulated with .015"‡ thick color coded Polyethylene insulation. Conductors are cabled and, along a No. 22§ tinned copper stranded drain wire laid parallel, are shielded with aluminum foil Mylar backed shield. Gray PVC jacket overall. This type of shielding provides 100% effective shielding and is suitable for audio and data work where cross talk must be reduced to a minimum. **Temperature rating:** −20°C to +60°C. **Operating voltage rating:** 400 volts.

§ No. 20 on No. 18, No. 16, No. 14.
‡.025" on No. 16, .032" on No. 14.

### 2 PAIR MINIATURE AUDIO AND SOUND CABLE

Tinned copper, .009"¶ Polypropylene insulation on 970001. 1 pair of black and red shielded with Mylar aluminum shield. Other pair of white and green twisted, not shielded. Both pairs twisted with #22 stranded T.C. drain wire and chrome vinyl jacket overall.

¶ .015" PVC on 970002

■ **POLYVINYL CHLORIDE "SM" 105°C U.L./MIL** This is a high temperature tubing meeting both U.L. and MIL-I-631C, Type F, Form U, Grade C, Class 1, (FUNGUS RESISTANT), Category 1 requirements. **Temperature rating:** −20°C to +105°C. **Specs:** MIL-I-631C, ASTM D-922 Grade C. U.L. File number on request.

■ **TFE TEFLON TUBING** Extruded TFE Teflon in three Wall Thicknesses. Lightwall: (.006" to .012"), Thinwall: (.009" to .015"), Standard: (.010" to .020").
**Operating Temperature Range:** −65°C to +250°C. Unaffected by soldering iron temperatures. Dearborn extruded Teflon tubing is chemically inert, has zero moisture absorption and its dielectric strength at high frequencies surpasses other types of insulation even at maximum operating temperatures.
These three wall thicknesses offer an excellent choice for use in miniaturization and compactness of design, especially where high heat, and a chemical solvent and corrosion resistant material is desired.
Meets requirements of— MIL-I-22129B, MIL-P-14077, MIL-P-14078, AMS-3651, AMS-3653.
**COLOR CODE:** 1—Clear or Natural • 2—Black • 3—Red • Other colors available on Special Order.
* Du Pont Trademark.

**STYLE ST-301 POLYOLEFIN HEAT SHRINKABLE TUBING TO MIL-I-23053B/5, U.L. APPROVED**

Dearborn Style ST-301 Heat Shrinkable Tubing is an irradiated, thermally stabilized, polyolefin product which meets or exceeds MIL-I-23053B/5, AMS 3636B and AMS 3637B. ST-301 shrinks to 50% of diameter at 121°C (250°F) in 7 seconds, and has an operating temperature range of −55°C (−67°F) to +135°C (+275°F).
MIL-I-23053/5 — CLASS I (COLORED INSULATION)
MIL-I-23053/5 — CLASS II (CLEAR INSULATION)

All sizes are shown and supplied in expanded inside diameters. Stock Colors: Black, Red, White and Clear. Clear is Non-Flame Retardant. All other colors are Flame Retardant under MIL-I-23053B/5. Additional colors available on special order. Supplied in either 4 Ft. or 6 Inch lengths, and 6 Inch Assortments. Suitable for all military applications as well as industrial and commercial uses.
**ST-301 Kit Assortments Available in 6" lengths. Assorted colors AST-301-1-6 — 3/64" thru 3/16" (30) Lengths. AST-301-2-6 — 1/4" thru 3/4" (16) Lengths.**

## Detects Faulty Circuits Instantly!

## CIRCUIT MONITOR

**HELPS PREVENT FIRE DAMAGE, AND LOSS!**

The Circuit Monitor detects whether or not proper ground and AC polarity are available from 115 Volt 3 wire power outlets for safe operation of power tools, appliances, office machines, lab and other electrical equipment. It does the job instantly and accurately without the inconvenience of handling probes and meters.

| Dearborn No. | Description |
|---|---|
| 5102B | Circuit Monitor in Box. |
| 5012C | Circuit Monitor on Card for Display Rack. |

**EASY TO USE.** Simply plug into 3 wire receptacle and lights on Circuit Monitor will indicate the following:

- **O & K** Circuit Okay
- **O only** Improper Ground
- **K only** Improper Neutral
- **O & X** Reversed Polarity
- **K & X** Reversed Ground
- **None** Power is OFF

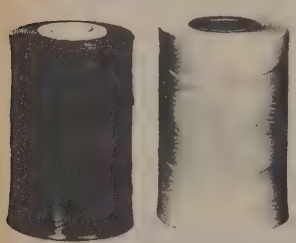
## Lacing Tapes and Twine Meeting and Exceeding Military and Commercial Specifications

**NYLON LACING TAPE MIL-T-43435 TYPE I**



- **INDUSTRIAL PRICING!**
- **SAME DAY SHIPMENT!**

Designed to Meet and Exceed MIL-T-713D, Type P, and MIL-T-43435 Types I, II, and IV, also AMS 3815, AMS 3816, AMS 3817.

**FINISHES AND COATINGS**

- **W — WAX, MIL SPEC "B"**

A microcrystalline fungicidal wax which exceeds military specifications, provides excellent knot retention and is suitable for either lacing or spot ties.

- **G — SYNTHETIC RUBBER, MIL SPEC "C"**

A special continuous coating of fungicidal synthetic elastomer (rubber) which exceeds Mil Spec requirements, ties easily and exhibits outstanding knot holding characteristics.

- **A — SYNTHETIC RESIN, MIL SPEC "E"**

A synthetic rubber-like resin formulated with fungicidal ingredients. Handling characteristics are excellent, knot retention is outstanding; meets or exceeds Mil Spec requirements. Operational Temperature Ranges: −67°F to +250°F on all items.

**NYLON LACING TWINE MIL-T-713D TYPE P**
Round twisted nylon fiber impregnated with microcrystalline fungicidal wax.

**POLYESTER LACING TAPE MIL-T-43335 TYPE II**
Flat braided polyester yarn impregnated with special finishes to military specifications. **Available in 500-yard spools.**

**NYLON LACING TAPE MIL-T-43435 TYPE I**
Flat braided high-tenacity nylon yarn impregnated with microcrystalline fungicidal wax or impregnations to meet military specifications. **Available in 500-yard spools.**

**NYLON LACING TAPE MIL-T-43435 TYPE I**
Flat braided high-tenacity nylon yarn impregnated with microcrystalline fungicidal wax or impregnations to meet military specifications. Available in 500-yard spools.

## MIL-W-5086A Unshielded Aircraft Wire

For use as airframe wire at temperatures within the range of −55°C to +105°C. Voltage rating is 600 volts. Both types are resistant to water, aircraft fuels, hydraulic fluid, oils, skydral, ethyleneglycol dilute acids, alcohol, alkalis, fungus and abrasion

**TYPE I — AN-22 THRU AN-12**
Single conductor stranded tinned copper with white PVC insulation and a clear (polyamide) nylon jacket overall.

**TYPE II — AN-22 THRU AN-12**
Single conductor stranded tinned copper with white PVC insulation white glass braid and a clear nylon jacket overall

**TYPE II — AN-10 THRU AN-0000**
Single conductor stranded tinned copper with white PVC insulation, white glass braid, flame retardant nylon lacquered nylon braid overall

## MIL-W-8777B- MS 25471 Silicone Aircraft Wire

These wires are intended for installation in aircraft electrical systems where potential does not exceed 600 volts (RMS). Temperature limits are −55°C to +200°C. Single conductor silver plated copper, silicone rubber insulation, glass and dacron braid impregnated with high temperature lacquer and a white dacron braid and high temperature lacquer overall. Resistant to aircraft fuels, hydraulic fluid, oils, water, skydral, ethyleneglycol, dilute acids, alcohol, alakalis, fungus and abrasion.

## Consult Us for MIL-W-5086A - MIL-C-7078A Shielded Aircraft Wire for Electrical Systems

**BASE WIRE, MIL-W-5086A, TYPE I, MIL-C-7078A, TYPE I**
Stranded tinned copper conductors, with color coded Polyvinylchloride insulation and a clear Nylon jacket on each conductor; cabled, with a braided tinned copper shield (85% coverage) overall.

**BASE WIRE, MIL-W-5086A, TYPE II, MIL-C-7078A, TYPE I**
Stranded tinned copper conductors, insulated with white PVC, color coded glass braid on each conductor. Each conductor has clear Nylon jacket over glass braid insulation. Conductors are cabled and have braided tinned copper shield (85% coverage) overall.

**BASE WIRE, MIL-W-5086A, TYPE I, MIL-C-7078A, TYPE II**
Same as MIL-C-7078A, Type I, Base Wire, MIL-W-5086A, Type I, with addition of a clear Nylon jacket over the shield

**BASE WIRE, MIL-W-5086A, TYPE II, MIL-C-7078A, TYPE II**
Same as MIL-C-7078A, Type I, Base Wire, MIL-W-5086A, Type II, with addition of clear Nylon jacket over the shield.

**GENERAL CHARACTERISTICS** —Temperature rating: −55°C to +105°C. Voltage rating: 600 Volts. Resistant to effects of oil, water, hydraulic fuel, skydrol aircraft fuels, ethyleneglycol, alcohol, dilute acids, alkalis, fungus, and abrasion

| TYPE VII | Teflon (PTFE) | −55°C to +250°C |
| TYPE VIII | Synthetic Rubber | −55°C to +75°C |
| TYPE IX | Teflon (FEP) | −55°C to +200°C |

### EXPLANATION OF NOMENCLATURE

### CENTER CABLE CONDUCTORS

Center cable conductors may be solid or stranded wires, or in some cases, a tube. Selection is made on the mechanical and electrical properties desired. Solid wires result in lowest cable attentuation. Stranding permits increased cable flexibility but also increases attenuation. Bare, tinned, or silver plated copper wire is usually used for center conductors. Other materials are Copperweld, Cadmium Bronze, Aluminum, Nichrome and Karma.

### DIELECTRICS (CABLE)

#### EXTRUDED POLYETHYLENE

Low cost, flexibility, ease of application, high dielectric strength and low dielectric constant make it well suited for RF applications. It is the most commonly used low temperature cable dielectric.

#### FOAM CORE (CELLULAR POLYETHYLENE)

An excellent low temperature dielectric formed by expanding polyethylene with millions of bubbles of an inert gas. Its low dielectric constant of 1.5 for Foam Core compared to 2.26 for solid polyethylene permits the design of lower attenuation and low capacity cables.

#### TEFLON

Teflon will withstand high temperature applications. It has high dielectric strength and a very low dielectric constant. Its ability to withstand exposure to gases and liquids makes it the dielectric selected where other materials would be inadequate.

### CABLE OUTER CONDUCTORS

#### SHIELDS† OR BRAID

The outer conductor is usually made of a metal braid but it can be a solid tube. The braid is used where flexibility is a vital factor; the tubular construction is used where a high degree of shielding is required. Tubular construction also provides lower cable attenuation. Two adjacent braids offer better shielding action than one braid. Generally speaking braids are either copper, tinned copper or silver plated copper.

† Armor

## Cable Jacket Types

**TYPE I (MIL-C-17)—Description:** Black Polyvinylchloride. **Characteristics:** Excellent weathering and abrasion properties, but is of the contaminating type and will cause cable attenuation to increase with age. Can be used for direct burial.

**TYPE II (JAN-C-17A)—Description:** Grey Polyvinylchloride. **Characteristics:** A semi-noncontaminating jacket.

**TYPE IIA (MIL-C-17)—Description:** Black or Grey Polyvinylchloride. **Characteristics:** Noncontaminating. Good weathering and abrasion resistant properties. Can be used for direct burial.

**TYPE IIIA (MIL-C-17)—Description:** Black Polyethylene. **Characteristics:** Moisture resistant, abrasion resistant, defies ultra violet damage. Noncontaminating; recommended for direct burial.

**TYPE IV (MIL-C-17)—Description:** Black Synthetic Rubber. **Characteristics:** This jacket material is used only on high voltage pulse cables. The basic material is polymerized chloroprene.

**TYPE V (MIL-C-17)—Description:** Fiberglas Braid. **Characteristics:** Impregnated with silicone varnish to provide abrasion resistance and a moisture seal.

**TYPE VI (MIL-C-17—Description:** Silicone Rubber Dacron Braid. **Characteristics:** Two wraps of silicone rubber impregnated fiberglass tape which is fused into a homogeneous layer. A dacron braid is applied, followed by a high temperature fluorocarbon lacquer.

**TYPE VII (MIL-C-17)—Description:** Teflon (Polytetrafluordethyene). **Characteristics:** Either extruded or tape wrapped. Withstands high temperatures; chemically inert; insoluble in liquids and gases.

**TYPE VIII (MIL-C-17)—Description::** Synthetic Rubber. **Characteristics:** This material is a polychloroprene compound and is used with only a few pulse cables. Its primary use is as a jacket material for multiconductor cables.

**TYPE IX (MIL-C-17)—Description:** Teflon (Fluorinated Ethylene Propylene). **Characteristics:** Excellent weathering properties and chemically inert. Maximum operating temperature of 200°C.

# DEARBORN WIRE AND CABLE COMPANY

## Automotive Wire

**TYPE G.P.T. — SAE, TYPE I, PRIMARY WIRE**
Single conductor, stranded bare copper. Color coded polyvinylchloride insulation. Resistant to grease, oil, gasoline, acid and ageing.

**G.P.T. SAE TYPE 1 AUTOMOTIVE WIRE**

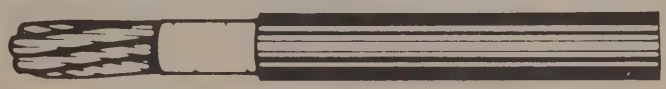
## Welding Cable



**INDUSTRO-FLEX NEOPRENE WELDING CABLE**
The Industro-Flex Neoprene Series is a new development which utilizes No. 30 stranding. It has a smaller O.D. and still retains flexibility at lower prices than the standard Neoprene welding cable.

**NEOPRENE AND RUBBER WELDING CABLES**
These cables are constructed of stranded bare copper conductors, with a tape wrap and either a neoprene or rubber jacket overall as specified in tables at right. All have extra fine stranding, are extremely flexible and have high resistance to abrasion, impact, flexing and twisting.

**INDUSTRO-FLEX NEOPRENE WELDING CABLE**

## Service and Power Cords — Rubber Neoprene and Plastic

**GENERAL CHARACTERISTICS**

**Temperature Rating:** −20°C to +60°C.
**Voltage Rating:** Types SV, SVT, SJ, SJT, and SJO are 300 V rated; Type S and SO are 600 V rated. On SJO two types are listed: Stationary and Constant Service. Constant Service has more flexible stranding.

**TYPES SV, SJ AND S/RUBBER CORD CONSTRUCTION**
Conductors are stranded bare copper. Separator, color coded rubber insulation, cabled with fillers. Separator and tough rubber jacket overall.

**TYPES SVT AND SJT PLASTIC CORDS**
Types SVT and SJT are plastic insulated and plastic jacketed. Construction is same as SV and SJ. Jacket is black.

**TYPES SJO AND SO/NEOPRENE CORD CONSTRUCTION**
Conductors are stranded bare copper. Separator, color coded rubber insulation cabled with fillers. Separator and black neoprene jacket overall. Resistant to oil, grease, ozone, acid and moisture.

# DEARBORN WIRE AND CABLE COMPANY

### STYLE 1007, U.L. HOOK-UP WIRE

**Voltage rating:** 300 Volts. **Temperature rating:** −10°C to +80°C. 1/64" Polyvinylchloride insulation over stranded tinned copper.

### STYLE 1061, U.L. SEMI-RIGID BUSINESS MACHINE WIRE

**Voltage rating:** 300 Volts. **Temperature rating:** −10°C to +80°C. .009" Polyvinylchloride insulation over solid or stranded tinned copper.

### "TEW" FLAME RETARDANT, FR-1 STYLES 1015, 1028, 1283, 1284 600 VOLT, 105°C AND FR-1 STYLE 1007, 300 VOLT, 80°C

The polyvinylchloride insulation used on this series has the necessary additives that enable the wire to pass the Vertical Flame Test as prescribed by the Underwriter Laboratories for this UL style. All this wire is imprinted with the symbol FR-1 indicating it is covered by the above specifications.

## Thermoplastic Insulated Hookup Wire

U.L. AND C.S.A. APPROVED

### X-L POLYETHYLENE, U.L. STYLES 3173, 3199, 125°C — 600 VOLT, 105°C — 300 VOLT

The Polyethylene insulation used on this series of lead wire is chemically cross-linked, which increases the moisture resistance, solvent resistance and aging characteristics. When momentary high temperatures caused by overloads or shorts occur, the insulation does not deform as quickly as if not cross-linked. Typical applications include small motors, control panels, dry transformers, etc. **Recommended maximum baking cycles:** 300°F for 24 hrs. — 325°F for 12 hrs. — 350°F for 8 hours.

# DEARBORN WIRE AND CABLE COMPANY

## U.L. Listed
## High Temperature Teflon* Wire

Dearborn supplies a variety of high temperature insulated wires that are listed by the Underwriters Laboratories. The types shown here fall into the category of appliance wiring material (AWM) and are covered by the Flexible Cord and Fixture Wire Standard and UL Standard 758.1 for insulated single conductor appliance wiring material. Among a variety of requirements, the latter document assigns ratings regarding the duty group, flame retardance, temperature rating, voltage rating, service flexibility, resistance to abnormal temperature, oil resistance, water resistance and gasoline resistance where applicable. All of the following Underwriters styles are flame retardant and will satisfy the FR-1 designation of UL.

This section lists only the most commonly used conductors. In many instances, the Underwriter's Laboratories allow the use of other materials. Consult factory for further details.

**UL STYLES 1164 AND 1180**

**CONDUCTOR:** Silver plated copper. On special order nickel plated copper conductors are available. **INSULATION:** Extruded "Teflon" TFE, .013" min. (average) wall. **TEMPERATURE RATING:** UL 1180-200°C. **VOLTAGE RATING:** 300 volts rms. **USE:** For internal wiring of appliances, also suitable for immersion in gasoline, gasoline vapor and 80°C oil. **TEMPERATURE IDENTIFICATION MARKER:** UL 1164-Brown, UL 1180-Black. Dearborn standard temperature identification is a longitudinally applied stripe in size 18 AWG and larger. Sizes 20 AWG and smaller do not require temperature identification. Upon request and at an additional charge, surface printing can be provided.

**UL STYLES 1226 AND 1227**

**CONDUCTOR:** Tin plated copper. Constructions with silver plated copper or silver plated high strength high conductivity copper alloy are available on request. **INSULATION:** Extruded "Teflon" FEP, .008" min. (average) wall. **TEMPERATURE RATING:** UL 1226-80°C. UL 1227-105°C. **VOLTAGE RATING:** Not specified. **USE:** In office appliances where exposed to temperatures not exceeding 80°C and 105°C or oil at temperatures not exceeding 60°C, and where not subjected to undue mechanical abuse. Temperature identification of the wire is not required for these styles.

STOCK COLORS: 0-9

**UL STYLES 1330 AND 1331**

**CONDUCTOR:** Tin plated copper. **INSULATION:** Extruded "Teflon" FEP, .020" min. (average) wall, sizes 26-10 AWG, .030" min. (average) wall, sizes 8-2 AWG. **TEMPERATURE RATING:** UL 1330-200°C, may be used with tin plated copper conductors only where the individual strand diameter is .015" (26 AWG) or larger. UL 1331-150°C. **VOLTAGE RATING:** 600 volts rms. **USE:** For general appliance wiring where not subjected to temperatures exceeding 200°C for style 1330 (see above limiting note), or 150°C for style 1331. Suitable for immersion in gasoline, gasoline vapor and 80°C oil. Constructions with silver plated copper are available on request; this version has an unrestricted 200°C temperature rating for style 1330. For sizes 18 AWG and larger, temperature identification is indicated by a black marker thread for style 1330 and a brown marker thread for style 1331, located under the insulation. Sizes 20 AWG and smaller do not require temperature identification.

### THIN WALL INSULATION RATED AT 150 VOLTS AND 150°C

**CONDUCTOR:** Silver plated copper. Constructions with nickel plated copper or nickel conductor can be supplied. Consult factory for details. **INSULATION:** Extruded "Teflon "TFE, .010" (0.25mm) min. average wall thickness. Surface printed for product identification in sizes 24 AWG and larger. **USE:** For internal wiring of process control and computer equipment.

**STOCK COLORS: AWG SIZES 16 THROUGH 24 = 0-2-9. AWG SIZES 26 THROUGH 32 = 0-9.**

* For availability of other color and stripe combinations, consult factory.

## Appliance and Fixture Wire

U.L. LISTED

### SILICONE RUBBER TYPES

#### HIGH TEMPERATURE BRAIDLESS SILICONE RUBBER WIRE

Braidless silicone is easy stripping, and has excellent physical strength and mechanical properties. Recommended for stoves, dryers, motors and electronic devices where high temperatures are incurred. All conductors are of stranded tinned copper. U.L. Style 3212 — Sizes 10 thru 22; U.L. Style 3213 — Sizes 2 thru 8; Style 3214 — Sizes 00 thru 1.

#### HIGH TEMPERATURE SILICONE RUBBER WIRE WITH GLASS BRAID

High temperature silicone rubber insulation for easy stripping. Lacquered glass braid overall gives additional abrasion resistance. Lacquer prevents fraying of braid. Used for appliance and hookup wire. U.L. Style 3071 on AWG Sizes: Nos. 18, 16, 14, and 12. U.L. Style 3075 on AWG Size No. 10.

### ASBESTOS INSULATED TYPES

#### TYPE AA

U.L. Style C-2130, 150°C; 300 Volts. Designed for wiring of electric ranges, grills, space heaters and other types of electrical heating devices where heat but not moisture is present. Maximum copper temperature is 200°C (392°F).

#### TYPE AF

U.L. Style AF 3200, 150°C; 300 Volts. Stranded copper conductor; tape, felted asbestos insulation — flame, heat and moisture resistant. Approved for all types of interior illumination, particularly fluorescent devices, and all high wattage units, especially where socket temperatures exceed 90°C (194°F).

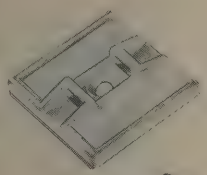
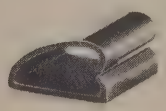
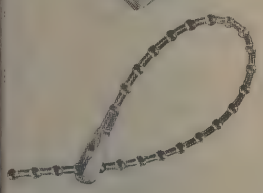
## ADDITIONAL FASTRAPS™ FASTENING PRODUCTS



**TIE MOUNT**
Molded Nylon. Adhesive Back and Screw Hole. Tie Slips Through Slots and Around Bundle. Available in Natural Nylon Color and Black. Approx. 1⅛" Square.



**CONVENIENCE CLAMP**
Adhesive Backed for Sure, Fast Mounting. Easily Opened to Add or Remove Wires. Approx. ¾" sq. and ½" High.



**BEADED CHAIN TIE**
Economical. Reusable. Easy to Use. Available in Nylon in Natural White and Polyethylene in Natural, Red, Yellow and Blue. 4, 5, 6, 8 and 10 Inch Lengths.

**PUSH MOUNT CLIPS**
Quick, Easy Method of Routing Wire or Cable. Easily Hand Installed. Tension Lock or Self Locking Styles. Accommodates up to 1" Diameters. Natural Nylon or Fire Retardant Nylon.

**CABLE CLAMPS**
Screw Down Clamp Provides Secure Fastening of Cable Bundles to Chassis. Choice of 26 Sizes That Accept From ⅛" to 1½" Bundles. Nylon, Fire Retardant Nylon or Polypropylene Materials.

FOR COMPLETE DESCRIPTION OF ALL FASTRAPS PLASTIC FASTENING PRODUCTS, SEE FASTRAPS CATALOG

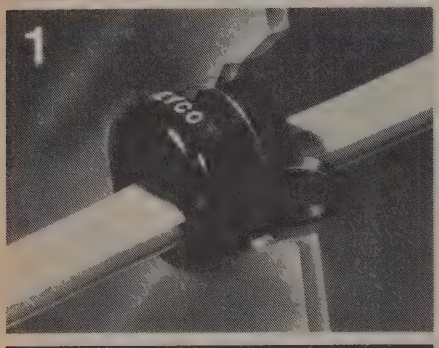
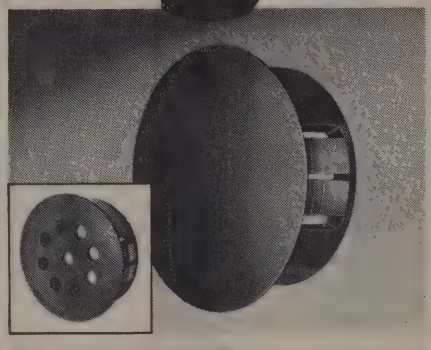
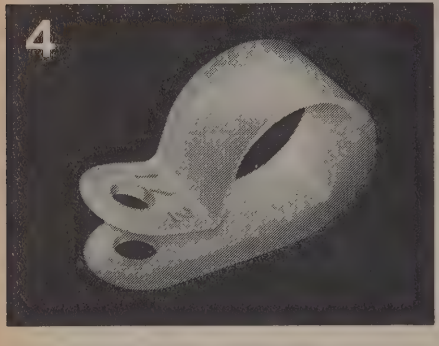
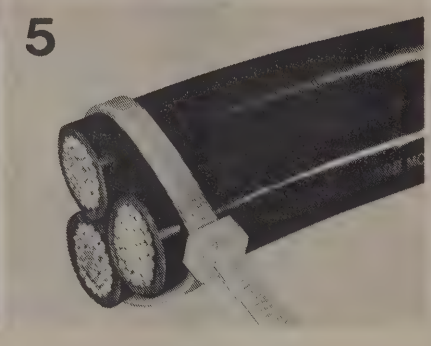
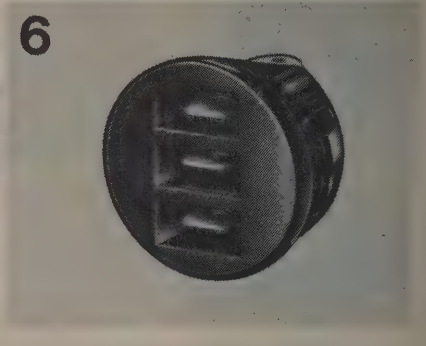
# Heyco® nylon bushings











**1. STRAIN RELIEF BUSHINGS**
Inexpensive way to securely anchor, insulate and protect cable at point of entry into chassis. Completely absorb push, pull and twist on wire. Approved for use in elevated temperatures. 58 sizes—for chassis holes from 3/8" through 1-3/16". Available for straight through, right angle or flexing applications.

**2. HOLE PLUGS**
For neat, low-cost closures of factory adjustment holes, wiring outlets and unnecessary openings. Snap-lock installation by finger pressure provides the quickest hole-closing method for assembly lines. Unaffected by elevated temperatures. 20 sizes—for panels up to 1/8" thickness, holes from 3/16" through 2" diameter. Also 2 sizes available with perforated head for ventilation.

**3. INSULATING BUSHINGS**
Convert sharp-edged metal holes to smooth, neat insulated holes. Quick, snap assembly with finger-tip pressur Will withstand 35 pound pushback tes Meets specifications for insulation anc mechanical protection of tubing, cables, etc.
Available in 51 sizes for 3/16" to 2-1/2" diameter holes with various I.D 5 sizes also available with split side.

**4. CABLE CLAMPS**
Anchor, insulate and direct cable, wiring, tubing and piping. Open ended for easy assembly. Fully radiused edges. 26 sizes—available in both standard and heavy duty types with inside diameters ranging from 1/8" to 1-1/2".

**5. WIRE TIES**
Nytye® self-locking wire ties for standard and heavy duty, regular and mountable applications. 21 sizes for bundling and holding cables, wires, hoses, etc. of 1/16" to 8-1/8" in diameter. Mounting platforms also available.

**6. TERMINAL BUSHINGS**
Provide low cost, fully insulated, quicl connecting and disconnecting of wire through panels or housing. Six sizes with 1, 2 or 3 terminals, in 8 colors for color coding. Choice of solder, double male or crimp terminals which mate with 3/16" or 1/4" standard female quick-connect terminals.

## Heyco Labkits®

**LABKIT No.1**
**Strain Relief Bushings**
188 piece working assortment for prototype and lab use.
**$12.50**

**Assembly Plier**
**$15.00**

**LABKIT No. 2**
**Insulating Bushings**
258 Snap and Shorty Bushings in 18 popular sizes.
**$12.50**

**LABKIT NO. 3**
**Hole Plug Assortment**
255 of the 18 most popular sizes instantly available for product design use.
**$12.50**

**LABKIT No. 4**
**Assortment for K. O.'s**
125 Insulating Bushings, Plugs and Strain Relief Bushings for ½ KO (⅞") and ¾ KO (1-3/32") holes. **$12.50**
**Strain Relief Assembly Plier**
**$15.00**

**LABKIT No. 5**
**Cable Clamps**
285 clamps of 18 different sizes, both standard and heavy duty for ⅛" to 1½" diameter applications.
**$12.50**

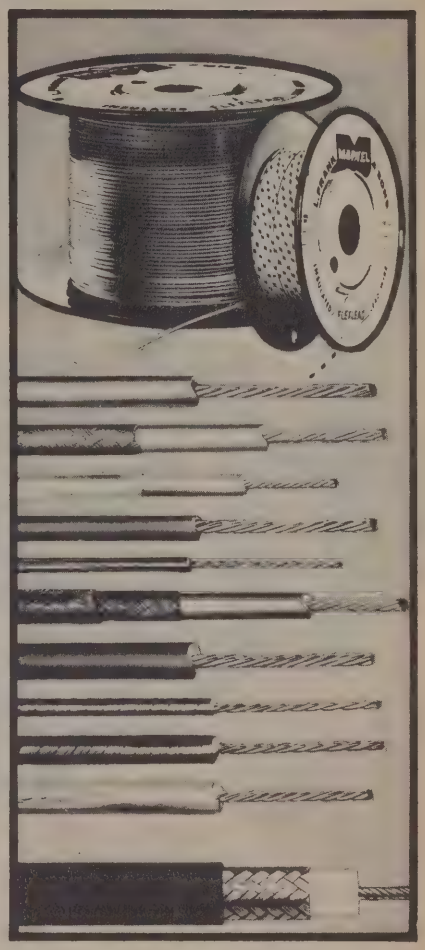
# MARKEL CORPORATION

## Insulating Tubings and Sleevings — High Temperature Wire and Cable

With Today's higher temperature requirements MARKEL can provide you — the customer — with insulated leadwire that delivers the protection and performance no other standard material can supply.



### FLEXLEAD SILICONE RUBBER WIRE AND CABLE

Flexlead Silicone Rubber Leadwire is recommended for high temperature applications in motors, heaters, high voltage power supplies, switches, consumer appliances, medical equipment, nuclear plant wiring, and fire resistant control cables.

- A diversified Standard Product Line
- Economy and Reliability
- Compliance with UL, CSA and Military Requirements
- Special Tailor-Made Constructions
- Ultra Flexible, Wide Temperature Range

### FLEXLEAD FLUOROCARBON WIRE AND CABLE

Flexlead Fluorocarbons (PFA, TFE, FEP, ETFE) are recommended for personal care and home appliances, aircraft, commercial and private communication systems, computers, business machines, electric motors and traction equipment — Anywhere the ultimate in performance is required.

- Inert to Lubricants, Solvents, and Reagents
- Non-Flammable in Normal Atmospheres
- Servicable in —70° to 260°C Environments
- Unsurpassed Electrical Performance
- Substantial Weight and Space Savings Over Conventional Insulations

As a manufacturer of wire and cable products . . . with warehouses on both East and West coasts, National Wire & Cable is ready to fill your immediate needs. Choose from our standard lines of wire or cable . . . OR let us design and custom manufacture exactly what you require for your application.

**Our wire inventory is now over 160 million feet, and our 500 different standard multi-conductor cables total in excess of 1.3 million feet!**

When you call National Wire, you'll find we are especially well equipped to handle your large as well as minimal requirements. If our "standard" items won't meet your application, we have the wire inventory, the machinery, the expertise to come up with exactly what you need. 86,000 square feet of manufacturing area and our expert engineering staff are at your disposal!!! All cable components are produced within our own facility in order to assure complete quality control.

Review the following catalog pages. If you need some assistance with your specific requirement, call our factory direct, or call our representative nearest you. See Manufacturers and Sales Office Directory Yellow Pages.

# Nafoil Kleen-Strip® Foil-Shielded Audio & Instrumentation Cables (NKS Series)

## COMPUTER GRADE U.L. LISTED SELF-STRIPPING FOIL SHIELD

**Self stripping feature saves preparation time . . . increases production.**

National Wire and Cable Corporation manufactures a full line of small shielded instrumentation cables using our "NAFOIL KLEEN-STRIP" self stripping foil shield construction, plus non-fraying NABOND bonded stranded conductors.

Since the foil shield of "NAFOIL KLEEN-STRIP" is integrally fusion-bonded to the cable jacket, stripping the jacket from the end of the cable automatically removes the foil shield in the same operation.

This eliminates hand untwisting and trimming of foil shields. Excellent for automatic machine stripping.

Insulated conductor and "drain" wire use National's "NABOND" bonded stranded wire which eliminates frayed wire ends. The "NABOND" process lightly bonds the tinning of all strands. "NABOND" wire acts like a solid wire during stripping and wiring operations. Subsequent flexure breaks the bonding and the wire returns to its flexible condition. Offers the convenience of solid wire during manufacture, with the reliability of stranded wire for normal use.

All wires are stranded, bonded, tinned copper with .010" vinyl insulation for use up to +80.C @ 300 volts (U.L. Style 1061). Also rated 105.C @ 600 volts per MIL-W-16878/1.

Foil shield is ½ MIL Mylar with .00035" Aluminum, 50% overlap. Bare drain wire is the same as used in insulated conductors.

Overall jacket is 105 C. polyvinyl chloride thermoplastic per MIL-I-631 Class B and exceeds U.L. requirements. Jacket wall thickness .031". For extra flexible applications, these cables are also available with .022" jacket wall.

### TECHNICAL DATA

| | |
|---|---|
| **U.L. Voltage Rating:** | 300. Volts RMS AC (U.L. Style 1061) |
| **Military Rating:** | 600. Volts RMS AC (Mil-W-16878/1) |
| **Breakdown Voltage:** | Greater than 3000. Volts RMS AC |
| **Insulation Leakage Resistance:** | Higher than 200. Megohms per 1000 ft at 500. V.D.C. from any conductor to all else. |
| **Jacket Leakage Resistance:** | Higher than 10 Megohms per 1000 ft at 500. V.D.C. from shield through Jacket to water bath. |
| **Capacitance:** | See Table Below. |
| **Shield Leakage Capacitance:** | Nominal "Look-Through" capacitance from conductor group through the shield to water bath is less than 2.pf/1000 ft. Reinforcing action of bonded jacket reduces "Window" effects caused by flexure. |
| **Usable Temp. Range:** | U.L. +80°<br>Military: −40° to +105°C |
| **Cold Bend:** | All cables are suitable for flexing to a circle diameter of approx. 6 cable diameters from +80°C to −40°C. |

# Miniature Signal & Control Cables Single Conductors (NX Series)

(NX1922SJ shown)

National Wire & Cable Corporation manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010" wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type B. Insulated for 600 volts working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier under shields. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. LISTED STYLE 2343 COMPUTER CABLE; rated 80°C. (Higher temp. ratings apply for any non-U.L. service.)

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

## IN STOCK

**MIL-SPEC U.L. LISTED COMPUTER GRADE STYLE 2343**

For light duty, gray jacketed version of these cables in the U.L. Style 2464, see Pages 4680-4683 NQ Series.

### TECHNICAL DATA (all cables)

**Insulation Breakdown Voltage:** Greater than 5000 volts AC RMS, 60 cps.

**Capacitance:** Nominal capacitance from a wire to all else in a cable ranges from 45. to 70. pf/ft. at 1. kc, depending on gauge and position.

**Insulation Leakage:** 200. megohms/1000 ft. min. @ 500. VDC from any conductor to all else in cable.

**Sheath Leakage:** 10. megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.

**Temperature Range:** Suitable for continuous use from −40°C. to +105°C. (U.L. Service limited to +80°C.)

**Bending Characteristics:** All cables are suitable for flexing to a circle diameter of 6. cable diameters from +105°C. to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C.

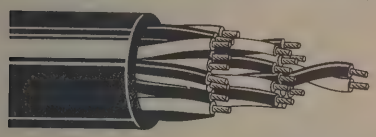
# Miniature Signal & Control Cables Twisted Pairs (NXP Series)



(NXP1924J shown)

**IN STOCK MIL-SPEC**

**U.L. LISTED COMPUTER GRADE STYLE 2343 & 2344**

For light duty, gray jacketed version of these cables in the U.L. Style 2464, see Pages 4670-4683 NQ Series.

National Wire & Cable Corporation manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010" wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type B. Insulated for 600 volts working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per table below.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier under shields. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. LISTED STYLE 2343 COMPUTER CABLE; rated 80°C. (Higher temp. ratings apply for any non-U.L. service.)

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.
* Denotes U.L. Style 2344.

## TECHNICAL DATA (all cables)

**Insulation Breakdown Voltage:** Greater than 5000 volts AC RMS, 60 cps.

**Capacitance:** Nominal capacitance from a wire to all else in a cable ranges from 45. to 70. pf/ft. at 1. kc, depending on gauge and position.

**Insulation Leakage:** 200. megohms/1000 ft. min. @ 500. VDC from any conductor to all else in cable.

**Sheath Leakage:** 10. megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.

**Temperature Range:** Suitable for continuous use from −40°C. to +105°C. (U.L. Service limited to +80°C.)

**Bending Characteristics:** All cables are suitable for flexing to a circle diameter of 6. cable diameters from +105°C. to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C.

**Impedance: (24. AWG pairs)** **Balanced: 87. ohms ±5%** **Unbalanced: 52. ohms ±5%**

# Heavy Duty Signal & Control Cables Single Conductors (NW Series)

(NW1918SJ shown)

**IN STOCK**

**MIL-SPEC U.L. LISTED — STYLE 2343 & 2344**

National Wire & Cable Corporation manufactures a complete line of multiple conductor control cable. Conductors are stranded tinned copper with 1/64" wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type C.* Insulated for 1000 volts working voltage. Color coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape serve over cable bundle. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078, and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C vinyl meeting MIL-I-631 Class F. All materials are self-extinguishing and fungus resistant. All cables are U. L. LISTED STYLE 2343; rated 80°C. (Higher temp. ratings apply to any non-U.L. service.) Specify polyurethane sheath for extreme rough usage or low-temp. service.

Standard Putups: 100, 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Insulated wires also meet U.L. style 1007 and CSA type TR-64.
† Denotes U.L. Style 2344.

## TECHNICAL DATA (all cables)

**Insulation Breakdown Voltage:** Greater than 8000 volts AC RMS, 60 cps.

**U.L. Voltage Rating:** 300 volts RMS AC (appliance use). 600 volts RMS AC (electronic use).

**Military Voltage Rating:** 1000 volts RMS.

**Capacitance:** Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on gauge and position.

**Insulation Leakage Res.:** 200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.

**Sheath Leakage Res.:** 10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.

**Usable Temp. Range:** Suitable for continuous use from +105°C to −55°C.

**Cold Bending Capability:** All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C. For continuous flexing applications consult factory.

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

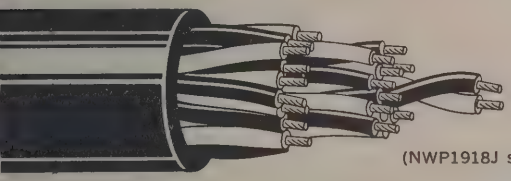
# Heavy Duty Signal & Control Cables Twisted Pairs (NWP Series)



(NWP1918J shown)

**IN STOCK MIL-SPEC**
**U.L. LISTED**

**Identical to National's NW-Series Cables except offered as twisted pairs.**

National Wire & Cable Corporation manufactures a complete line of multiple pair control cables. Conductors are of tinned copper strand with 1/64" vinyl primary insulation for use up to 105°C per MIL-W-16878D Type C. Insulated for **1000** volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per table below.

All pairs are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black vinyl plastic per MIL-I-631; or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene at added cost).

## SHIELDED CABLES

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A.

## TECHNICAL DATA (all cables)

**Insulation Breakdown Voltage:** Greater than 8,000 volts AC RMS, 60 cps.

**Capacitance:** Nominal capacitance wire to wire for a pair ranges from 27. to 40. mmfd/ft. Capacitance from both wires tied together measured to all else in common ranges from 35. to 60. mmfd/ft. dependent on gauge and position. Overall shield has negligible effect on W-W capacitance.

**Insulation Leakage Res.:** 200. megohms / 1000 ft. min. at 500 VDC from any conductor to all else in cable.

**Sheath Leakage Res.:** 10. megohms / 1000 ft. min. at 500 VDC from overall shield through sheath to outside world.

**Usable Temp. Range:** Suitable for continuous use from +105°C to −55°C.

**Cold Bending Capability:** All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C. For continuous flexing applications consult factory.

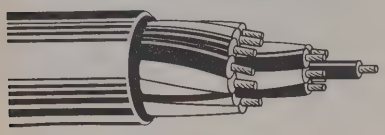
# Miniature Signal & Control Cables Single Conductors (NQ Series)

## *EXTRA FLEXIBLE — GRAY PVC JACKET*



(NQ1928J shown)

GRAY PVC JACKET

National Wire & Cable Corporation manufactures a complete line of highly flexible micro-miniature low-voltage instrument control cable. These are available as cabled pairs or singles, with optional overall shield of either foil with drain or a braided shield. Stocked with braided shields.

Conductors are stranded tinned copper with .010" wall of tough extruded polyvinyl chloride primary insulation, rated for 300 volt use at +80°C under U. L. listed style 1061.* All are color coded using ten standard colors plus white with stripes per MIL-STD-681. Coded pairs use the same sequence as type NXP and NWP.

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under braids. Shielded cables have a tinned copper braid of 90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback; or have a 100% coverage foil shield in intimate contact with a drain wire for easy termination. See Section 3 of our master catalog for relative shield effectiveness.

Outer jacket is highly flexible abrasion-resistant gray polyvinyl chloride thermoplastic, meeting the requirements of U.L. listed style 2464.** C.S.A. listing on request.

All materials are flame retardant and fungus resistant.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Wire also meets MIL-W-16878 type B, rated 600 volts, +105°C.

** Jacket material is military rated for +105°C; meets MIL-I-631, Class F.

## MIL-SPEC & U.L. LISTED — STYLE 2464

**TECHNICAL DATA (all cables)**

| | |
|---|---|
| **Insulation breakdown voltage:** | Greater than 3000 volts AC RMS, 60cps. |
| **Capacitance:** | Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 pf/ft at 1kc, depending on gauge and position. |
| **Insulation Leakage:** | 200 megohms/1000 feet minimum @ 500VDC from conductor to all else in cable. |
| **Sheath Leakage:** | 10 megohms/1000 feet minimum @ 500VDC from shield or conductor group through sheath to ground. |
| **Temperature Range:** | U.L. rating: +80°C per U.L. style 2464. Military: Continuous use from −40°C to +105°C. |
| **Bending Characteristics:** | All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°. For continuous flexing applications consult the factory. |
| **Foil Shielded Cables:** | The nominal overall diameter of foil shielded cables will be .006" greater than the non-shielded cables of the same conductor count and wire size. |
| **Characteristic Impedance: (NQP Paired Cables)** | Ranges from 150 ohms to 45 ohms, dependent on wire size (AWG), geometry and drive method. Consult our technical staff for data on specific cable types. |

## MULTI-CONDUCTOR STOCK CABLED SINGLES

Conductor sizes 28, 26, 24, 22 are 7 strand. All others 19 strand.

## *EXTRA FLEXIBLE — GRAY PVC JACKET*

(NQP1928J shown)

**MIL-SPEC & U.L. LISTED** **STYLE 2464**

GRAY PVC JACKET

National Wire & Cable Corporation manufactures a complete line of highly flexible micro-miniature low-voltage instrument control cable. These are available as cabled pairs or singles, with optional overall shield of either foil with drain or a braided shield. Stocked with braided shields.

Conductors are stranded tinned copper with .010" wall of tough extruded polyvinyl chloride primary insulation, rated for 300 volt use at +80°C under U. L. listed style 1061.* All are color coded using ten standard colors plus white with stripes per MIL-STD-681. Coded pairs use the same sequence as type NXP and NWP.

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under braids. Shielded cables have a tinned copper braid of 90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback; or have a 100% coverage foil shield in intimate contact with a drain wire for easy termination. See Section 3 of our master catalog for relative shield effectiveness.

Outer jacket is highly flexible abrasion-resistant gray polyvinyl chloride thermoplastic, meeting the requirements of U.L. listed style 2464.** C.S.A. listing on request.

All materials are flame retardant and fungus resistant.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Wire also meets MIL-W-16878 type B, rated 600 volts, +105°C.

** Jacket material is military rated for +105°C; meets MIL-I-631, Class F.

**TECHNICAL DATA (all cables)**

| | |
|---|---|
| **Insulation breakdown voltage:** | Greater than 3000 volts AC RMS, 60cps. |
| **Capacitance:** | Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 pf/ft at 1kc, depending on gauge and position. |
| **Insulation Leakage:** | 200 megohms/1000 feet minimum @ 500VDC from conductor to all else in cable. |
| **Sheath Leakage:** | 10 megohms/1000 feet minimum @ 500VDC from shield or conductor group through sheath to ground. |
| **Temperature Range:** | U.L. rating: +80°C per U.L. style 2464. Military: Continuous use from −40°C to +105°C. |
| **Bending Characteristics:** | All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°. For continuous flexing applications consult the factory. |
| **Foil Shielded Cables:** | The nominal overall diameter of foil shielded cables will be .006" greater than the non-shielded cables of the same conductor count and wire size. |
| **Characteristic Impedance: (NQP Paired Cables)** | Ranges from 150 ohms to 45 ohms, dependent on wire size (AWG), geometry and drive method. Consult our technical staff for data on specific cable types. |

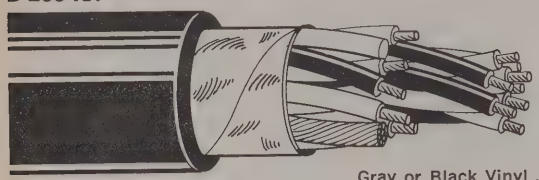
# Digital Data Transmission Cables (D-200 Series)

## Low Voltage Computer Cable

**THE D-200 SERIES CABLES ARE MULTIPLE-PAIR FLEXIBLE CABLES DESIGNED FOR TRANSMISSION OF DIGITAL PULSE SIGNALS BETWEEN A COMPUTER AND ITS PERIPHERAL EQUIPMENT.**

UL LISTED
U.S. Pat. No. 3489844

**D-200 XX** (XX designates number of pairs)



Gray or Black Vinyl Jackets

**D-200 XXRF** (RF designates braided shield)*

### DESIGN FEATURES OF THE D-200 SERIES DIGITAL DATA CABLE

Unlike conventional flexible cable construction, the primary features offered by the D-200 series data cable are the high and accurately controlled characteristic impedance of every pair, regardless of its position in the cable and special geometry chosen to reduce crosstalk.

ADVANTAGES

1. Less crosstalk and noise from mismatched loads, due to proper matching.
2. Uniform light loading on drivers allows direct I.C. drive, accurate prediction of current demands from power supply, and driver power dissipation.
3. Proper load match reduces re-flection and inversion noise where driver end is not matched to line. (Typical of TTL.)
4. Special geometry and pair construction provides exceptionally close capacitance balance between pair wires, reducing differential crosstalk.

USAGE

We recommend use of balanced drive and differential-input line receivers for lowest crosstalk and best pulse reproduction, utilizing the 110 ohm balanced impedance of the pairs. With such a system, TTL and MECL speeds have been used on D-200 cable at 1 mc data rates over 1000 ft.

Where the system is single-ended drive and receive, all pairs exhibit the 78 ohm impedance. Since these line receivers cannot discriminate between noise and the desired signal, crosstalk limits the cable distance over which transmission is reliable. Typical runs for DTL having 50 ns risetimes are 200 ft. Where risetimes can be slowed to longer than 100 ns, run lengths are practical to 500 ft. Without differential line reception, runs over 500 ft are not recommended for D-200 cable due to external noise aspects.

**The D-210 series cable are recommended for high noise or long-run application. (Utilizing individual shields.)**

Although use of balanced drive and differential line reception will avoid most noise problems, there are some installations where the expected external noise is unknown but assumed to be very great. Here, the use of data cables having individually-shielded pairs may be considered as conservative engineering practice. The assurance of a lower received noise may justify the increased size, cost and rise-time.

For these high noise-long run applications, Dynatronic Cable Engineering Corp has developed the D-210 series data cables. Electrical performance is essentially the same as the D-200 series cables, which use only an overall shield. *An overall tinned-copper shield braid may be specified on either series by the suffix -RF on the part number. Standard D-200 shield is aluminum-mylar foil.

For runs of 1000-5000 ft. or where extra-fast output pulse risetime is required, we offer the D-220 series cable: a larger version of the D-200 series having improved transmission properties with sufficient mechanical strength for long pulls in conduit. Consult factory for technical data.

PULSE TRANSMISSION LOSS in D-series data cables causes a moderate amplitude loss, with definite rounding of the leading and trailing edges from 50% to 90% amplitude. The photos below (for a 1.25 megabit clock rate) show typical waveforms. The D-220 and D-222 series cables offer even lower losses than the D-200 or D-210 cables for long-run or fast-clocked applications.

Contact our factory engineering staff for detailed pulse-shape versus distance information, or for special applications.

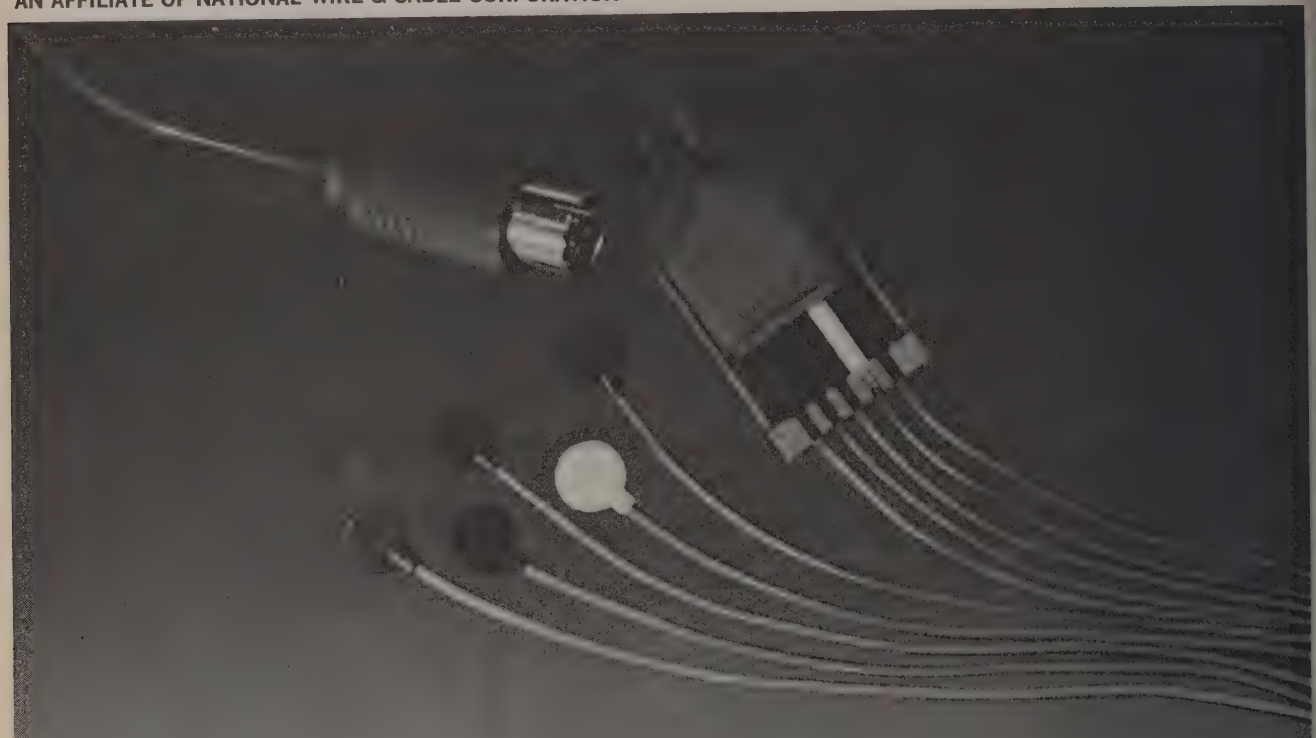
# NATIONAL CABLE MOLDING CORPORATION

AN AFFILIATE OF NATIONAL WIRE & CABLE CORPORATION

Dept. EM, 136 San Fernando Rd., Los Angeles, Calif. 90031
Phone (213) 225-5611, TWX: 910-321-4155, Fed. Stock Code H4-04569

## Molded Instrumentation Cables for all Types of Medical & Electronic Applications

AN AFFILIATE OF NATIONAL WIRE & CABLE CORPORATION



**SPECIALISTS IN INJECTION-MOLDING OF CONNECTORS DIRECTLY ONTO CABLE!**

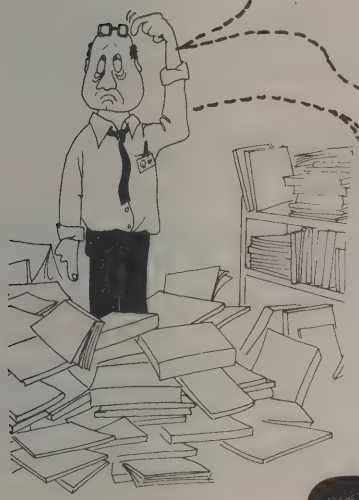
**INTEGRAL-MOLDED ELECTRONIC CABLE/CONNECTOR ASSEMBLIES**

Utilizing integral cable molding techniques, National Cable Molding Corporation (NCM) manufactures all components "in-house" from wire insulation to cable manufacture, connector assembly, tooling and molding the entire unit ready for use!

Write or call Mr. Frank W. Motley today for technical information or assistance. Phone: (213) 225-5611.

*What can I use to keep all the manufacturers' product data I receive in order?*

*What system makes filing or retrieving manufacturers' catalogs fast and easy?*



*Which file system have thousands of engineers purchased because they know it works?*

# eem FILE SYSTEM

## THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

**Here's how to order your eem FILE SYSTEM:**

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

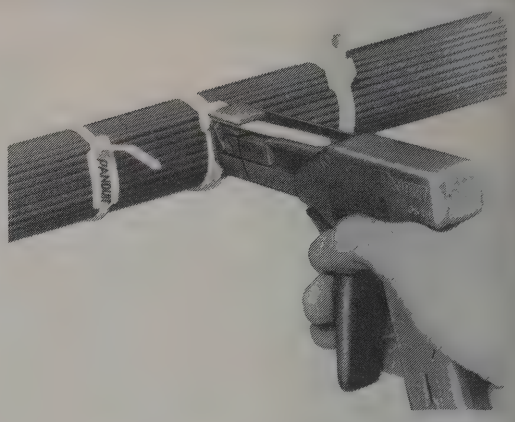
*UNITED TECHNICAL PUBLICATIONS, INC., DIV. OF COX BROADCASTING CORP., 645 STEWART AVE., GARDEN CITY, N.Y. 11530 (516) 222-2500*

# PANDUIT® wiring components

## PANDUIT® CABLE TIES

**. . . Engineered to reduce your total installed cost.**

- **The most complete line of Cable Ties, Clamps, Push Mounts and Marker Ties.**
- **Consistent quality assured by tests conducted by military and independent testing labs.**



Applicable sizes of PAN-TY and STA-STRAP cable ties are Recognized under Components Program of Underwriters' Laboratories, Inc. and meet applicable Mil Specs.

## PAN-TY® CABLE TIES

- Strong, one-piece, all nylon. Minimum loop tensile strength up to 250 lbs.
- 43 sizes available including lashing ties. For bundle diameters up to 12 inches.
- Fast — install quickly by hand or with PANDUIT® installation tools. Self-locking and releasable types available.
- Economical and versatile. Use to secure wires, cables, hoses.

### Cable Ties

| Part No. & Cross-section | Max. Bundle Dia. | Approx. Length | Min. Loop Tensile Strength |
|---|---|---|---|
| PLT1M Miniature Tie | 3/4" | 3 7/8" | 18 lbs. |
| PLT1.5M Miniature Tie | 1 1/4" | 5 5/8" | 18 lbs. |
| PLT1.5I Intermediate Tie | 1 1/4" | 5 5/8" | 40 lbs. |
| PLT1.5S Standard Tie | 1 1/2" | 6 3/8" | 50 lbs. |
| PLT2M Miniature Tie | 2" | 8" | 18 lbs. |
| PLT2I Intermediate Tie | 2" | 8" | 40 lbs. |
| PLT2S Standard Tie | 1 3/4" | 7 3/8" | 50 lbs. |
| PLT3I Intermediate Tie | 3" | 11 5/8" | 40 lbs. |
| PLT3S Standard Tie | 3" | 11 1/2" | 50 lbs. |
| PLT3H Heavy Tie | 3" | 11 3/8" | 120 lbs. |
| PLT4I Intermediate Tie | 4" | 14 5/8" | 40 lbs. |
| PLT4S Standard Tie | 4" | 14 1/2" | 50 lbs. |
| PLT4H Heavy Tie | 4" | 14 1/2" | 120 lbs. |
| PLT5H Heavy Tie | 5" | 17 3/4" | 175 lbs. |
| PLT6H Heavy Tie | 6" | 20 7/8" | 175 lbs. |
| PLT8H Heavy Tie | 9" | 30 5/8" | 175 lbs. |

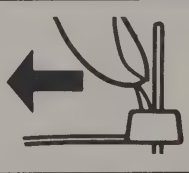
### Clamps

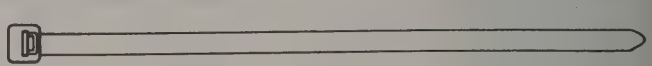
| | | | |
|---|---|---|---|
| PLC1M-S4 Miniature Clamp #4 Screw | 3/4" | 4 3/8" | 18 lbs. |
| PLC1.5I-S8 Intermediate Clamp #8 Screw | 1 1/4" | 6 1/8" | 30 lbs. |
| PLC2S-S6 Standard Clamp #6 Screw<br>PLC2S-S10 Standard Clamp #10 Screw | 1 3/4" | 7 7/8" | 50 lbs. |
| PLC4H-S25 Heavy Clamp 1/4" Screw | 4" | 15 1/4" | 120 lbs. |

ALL SIZES, STANDARD COLOR: NATURAL NYLON. ELEVEN COLORS AVAILABLE.

### Releasable Cable Ties

Exclusive design permits fast, easy release and reuse.



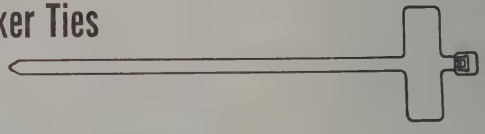


| | | | |
|---|---|---|---|
| PRT1.5S Standard Tie | 1 1/2" | 6 3/8" | 50 lbs. |
| PRT2S Standard Tie | 1 3/4" | 7 3/8" | 50 lbs. |
| PRT4S Standard Tie | 4" | 14 1/2" | 50 lbs. |

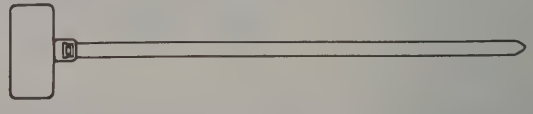
### Push Mount Ties

| Part No. & Cross-section | Max. Bundle Dia. | Approx. Length | Min. Loop Tensile Strength |
|---|---|---|---|
| PLP1.5I Intermediate Push Mount Tie | 1 1/4" | 6 1/8" | 30 lbs. |
| PLP2S Standard Push Mount Tie | 1 3/4" | 7 7/8" | 50 lbs. |

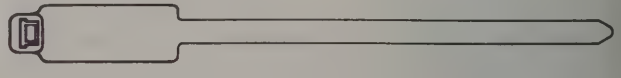
### Marker Ties



| | | | |
|---|---|---|---|
| PLM1M Miniature Marker Tie | 3/4" | 3 7/8" | 18 lbs. |
| PLM2M Miniature Marker Tie | 2" | 8" | 18 lbs. |



| | | | |
|---|---|---|---|
| PLF1M Miniature Flag Marker Tie | 3/4" | 4 3/8" | 18 lbs. |



| | | | |
|---|---|---|---|
| PLM2S Standard Marker Tie | 1 3/4" | 7 3/8" | 50 lbs. |
| PLM4S Standard Marker Tie | 4" | 14 5/8" | 50 lbs. |

# PANDUIT® wiring components

## STA-STRAP® CABLE TIES

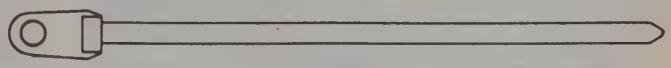
- Strong, all nylon.
- 21 sizes available for bundle diameters up to 8 inches.
- Zero threading force.
- Fast—install quickly by hand or with PANDUIT® installation tools. Self-locking, all are releasable prior to final tensioning.

### Cable Ties

| Part No. & Cross-section | Max. Bundle Dia. | Approx. Length | Min. Loop Tensile Strength |
|---|---|---|---|
| SST1M Miniature Tie | ¾″ | 4″ | 18 lbs. |
| SST1.5M Miniature Tie | 1¼″ | 5½″ | 18 lbs. |
| SST1.5I Intermediate Tie | 1¼″ | 5¼″ | 40 lbs. |
| SST1.5S Standard Tie | 1¼″ | 5¾″ | 50 lbs. |
| SST2I Intermediate Tie | 2″ | 8⅛″ | 40 lbs. |
| SST2S Standard Tie | 1¾″ | 6¾″ | 50 lbs. |
| SST2H Heavy Tie | 2″ | 8″ | 120 lbs. |
| SST3I Intermediate Tie | 3″ | 11″ | 40 lbs. |
| SST3S Standard Tie | 3″ | 11″ | 50 lbs. |
| SST4I Intermediate Tie | 4″ | 14¾″ | 40 lbs. |
| SST4S Standard Tie | 4″ | 15″ | 50 lbs. |
| SST4H Heavy Tie | 4″ | 14¾″ | 120 lbs. |
| SST8H Heavy Tie | 8″ | 27½″ | 120 lbs. |

ALL SIZES, STANDARD COLOR: NATURAL NYLON. ELEVEN COLORS AVAILABLE.

### Clamps



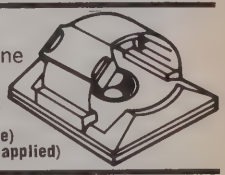
| Part No. & Cross-section | Max. Bundle Dia. | Approx. Length | Min. Loop Tensile Strength |
|---|---|---|---|
| SSC2S-S6 Standard Clamp #6 Screw | 1¾″ | 7⅜″ | 50 lbs. |
| SSC2S-S10 Standard Clamp #10 Screw | 1¾″ | 7⅜″ | 50 lbs. |
| SSC4S-S6 Standard Clamp #6 Screw | 4″ | 15⅝″ | 50 lbs. |
| SSC4S-S10 Standard Clamp #10 Screw | 4″ | 15⅝″ | 50 lbs. |
| SSC4H-S25 Heavy Clamp ¼″ Screw | 4″ | 15½″ | 120 lbs. |

### Marker Ties

| | | | |
|---|---|---|---|
| SSM2S Standard Marker Tie | 1¾″ | 6¾″ | 50 lbs. |
| SSM4S Standard Marker Tie | 4″ | 14⅞″ | 50 lbs. |

## PANDUIT® CLINCHER™ ADJUSTABLE, RELEASABLE CLAMP

- Combines wire bundling and mounting into one easy to use item.
- Available in adhesive or screw applied styles.
- Adjustable sizes, 3⁄16″ up to 1 1⁄16″. Releasable and reusable.



ARC.68-A (Adhesive)
ARC.68-S6 (Screw applied)

## PANDUIT® MOUNTING ACCESSORIES (Part of a Complete Selection)

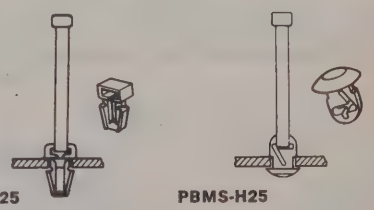
### ADHESIVE BACKED MOUNTS

- Convenient mounting method. Many types for different applications.

ABMM-A ABM2S-A ABMS-A MABMS-A

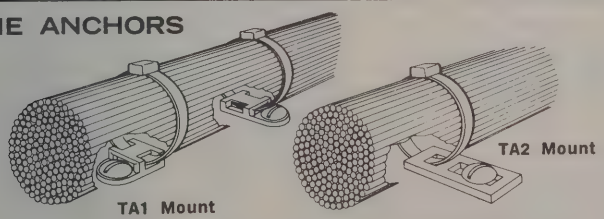
### PUSH MOUNTS

- For panel thickness ⅛″ max. Hole dia. nom. ¼″.



PM2H25 PBMS-H25

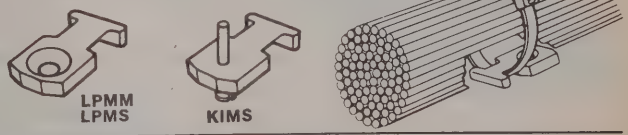
### TIE ANCHORS



TA1 Mount TA2 Mount

### LOW PROFILE MOUNTS

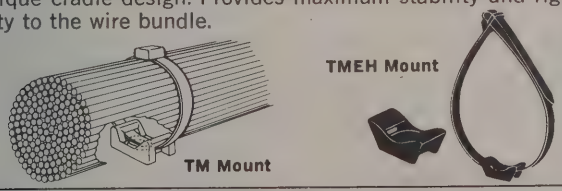
- Provide for low height when securing bundles to panels or other flat surfaces.



LPMM LPMS KIMS

### TIE MOUNTS

- Unique cradle design. Provides maximum stability and rigidity to the wire bundle.

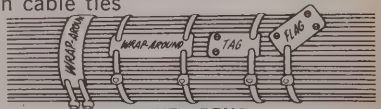


TM Mount TMEH Mount

### MARKER PLATES

- Provide clear, permanent identification
- Secured to bundles with cable ties
- Made of nylon
- 6 sizes available

MP150 — ¾″ x 1½″
MP175 — ¾″ x 1¾″
MP200 — ¾″ x 2″
MP250W175 — 1¾″ x 2½″
MP250 — ¾″ x 2½″
MP350 — ¾″ x 3½″



MARKER PENS
PX-0 Black PX-2 Red

- Used to mark nylon marker plates

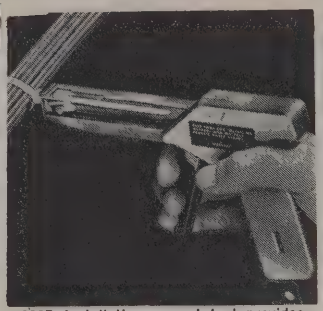
# PANDUIT® wiring components

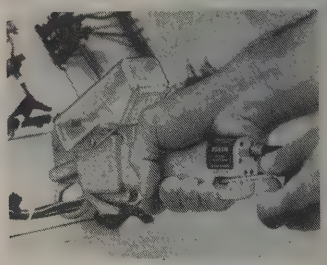
## PANDUIT® CABLE TIE INSTALLATION TOOLS

A complete tooling program to meet all production requirements for fast, neat harnessing.



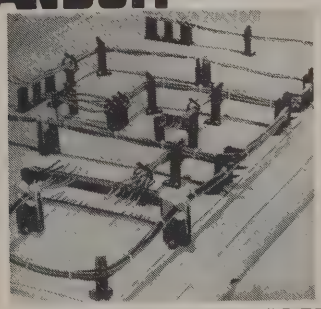
GS2B installation manual tool provides uniform tensioning and cutoff of all PANDUIT® miniature, intermediate and standard cross-section cable ties, clamps and markers; meets MIL-T-81306(AS), MS90387-1. Also available is GS4H manual installation tool for all standard and heavy ties; meets MIL-T-81306(AS), MS-90387-2.

PPTS hand-operated pneumatic cable tie installation tool. Installs all PANDUIT miniature, intermediate and standard cross-section cable ties, clamps and markers. Uses standard 70-80 psi air.



High Speed Production Tooling. PSA1M semi-automatic pneumatic installation tool — installs hand fed PLT1M ties, tensions and cuts off flush. Up to ¾" dia. bundle.
PAT1M automatic pneumatic installation tool — installs PLT1M from dispenser, tensions and cuts off flush, all in less than 1 sec. Up to ¾" dia. bundle.

## PANDUIT® HARNESS BOARD ACCESSORIES



### Elastic Retainers

Automatically form bundles as wires are inserted.
RER.75-S6 — up to ¾" bundle diameter.
RER1.25-S6 — up to 1¼" bundle diameter.

### Bundle Retainers

BR.5-E6 up to ½" bundle diameter.
BR.75-E6 up to ¾" bundle diameter.
Supports bundle above harness board at uniform height.

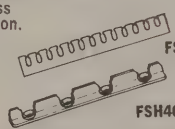
### Corner Posts

CPL.75-S8 (Low)
CPH.75-S8 (High)
Used to route wire bundles up to ¾" around corners on the harness board or a "T" junction.

### Spring Wire Breakout System

PBSC — Springs available in 1", 3", 6", 12" lengths.
SHH — Spring holder. For 1" and 3" PBSC springs.

### Fanning Strip & Holder



FS156 Fanning Strip

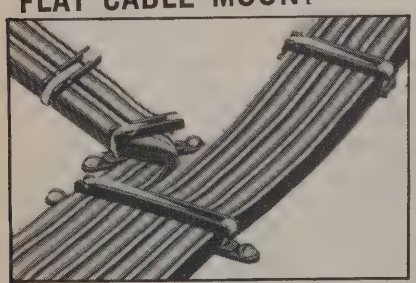
FSH40 Fanning Strip Holder

FSHH

For uniform height use RER.75, BR.75 (BR.5), CPH.75, SHH and FSHH. This height is suitable for use with PAT1M or PSA1M cable tie installation tools. This total system speeds harness fabrication thus lowering your total harness cost.

## ACCESSORIES FOR FLAT CABLE

### FLAT CABLE MOUNT



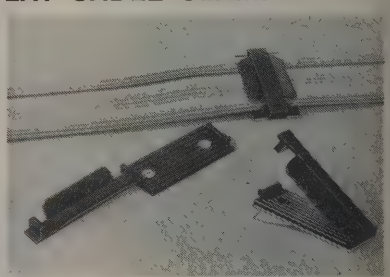
- Combination of PANDUIT® Cable Tie and unique Flat Cable Accessory provides . . . secure method of mounting or bundling flat cable.

- For Bundling use (2) Plates, (1) Tie.
- For Mounting use (1) Plate, (1) Base, (1) Tie.

| | Part No. | For Flat Cable Widths (up to) |
|---|---|---|
| PLATE | FCPI1 | 1" |
| | FCPI2 | 2" |
| | FCPI3 | 3" |
| BASE (Screw Mount) | FCBI1-S10 | 1" |
| | FCBI2-S10 | 2" |
| | FCBI3-S10 | 3" |
| BASE (Adhesive Supplied by User) | FCBI1-A | 1" |
| | FCBI2-A | 2" |
| | FCBI3-A | 3" |
| RIGHT ANGLE BASE (Screw Mount) | RAFCBI1-S10 | 1" |
| | RAFCBI2-S10 | 2" |
| | RAFCBI3-S10 | 3" |

Used with PAN-TY® Cable Tie, intermediate sizes.

### FLAT CABLE CLAMP



- Self-locking clamp for flat cable; width up to 2", height .17".
- Available in adhesive or screw applied style.
- Color: Black.

| Part Number | Mounting Method | For Flat Cable Width (up to) |
|---|---|---|
| FCM2-A-20 | Adhesive | 2" |
| FCM2-S6-20 | #6 Flat Head Screw | 2" |

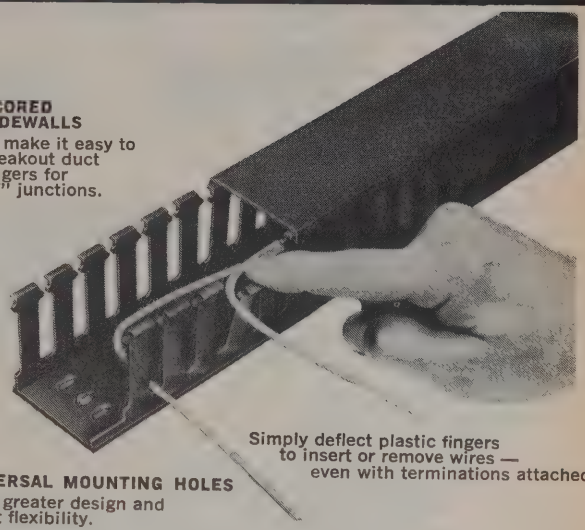
# PANDUIT® wiring components

## PANDUCT®

### PLASTIC WIRING DUCT — TYPE "E"

- Reduce your total installed costs with patented snap-in slot design:
  - — Holds breakout wires captive while providing complete accessibility for adding or removing wires — even with terminations attached.
  - — Result: your total cost is reduced during initial installation, wire tracing, trouble shooting and circuit revisions.
- Non-slip cover prevents vibration slippage, yet easy to install or remove.
- Standard color: Light gray. White and dark gray available. Standard length: 6 ft.
- Complete variety of accessories available for installation.
- Also available:
  Type "S" Solid Wall Duct
  Type "D" Round Hole Duct
  Type "NE" & "NS" Chlorine-Free, High-Temperature Duct



SCORED SIDEWALLS
— make it easy to breakout duct fingers for "T" junctions.
Simply deflect plastic fingers to insert or remove wires — even with terminations attached.
UNIVERSAL MOUNTING HOLES
— for greater design and layout flexibility.

Applicable sizes are recognized under Components Program of Underwriters' Laboratories, Inc.

MEETS J.I.C. REQUIREMENTS

| Nominal Duct Size W x H | Nominal Duct Size W x H | Nominal Duct Size W x H |
|---|---|---|
| .5 x .5 | 1 x 3 | 3 x 1 |
| .5 x .62 | 1 x 4 | 3 x 1.25 |

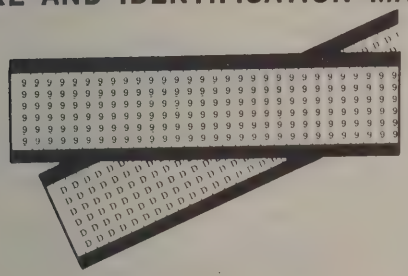
| 1 x 1 | 2 x 3 | 4 x 4 |
| 1 x 1.5 | 2 x 4 | 4 x 5 |
| 1 x 2 | 2.5 x 3 | |

## PANDUIT® INSTA-CODE™

### WIRE AND IDENTIFICATION MARKERS



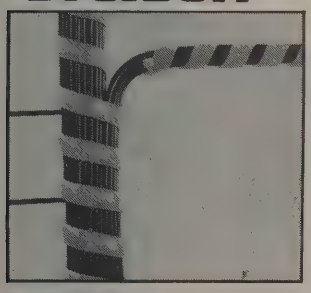
**FAST AND EASY WIRE IDENTIFICATION**

- Self adhesive
- Permanent
- Meet industry standards
- Wide selection

**CONVENIENT DISPENSER CARDS**

Solid numbers: 0-250
Consecutive numbers: 1-33, 34-66, 67-99, 100-124, 125-149, 150-174, 175-199
Solid letters: A-Z
Consecutive letters: A-Z and A-J
Solid symbols: T1, T2, T3, L1, L2, L3, +, −, GRD, GND, SPARE
Solid NEMA colors: 16 colors
Voltage markers: 100V thru 13,800V
Self-laminating wire and cable markers.
Safety signs.
**Plus handy books — with terminal markers. 16 assortments**

## PANDUIT™ SPIRAL WRAPPING



- Versatile. Wires can enter or leave at any point. Follows path of wires easily.
- Reusable.
- Available in three standard materials: Polyethylene, Flame Retardant Polyethylene, Nylon.
- Each available in three sizes: 1/16″-1/2″; 3/16″-2″; 3/4″-4″.
- Easily installed with tool supplied in each package.

## PAN-TERM®

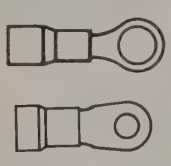
### TERMINALS, SPLICES, DISCONNECTS, WIRE JOINTS and INSTALLATION TOOLS

For specific details on the wide range of PAN-TERM terminal products to meet your requirements, contact your local Panduit Distributor or Sales Office.

Listed by Underwriters' Laboratories, Inc. and approved by Canadian Standards Association. PAN-TERM terminating devices have successfully passed the test requirements of U.L. specification 486 and CSA specification C22.2 No. 65 where indicated in Bulletin T-3 which lists the complete line.

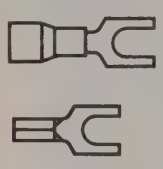
## TERMINALS

**Wire sizes from #26 through #2 AWG and stud sizes through ½".**

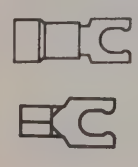


**RING TONGUE**
Nylon Insulated
TEFZEL* Insulated
Vinyl Insulated
Non-insulated
Available for #26-22, #22-18, #16-14, #12-10, #8, #6, and #2 wire. Stud sizes #2, #4, #6, #8, #10, ¼", 5/16", ⅜" and ½".

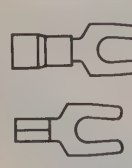
* TEFZEL Fluoropolymer Reg. TM, E. I. Dupont De Nemours Co.



**FORK TONGUE**
Nylon Insulated
Vinyl Insulated
Non-insulated
Available for #26-22, #22-18, #16-14 and #12-10 wire. Stud sizes #2, #4, #6, #8, #10 and ¼"

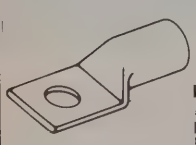


**SHORT LOCKING FORK**
Nylon Insulated
Vinyl Insulated
Non-insulated
Available for #22-18, #16-14 and #12-10 wire. Stud sizes #5, #6, #8, #10, ¼".

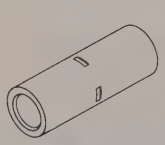


**LOCKING FORK**
Nylon Insulated
Vinyl Insulated
Non-insulated
Available for #22-18, #16-14 and #12-10 wire. Stud sizes #6, #8 and #10. Wide Locking Forks available.

## COMPRESSION CONNECTORS



**LUGS**
#8 AWG through 1000 MCM
For copper
For aluminum/copper



**SPLICES**
For copper

## DISCONNECTS

**Wire sizes from #22 through #10 AWG and tab sizes .250, .187, .145, and .110 by .032 or .020**

### FEMALE DISCONNECTS

**Vinyl Fully Pre-insulated Clear Vinyl**
Available for #22-18, #16-14 and #12-10 wire. Tab sizes .250 x .032 and .187 x .020

**Vinyl Insulated — Funnel Entry Insulation Grip Sleeve**
Available for #22-18 and #16-14 wire. Tab sizes .187 x .032 and .187 x .020

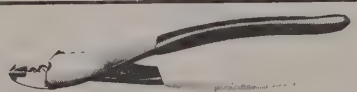
**Nylon Insulated Funnel Entry**
For #16-14 wire. Tab sizes .187 x .032 and .187 x .020

**Sleeved Barrel Vinyl and Non-Insulated**
Available for #22-18, #16-14 and #12-10 wire. Tab sizes .250 x .032, .187 x .020.

**Butted Seam Vinyl and Non-Insulated**
Available for #22-18 and #16-14 wire. Tab sizes .250 x .032 and .187 x .020

### MALE DISCONNECTS

**Vinyl and Non-Insulated Brazed Seam**
Available for #22-18 and #16-14 wire. Tab sizes .250 x .032 and .145 x .032



CT-200 Tool installs non-insulated PAN-TERM terminals, disconnects and splices on wire ranging from #10 to #22.

**Controlled Cycle Tools**

**HAND TOOLS**

**CT-500; CT-510; CT-520; CT-550; CT-570**
Precision made tools to provide TOOL-CONTROLLED crimps for PAN-TERM insulated and non-insulated terminals, splices, disconnects and wire joints on wire ranging from #10 to #22. Color coded handles readily identify the tool needed for parts being crimped.

## SPLICES

**Wire sizes from #26 through #10 AWG**

**Butt Type**
Nylon Insulated
Vinyl Insulated
Clear Vinyl Insulated

**Butt Type**
Non-insulated

**Parallel Type**
Nylon Insulated
Non-insulated

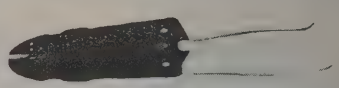
## WIRE JOINTS

**Capacities from (2) #24 to (4) #10 AWG wires**

**Nylon Insulated**
Four sizes. Range from minimum of (2) #24 to maximum of (4) #12 wires

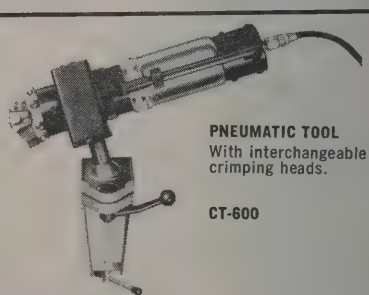
**Non-insulated**
Three sizes. Range from minimum of (2) #14 to maximum of (4) #10 wires

## INSTALLATION TOOLS



CT-100 Tool crimps PAN-TERM insulated and non-insulated terminals, splices, disconnects and wire joints on wire ranging from #10 to #22. Also cuts and strips wire, and cuts popular screws.

**CT-250** Tool installs insulated PAN-TERM terminals, disconnects, and splices on wire ranging from #10 to #22.



**PNEUMATIC TOOL**
With interchangeable crimping heads.

**CT-600**

# PHILADELPHIA INSULATED WIRE CO., INC.

Main Office and Factory

**333 NEW ALBANY ROAD / MOORESTOWN, N. J. 08057**
**(609) 235-6700 TOLL FREE 800-257-8357 TWX NO. 710-897-0187**

When P.I.W. was founded in 1820, the original product line was hoop-skirts for the ladies. In 1842, P.I.W. developed insulated wire by wrapping cotton around a bare copper conductor. This first insulated wire was produced for Samuel F. B. Morse, the inventor of the telegraph.

Originally located in Philadelphia, Pennsylvania, P.I.W. produced annunciator wire, litz wire, organ cables, connecting wire, polyvinylchloride hookup wire and cables, and various braided glass and cotton constructions.

In 1959, P.I.W. moved to new facilities in Moorestown, New Jersey, when it was purchased by the Wilbur B. Driver Company of Newark, New Jersey. This move served to establish P.I.W. as a greatly respected producer of high temperature insulated wire for the computer, aerospace and electronics industries.

From the beginning, the goal of P.I.W. has been to surpass the exacting standards required in the manufacture of high temperature insulated wire. P.I.W. continues to maintain the skill and proficiency which established a reputation for quality and service that has endured for over a century and a half. Quality products and efficient service remain top priorities at Philadelphia Insulated Wire Company, Inc.

P.I.W. has the capability of producing the following insulations: TFE and FEP Teflon, Polyethylene, Tefzel and Halar. PVC hookup wire and PVC control cables are also produced.

Complete information in P.I.W.'s outstanding line of insulated wire and cable is presented in this catalog, as well as technical descriptions denoting electrical characteristics, applications, packaging, etc. It has been impossible, however, within the confines of a catalog such as this, to set forth all the possible combinations of cable available. For more detailed information, please contact the nearest P.I.W. sales office.

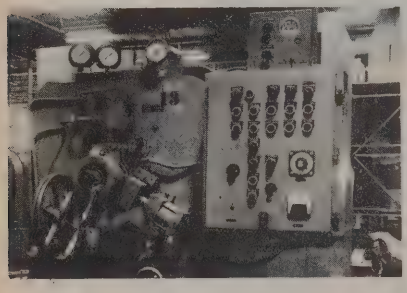
# P.I.W.'s Production Department consists of the following operations:



Paste Extrusion — (PTFE compounds)

Melt Extrusion — (FEP, Polyethylene, Tefzel, Halar, PVC, Nylon, etc.)

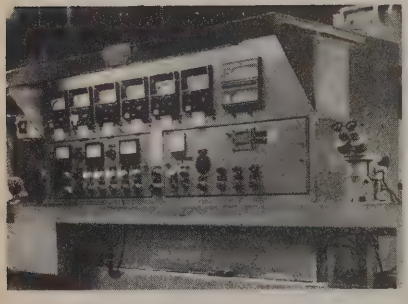
Tape Wrap — (PTFE, Polyester, etc.)

Shielding — (Silver Plated Copper, Tin Plated Copper, Nickel Plated Copper, Stainless Steel, etc.)

Braiding — (Cotton, Nylon, Glass, etc.)

Each department can produce a finished product or can function as an integral operation for more complex insulations.

Secondary operations include cabling, bonding, shielding, impregnating, striping, jacketing, etc., as well as developing insulated conductors for every application.



P.I.W serves as a prime source for the following types of wire and cable:

Air Frame Wire — (MIL-W-22759/9, 10, 11 & 12, Teflon)

Appliance Wire — (Teflon, Thermoplastic)

Business Machine Wire — (Teflon, Thermoplastic)

Building Wire — (Thermoplastic)

Cathodic Protection Cables — (High Molecular Weight Polyethylene, Teflon, Tefzel and Halar)

Coaxial Cables — (MIL-C-17D, Teflon Types)

Computer Wire — (Teflon, Tefzel, Halar, etc.)

Control Cables — (Multiconductor Cables, TFE and FEP Teflon, Tefzel, Halar, etc.)

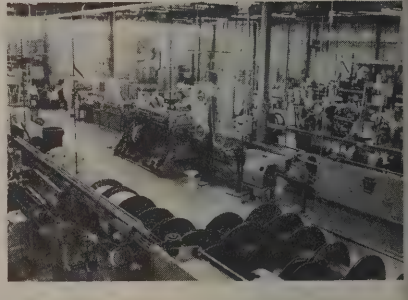
Fire Alarm Cables — (FEP Teflon)

Heating Cables and Electric Heating Wire — (Teflon, Thermoplastic)

Inter-communication Cables — (Thermoplastic)

Motor Lead Wire — (Teflon, Thermoplastic)

Organ Cables — (Thermoplastic)



P.I.W. has the ability to insulate a wide range of conductors from 32 gauge to 750 MCM depending upon type of insulation. Flexibility allows P.I.W. to make long high speed production runs, and incorporates design changes to meet rapid technological advances.

Our specialized equipment results in minimum time loss with maximum reliability; a significant factor in holding down costs, and providing optimum deliveries.

The extent of P.I.W.'s manufacturing facilities and equipment are shown in the illustrations on this page.

**Dielectric Test 2000V**
**Impulse Test 13.5KV Peak**
**Insulation Resistance 5000 Megohms/1000 Ft.**
**Coldbend 2 turns @ —65°C**
**Shrinkage 0.03" max. in 12" @ 290°C**

# PIW LEADWIRE-TEFLON** MILITARY

**P.I.W. Teflon hook-up wire is fabricated utilizing the most advanced techniques in extrusion and process control. The properties of Teflon, when combined with P.I.W. skill result in a product that can be used in severe temperature and environmental conditions. It has proven especially applicable to those situations requiring superior di-electric characteristics.**

# ...UNICABLE
# It's the "NEW" idea in WIRE

MANUFACTURED BY

## Philadelphia Insulated Wire Co., Inc.

A revolutionary concept in insulated wire. A unique approach to meet the needs of back plane wire and miniature cable.

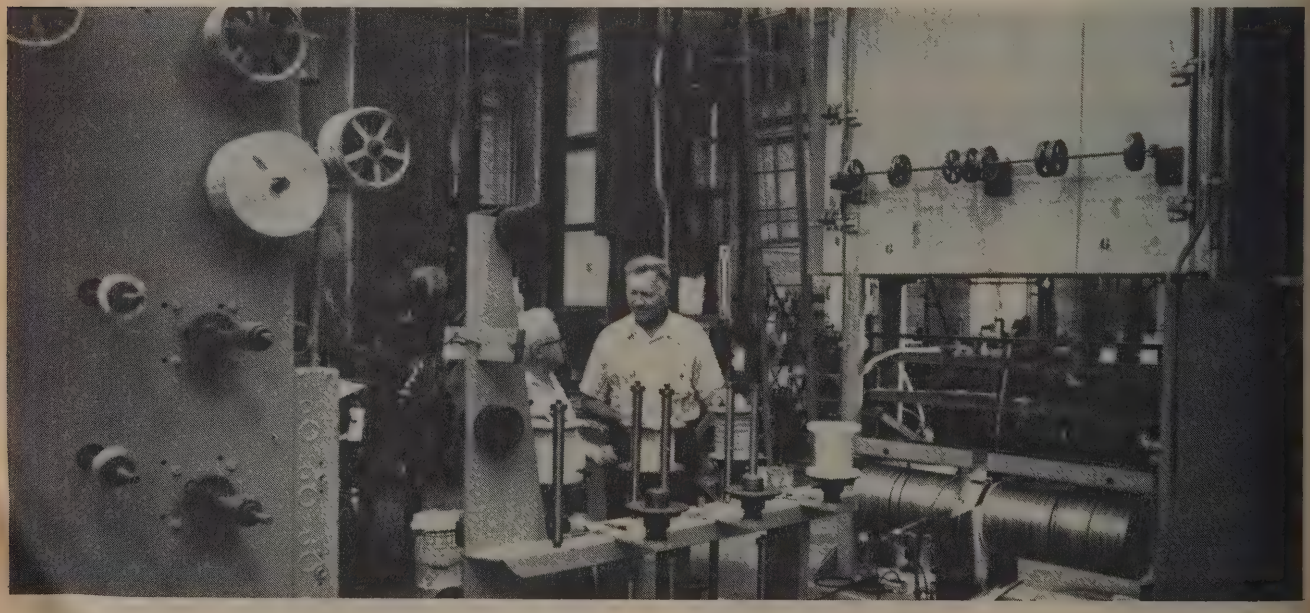
The Unicable Chemex insulation system is a series of thin wall insulated wires exhibiting outstanding mechanical and electrical properties. Its remarkable construction utilized liquid resin applied to the conductor in multiple coats, die wiped and oven cured to solid form.

This original design provides dimensional control and long-length availability which allows the economical operation of automatic solderless wire-wrap machines. It exhibits excellent cut-thru ability on sharp edges of wrap posts and the low-stiffness, low "pop-up" required for high density wiring patterns.

Other outstanding features include diameter tolerance control to well within plus or minus .001 inch and 70% concentricity; temperature rating of 105 degrees C.; dielectric constant not to exceed 3.4; and Oxygen Index ratings in excess of 29%.

This extraordinary wire exhibits no shrink-back on heat exposure of soldering or of high current overload at re-melt temperature of tin. It is available in long lengths on reels, averaging one slice per reel of 20 M ft. There are no limitations on conductor materials.

Unicable Chemex—a wiring system to electrify the industry.



# FIRE ALARM CONTROL CABLES

**INSULATED WITH "TEFLON" FEP**
**600 VOLT — 200°C RATING**

### APPLICATION:

These control cables have been designed for fire alarm and associated control circuits or control apparatus where maximum reliability is required. Typical application of these cables would be, floor warden and fire command control stations, smoke detection, voice communication, supervisory, and all associated systems.

### SPECIFICATIONS

I CONDUCTORS: Solid soft bare copper per ASTM B3. Also available in tin plated copper solid or stranded.

II PRIMARY INSULATION: Extruded Teflon F.E.P. per ASTMD-2116. Minimum insulation wall thickness .018" rated for 600 volt service at 200°C continuous operating temperature and conforming to U.L. approved wire.

### CODING

Individual pairs shall be color coded for easy identification. Coding can also be furnished in accordance with I.P.C.E.A. methods, if desired.

### CABLE LAY-UP

Individual pairs and cable lay are in accordance with standard commercial practice.

### JACKET

The jacket is Teflon F.E.P. .025" minimum wall thickness colored fire department red and is marked Fire Alarm Service at regular intervals for entire length.

### SHIELDING

To meet shielding requirements on individual pairs for voice communication and other applications, a shield consisting of aluminized/mylar plus a solid tin plated copper drain wire shall be applied. A conventional braided shield is also available if desired.

### NOTE:

Additional cable constructions conforming to Class "E" are available upon request.

### NON-SHIELDED CONSTRUCTION

# CATHODIC PROTECTION CABLE

**HIGH MOLECULAR WEIGHT POLYETHYLENE** — Application — Industrial and Utility Plants

Construction — Single conductor, uncoated Copper conductor, Black Polyethylene Uni-Insulation and Jacket 600 Volts IPCEA Specification.

**Halar and High Molecular Weight Polyethylene**

The cable is available in #8 AWG copper conductor with 20 mils of Halar primary insulation and a 40, 50, 60, 70, 80 or 90 mils of H.M.W.P.

Application — Deep well ground beds where chlorine gas from brakish water attacks and deteriorates cable.

| PIW Product Number | Size AWG | Stranding | Insulation Thickness Inches | Approx. O.D. Inches | Approx. Shipping Weight Lbs./M Ft. |

| 370-040-00 | 2 | 7 | 7/64 | .510 | 265 |

PIW's high temperature insulations provide a unique combination of toughness, abrasion and resistance to the chemical reaction of soil corrosives. Whether your system utilizes deep wells or parallel ground beds; no matter what the condition or chemical composition of the soil — PIW's cable is designed to outlast all the other components of your system. These cables are available in 6 and 8 AWG; 7 strand Bare or Tinned Copper, various wall thicknesses. Other sizes available on special request.

* Cathodic Protection Cable also available in various insulations including Tefzel and FEP Teflon. Consult PIW technical staff for further information.

## REQUIREMENTS

1. Dielectric strength
   5,000 volts, rms, minimum.
2. Corona
   1,900 volts, rms, minimum.
3. Attenuation
   9.0 db/100-ft. maximum at 400 mc.
4. Impedance
   50 ±2 ohms.

## CONSTRUCTION DETAILS

**Inner conductor**
Silver-covered copper-covered steel wire. Overall diameter, 0.039 ±0.001 inch.

**Cable core**
Type F-1 Teflon®. Overall diameter, 0.116 ±0.005 inch.

**Outer conductor**
Double braid, AWG size 36 silver-covered copper wire. Overall diameter, 0.171 inch maximum.

**Inner braid**
Carriers ..... 16
Ends ..... 7
Picks/Inch .... 14.5, ±10 percent

**Outer braid**
Carriers ..... 16
Ends ..... 7
Picks/Inch .... 14.5, ±10 percent

**Jacket**
Type IX, Extruded Fluorinated Ethylene Propylene. Overall diameter, 0.195 ±0.005 inch. Minimum wall thickness, 0.012 inch.

### CONDUCTOR TYPE

Type 1 — Silver Covered, Copper Covered, Steel Wire
Type 2 — Silver Covered, Annealed Copper Covered, Steel Wire
Type 3 — Silver Covered, Copper Wire

### INSULATION TYPE

Type F-1 — Solid Polytetrafluoroethylene
Type F-2 — Taped Polytetrafluoroethylene

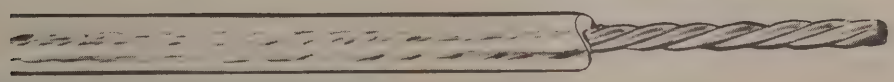
### JACKET TYPE

Type V — Silicone Impregnated Fiberglass
Type VII — Taped Polytetrafluoroethylene
Type IX — Extruded Fluorinated Ethylene Propylene

### POLYTETRAFLUOROETHYLENE DATA

Dielectric Constant* — 2.1 Maximum
Power Factor* — .0005 Maximum
Temperature Range — −70°C to +250°C
* When measured between 50 mc and 100 mc

# PIW AIRCRAFT TEFLON, TFE INSULATION



Wire indicated is normally white that meets all requirements of MIL-STD-104. Other colors must be specified on the purchase order, and when supplied will meet all requirements of MIL-STD-681.

# PIW SHIELDED TEFLON* CABLES

## TEFLON Impregnated Braid/Over Shield

**DESCRIPTION:** Each conductor stranded silver plated copper, Type E extruded .010" TFE Teflon insulation, color coded, cabled braided silver plated copper shield, 90% coverage, braided white fused Teflon impregnated, fiberglass braid overall.

**CHARACTERISTICS:** Temperature rating −65°C to +200°C. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus.

## TEFLON FEP Extruded Jacket/Over Shield

**DESCRIPTION:** Each conductor stranded silver plated copper, Type E extruded TFE insulation color coded, cabled, braided silver plated copper shield 90% coverage, extruded FEP white Teflon jacket overall.

**CHARACTERISTICS:** Temperature rating −65°C to +200°C. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus. Extruded FEP Teflon jacket is tough and abrasion resistant.

## PIW QUALITY CONTROL

Each product manufactured by P.I.W. will meet or exceed all customers' specification, standards of reliability, and quality.

To insure this pledge our quality control system is equipped with the latest test equipment. P.I.W.'s Quality Control Department monitors our production process from raw material to finished product. The Philadelphia Insulated Wire Company, Inc., guarantees its product.

The heart of our production operation is the Quality Control Department. The test and measuring equipment throughout P.I.W. facilities is calibrated to comply with Military Specifications.

Standards and production processes are checked and inspected at every key stage of manufacture.

Together with production control, our laboratory engages in advanced product development and government QPL testing. Every procedure is supervised by carefully trained and experienced technicians and inspectors.

# PIW TEFLON (FEP) CONTROL CABLE

**Teflon (FEP) insulated control cables can be used in steel mills, chemical plants, oil refineries and in other industries where control and signal circuits are exposed to high ambient temperature and corrosive chemical environments.**

**The ability of FEP to operate continuously at temperatures up to 400°F and its resistance to water, oil, grease and most chemicals make this an ideal insulation for applications where severe environmental conditions are encountered.**

TEMPERATURE: Continuous service up to 400°F and for short periods up to 550°F.

ELECTRICAL: Excellent electrical properties, low dielectric constant (2.1), exceptionally high insulation resistance.

CHEMICAL: FEP is resistant to all known chemicals and solvents other than molten alkali metals and fluorine at elevated temperatures. Water absorption — .01%.

NYLON JACKET: Either an extruded nylon jacket or a nylon braid and lacquer can be furnished for abrasion protection. The protection afforded by the nylon is effective up to 300°F for a limited time.

CONSTRUCTION: Conductors: #18.

AWG 19/30 Silver-plated or Tin-plated Copper.

Insulation: Teflon 100 FEP.

Cabling: Individual conductors are concentrically cabled with glass fillers to give a uniformly smooth appearance. A glass tape is applied over the cable core when necessary.

Inner Jacket: Teflon 100 FEP.

Outer Jacket: Will be designed to fit the particular application of this cable. Jackets of extruded nylon or braided nylon and lacquer impregnation can be furnished where abrasion is unusually severe and temperatures encountered are below 300°F. Double glass braids can be furnished where abrasion is not severe and continuous service up to 400°F is needed.

# PIW FIXTURE WIRE "TEFLON" FEP

Applications: Designed for installation in lighting fixtures and in similar equipment where they are enclosed or protected and not subject to bending or twisting in use. They can also be used for connecting lighting fixtures to the conductors of the circuit that supplies the fixtures but are not intended for use as branch circuit conductors.

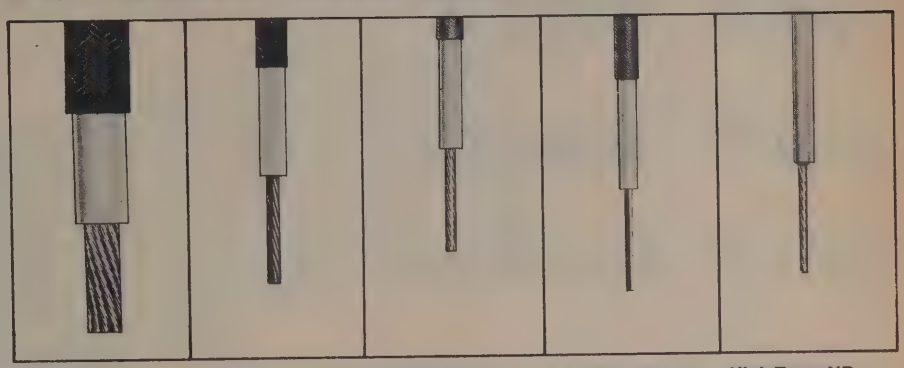
ROWE KNOWS WIRE AND CABLE

# High Temperature silicone rubber wire and cable.

Rowe's silicone rubber insulation offers better performance and longer life than natural rubber or thermoplastic insulation. For example, our high temperature wire and cable is: heat stable to 200°C and flexible to −90°C, unaffected by severe thermal cycling, ultraviolet radiation, ozone or corona, resistant to ageing, moisture and chemicals, highly flame retardant and tough enough for unbraided lead wire.

Choose from a variety of UL listed styles or ask us to design one that meets your special requirements.



**Power cable** for 600 volts +.

**Appliance & fixture wire** for 300 volts +.

**Apparatus & motor lead wire** for 600 volts +.

**Lighting wire** for 600 volt transmission with solid tinned copper conductor, silicone rubber insulation and fiberglass braided covering.

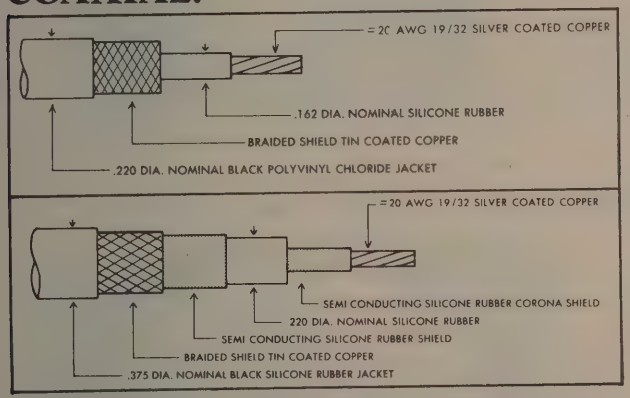
**High Temp NB** especially suited for motor lead wire. No braided covering necessary. Tinned copper, stranded or solid tinned copper conductor.. Silicone rubber insulation in 10 colors.

All the above wire and cable feature tinned copper, stranded conductors, silicone rubber insulation, with fiberglass braided covering.

# Hi-V cable, wire, and interconnections.

Well suited for a variety of industrial and military applications including accelerators, radar, x-ray, ECM and others. Hi-V combines semi-conducting, corona-suppressing layers with thermosetting materials for noise-free, corona-free cable and wire. It is available in single conductor, coaxial and triaxial configurations.

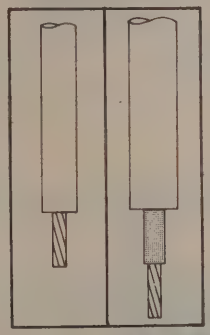
## COAXIAL.



=20 AWG 19/32 SILVER COATED COPPER
.162 DIA. NOMINAL SILICONE RUBBER
BRAIDED SHIELD TIN COATED COPPER
.220 DIA. NOMINAL BLACK POLYVINYL CHLORIDE JACKET
=20 AWG 19/32 SILVER COATED COPPER
SEMI CONDUCTING SILICONE RUBBER CORONA SHIELD
220 DIA. NOMINAL SILICONE RUBBER
SEMI CONDUCTING SILICONE RUBBER SHIELD
BRAIDED SHIELD TIN COATED COPPER
.375 DIA. NOMINAL BLACK SILICONE RUBBER JACKET

Features: 5-100KV minimum voltage ratings, 8-22 AWG corona-free and ozone resistant, 80°C to 200°C operating temperature range. Excellent for high pulse applications and for use with Rowe high voltage miniature coaxial connector series, G series connectors, Hi-pulse 40KV series and Rowe R75 connector series. All exhibit good corona-free RFI-EMI capabilities and have excellent flexibility properties.

## SINGLE CONDUCTOR, UNSHIELDED.



Features: 5-60 KVDC minimum voltage ratings, 10-20 AWG corona-free, ozone-resistant material, 200°C operating temperature, excellent flexibility at high and low temperatures.

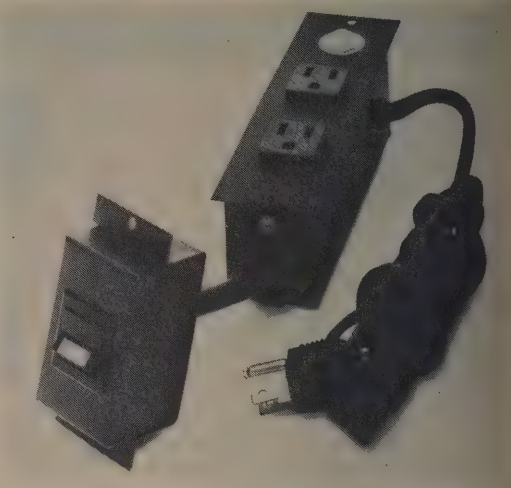
# SGL WABER® Multiple Electrical Outlet Strips

## call it "OEM"
## call it "Special"
## call it "Custom"
## it doesn't matter!



▲ We'll design exactly what you need or ... choose from our extensive stock ▼

What does matter is that we can make that "OEM" . . . "custom" . . . or "special" electrical outlet strip do exactly what you want it to do and go exactly where you want it to go. We've been doing it for years for others. We can do it for you.

If a particular model in our regular line of outlet strips fills the bill . . . fine. We have over 240 stock items from which to choose, and they are readily available from your local electronic distributor. (Check yellow section of eem.)

But there are times when off-the-shelf won't do, and your need is for a unique electrical outlet strip that doesn't exist. That's OK. Tell us about it, and we'll make it exist.

Just call us and tell us what you need. Give us the specifications and we'll design an electrical outlet strip exactly as you want it . . . at no cost to you. Call us today.

**You get these advantages:**

- **Finest quality . . . safety tested**
- **355 models Listed with UL (110 models are stock items)**
- **Meets electrical codes and OSHA standards**
- **20 years of multiple outlet strip design experience**

**SEND FOR FREE 24 PAGE CATALOG SHOWING OVER 240 MULTIPLE OUTLET STRIPS**

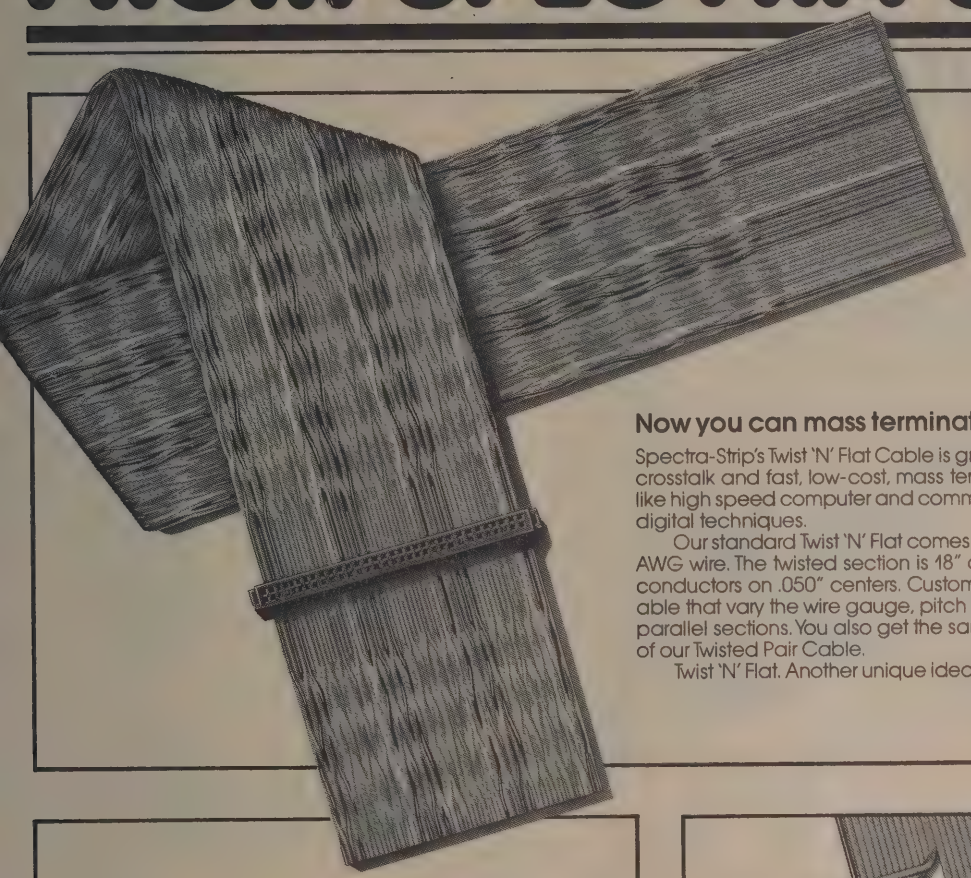
# CABLEGRAMS FROM SPECTRA·STRIP.



## Now you can mass terminate twisted pair cables.

Spectra-Strip's Twist 'N' Flat Cable is great when you need reduced crosstalk and fast, low-cost, mass termination. In applications like high speed computer and communication equipment using digital techniques.

Our standard Twist 'N' Flat comes with 26 solid or 28 stranded AWG wire. The twisted section is 18" and parallel section is 2" with conductors on .050" centers. Custom configurations are available that vary the wire gauge, pitch and length of the twisted and parallel sections. You also get the same crosstalk characteristics of our Twisted Pair Cable.

Twist 'N' Flat. Another unique idea patented by Spectra-Strip.

## At Spectra-Strip, we'll give you the right connection.

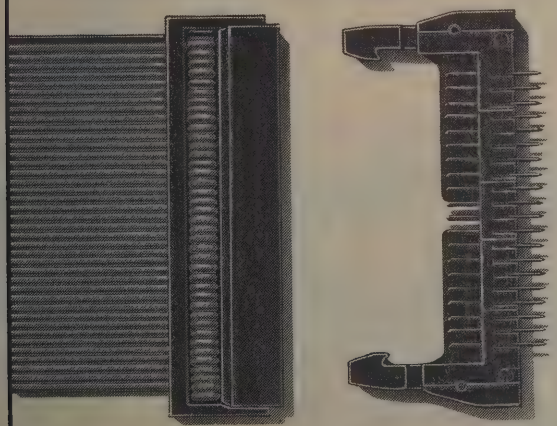
We also make a lot more than ribbon cables.

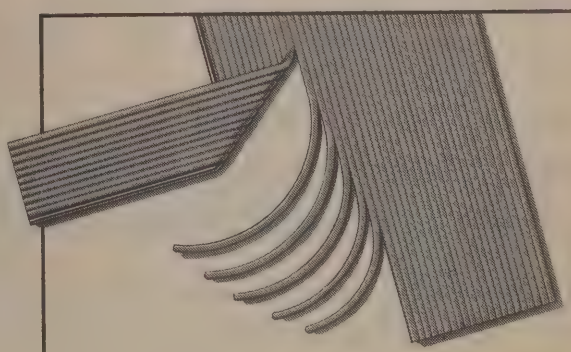
We make a wide range of IDC connectors, headers, and other ribbon cable connectors. Complete planar systems, including standard interconnects and custom assemblies, are our specialty.

Our experience in cable design, development and assembly lets us give you a wider range of planar systems than anyone. In fact, you could call us generalists in an industry full of specialists.

Nobody has a greater variety of ribbon cables and connectors than we do. Nobody.

And we intend to keep it that way.





## Spectra-Zip gives you mass termination. And fast, easy breakouts.

For general purpose interconnection from calculators to computers, Spectra-Zip Laminated Planar Cable offers you economy. Reliable performance. Weight and space savings. Controlled electrical characteristics. And low-cost termination.

Spectra-Zip's convenient double contour feature lets you assemble IDC connectors on either cable surface. And assures you of easy, uniform breakouts.

Every time.

# TRW HOLYOKE WIRE & CABLE

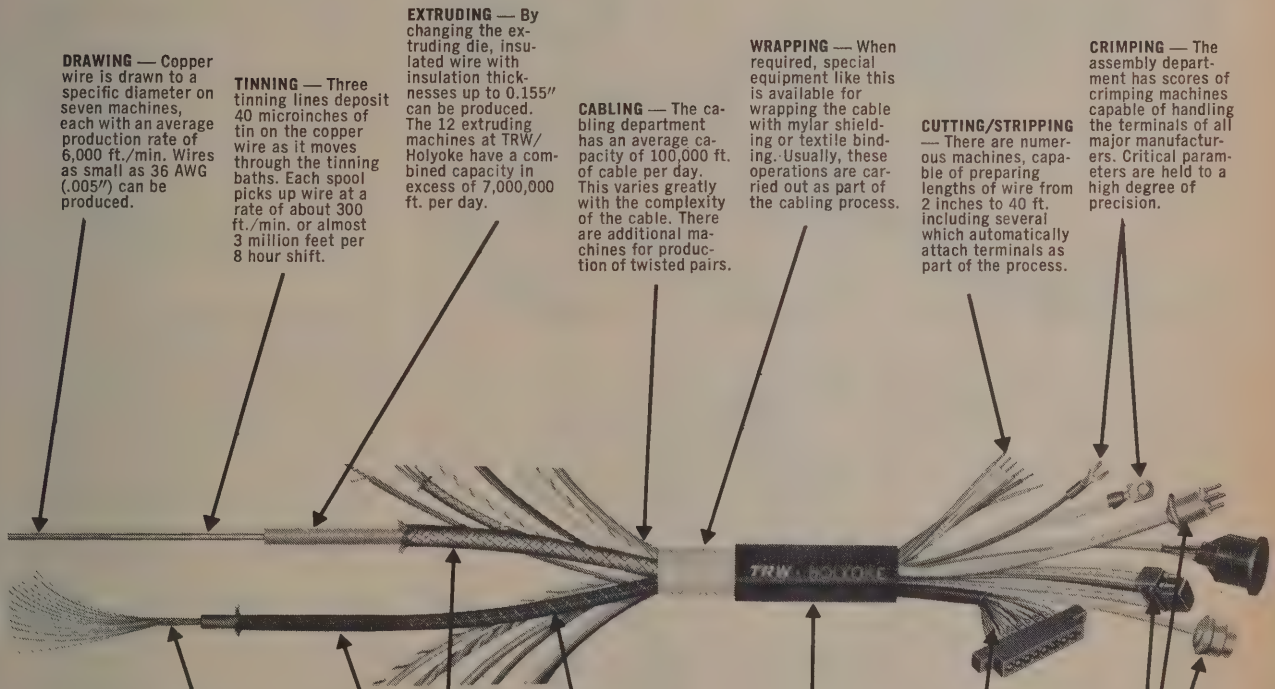
## TOTAL CAPABILITY IN PRECISION CABLE ASSEMBLIES

At TRW/Holyoke Wire and Cable, "total capability" in the manufacture of precision cable assemblies and harnesses is a blend of complete facilities, advanced technology, and wide experience.

Every manufacturing step — from the drawing of individual copper wires to the attaching of hardware and molding of the connector — is performed internally to achieve maximum cost effectiveness and control of product quality.

Through its complete in-house wire and cable manufacturing facilities, TRW/Holyoke is equipped to fabricate any cable assembly or harness, regardless of its complexity.

Laced or textile braided assemblies, with shielded breakouts and solder or crimp attachment of any single or multiple termination can be supplied. Dies for molded connector assemblies are designed and built internally for a wide range of molding materials.



**DRAWING** — Copper wire is drawn to a specific diameter on seven machines, each with an average production rate of 6,000 ft./min. Wires as small as 36 AWG (.005″) can be produced.

**TINNING** — Three tinning lines deposit 40 microinches of tin on the copper wire as it moves through the tinning baths. Each spool picks up wire at a rate of about 300 ft./min. or almost 3 million feet per 8 hour shift.

**EXTRUDING** — By changing the extruding die, insulated wire with insulation thicknesses up to 0.155″ can be produced. The 12 extruding machines at TRW/Holyoke have a combined capacity in excess of 7,000,000 ft. per day.

**CABLING** — The cabling department has an average capacity of 100,000 ft. of cable per day. This varies greatly with the complexity of the cable. There are additional machines for production of twisted pairs.

**WRAPPING** — When required, special equipment like this is available for wrapping the cable with mylar shielding or textile binding. Usually, these operations are carried out as part of the cabling process.

**CUTTING/STRIPPING** — There are numerous machines, capable of preparing lengths of wire from 2 inches to 40 ft. including several which automatically attach terminals as part of the process.

**CRIMPING** — The assembly department has scores of crimping machines capable of handling the terminals of all major manufacturers. Critical parameters are held to a high degree of precision.

**STRANDING** — Depending upon the length of the twist or "lay" as well as the diameter of the wire, these 36 machines each produce stranded wire at a rate of 50-100 ft./min., utilizing the total output of the tinning lines.

**BRAIDING** — The braiding room contains over 400 machines, including "butt" braiders which produce "breakout" textile cables of the type shown on cable assembly page. Capacity is in excess of 2,000,000 ft. per day.

**LACQUERING** — This department can easily match the total capacity of the braiding room. A number of lacquer and saturant formulations are used to impart anti-fray, flame-retardant, moisture and fungus resistant properties.

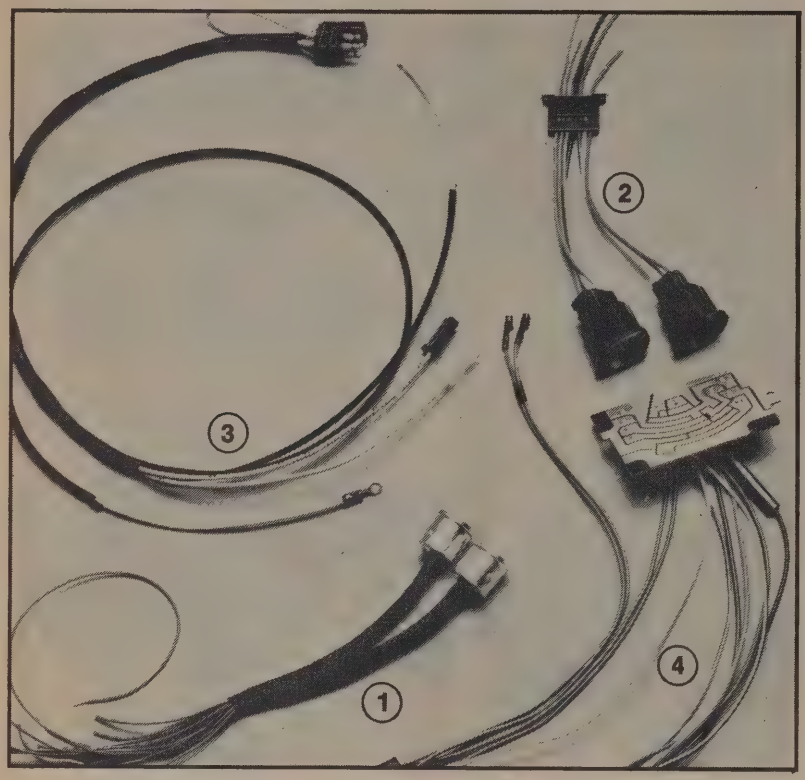
**JACKETING** — Jacketing of cables is accomplished on the extruding machines with the use of appropriately designed extruding dies and adjustment of temperatures, cooling profile, line speed, etc.

**SOLDERING** — Over 4,000 sq. ft., with numerous production lines is devoted to soldering in the assembly area. Internally designed jigs and tools are used to obtain maximum production rates.

**MOLDING** — Fifteen automatic machines, whose output varies with the size and complexity of the part are now in operation. Electrical testing is conducted at the machine as the part is completed.

**TRW/HOLYOKE WIRE & CABLE, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 775 NEW LUDLOW RD. / SOUTH HADLEY, MA 01075**

# TRW HOLYOKE WIRE & CABLE



## CABLE ASSEMBLIES

Automotive cable assemblies produced by TRW/Holyoke cover the range from low voltage, low current semiconductor circuit devices to high power, high reliability types — all with the appropriate environmental terminations and connectors.

**1.** Passenger car rear seat control cable assembly incorporating Y-shaped "break-put" nylon braiding to two solder-terminated female connectors.

**2.** Dual connector electronic ignition cable assembly with molded grommet and molded-in blade contacts in pull-apart insulator shells.

**3.** Semi-trailer refrigeration system nylon braided cable assembly, for high reliability control application. Coded aircraft type connectors, terminated with pre-insulated crimped terminals and molded automotive type plug.

**4.** Automobile climate control cable assembly with crimp insertable contacts in male plugs and crimp contacts riveted to a printed circuit board switch panel.

TRW/Holyoke's most complex assemblies are those supplied to the computer industry. The combining of many type of conductors, terminals and connectors in a single harness is not uncommon. TRW/Holyoke can incorporate special PC boards or connectors provided by the customer, or will purchase these for the customer, in addition to producing any special molding dies that may be required.

Complete testing facilities are available — no matter how complex the harness assembly.

**1.** Thirty conductor cable assembly with four molded tapehead connectors, 50 position edge connector and miscellaneous wire terminations.

**2.** Thirty-two conductor cable using unique braiding technique that allows shielding the entire length of each breakout section. Continuous nylon braid to end of breakout combines minimum cable diameter with high flexibility.

**3.** Fifteen crimp-insertable terminations (4 twisted pairs, 7 single) in nylon plug and PC connector assembly.

**4.** Sixty-six conductor harness assembly with four crimp insertable terminal edge connectors, crimp plug and miscellaneous terminals.

**TRW/HOLYOKE WIRE & CABLE, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 775 NEW LUDLOW RD. / SOUTH HADLEY, MA 01075**

# TRW HOLYOKE WIRE & CABLE

## WIRE & CABLE

The manufacture of single-insulated conductors is a highly technical process that requires precision control of a variety of production parameters, including temperature, wire diameter, die size, and production rate.

Establishment of these parameters is the result of an intimate knowledge of equipment capabilities and material characteristics. At TRW/Holyoke this knowledge is based on over sixty years of experience.

Critical requirements, such as low cross talk levels in telecommunication and EDP cables, minimum impedance discontinuities in RF cables, and enhanced flame retardancy in home entertainment wires and wiring devices, are regularly engineered into products. The requirements of Underwriters' Laboratories fulfilled through design engineering.

Any combination of single wires, twisted pairs, and coaxial cable, in any number, with necessary fillers and bindings can be incorporated into a cable. The only limitation is that the cable diameter not exceed 1.75″; flat braided (woven) cable, up to 0.5″ width. Flat rainbow (ribbon) cable is available with 2 to 43 parallel conductors.

### Manufacturing Options

**Conductors**

Copper, copper covered steel, cadmium bronze, phosphor bronze, precious metal alloys.
10 through 30 AWG
Solid or Stranded or Tinsel
Stranding from 7 to 500 strands
Bare or Tinned
Topcoat, Overcoat, Heavy Tinned — fused

**Insulations**

Polyethylene
Kynar***
Polypropylene
Polyurethane
Polyvinyl Chloride (PVC)
Silicone Rubber
FEP Teflon**
Nylon
Tefzel**

Insulation wall thickness from .002″ to .155″

**Textile Braids**

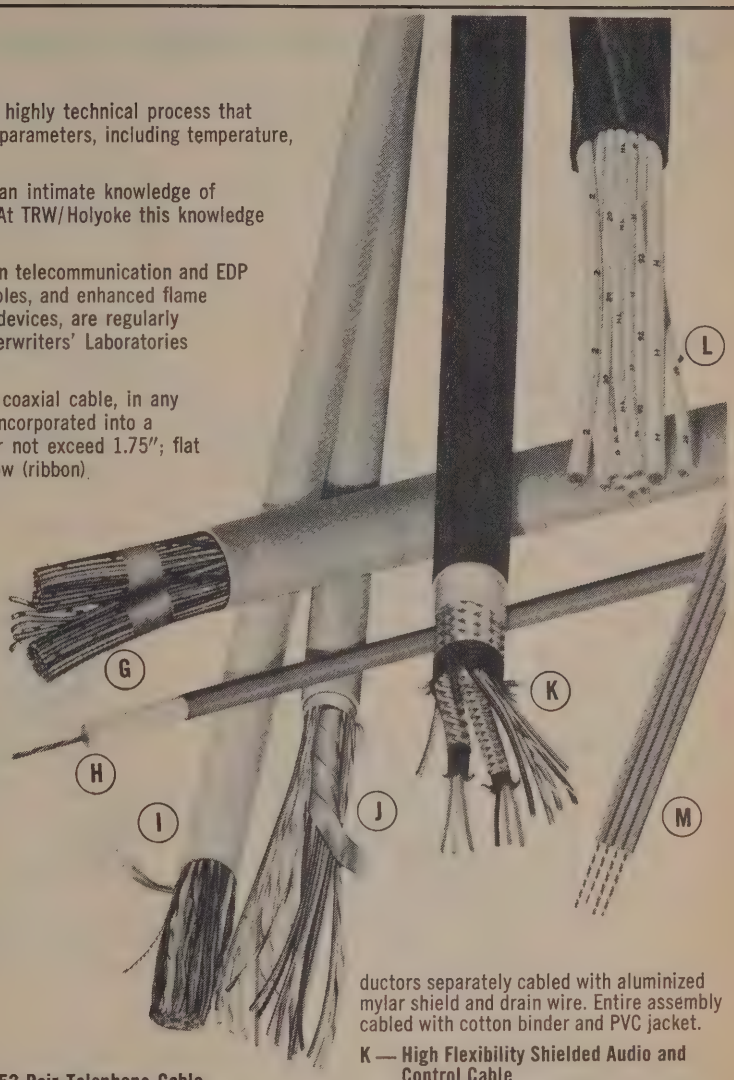
Celanese*
Cotton
Dacron**
Glass
Nylon
Orlon**
Rayon

. . . with or without lacquer

**Shieldings**

Conductive Vinyl
Aluminized Mylar**
Spiral Wrapped and Braided Copper

***Pennwalt Corp. T.M.
**DuPont T.M.
*Celanese Corp. T.M.



**G — 52 Pair Telephone Cable**

Semi-rigid thin wall insulated #24AWG solid conductors with band marked color coding. Conductors paired with programmed lay for minimum cross-talk. Assembled into 25 pair units with coding binders and four spare conductors, with flexible PVC sheath overall. Overall diameter .625″. Rated at 80°C.

**H — High Voltage Lead Wire**

Tinned copper conductors, solid or stranded, covered with flame retardant high dielectric strength insulation with 105°C. PVC jacket. Construction is designated as UL style #3239 and can be provided in a variety of conductors and voltage ratings to 40 KV.

**I — Telephone Distribution Cable**

25 pairs #24AWG solid conductors with thin wall semi-rigid insulation, spiral stripe coded. Pairs cabled with flexible bunch lay. PVC sheath extruded overall with nylon ripcord under sheath. O.C. is 0.375″.

**J — Mini Computer Memory Bank Cable**

36 conductors with flexible stranding, PVC insulation and spiral stripe coding. 12 conductors separately cabled with aluminized mylar shield and drain wire. Entire assembly cabled with cotton binder and PVC jacket.

**K — High Flexibility Shielded Audio and Control Cable**

Cable core of seven #24AWG PVC insulated single conductors and two triple conductor cables of #24AWG stranded conductors PVC insulated with color coded textile braiding. These three conductors are then nylon braided as a unit and copper-braid shielded. The entire cable core is nylon braided and copper shielded with a PVC jacket overall.

**L — Power and Control Cable**

Nine #18AWG and two #12AWG stranded conductors insulated with 105°C. thermoplastic, then covered with lacquered glass braid and extruded nylon. Cabled with extruded thermoplastic jacket overall. Rated 600 volts, −55°C to +105°C. For on-the-road tractor-trailer interconnection.

**M — Environmental Resistant Flat Cable**

Four stranded conductors simultaneously insulated with high performance extruded silicone rubber compound to form an extremely flexible high reliability cable for military applications. Rated at 300V., −100°C. to +200°C., moisture, fungus and radiation resistant.

TRW/HOLYOKE WIRE & CABLE, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 775 NEW LUDLOW RD. / SOUTH HADLEY, MA 01075

# TRW HOLYOKE WIRE & CABLE

## SERIES 8000, 8001 FLAT CABLE

### FEATURES:

- Efficient, Economical, Reliable Packaging Technique:
  - Up to 50 terminations in one staking operation
  - Wiring errors are eliminated
  - Low profile for space and weight reduction
- Easy to separate conductor groupings for breakouts
- Flexible and rugged—easily folded or bent for efficient installation
- Constant electrical characteristics

### SPECIFICATIONS

| | 8000 | 8001 |

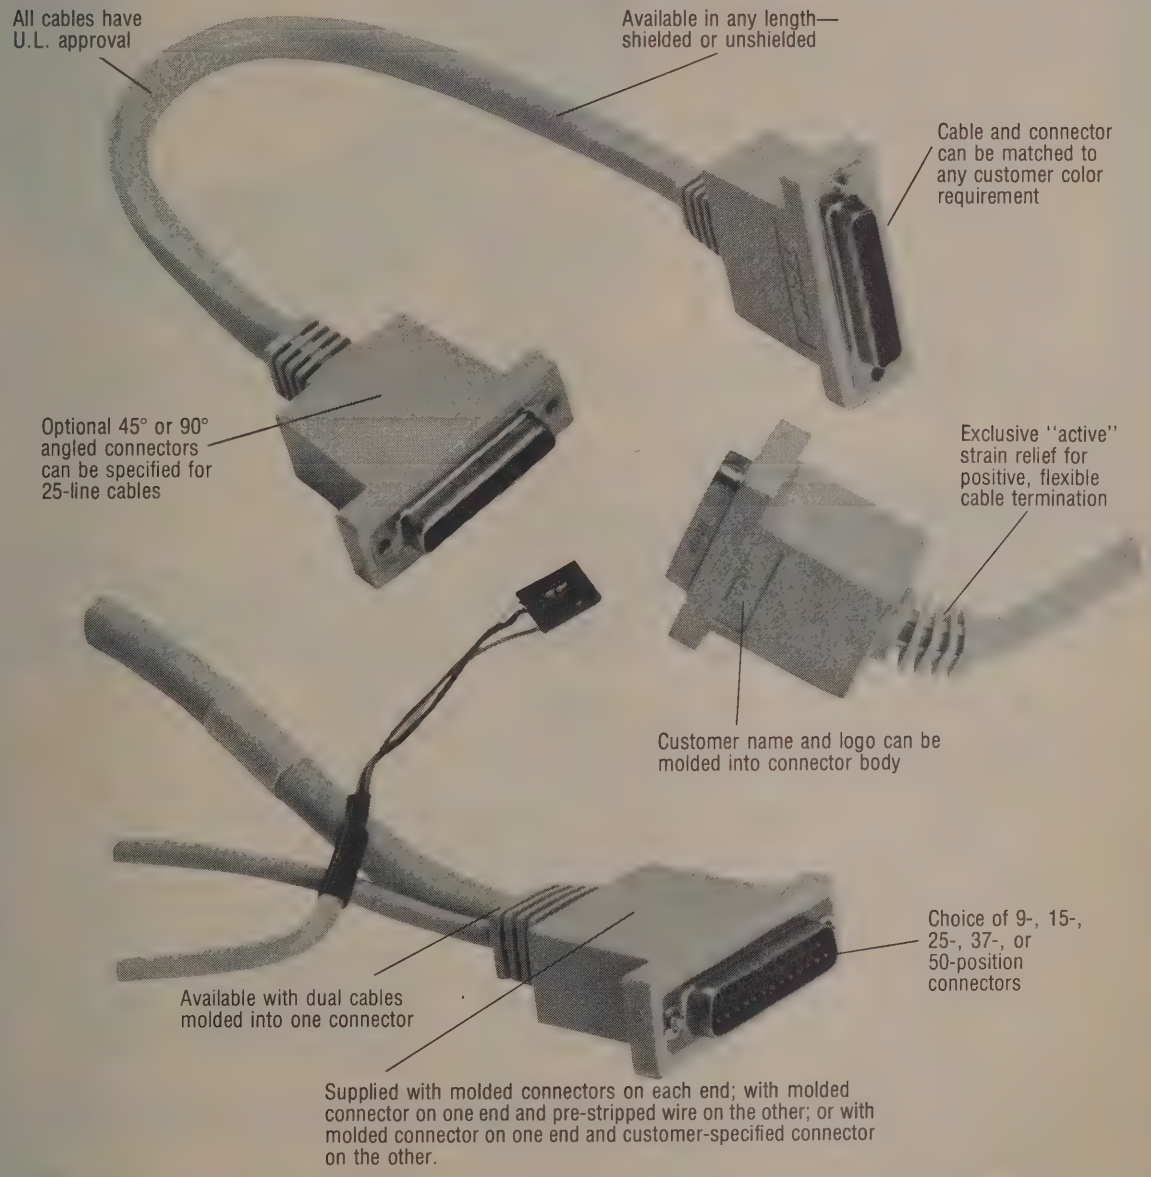
# TRW HOLYOKE WIRE & CABLE

## MOLDED D-SUBMINIATURE CABLE ASSEMBLIES

Durable, high-reliability TRW Holyoke D-subminiature cables—with molded external covering and active strain relief—withstand substantial abuse, because nothing can come loose or require adjustment.

All 25-position cable assemblies fulfill the requirements of EIA Specification RS232, while 9- and 37-position assemblies meet EIA Specification RS449.



All cables have U.L. approval
Available in any length—shielded or unshielded
Cable and connector can be matched to any customer color requirement
Optional 45° or 90° angled connectors can be specified for 25-line cables
Exclusive "active" strain relief for positive, flexible cable termination
Customer name and logo can be molded into connector body
Choice of 9-, 15-, 25-, 37-, or 50-position connectors
Available with dual cables molded into one connector
Supplied with molded connectors on each end; with molded connector on one end and pre-stripped wire on the other; or with molded connector on one end and customer-specified connector on the other.

In addition to the D-type connectors shown above, cables can be molded with MIL-specified circular, coaxial or card-edge connectors. Special connectors and strain reliefs can be designed for applications where standard connectors will not fit, and custom pin configurations can be developed to meet specific customer requirements.

These cables are ideal for user-pluggable equipment such as point-of-sale devices, dictation machines, industrial programmers, medical instruments, computer peripheral gear and TV games.

## METHODS DESIGNED FOR BETTER QUALITY AND BETTER SERVICE

An important feature in maintaining the quality of our products is our ability to design and construct the tools necessary to do the job. We guarantee continuous performance of equipment & continuity of production.

The exacting specifications of Whitmor's space-age customers require a stringent quality assurance program. Our Q.C. meets Mil-Q-9858 & Mil-I-45208 with modifications required by customers. The same quality consciousness is applied to commercial work. We guarantee trouble free cable and wire!

**NEW! THERMOPLASTIC RUBBER JACKETS AVAILABLE.**

## Whitmor has what it takes to build cables for tough jobs!

20,000 square feet housing modern, high speed equipment makes it possible to fill orders on a 24 hour basis, if required.

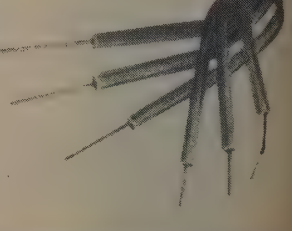
*Designate jacketing desired as follows: V=vinyl X=Dur-X-thane P=polyethylene N=neoprene - Mil-S-6855 - Class 2 - Grade 60
EXAMPLE: W-1827P=Cable w/27 conductors, 18 gauge wire, w/polyethylene jacketing. **Add "S" to PART NO. for Shielded cable.
Other constructions available on request using 1/32" PVC insulation (3000 V, Military Type D); (600 V, Style 1015 U.L. Commercial)

## TECHNICAL DATA

Whitmor Wire and Cable Corporation manufactures a complete line of multiple conductor control cables. All conductors are Type C per MIL-W-16878, insulated for 1000 V and 105° C. Conductors are color coded per MIL-STD 681. All conductors are planetary cabled and contra-helically laid with Mylar tape over the cable bundle.

® Dur-X-thane is Whitmor's Registered T.M. for extruded Polyurethane.

**SHIELDED CABLES:** Same specifications as above with additions of tinned copper braided shield over cable complex with 85%-95% coverage to MIL-C-7078A, cables shipped on non-returnable reels.



WHITMOR WIRE AND CABLE CORPORATION

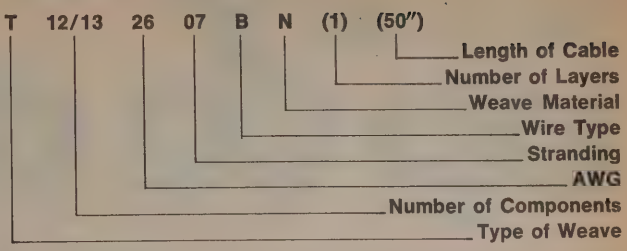
# WOVEN CABLE

**JACKETS AND SHIELDING**
Shielding and extruded jackets for heavy-duty protection.

**CUT AND FOLD LINES**
Woven-in channels for folding and/or cutting. Cut line provides most rapid lead separation technique. Multiple fold lines allow compaction of broad cable to stacked fold for smaller openings, etc.

**ULTRA-FLEXIBLE CABLES**
Withstand continuous flexing without delamination while retaining insulation continuity.

## ORDERING WOVEN CABLE



Six basic characteristics of woven cable are indicated by this numbering code.

**Type of Weave**

- **S** — Standard Weave (Plain and box weave)
- **T** — Twill Weave
- **SpT** — Stack Weave. Number in parenthesis at end of order number designates number of layers.
- **A** — Accordion Fold
- **PS** — Programmed Standard
- **HS** — Woven Harness
- **CIC** — Matched Impedance
- **C** — Covered Cable

**Number of Components.** Fold lines are indicated by /, between the number of components desired on each side of the fold line. More than one fold line may be indicated in this manner: 12/13/26/12. TP following number of components indicates they are Twisted Pairs. TT are Triads.

**AWG.** Size of wire — 22, 24, 26, 30 etc.

**Stranding.** Number of strands required to make up the AWG size.

**Wire Type.** Using letters from MIL-W-16878D, such as Type B, C, E, ET, EE. Or at this point show UL style of wire required — UL-1007, UL-1061, etc.

**Weave Material.** Most commonly specified: N-Nylon NX-Nomex D-Dacron Pp-Polypropylene G-Glass.

**Number of Layers.** When ordering stack-weave cable, number of layers into which designated components are to be formed should be shown in parentheses at the end of the numbering code.

**Length of Cable.** When ordering programmed cable (PS, HS, CIC), show length in inches, in parentheses, at end of numbering code.

**Special Requirements.** For special requirements, drawings and detailed notes may be used. Dimensional drawings are necessary for all harnesses, accordion fold units and programmed lead units, as well as wire run list and bill of materials.

If a special array of conductors is needed, list and number each conductor. Indicate colors required. If using standard NEMA color code and repeat, simply note — "NEMA and repeat."

# eem FILE SYSTEM

## THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

**Here's how to order your eem FILE SYSTEM:**

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

# CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
# DER PRODUKTKATALOG FÜR ELEKTRONIKER
# ELECTRONIC ENGINEERS CATALOGUE

**The 1978 edition is out...and the response is in...**
**IMMEDIATE AND OVERWHELMING**

**ACCEPTANCE**

The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to—and from—Western Europe.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 product headings & cross-references alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

**IC MASTER**

645 Stewart Avenue, Garden City, NY 11530
U.S.A.

**"I need to know if this device exists, and if there are any alternate sources. Where do I start?"**

- Memory IC
- RAM
- Static
- 1024x1
- CMOS
- 250 Nanoseconds
- 5 Volts

# If you're spending hours to solve a problem similar to the one above, you're behind the times...

# It only takes a few seconds with "THE MASTER."

**Clear your desk for action with the newly revised 1978 IC Master.** Its all-under-one-cover features include: Over 40,000 standard products from more than 87 different companies . . . over 2,200 pages comprising five different selection guides (memory, microprocessor, interface, linear and digital) . . . almost 1500 design data pages . . . alternate source directory for pin-for-pin, function-for-function replacements . . . applications directory . . . complete military section . . . a complete part numbering guide . . . etc.

**You don't have to search through stacks of catalogs.** Simply look up the specs and function you need. You don't need a part number to start with.

**All you need is a problem to use The Master.** Does the device exist? Who makes it? Is there an alternate source? What's the part number? Is there an applications note? Who is my closest distributor—etc.

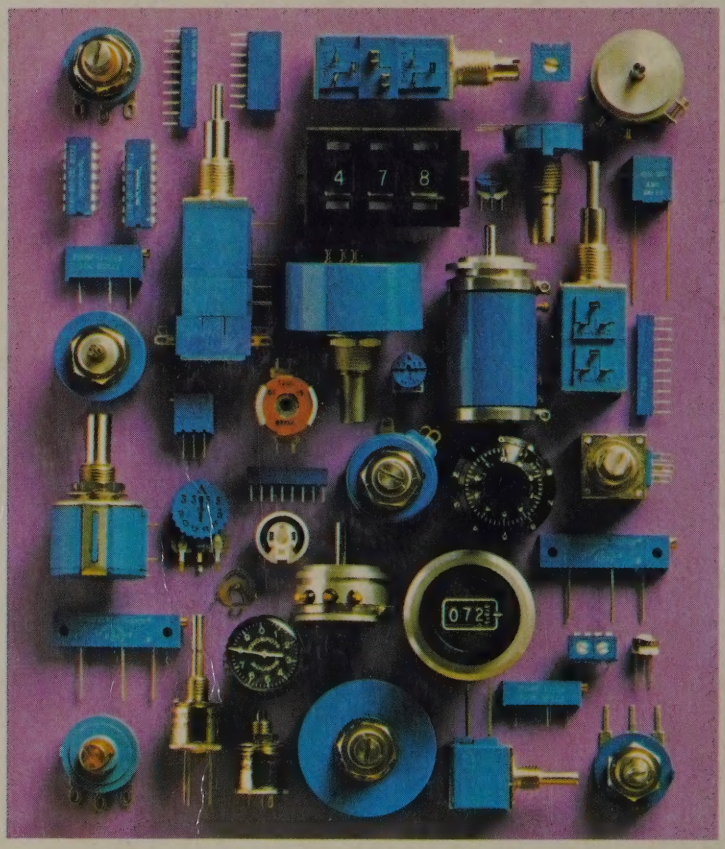
# The Big Choice in Resistive and Inductive Components



## You'll find it on these EEM pages:

**Resistive Components**

Dials, Turns Counting ..... 3858-3862

Potentiometers:

- High Precisions ..... 3863-3871
- Modulars ..... 3832-3842
- Panel Controls ..... 3829-3831
- Precisions ..... 3843-3857

Resistor Networks ..... 3639-3645

Trimmers ..... 3802-3828

Trimmers, Multi Function ..... 3791-3801

**Inductive Components**

Delay Lines ..... 2383

Inductors, Ferrite Core ..... 1324-1327

Transformers ..... 4331-4336

Sales Offices and Distributors: EEM Yellow Pages

For Quotation or Order Placement: Resistive Components 714 781-5050; Inductive Components 714 657-5195
